Sumner said that the ARRL's concern was not with the business plan -- that he termed "obviously flawed" -- but with "the interference to licensed radio services -- and in particular the Amateur Radio Service -- inevitably caused by putting radio frequency energy on unshielded, unbalanced conductors. Manassas was touted as 'the most successful BPL deployment in the nation' when FCC Chairman Michael Powell visited the site with much fanfare -- and, the ARRL maintains, in violation of the FCC's own rules -- on the eve of the FCC's vote to adopt inadequate protection for licensed radio services against interference from BPL systems. The taxpayers and ratepayers of Manassas are not the only ones who benefit from the end of this ill-considered foray into BPL. Radio amateurs in the Manassas area have good reason to celebrate, for they

have spent countless hours documenting the widespread interference caused by the system."

BPL technology uses the electricity grid in a city and the wiring in individual homes to provide direct "plug in" broadband access through electricity sockets, rather than over phone or cable TV lines. Because BPL wiring is physically large, is often overhead and extends across entire communities, these systems pose a significant interference potential to over-the-air radio services, including Amateur Radio.

==> FCC NEWS: ARRL RESPONDS TO FCC'S NPRM CALLING FOR NEW RULES ON VANITY AND CLUB CALL SIGNS

In November 2009, the FCC issued a Notice of Proposed Rule Making (NPRM) -- WT Docket No 09-209 -- seeking to amend the Commission's Amateur Radio Service rules in an attempt to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations. In March, the ARRL submitted comments and additional proposals to the FCC to update the Amateur Service's call sign assignment system and provide for continued growth of the Amateur Radio Service, as well as enhance the pride and satisfaction of licensees in their personal achievements in the radio art. The ARRL's positions were developed by the Executive Committee at its March 13 meeting. Read more here <http://www.arrl.org/news/stories/2010/04/07/11423/?nc=1>.

==> FCC NEWS: ARRL FILES COMMENTS IN RESPONSE TO HOSPITAL ASSOCIATION SEEKING BLANKET WAIVER REQUEST FOR AMATEUR RADIO DRILLS

In February 2010, the American Hospital Association (AHA) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 -- asking whether the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored."

Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." On April 2, the ARRL filed comments regarding the blanket waiver request. Read more here <http://www.arrl.org/news/stories/2010/04/07/11425/?nc=1>.

==> FCC NEWS: ARRL FILES PETITION FOR RECONSIDERATION OVER WAIVER FOR NON-AMATEUR DEVICE IN 70 CM BAND

In January 2008, a company called ReconRobotics filed a request with the FCC for a waiver of Part 90 of the Commission's Rules with respect

to the Recon Scout -- a remote-controlled, maneuverable surveillance robot designed for use in areas that may be too hazardous for human entry. A waiver is required to permit licensing of the Recon Scout because the device operates in the 430-448 MHz band, which is allocated to the Federal Government Radiolocation service on a primary basis, as well as the Amateur Radio Service and certain non-federal radiolocation systems on a secondary basis. More than two years later, the FCC granted the waiver request in the form of an Order (WP Docket No 08-63), subject to certain conditions. The ARRL had opposed the waiver on the grounds that the device has a significant potential to interfere with amateur stations and that the company is simply trying to avoid redesigning for the domestic market a device that was designed for military use overseas, and as such, filed a Petition of Reconsideration with the FCC in late March. Read more here <http://www.arrl.org/news/stories/2010/04/06/11422/?nc=1>.

==> PUBLIC SERVICE: TELEPHONE OUTAGE IN NEBRASKA WAS NO APRIL FOOL'S JOKE

Early on the morning of April 1, almost 40,000 people in Southeastern Nebraska -- including the City of Lincoln's government, business and emergency centers -- found that they had no landline telephone service, as well as spotty cell phone coverage, thanks to an equipment malfunction at a Lincoln switching facility owned by Windstream Communications. According to news reports, residents of 12 counties were unable to contact 911 and dispatch centers had rely on other communications services -- including Amateur Radio. Read more here <http://www.arrl.org/news/stories/2010/04/05/11421/?nc=1>.

==> ON THE AIR: THE FIRST ROOKIE ROUNDUP -- COMING APRIL 18!

The ARRL's newest contest -- the Rookie Roundup -- is getting a lot of buzz among newly-licensed amateurs. Designed as a modern equivalent to the ARRL Novice Roundup from a few decades ago, this new incarnation combines a competitive event with some on-the-air training. The first Rookie Roundup is scheduled for April 18 and will be an SSB contest. The Rookie Roundup is six hours of fun on a Sunday afternoon that is designed to give new hams a chance to get their feet wet on HF and 6 meters. Old-timers are encouraged to get on the air and work the Rookies, just as in they did in the Novice Roundups. The six hour event -- from 1800 UTC-2359 UTC -- will be held on the third Sunday of April, August, and December. SSB, RTTY, and CW will be featured in the different months. Read more here <http://www.arrl.org/news/stories/2010/04/08/11426/?nc=1>.

==> COMING UP IN QST : CHECK OUT WHAT'S IN THE MAY ISSUE

The May issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a breakdown of the Second ARRL Homebrew Challenge -- the upcoming issue of QST has something for just about everyone. You'll find an abundance of technical and general interest

articles, as well as monthly columns such as Happenings, How's DX, Hamspeak, Vintage Radio and more. Click here <http://www.arrl.org/news/stories/2010/04/07/11424/?nc=1> to discover what's in store for you in the May issue of QST, the official journal of the ARRL.

==> ON THE AIR: MOONBOUNCE FOR EVERYONE -- COURTESY OF THE ARECIBO RADIO TELESCOPE!

Sending Amateur Radio signals to the Moon and back has never been easy. After roundtrip journeys of nearly half a million miles, even the most powerful signals generated by hams are exquisitely weak on arrival. Because of the equipment and expertise necessary for successful "moonbounce" operating, this facet of Amateur Radio generally has been confined to a small audience. But for three days in April even hams with very modest stations will have the opportunity to experience the thrill of moonbounce, thanks to the giant radio telescope at the Arecibo Observatory in Puerto Rico. Read more here <http://www.arrl.org/news/stories/2010/04/07/11420/?nc=1>.

==> SOLAR UPDATE

Tad "Pay no worship to the garish Sun <http://shakespeare.mit.edu/romeo_juliet/romeo_juliet.3.2.html>" Cook, K7RA, reports: A strong solar wind blasted us on Monday and Tuesday, causing the biggest geomagnetic storm since 2006. On those days, the mid-latitude A index was 28 and 22 and the planetary A index was 49 and 46. A search for similar numbers over the past few years yields nothing. In 2009, the highest planetary A index was 19 on August 30, and in 2008 it was 37 on October 11. This is indicative of how quiet space weather has become in the past few years. In 2007, the planetary A index reached 30 on April 1, and we have to go back to 2006 to find any geomagnetic activity as strong, when the planetary A index reached 63 and 104 on December 14-15. It seems counter-intuitive, but average daily sunspot numbers rose by 3.5 points this week to 32.4, while the average daily solar flux dropped more than 7 points to 77.8. NOAA and USAF predict solar flux at 76 for April 8-9, 75 on April 10-14 and a jump to 80 on April 15. The same forecast predicts planetary A index settling down to 15, 8, and 5 for April 8-10. For some reason, despite the high geomagnetic activity, no reports have come in from 6 meter operators about auroral propagation. Perhaps we will hear from them before Friday when this week's bulletin is released. Look for more information on the ARRL Web site on Friday, April 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Shakespeare's Romeo and Juliet <http://shakespeare.mit.edu/romeo_juliet/romeo_juliet.3.2.html> (Act III, Scene 2).

==> ARRL PUBLICATIONS: NEW EDITIONS OF THE ARRL HAM RADIO LICENSE MANUAL, TECH Q&A NOW AVAILABLE

Discover all the excitement of Amateur Radio when you get your Technician license -- your ticket to the unique mix of fun, public service, technology and experimenting with electronics. The ARRL Ham Radio License Manual and ARRL's Tech Q&A will guide you as you get started in Amateur Radio, helping you select your equipment, set up your first station and make your first (of many!) contacts. These manuals -- designed for Technician exams given after July 1, 2010 -- contain all of the information you need to study for and pass the 35 exam questions derived from the new

Technician class (Element 2) question pool. The questions in the pool provide for the new Technician licensee to be able to establish his or her station and operate it legally, courteously and safely. The new Technician pool contains approximately 400 questions, from which 35 are selected for an Element 2 examination; the exam will contain graphics and diagrams. When you use The ARRL Ham Radio License Manual and the ARRL's Tech Q&A to study for your first license exam, you'll be on the air in no time! Every page presents information you will need to pass the exam and become an effective operator, such as radio and electronics fundamentals, operating station equipment, communicating with other hams, licensing regulations, operating regulations and radio safety. Read more here <http://www.arrl.org/news/stories/2010/04/05/11419/?nc=1>.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=6LsUNXPtObs> This week, the Montana QSO Party is April 9-11. The Japan International DX Contest, the QCWA Spring QSO and the Georgia QSO Party are April 10-11. Next week, the TARA Skirmish Digital Prefix Contest, the Holyland DX Contest and the EU Spring Sprint are April 17. The Michigan QSO Party, the Ontario QSO Party and the YU DX Contest are April 17-18. The Run for the Bacon QRP Contest is April 19. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member

Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1704 - April 9 2010

Amateur Radio Newsline report number 1704 with a release date of
Friday, April 9th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. 911 service fails in Lincoln Nebraska and
its ham radio to the rescue. Also, Southern California hams prove
that they can mobilize for an earthquake, a Kentucky radio club wants
to recycle old TV towers for emergency communications use and National
Public Radio says that ham radio is alive and growing. Find out the
details on Amateur Radio Newsline(tm) report number 1704 coming your
way right now.

RESCUE RADIO: LINCOLN NE 911 OUTAGE BRINGS OUT HAM RADIO Y2K PLAN

Its was no April Fools joke on Thursday, April 1st. Thats when the
local telecommunications provider Windstream lost its interconnect
ability and phones literally went out in South-Eastern Nebraska. It
also brought out a cadre of well trained ham radio operators to fill in
until service could be restored. Joe Eisenberg, K0NEB, lives in
Lincoln and explains what failed:

--

KONEB: "At about 7:45 a.m. the main switch which controls the Windstream
Inter-Exchange switching in Lincoln, Nebraska, and 12 surrounding counties
failed, and then the redundant switch failed as well causing phone calls
that would go between exchanges to be disrupted as well as all 911 service
in the multi-county area to cease to exist. So we hams have been out on
location throughout the city of Lincoln and areas of Lancaster County
stationed at major intersections in case somebody needs to contact 911."

--

According to the Nebraska Department of Health and Human Services, 911
service was out for all or part of Butler, Seward, Saunders, Clay, Adams,
northern Gage, Jefferson, Cass, Saline, Richardson and Fillmore counties,
as well as Lancaster county. Responding to the emergency were 68 hams
belonging to the Lincoln Amateur Radio Club and Lincoln ARES. They were
activated throughout the day to become the emergency communications
replacement for the 911 service. It was a callout that Lancaster Country
Emergency Coordinator Reynolds Davis, K0GND, says that area hams had spent

over a decade preparing for. Preparations that began because of dire predictions News Years Eve 2000:

--
K0GND: "We implemented our Y2K plan which we put together in late 1999 in anticipation of all the doom and gloom people had worried about. Although it was not necessary that night, since then we have implemented it four different times for massive telephone outages."

--

While the predicted computer failures of Y2K never occurred, it did place Lincoln area hams in a unique position to respond to communications emergencies that have occurred over the past decade. So nobody was surprised when the general call for assistance went out this time. Again, Reynolds Davis, K0GND:

--

K0GND: "On Y2K night the newspaper had a map of the city printed on the front page, and at major intersections -- each one of these within a half miles of residents of the city -- that's how they were selected. And we (hams) became a phone booth with flashing lights and a sign on the car and so forth -- should an emergency call be needed after midnight on that night. I think that plan covered some 60 intersections within the city

"This time it was a scaled back call-up but none-the-less it was the same plan and we ended up with 26 major intersections last Thursday when this all occurred. And they were staffed essentially from 8 in the morning until about 11:30 p.m. when we finally secured"

--

What may surprise some is that this entire operation only entailed the use of one repeater on the two meter band. Davis credits the self discipline and emergency service training of the regions ham radio community for making this possible. He also notes that the training never stops:

--

K0GND: "We have nightly nets on the same repeater. There are ARES nets every night of the week. We do lots of drills and a tremendous amount of public service. Last year almost 5000 volunteer hours of public service by the club. And all of those things keep your discipline up and your ability to listen out: - which is a key to running a large net with a lot of people.

--

K0GND tells Newsline that thankfully the ham radio communicators only had to handle a small number of 911 incidents. The worst of these was a house fire that they were requested to report. Another dealt with a police officer involved in tracking down a missing child. And it took the better part of a day before 911 service was restored cross the affected area and the ham radio operators could stand down and go home. (ARNewsline(tm))

**

RESCUE RADIO: SOCAL HAMS ACTIVATE FOR MEXICALI QUAKE

Hams in Los Angeles County activated briefly after shock waves from the 7.2 magnitude earthquake in Baja California. Mexico, were felt at about 03:50 PM Pacific time on Easter Sunday. The Los Angeles Section ARES immediately activated it's emergency net with hams from all over the area checking in.

But there were no reports of commercial communications outages, utility outages or even any damage in and around the local area and soon attention was turned to the South. That's when the nets Spanish speaking operators were asked to monitor the High Frequency bands for possible traffic from the quake area.

Dr. Armondo Montalvo, KI6TAA, in the Los Angeles suburb of Woodland Hills was able to contact Franscisco Menses, XE2FMS, in the city of Mexicali, Mexico, along with mobile operators XE2DZZ and XE2BRL . Initial reports said that most stations in and around the quakes epicenter were without electric power. Also, the major highway between Mexicali and Tijuana, Mexico suffered severe thrust fault damage. This information was forwarded to the United States Geologic Survey for it to act on.

In all, some three dozen stations were involved at one time or another during the call-up, but no large scale ham radio relief effort was needed on either side of the United States and Mexico border. Never the less, area ham radio emergency planners say it was definitely a good test of the ability of the regions hams to respond at a moments notice. (LAX ARES)

**

RESCUE RADIO: KY CLUB WANTS TO RECYCLE OLD TOWERS FOR EMCOMM WORK

A group of Bowling Green, Kentucky area ham radio operators want to give new life to old residential TV towers by incorporating them into an emergency communications system. The Kentucky Colonels Amateur Radio Club and the Kentucky 4th District Amateur Radio Emergency Services are seeking donations of the TV towers, which have become increasingly obsolete as more households have turned to cable, satellite and digital TV providers.

In an article in the Bowling Green Daily News, Bill Schlicht, KJ4DGW of the Kentucky Colonels Amateur Radio Club said members will remove the towers for free, recondition them and install them at numerous locations in the 10-county Barren River Area Development District. This, to support emergency communications among ham radio operators, hospitals, county emergency management directors, American Red Cross chapters and other emergency workers.

Schlicht told the paper that club members are covered by liability insurance during performance of club activities, and removing the TV towers will not cost the homeowner anything. He says that his ham radio association wants to set up at least 16 towers, mainly at area hospitals where ham radio operators can communicate with emergency workers during a

large-scale disaster. There are about 400 amateur radio operators in Warren County and the Bowling Green area.

You can read the rest of this article at: http://bgdailynews.com/articles/2010/03/31/news/news6.txt (BG News, eHam.net)

**

RESCUE RADIO: UK CLUB GETS 5000 POUND PUBLIC SERVICE GRANT

Meantime, over in the United Kingdom, the Itchen Valley Amateur Radio Club has been awarded nearly 5000 British Pounds in Lottery funding. This, to assist with providing community based radio projects that will include supporting the Radio Amateur Emergency Network in providing communications coverage for disaster and emergency exercises as well as real time responses.

The grant will primarily be used to equip a portable radio station with a 25 foot trailer tower with antennas, and a portable generator system to enable the station to provide communications services without mains power or the normal mobile phone networks. This stand alone capability will allow the club to contribute to the telecommunications infrastructure supporting long-distance events that involve communications and control in isolated places.

In addition, part of the grant will provide funds for working with local youth organizations such as Scouts and Guides, as well as other public projects to broaden awareness of amateur radio. 5000 British Pounds is the equivalent of about $7600 United States dollars.

HAM HAPPENINGS: NPR SAYS HAM RADIO IS GROWING

National Public Radio says that ham radio is alive and well, and its even produced a segment of its All Things Considered program to prove it. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Ham radio is far from the dying hobby that the nay sayers claim it to be. One that only a few years ago was being touted by techno blogs alongside 35 mm film and home videotape as technologies slated to quickly disappear.

Well, National Public Radio says that the bloggers were wrong because there are now nearly 700,000 U-S citizens who have ham radio licenses. NPR says that number is up by some 60 percent since 1981. And Says NPR, that number is growing.

The NPR story quotes Allen Weiner. He is an analyst at the technology research firm Gartner and Associates. Weiner says that while ham radio will never have the sex appeal of the iPhone, it does have a certain level of what he terms as nerd appeal.

Weiner also explains growth in our specialized communications interest in this way. He says that if it creates its own experience, that's really what's key here. Conversely, if it just emulates an experience that you can get online, it's not going to grow.

The report concludes by noting that even the most die-hard hams admit that amateur radio will never be a mainstream hobby. But says National Public Radio, people are still discovering the joy of communicating with the technology of amateur radio. A technology that has existed for nearly a century.

Still enjoying ham radio from Scottsdale Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

You can hear the NPR story on ham radios growth at the URL found at http://www.npr.org/templates/story/story.php?storyId5586086

RADIO LAW: EVEN WHEN ITS WRONG THE FCC IS RIGHT

Parties relying on informal discussions with commission staff do so at their own risk. At least that's the lesson that's been learned KRNW- FM which has been ordered to pay a $5,000 fine for what amounts a simple clerical error based on information a Commission representative gave to the broadcaster.

According to the trade publication Radio World, KRNW FM is located in Chillicothe, Missouri, and is licensed to Northwest Missouri State University. Its case started with the expiration of the license in early 2005, The FCC says that the station didn't file properly until two weeks later, and it didn't seek an STA to continue to operate or give a reason for the failure to file on time.

When the fine was handed down the college, which also owns KXCV FM, appealed. It argued that the fine was unfair because it did in fact try to renew properly. It said FCC staff had told the station manager to file both station renewals on the same form, and the manager did so.

Now, in upholding the fine the commission said that while allows for some stations to file on the same form, the manager should have filed, as she did in the past, a separate renewal application for the KRNW. It added

that Commission precedent has established that parties relying on informal discussions with FCC staff do so at their own risk. The commission may still enforce its rules despite the public's reliance on allegedly erroneous staff advice. (RW)

**

RADIO LW: FCC LOSES COURT BATTLE OVER NET NEUTRALITY

A federal court in Washington D.C. has handed the FCC a major defeat and at the same time has thrown the future of Internet regulations and United States broadband expansion plans into doubt. It happened on Tuesday, April 6th when the U.S. Court of Appeals for the District of Columbia ruled that the Commission lacks authority to require broadband providers to give equal treatment to all Internet traffic flowing over their networks. Amateur Radio Newsline's Frank Haas, KB4T, has the details:

--

The unanimous ruling by the three-judge panel marks a serious setback for the FCC which is trying to adopt official net neutrality regulations. FCC Chairman Julius Genachowski believes that such rules
are needed to prevent phone and cable companies from using their control over Internet access to favor some kinds of online content and services over others.

On the other side, the court decision was a big victory for Comcast Corporation. Comcast is the nation's largest cable company and it had challenged the FCC's authority to impose network neutrality obligations on broadband providers. This following a 2008 Commission finding that centered on Comcast's actions in 2007 when it interfered with an online file-sharing service called BitTorrent.

In its decision, the court essentially held that it was not for the FCC to determine which of Comcast's customers was entitled to better levels of service than another. Rather that this is a business decision that Comcast was free to make.

Public advocacy groups have already reacted negatively to the court decision. They contend that the ramifications of the ruling are much broader. That's because it undercuts the FCC's ability to prevent broadband providers from becoming gatekeepers for many kinds of online services. This could include Internet-based phone services and even software that runs in a Web browser.

The decision also has serious implications for the FCC's national broadband plan released by the FCC last month. The Commission needs undisputed authority to regulate broadband in order to pursue some its
key recommendations. In a statement following the release of the decision, the FCC said it remains committed to promoting an open Internet and to policies that will bring the enormous benefits of
broadband to all Americans.

At this point the FCC has several options. It can do nothing and let the ruling stand. That's highly unlikely.

It could ask Congress to give it explicit authority to regulate broadband, but that could take years. Or, it could appeal the matter to the United States Supreme Court which could also take years.

Or as some observers believe, the Commission might simply reclassify broadband as a more heavily controlled telecommunications service. One which could be subjected to both intensive scrutiny and heavy regulation.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

We should know what direction the Commission will take in a matter of weeks. (Published news reports)

HOT OFF THE PRESS: NEW DX BOOK AVAILABLE BY W9KNI

'A Year of DX' is a new book by noted author Bob Locher, W9KNI that follows him as he makes an all out effort to win the 2008 running of CQ Magazine's DX Marathon. The Marathon is a year long operating event during which a contestant works as many countries and CQ zones as possible, any band or any mode.

While the book chronicles Bob's efforts in the pileups and through the lonely watches of the night, it also contains other discussions of what DX'ing is all about. These include the possibilities of DX'ing in low sun spot periods contributed by Jim Henderson, KF7E, a chapter on optimizing your SSB transmit audio by Hall of Famer Chip Margelli, K7JA, a discussion of what is the ideal linear amplifier, and much more.

Anyone who read and enjoyed Bob's 'Compete DX'er' is sure to find this book equally worthwhile. Its publication date is scheduled for May 1st. More information is on-line at www.idiompress.com/yearofdx.php (Via e-mail)

HAMVENTION HAPPENINGS: SPEAKERS LIST RELEASED FOR DX FORUM

The SouthWest Ohio DX Association has started to announced its line-up for the DX Forum at this year's Dayton Hamvention. Guest speakers include Tom Harrell, N4XP, of the K4M Midway Island 2009 DXpedition, George Wallner, AA7JV who operated TX3A from Chesterfield Reef and Paul Ewing, N6PSE of the YI9PSE operation from Iraq. Don Dubob, N6JRL, will be this year's forum moderator and at the close of the session the SouthWest Ohio DX Association will be raffling off a Yaesu FT-2000 transceiver. (SWODXA)

PROMOTING HAM RADIO: FREE ARRL WEBINAR ON PUBLICIZING FIELD DAY APRIL 22

Hams involved in planning their clubs Field Day activities are invited to take part in free 90 minute webinar on April 22nd. Hosted by the ARRL's Atlantic Division in cooperation with the League's Public Relations Committee, this session will focus on how to publicize your groups Field Day outing so as to gain maximum recognition for the hobby.

Among the topics to be covered will be how to set up a Field Day publicity calendar. How to get audio and video Public Service Announcements on local radio and TV stations. How to get proclamations issued and even how to use social networks like Facebook and Twitter to draw people to your Field Day event.

Also covered will be the correct way to invite elected officials and dignitaries to your Field Day site. Depending on whom you get to show up, this can bring with it good local, regional or even national press coverage. And according to Allen Pitts, W1AGP, who is the ARRL's Public Relations Manager, the guest list reads like a whose who in ham radio media relations:

--

W1AGP: "You have got Walt Palmer recently of ABC News - television; Diana Eng will be working with Facebook and Twitter; Bill Morine on print journalism will be talking on how to schedule and set up things; Kevin O'Dell who until recently made television commercials will be talking about how to make up your own Public Service Announcements and videos. And then of coarse you have got me."

--

And I'll be on that panel too talking about media relations with broadcast radio.

Again, the date for this on-line seminar is Thursday, April 22nd beginning at 9:00 PM Eastern Daylight Time. To pre-register take your web browser to https://www1.gotomeeting.com/register/932645064 (ARRL)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RESTRUCTURING: BAHARAIN IMPROVES ITS AMATEUR SERVICE

Licensing of the amateur service in the Kingdom of Bahrain has taken a major step forward. This, with the release of new amateur service rules by the nations telecommunications regulatory authority.

New additions for the Bahrain General Class licensees include 135.7 to 137.8kHz with a power limit of 10 watts. Also, regulators have extended the 160 meter band changing the upper limit to 2000 kHz. They have also expanded 40 meters up to 7200 kHz and added access to the 30 meter band as well. Above 30 MHz new additions include 6 meters from 50 to 52MHz and improved access to bands at 430MHz and above.

Also, Bahrain now has a new Intermediate Class license that permits operation at 28 MHz and above with power output to the antenna of 100 watts. Aeronautical Mobile, Maritime Mobile, Mobile and Portable operations are also permitted within the terms of the new license.

It should be noted that with the exception of the segment 50 to 50.5MHz, which is primary, all new allocations have been granted on a secondary basis. Permitted power to the antenna on all bands except 136 kHz is 1500 watts. (GB2RS)

**

WORLDBEAT: WORLD AMATEUR RADIO DAY APRIL 19

"Amateur Radio: combining communication experience with modern digital techniques" is the theme of this years World Amateur Radio Day. Scheduled for April 18th, World Amateur Radio Day is an international celebration of the hobby sponsored by the International Amateur Radio Union and its member societies representing over 150 countries.

Since 1925, the IARU has been instrumental in coordinating and representing amateur radio on global matters. It says that in today's world that it is radio amateurs who are finding ways to use frequencies at the fringes of the radio spectrum while developing marriages of radio and the internet, and experimenting with digital and satellite communications.

For information about World Amateur Radio Day and the International Amateur Radio Union please take your web browser to www dot IARU dot org. (IARU)

**

HAM RADIO IN SPACE: DARA TO MATCH DONATIONS TO AMSAT

The Dayton Amateur Radio Association says that it will match one-for-one any donations made to AMSAT-NA between now and June 30th of 2010. This, up to a maximum of $5,000.

The matching funds will be earmarked in support of the "Getting AMSAT Back into Space" campaign and help us raise the funds needed for the next satellite project which is a cubesat that will provide a 2 meter-70 Centimeter FM transponder that will match the ground performance of AO-51.

More on this matching fund is on line at www.amsat.org. (ANS)

**

HAM RADIO IN SPACE: AMSAT SPACE SYMPOSIUM IN CHICAGO IN OCTOBER

The 2010 AMSAT Space Symposium will be held in Chicago, Illinois from October 8th through the 10th. This years venue is the Elk Grove Holiday Inn near O'Hare Airport. Topics to be covered include presentations on operating techniques along with other sessions covering plans for the future of ham radio in space. For more information please visit www.amsat.org on the World Wide Web. (ANS)

**

ON THE AIR: MOONBOUNCE USING THE 1000 FOOT ARECIBO DISH

The Arecibo Observatory Amateur Radio Club will be putting the 1000-foot radio telescope on the air for 432 MHz E-M-E contacts from April 16th to the 18th. The callsign used will be KP4AO with a transmit frequency of 432.045 MHz and receiving between 432.050 to 432.060 MHz. KP4AO will transmit with 400 watts out but the giant dish will give the signal about 60 db of gain. Translated it means that KP4AO should be able to be heard with a small hand-held yagi pointed at the moon and a good receiver. A 15 db gain antenna and 100 watts will be enough to KP4AO on CW. More is on-line www.southgatearc.org/news/april2010/arecibo_432_moonbounce.htm (Southgate, K1JT)

**

ON THE AIR: CELEBRATING MEXICO'S INDEPENDENCE

On the air, word that the Mexican Federal Telecommunications has authorized the use of the special 4 B prefix for Mexican stations throughout the year 2010. The use of this prefix is to celebrate the bicentennial of Mexico's independence and the centennial of the Mexican Revolution. (OPDX)

**

ON THE AIR: CV7G CELEBRATES THE FOUNDING OF MODERN URUGUAY

And CX7ABK, will be using the special callsign CV7G between April 17th and the 19th. This operation celebrates the landing of 33 Orientales on Agraciada Beach in Uruguay. This was a militant revolutionary group led by Juan Antonio Lavalleja against the Empire of Brazil. Their actions culminated in the foundation of modern Uruguay. And in celebration of this event CV7G will be on 40 and 20 meter SSB. A special QSL card will be issued. You send your QSL via CX7ABK. (OPDX)

**

PROPAGATION: SOLAR WINDSTORM HITS EARTH

In propagation news, what's described as a sharp gust of solar wind hit Earth's magnetosphere on Monday, April 5th, at approximately 0800 UTC. It also sparked the strongest geomagnetic storm of the year.

According to Spaceweather dot com, the event registered 7 on the 0-to-9 K index scale of magnetic disturbances. Although the storm was subsiding by

Wednesday morning, April 7th, it was not over and high-latitude sky watchers were told to remain alert for the possibility of aurora propagation. (Spaceweather)

**

DX

In DX, PG5M, has made available his story called the 'Pacific 2009 Ultra Light Solo DXpedition' in PDF format on the World Wide Web. Its 12 pages long and goes into detail about his activities and netting 13000 QSOs from Fiji, Tuvalu and Tarawa. You can downloaded it at www.dx.to

On the bands, word that S53A is now active from Zanzibar as 5-eye-one-S. This is his first holiday style trip with some radio operation as when time permits. He has been reported on 20. 15 and 10 meters mostly on CW. QSL via S53A, direct or via the bureau.

JI5RPT, will be active as JD1BLY from Chichijima Island between May 2nd and the 7th. His operation will be on 40 through 6 meters using CW, SSB, Digital and the Satellites. QSL via his home callsign JI5RPT.

Lastly, , EA8AY, will be active from the Canary Islands as EF8E. This during the CQWW
WPX CW Contest on May 29th and 30th. QSL via EA8AY.

(Above from various DX news sources)

**

THAT FINAL ITEM: ITS SPRING ARDF TIME

And finally this week, as the weather warms, it's time to start planning for outdoor radio fun this summer. Opportunities to win medals by finding hidden transmitters are coming, as Newsline's Joe Moell, K0OV, explains.

--

More and more hams every year are discovering the fun of tracking hidden radio transmitters in their cars or on foot. The on-foot variety of foxhunting has become an international sport, with names such as foxtailing, radio-orienteering and ARDF. USA is one of about 30 countries with an active ARDF program, including national championships and participation in the World Championships every two years.

To see the USA's best on-foot foxhunters in action, to learn from them, and to try it for yourself, make plans to come to Ohio this spring. The Tenth USA ARDF Championships will get under way on Friday, May 21. It's a three-day weekend of practice sessions, a big two-meter hunt, and another hunt on 80 meters. It's open to anyone at any foxhunting skill level, with or without a ham license. If you're a senior, don't worry about trying to compete against teenagers. Equal medals will be awarded in six separate age categories for OM's from under 18 to over 70. Five similar age categories divide up the YLs. To be even better prepared, attend the optional two-day

intensive training camp just before the championships.

What could you win? Possibly a medal and a place on our country's team going to the ARDF World Championships in Croatia this coming September. USA can only field a maximum of three people in each age and gender category, so our national championships determine who will go.

Will this be the year that you win a radio-orienteering medal? The registration deadline is coming soon. So for everything you need to know about the USA Championships, including schedules, registration forms and equipment ideas, point your Web browser to www.homingin.com. That's HomingIn, as one word, homingin.com. You can also learn about the World Championships in Croatia and the annual CQ Worldwide Foxhunting Weekend.

From southern California, this is Joe Moell Kay-Zero-Oscar-Victor for Amateur Radio Newsline.

--

Every year interest in Amateur Radio Direction Finding grows. Who knows. One of these days it could become popular enough that the ham radio community might petition for it to become an Olympic medal level sport. (K0OV)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Carlson, KQ6FM, saying 73 from Reno, Nevada, and we thank you for listening.

So, given your public service intent, here, and, myself,
questioning the efficacy of changing a public ordinance by wailing
in a USENet newsgroup, I have to ask: have you taken more definitive
steps to get this addressed? Like notifying the ARRL. They most
certainly would have something to say about it. Or FCC? FCC has
dominion over communications issues, and has ruled specifically on
the issues of interference, antenna installation, and the HOA CC&R's
limiting of TV, and satellite antennae installation.

Have you taken your complaints there?

Or are you just flailing against 'the man.'

Make no mistake, I'm fully aware of the war on radio hobbycraft
in this country.

But screaming 'fire' in a crowded NRA convention may not be the
better way to accomplish your goal.

Agreed - and moreover - does it make sense to air these views on a FRS newsgroup? The connection is tentative at best.

This radioguy is a DUFUS, and has a long history of reading a ton of BS
into local Statutes that have to do with Radio Communications.... I, and
MANY others, have refuted his BS, but he continues to froth off at the
mouth, about things he really just doesn't understand.... Being a former
FCC Field Agent, I still have a lot of insight, and even a few friends
at the Commission, and 99% of his conclusions are bogus from the get go.
Just put him in your PLONK File, and ignore him.....

Me one who has a 40 year history in the Radio Field, in many areas

As a former Field Agent, can you help us understand how one might have
their ticket revoked due to character issues?

Sure, In the Commissions Rules and Regulations (Title 47) there are Rules
that state that to be Eligible to Hold a Radio License in the USA, one
must be of "Good Character". The definition includes such things as not
being convicted of a Felony Crime while using Radio Communications, Not
being convicted of a Felony Crime of Violence, Not being convicted of
Wire Fraud, or a number of other lesser Crimes. If you have ever had a
License Revoked, for ANY Reason. Violation of the Secrecy Clause of the
Communications Act of 1934, as Amended. (although I have never heard of
a prosecution for this). If you have been issued a Violation Notice and
not Responded, and it went to a Hearing, and Revocation was part of the
Judgement. I heard of a fellow that owned a small local Radio Station,
that was issued a Violation Notice for Tower Lights not operating
properly, He choose to not respond to the notice, and when the Field
Agent "Pink Slipped" the Transmitter, and took it off the air, he
removed the seal on the Power Switch, and went back on the air after the
Agent left the site. The Agent came back the next day with a Federal
Marshal, and they put the guy in the Slam, and revoked the Station
License for that station and start proceedings to revoke his Class A
Citizens Band License, Ham License, and Land Mobile Licenses, under
these rules, as not being of "Good Character"... The Administrative Law
Judge wasn't impressed with his Court appearance, and granted the
Commissions Revocation requests on all counts. He did time for the Tower
thing, and lost everything....

Just a note here: FCC Field Agents do NOT have Police Powers, on Land or
Sea... but they can, and do, have the ability to get a Federal Marshal
for Land, and a USCG Officer for Sea, to enforce the FCC Rules and
Statutes if that is the only recourse. When doing Vessel Inspections for
SOLAS Compliance, I have had to get a USCG Officer to make a Violation
Notice stick, on a couple of occasions, and had to get a Federal Marshal
a couple of times, for Interference with Safety Communications Issues by

stations on Land. One of those was for a Cable outfit with a VERY Leaky System, that was taking out the local Cops Repeater, the USCG local Marine CH16 Vhf Receiver, AND the local Airports Approach Frequency, all at the same time. That was a GIANT MESS....

Me Memories from time gone by....

I would still be there, if Clinton and Buauru his dufus buddy ALGORE
hadn't "Reinvented Government" and gutted the Field Operations Division,
by RiFF, and Retirements... Oh Well, that was long before that dufus
went nuts, on Global Warming.....

Me one who knew ALGORE was crazy, long before Global Warming

Subject: Tears On My Pillow--a nice 50's ballard changed just for
Marky!

********STAINS ON YOUR PILLOW**********

You don't remember me, but I remember you.
I'm that seventeen year old, who tore your ass in two

Stains on your pillow, jizz in your ass, because of you.

My cock is not a gadget, your ass is not a toy, your dam asshole is
so
streached out because my name is LeRoy!

If I could start anew, I'd only masturbate. You made me fuck your
ass,
Mark you're a reprobate!

Stains on your pillow, jizz in your ass, because of you.

I know what you mean. I saw on city tv, ctv, or chch news ontario is
prohibiting using cn and ham radio equipment while mobile ubness
you're using a hands free device and is also preventing having
anything with a viewscreen on it while driving unless the viewscreen
is capable of displaying ONLY safety information and nothing else.

What the citty tv,ctv.chch news did not say is

1. a hands free device on a cb or ham radio is illegal, especially
mobile as that is automatically illegally transmitting when you are
not talking to anyone and the cox picks up the external noise.

especially picking it up constantly. which is what happens when you
have a vox on the entire time you're mobile.

2. The viewscreen law. Not only does that make my cellphone illegal to
use in the car even with a hands free device since it has a viewscreen
on it, it also makes a vehicle safety device I have to get illegal
since it requires a viewscreen to be in sight of the driver to be safe
otherwise it negates the safety feature it is designed for if the
drivver can't see the viewscreen.

And of course, it isn't capable of displaying only the safety feature.
The FM capture effect sees to that. If you believe what the majority
of people posted about the fm capture effect, then it will pick up
only the strongest signal whatever that might be wherever you're at.

But because of the way land is around the municipality where I live,
the neighbors almost running over other people here and vice versa, I
have to get the vehicle safety device in order for other people to be
safe.

It figures Ontario would outlaw these vehicle safety devices.

And it's my understanding some states in the U.S. have also outlawed these vehicle safety devices in the name of "safety" by making the roads "more safe" by outlawing vehicle safety devices.

It's probably a bunch of rednecks whichever state they're in who has done so.

==> COME EXPLORE THE NEW ARRL WEB SITE!

We'd like to welcome you to come and delve into the new ARRL Web
site <http://www.arrl.org/>. After more than two years of work, the
staff, officers and Board of Directors are excited to show you what's
in store.

As you peruse the site, you'll notice it's set up a bit differently
than the previous site. With the new site, we chose to focus on how you
use Amateur Radio, instead of by departments here at HQ. For instance,
in the "On the Air <http://www.arrl.org/on-the-air>" section, you'll
find information on contesting, awards, Logbook of The World,
international operating, special events, the QSL Bureau (both Incoming
and Outgoing) and more. And in the "Public Service
<http://www.arrl.org/public-service>" section, you will find
information on emergency communication, as well as served agencies and
involvement opportunities. We are aware that some parts of the site are
not yet available. We ask that you be patient while we try to bring
```

everything over to the new site.

<http://www.arrl.org> So go ahead -- take a look around! Make yourself at home on the Web site. We invite you to go ahead and set up your member profile while you're here. Once you log in, click on "Edit Your Profile <http://www.arrl.org/myarrl-account-management>" -- it's located right under the log-in area. Let us know what Amateur Radio activities you enjoy (and once you do, you'll see information about your chosen activities on our home page, personalized just for you). This is also the place where members can sign up to receive The ARRL Letter <http://www.arrl.org/arrlletter> and other e-newsletters, W1AW bulletins, license renewal notices, messages from your Section Manager and Director and more. You can join groups, add friends and even add a picture of yourself!

If you ever need help finding anything or if you encounter any problems, look for the "Having Trouble? <http://www.arrl.org/support>" link at the bottom of each page. Click it and report your problem; you will be contacted shortly with a solution. We hope you will enjoy this new Web site as much as we do here at ARRL Headquarters. Remember -- this is your Web site. Have some fun with it!

==> MIKE COREY, W5MPC, JOINS ARRL STAFF AS EMERGENCY PREPAREDNESS AND RESPONSE MANAGER

The ARRL is pleased to welcome Emergency Preparedness and Response Manager Mike Corey, W5MPC, to the Headquarters staff in Newington. Corey's major responsibilities include addressing the development and implementation of an organizational disaster response plan as well as an operational continuity plan, complete with supporting procedures and training. Corey also will play an integral part in the management of ARESï¿½, and in future negotiations with served agencies with whom ARRL shares or creates Memoranda of Understanding. An Extra class licensee and an ARRL Life Member, Corey comes to the ARRL with almost 20 years of experience with emergency communications. Licensed since 1988, he has been involved with SKYWARN since 1991 and has attended basic and advanced SKYWARN training. He is the co-author of the ARRL Storm Spotter's Handbook, which is due out next month. Read more here <http://www.arrl.org/news/mike-corey-w5mpc-joins-arrl-staff-as-emergency-preparedness-and-response-manager>.

==> FCC NEWS: FCC LOOKS TO LOWER FEES FOR VANITY CALL SIGNS

The FCC released a Notice of Proposed Rulemaking and Order (NPRM) on April 13 seeking to lower the fee for Amateur Radio vanity call signs. Currently, a vanity call sign costs $13.40 and is good for 10 years; the new fee, if the FCC plan goes through, will go down to $13.30 for 10 years, an decrease of 10 cents. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term.

The vanity call sign fee has fluctuated over the 13 years of the current program -- from a low of $11.70 in 2007 to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In 2007, the Commission lowered the fee from $20.80 to $11.70. The FCC said it anticipates some 14,800 Amateur Radio vanity call sign "payment units" or applications during the next fiscal year, collecting $196,840 in fees from the program. Read more here <http://www.arrl.org/news/fcc-looks-to-lower-fees-for-vanity-call-signs>.

==> SECTION NEWS: NOMINATIONS OPEN FOR KNIGHT DISTINGUISHED SERVICE AWARD

Each year, the ARRL offers an award to recognize someone who has served admirably as an ARRL Section Manager. The Knight Distinguished Service Award recognizes exceptionally notable contributions by a Section Manager to the health and vitality of the League. The first such award was presented to Joe T. Knight, W5PDY (now SK) in 2003 -- for whom the award was named -- in recognition of his exemplary service not only as the ARRL Section New Mexico Section Manager for more than a quarter century, but also for his willingness to share his knowledge and skills. For information on selection criteria and how to nominate a deserving Section Manager, click here <http://www.arrl.org/news/nominations-open-for-knight-distinguished-service-award>.

==> W1AW NEWS: HELP KEEP THE W1AW DREAM ALIVE

W1AW. It is the most famous call sign in the century-long history of Amateur Radio. To hundreds of thousands of radio amateurs, W1AW is synonymous with Hiram Percy Maxim -- the visionary who first recognized a need for a national network of Amateur Radio operators in North America, and who just a few years later saw a similar need for the worldwide federation that we now know as the International Amateur Radio Union (IARU). Amateur Radio without Hiram Percy Maxim would be like automobiles without Henry Ford or electricity without Thomas Edison. Without Mr Maxim, Amateur Radio probably would not exist today -- and if it did, it would be a pale shadow of the enriching endeavor we now enjoy.

The W1AW Endowment was established to provide a reliable source of funds for the operation and maintenance of the Maxim Memorial Station. "When we begin the budget cycle every year, it is a relief to know that some portion of the expenses related to W1AW will not have to compete for scarce budget dollars with other important ARRL programs," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Thanks to generous members and supporters, the W1AW Endowment and the income it generates have grown." To help ensure that Hiram Percy Maxim's memory lives on to inspire future generations of radio amateurs, please consider making a donation to the W1AW Endowment. By doing so, you will help build a solid financial future for W1AW so that it can continue to fulfill its mission as Amateur Radio's flagship station. "When you visit ARRL and tour W1AW, you will see your generosity at work," Sumner said. "And

every time you hear 'Whiskey-One-Alfa-Whiskey' on the air, you'll know that you had a part in keeping the dream alive." For information on how you can help keep the W1AW dream alive, click here <http://www.arrl.org/news/help-keep-the-w1aw-dream-alive>.

==> ARRL FIELD DAY : ARRL PUBLIC RELATIONS COMMITTEE TO HOST FIELD DAY WEBINAR

The ARRL Public Relations Committee -- in conjunction with the ARRL's Atlantic Division -- will host a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Thursday, April 22 at 9 PM EDT, join ARRL Media and Public Relations Manager Allen Pitts, W1AGP, along with ARRL Field Day Manager and members of the League's Public Relations Committee as they explain how to use ARRL Field Day to bring attention to Amateur Radio in your area. Learn how to set up a Field Day publicity calendar, invite elected officials and dignitaries, get proclamations issued, post your Field Day event on local media outlets and community bulletin boards, get audio and video PSAs on local radio and TV stations, how to use newer social networks like Facebook and Twitter and more to draw people to your Field Day event. Click here <https://www1.gotomeeting.com/register/932645064> to register for this informative, interactive Internet meeting.

==> ON THE AIR: MOONBOUNCE FOR EVERYONE -- COURTESY OF THE ARECIBO RADIO TELESCOPE!

Sending Amateur Radio signals to the Moon and back has never been easy. After roundtrip journeys of nearly half a million miles, even the most powerful signals generated by hams are exquisitely weak on arrival. Because of the equipment and expertise necessary for successful "moonbounce" operating, this facet of Amateur Radio generally has been confined to a small audience. But this coming weekend, even hams with very modest stations will have the opportunity to experience the thrill of moonbounce, thanks to the giant radio telescope at the Arecibo Observatory in Puerto Rico. Read more here <http://www.arrl.org/news/moonbounce-for-everyone-courtesy-of-the-arecibo-radio-telescope>.

==> SOLAR UPDATE

Tad "Though the Earth was cold and wet, the sky was clear and the Sun rose bright, placid and beautiful <http://www.literature.org/authors/dickens-charles/two-cities/book-01/chapter-03.html>"
Cook, K7RA, reports: Weakened sunspots faded away this week and we were buffeted with more geomagnetic instability, but without the dramatic geomagnetic storms of the previous week. The average daily sunspot numbers fell more than 20 points to 12.1, and the average solar flux dropped nearly three points to 75.1. April 11 saw no sunspots -- with group 1061 appearing April 5-10 -- and sunspot group 1062 showing April

12-14. By today, group 1062 should be gone and we may still see more days without sunspots. The predicted solar flux for April 15-18 is 75, 77, 78 and 79, then hitting 80 on April 19-24. The predicted planetary A index for April 15-19 is 5, 5, 12, 8 and 5. Look for more information on the ARRL Web site on Friday, April 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' A Tale of Two Cities <http://www.literature.org/authors/dickens-charles/two-cities/index.html> (Chapter 3).

==> THIS WEEK ON THE RADIO

This week, the ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup> is April 18. The TARA Skirmish Digital Prefix Contest, the Holyland DX Contest and the EU Spring Sprint are April 17. The Michigan QSO Party, the Ontario QSO Party and the YU DX Contest are April 17-18. The Run for the Bacon QRP Contest is April 19. Next week, the 10-10 International Spring Contest, the SP DX RTTY Contest, QRP to the Field, the Florida QSO Party and the Nebraska QSO Party are April 24-25. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

RESCUE RADIO: HAMS RESPOND TO CHINA EARTHQUAKE

Ham radio is responding to the China's Qinghai province earthquake.
The Chinese Radio Sports Association has asked that the frequencies of
7.050 and 7.060 MHz on 40 meters be kept clear for emergency ham radio
communications following a devastating shaker that hit the provinces Yu
Shudistrict.

The earthquake measuring 7.1 on the Ritcher scale occurred on the
morning of Tuesday, April 13th. It left 589 people dead, nearly
10,000 injured and 10,000 families needing to be resettled due to 99%
of houses in the area having sustained severe structural damage.

A number of radio amateurs are already active in supporting the rescue
and recovery efforts including BG9UA, BG9UP and BG9UO. The emergency
communication team of Anhui Amateur Radio Society, led by BG6CEV was
flying to Qinghai on April 15th to bring in much needed communication
equipment.

The Yu Shu diastrict is located in a plateau with temperatures fall to
-5 degrees Celcius making conditions bad for those without shelter as
well as hampering rescue efforts.

(BA1RB - CRSA Coordinator of the IARU Region 3 Disaster Communications
Conmmittee via Jim Linton VK3PC)

RESCUE RADIO: HAM RESPONSE TO MEXICALI QUAKE FOLLOW-UP

A follow-up to last weeks story regarding ham radio involvement in the Easter Sunday earthquake that rattled the city of Mexicali as well as the Imperial County, California, area. Bill Pasternak, WA6ITF, is in the newsroom with the latest:

--

According to Dennis Ambrose, WB6CGJ, hams in Imperial County immediately activated an emergency net on the San Diego Amateur Radio Association's 147.15 Mhz Mt. Laguna repeater. Ambrose, who is ARRL Assistant Section Manager for Imperial County says that landline and cellular telephone phone communications were not dependable and that electrical power was out in many locations.

Ambrose says that ARES and RACES members were among the first to arrive at the Imperial Emergency Operations Center. They handeled traffic regarding damage to buildings, bridges, roads, water treatment plants, and businesses. All of this was passed via amateur radio to the county Fire Chief and the director of the county's Office of Emergency Services.

SATERN, the Salvation Army Team Emergency Network, sent in operators from the San Diego, San Bernardino and Riverside counties to assist in communications for the shelter and mobile feeding units. It activated its SATERN Net using generator power and operated from one emergency shelter were twenty seven people stayed Sunday evening. This, due to extensive earthquake damage to their apartment complex.

Ambrose says that ham radio operators remained at their duty stations through Wednesday, April 7th when the county shifted to recovery status.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom, in Los Angeles.

--

Amateur radio operators, from ARES, RACES, SATERN, the American Red Cross, the Imperial County Irrigation District as well as individual hams not affiliated with any group took part over the three and a half days of emergency activation. There's s till no word from south of the border as to whether hams in Mexico were called out in response to this quake. (AD6VI, ARNewsline(tm))

**

RADIO THREAT: FCC EVACUATED DUE TO BOMB THREAT

A threat leads to the evacuation of the FCC's Washington headquarters. Norm Seeley, KI7UP, has the details:

--

The Federal Communications Commission was evacuated Wednesday, April 7th. This after what news sources report as an apparent bomb threat that forced staffers to outside the building in 90 degree heat for over two hours.

The building known as The Portals is located in Southwest Washington. It was evacuated around 9:30 a.m., according to FCC spokesman David Fiske. He said employees returned to the building around 11:30 a.m.

Throughout the afternoon, speculation in the media mounted that the FCC headquarters was evacuated because of a bomb threat. Details about the nature and timing of the threat were unavailable, though one source said staff was out for about two hours and that bomb-sniffing dogs were dispatched.

Fiske did not confirm that a bomb threat was the cause of the evacuation and referred inquiries to the Federal Protective Service. E-mail releases from the commission resumed mid-afternoon.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to the newsletter T V Business, bomb threats in Washington, D.C. are something of a regular occurrence. It notes a WTOP report that the Pentagon City Metro station was shut down briefly April 3rd for such a threat. Another was reported at World Bank headquarters in January. (RW, The Hill)

**

RESCUE RADIO: GAREC-2010 DATES ANNOUNCED

The Global Amateur Radio Emergency Communications Conference, or GAREC, will be held in Curacao, in the Netherlands Antilles on the 11th and 12th of October. The annual conference is for those engaged in providing emergency communications with this years theme being "Learning Through Practicing.".

The overall purpose of Global Amateur Radio Emergency Communications Conference is to exchange information and experiences between radio amateurs and groups interested in emergency communications. This years is gathering is being organized by the Dutch Amateur Radio Emergency Service and the IARU Netherlands Antilles national radio society VERONA.

The program is yet to be finalized however the organizers are keen to include first-hand accounts of emergency communications following the devastating Haiti and Chile earthquakes. More is on line at www.garec.net (VK3PC)

RADIO HONORS: LINCOLN CLUB HONORED

The Lincoln Amateur Radio Club has received the Nebraska Volunteer Group of the Year Award. This, at the Nebraska Impact Awards Luncheon in Omaha on, Friday, April 9th.

The award to the Lincoln Amateur Radio Club comes only about two weeks after it responded to a major telephone outage that affected south east

Nebraska. That story also was well covered by local, statewide and national press as wel as here on Amateur Radio Newsline.

The Lincoln Amateur Radio Club's Jeff Bennet, W&#65533;WKP, and ARRL Lancaster County Emergency Coordinator, Reynolds Davis, K&#65533;GND, were present to accept
the award. (K0AIZ)

**

RADIO LAW: FCC WANTS AUTHORITY TO LOWER VANITY FEE BY 10 CENTS

Still with FCC news, word that the regulatory agency has released a Notice of Proposed Rulemaking and Order seeking to lower the fee for Amateur Radio vanity call signs by 10 cents. Currently, a vanity call sign costs $13.40 and is good for 10 years. If the FCC's new fee structure is approved the new fee will go down to $13.30 for 10 years.

According to the ARRL, over the 13 years of the current program, the vanity call sign fee has fluctuated from a low of $11.70 in 2007 to a high of $70. The latter as first proposed in the FCC's 1994 Report and Order. In 2007, the Commission lowered the fee from $20.80 to $11.70 but its slowly been creeping upward ever since

The vanity call sign fee is payable both when applying for a new vanity call and also when renewing it for a new term. The FCC said it expects to receive some 14,800 amateur radio vanity call sign applications during the next fiscal year and collecting $196,840 in fees under the program.

MD Docket 10 dash 87 carries a commentary cutoff date of May 4th. Reply comments are due no later than May 11th. Instructions on how to comment on this or any other FCC action is available on the FCC Web site at http://www.fcc.gov/cgb/consumerfacts/howtocomment.html (FCC, ARRL)

**

RADIO LAW: FCC GRANTS DALLAS TEXAS AREA 97.113 WAIVER REQUEST

The Federal Communications Commission has granted a Part 97.113 waiver request by Mark Fulmer, KE5PHU, who is Preparedness Coordinator the Tarrant County Public Health Department in Dallas, Texas. This, to use hams employed by the agency in several upcoming bio-terrorism preparedness drills.

Scot Stone is the Deputy Chief, of the Mobility Division of the FCC's Wireless Telecommunications Bureau. In granting the request Stone wrote that the public interest is served in facilitating the April 16, May 21, June 18, July 16, August 20, September 17, October 15, November 19, and December 17 public safety exercises and thus warrants this limited waiver of Section 97.113(a)(3). The waiver permits Fulmer and a dozen other named hams to take part in these monthly drills. (FCC)

THE BPL WAR: MANASSAS VA TO END BPL SERVICE JULY 1

It's a big victory over QRN. This with word that the once highly touted Broadband over Powerline experimental project in Manassas. Virginia, will soon be no more as the Manassas City Council votes to discontinue the service as of July 1st. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

The Manassas City Council's action came soon after the Manassas Utilities Commission recommended it do so. Even with all of the pre-publicity it had received, BPL in Manassas proved to be what is best described as a flawed business plan. While the basic concept of using existing utility lines to also transmit broadband data seemed good at the outset, it never really gained a favorable level of subscribership. By the time the vote to discontinue the service came, BPL in Manassas was only serving about 560 residents and businesses.

In its report to the City Council, the Manassas Utilities Commission said that the total revenue brought in by BPL for the current Fiscal Year was only about $186,000. On the other hand, the expense of keeping up the city owned system was costing the ratepayers more than $351,000. This resulted in a net loss of almost $166,000 to keep the system in operation.

The July 1st termination date was chosen to give current BPL subscribers about three months to switch to other Internet Service Providers. Since its inception, the BPL system has been a thorn in the side of hams and SWL's in Manassas by raising the overall noise floor of most of the high frequency bands, and making all but the strongest radio signals impossible to hear.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

The Manassas decision to shut down its BPL system tends to prove once again what critics in the financial world have been saying for years. That being Broadband Over Powerline may look good on paper but in the world of finance it really is a flawed business plan. (ARRL)

**

RADIO POLICY: FCC CITES IPAD AS ANOTHER REASON FOR BROADBAND SPECTRUM

The FCC is using the high level public response over the release of Apple's iPad to put in a plug for finding more spectrum for wireless broadband use. In a blog posting on April 2nd, the FCC's chief spectrum policy analyst, Phil Bellaria teamed with deputy Wireless Bureau Chief John Leibovitz to pointed to the long lines at Apple stores as evidence that broadband is going mobile fast and in a big way.

According to Belllaria and Leibovitz, more and more Americans seemingly do not want to be tethered to a desktop computer or even a laptop. They want a light mobile device they with which they can curl up on the sofa with to watch an online movie, stow in a backpack for subway reading, or pass around the office with the latest vacation pictures. Belllaria and Leibovitz say that the broadband connections that enable this flexibility are wireless and points out the need for more spectrum for mobile broadband that the FCC has identified in the National Broadband Plan.

They point out that many of the iPads currently rely solely on WiFi to connect to the Internet. They said that the FCC should know before long what the impact of the iPad will have on spectrum use. (Published Reports)

**

RADIO LAW: RAC FILES FOR 60 METER CANADIAN ALLOCATION

Radio Amateurs of Canada has filed a request with telecommunications regulator Industry Canada for some 60 meter spot frequency assignments. The formal request was sent to the Director, Spectrum and Radio Policy, for consideration in authorizing for the Canadian Amateur Service the same five 5 MHz frequencies that are now authorized in the United States. In addition, two spot frequencies are also requested for exclusive Canadian amateur use.

The ground work for this was established at previous meetings of the Canadian Amateur Radio Advisory Board Radio Amateurs of Canada anticipates this request will go through a lengthy due process of analysis and review at Industry Canada before being published as a Canada Gazette Notice for public comment. If all goes well, Canadian hams could see an authorization to this spectrum within a year. (VE3LC)

ON THE NET: ARRL LAUNCHES NEW WEBSITE

The newly redesigned ARRL website is up and running and those visiting it have given it a big thumbs up. Still located in cyberspace at www.arrl.org, the new look makes navigating the site a breeze while at the same time striking what appears to be an almost perfect balance between content and advertising.

Among the most welcome changes are the click-to buttons at the very top of the page. A single mouse click navigates the user to such topics as Licensing, Technology, a Membership area and much more. In all there are eleven instant access buttons including one to bring you back to the suites home page.

A welcome carry over from the old ARRL web design was the decision to keep the latest news right on the home page as headlines. To read more you just click on the story and the full text appears almost instantly.

The new website was more than two years in the masking. Rather than our trying to describe it, you really need to visit it yourself. Just take your web browser to www.arrl.org and then click around. (ARRL)

**

ON THE NET: APRIL EME NEWSLETTER NOW AVAILABLE FOR DOWNLOAD

The latest issue of the 144 MHz EME Newsletter is now available for download. THE SOCIAL SCENE: OH-KY-IN ARS CELEBRATES ITS 50th YEAR

And a happy 50th anniversary to one of Newsline's long time support groups. The OH-KY-IN Amateur Radio Society celebrates its 50th year of existence in 2010. We know that you join with us in congratulating them on reaching this very important milestone. The name OH-KY-IN is an acronym derived from the sates of Ohio, Kentucky and Indiana which are the served by this group. (ARNewsline(tm))

**

THE SOCIAL SCENE: EMCOMMWEST PRE REGISTRATION CLOSES APRIL 23

And there's only a few days left to pre-register for the west's annual ham radio emergency communications event. Don Carlson, KQ6FM, is in Reno Nevada with the details:

--

Advance registration for EmcommWest in Reno is now in the final days, closing on April 23. The ARRL Emergency Communications specialty convention will be held at the Grand Sierra Resort Hotel in Reno Friday April 30 through Sunday May 2.

Some of the topics this year will include Simplex exercises, VOIP, Digital networks, effective communications between CERT and ARES, incident responses, public relations and setting up training classes. There will also be a full day devoted to classroom teaching of the latest ICS courses in addition to the Saturday night banquet, featuring ARRL CEO Dave Sumner, K1ZZ.

All of the information and registration is available online at www.emcommwest.org.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

Again, that website is www.emcommwest.org. (EmcommWest)

EMERGING TECHNOLOGY: FIRST SOLAR ONLY POWERED D-STAR SYSTEM ON THE AIR

What's believed to be the worlds first and only D-Star solar powered repeater has come on the air from Belgium. According to the Royal Union of Belgian Radio Amateurs the ON0CPS system was recently put into operation by ON4BK and is designed to operate entirely on solar energy.

The new D-Star repeater operates with an input channel of 431.9625 MHz with its output on 439.5625 MHz. According to the society, during the day there is usually enough sunlight to keep the machine in operation while simultaneously charging its two 120 Amp Hour batteries which power it at night. So far the repeater has been running over a month on this solar power alone with no failures or complaints.

More is at the ON4BK website located at http://tinyurl.com/yyajoxx (UBA)

WORLDBEAT: AUSTRALIA ANNOUNCES DTV REPEATER WITH STEREO AUDIO

Australia now has a Digital Amateur Television repeater that has full stereo audio. The VK3RTV repeater on Mt Dandenong which services the Melbourne and Geelong areas now has dual channel sound on both its digital and analog inputs. About seven stations transmitting digital DVB-S uplink have the capability to transmit stereo sound through the machine. Peter Cossins VK3BFG advises that experiments are also being conducted with Internet streaming with the British Amateur TV Club in the UK. (VK3BFG)

**

WORLDBEAT: SECOND AFRICAN WSPR BEACON TAKES TOM THE AIR

The second beacon using the new WSPR mode has gone on the air in Africa. Using the callsign 5X7JD the system is located in Masaka, Uganda and outputs 1 watt while cycling through 80, 40, 30, 20, 17, 15, 12 and 10 meters. This gives an overall cycle between WSPR transmissions returning every 16 minutes to a given band.

The beacon is composed of an embedded system based on a PIC microprocessor, a Direct Digital Synthesis chip and a MOSFET Power Amplifier with selectable filters all feeding a HyGain Av 18VS multi-band vertical

antenna. Time and location information are derived from an attached GPS receiver. You can read more about the station at www.hamradiosafari.com. (GB2RS)

**

HAM RADIO IN SPACE: AO-51 GOES SEMI-CTCSS

In ham radio space related news, Amsat Oscar 51's transmitter on 435.150 has been turned off and the 435.300 transmitter power output has been raised to near 2 watts output. Also, on Saturday, April, 10th the new continuous tone access routine was turned on. This cycle will turn the downlink on with an unsquelched uplink when it hears a 67 hz tone. The plan is to leave a squelch tail of several minutes, so the transmitter will stay on without hearing a tone for an interval of several minutes.

What does this mean for the average satellite user? First, if would be advisable to program in a 67 hz CTCSS tone if your radio supports tone access, but not absolutely required as long as someone else in the footprint does. It also means if you are the first person in the footprint you might not hear the satellite until after it hears 67hz for a few seconds. Reports from when the downlink turns on or off would be appreciated and go to ko4ma@amsat.org. (KO4MA)

**

HAM RADIO IN SPACE: ESTONIA TO LAUNCH HAM RADIO CUBE-SAT

The University of Tartu, in Estonia, has submitted a frequency coordination application to the IARU for an Amateur Radio CubeSat. Called ESTCube-1, the tiny bird would be a Low Earth Orbit satellite with UHF downlinks and a VHF telecommand uplink. It would also carry a camera to acquire images of Estonia for and will deploy a 10 meter conductive tether as a part of the development work of an electric solar wind sail. The projected launch for ESTCube-1 would be in 2012 although no launch opportunity has yet been confirmed. More on this Estonian ham radio in space project is on-line at http://tinyurl.com/yk66s2o. (ANS)

**

ON THE AIR: WIA CENTERIARY QRP CONTEST

Turning to the world of radiosports, the VK QRP Club will sponsoring a low power contest during May, This, to commemorate the Centenary of organized amateur radio in Australia.

All three grades of Australian license holders can join this one, provided they limit their output power to five watts CW and 10 Watts for AM and SSB. The contest will be on the 80 and 40 meter bands.

More details and the contest rules can be found on the Wireless Institute of Australia's website. Its in cyberspace at www.wia.org.au. (WIA)

**

ON THE AIR: CELEBRATING MORSE ARGENTINA

And members of the Grupo Argentina de CW will be active from Morse in Buenos Aires Province to commemorate the town's foundation birthday. The operation will take place from 1500 UTC on May 7th to 2000 UTC on May 9th. More details are on line at gacw.no-ip.org (LU1DZ)

**

DX

In DX, word that F5UOW, will stay on Reunion island through May 2nd. He will be active only on 20 meters signing portable FR until April 17th. He will then change his location and will show up as TO2R mostly in CW on 80 through 10 meters. QSL cards should be sent direct or via bureau to his home callsign.

ND9M is active as VQ9JC from Diego Garcia for the next four months. He reportedly prefers CW but also works in SSB and some of the digital modes. He also hopes to get the special call VQ90JC by the end of May in time for the CW portion of the WPX Contest. QSLs go to ND9M either direct or via the bureau.

SP2JMB is reportedly on Maritius signing 3B8SC. His operation is Morse only and he's expected to be operational through April 21st. QSLs via SP2JMB.

UA9YAB says that he plans to arrive in Mongolia on May 25th and will be operating all band mobile until June 2nd as JT9YAB using simple antennas and an emphasis on 50 MHz. If all works out as planned he will be find a location for a second trip for this fall focused 160 and 80 meter operation. QSL via UA9YAB direct only.

Lastly, here's one of those of you who hunt DX only on the bands above 50 MHz. I-2-S-V-A says that he will be active in late April and early May portable I-S-0 from Sardinia's grid square J N 40 U U using 2 meter weak signal modes. Hi operation will focus Meteor Scatter on April 24th and 25th. SSB and CW will take place on May 1st and 2nd. QSL I2SVA at his call book address.

(Above from various DX news sources)

**

THAT FINAL ITEM: PRODUCER DAVE BELL W6AQ LOOKING FOR FILM COPY OF "THE HAMS WIDE WORLD"

If you are old enough to remember back to when movies in school classrooms and on television were shown on film, then you also may remember that most non theatrical movies were shot and distributed on 16 millimeter film. Almost all of the early movies about ham radio were photographed on 16 millimeter including the 1969 Dave Bell, W6AQ, classic titled "The Hams Wide World."

Well Dave would like to restore that move and several others but so far no really decent prints of "The Hams Wide World" have been found. The only projectable one located so far is very faded. A video transfer done some 25 years ago used a film print that was severely scratched. A few months ago the ARRL was contacted to see if they might have a viewable print but none could be found.

Well, when "The Hams Wide World" went into distribution back about 40 years ago, it was a loan out program from what was then the ARRL Film Library. Its estimated that there were two to three dozen copies of "The Hams Wide World" in circulation, and in the off chance that one or two never got returned to League headquarters, we are turning to all of you. Especially any old timers who were responsible for getting programs for radio club meetings back in the early to mid 1970's. .

Perhaps you borrowed a copy of "The Hams Wide World" and forgot to send it back. Maybe its still sitting in your attic, closet or basement. If you do happen to have such a film print, Dave would love to borrow it for the restoration process.

You can contact Dave Bell, W6AQ, by e-mail to dbamovies@aol.com. He says that he would sincerely appreciate your help. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

radioguy wrote:

Uninformed jibberish snipped

They are talking about cloning radios on trunked networks
The problem a cloned radio causes is that if it is using the same ID as another radio it will log onto the system, the system can not allow two radios with the same ID in so the problem is that when a Police radio is turned on but it's ID is already logged on the radio will not be allowed access to the trunked network

The cloned radio that is logged in means it also is able to transmit on the network, the only way to remove the offending radio is to block that ID, but this means that they need to reprogram their radio with that ID to give it a new ID

Trunking scanners do not need to log into the system to follow signals across the network so do not cause any problems

Please do some research before posting silly comments

And the reason Police are pulling you over all the time has nothing to do with there being an antenna mounted on your vehicle

Yet once again, you have completely and utterly misunderstood the point and purpose of this law. Yet once again, you are spreading false and misleading information.

I truly believe that you are mentally ill, and that you actually believe the things you post here - but that doesn't excuse your behavior, especially when it is pointed out to you time and time again that you are wrong, and why.

The proposed law only applies to people who modify commercial UHF trunking radios (intended to operate exclusively on the UHF business band), in order to make the radios capable of TRANSMITTING on police trunked radio systems by (A) changing the radio's frequency coverage (either in software or hardware), and (B) programming in the specific trunking IDs and codes used by the police systems - either by "cloning" or by other means.

And what is wrong with that? What possible legal or moral justification could there be for a private citizen to possess or use a radio TRANSMITTER specifically programmed to operate on the private trunked system of their local police department? The only possible use such radios could be put to would be to deliberately cause interference to the legitimate users of the system.

If that is the sort of thing you advocate, it's no wonder you are always being stopped by your local cops (or so you claim.)

This proposed law does NOT, in any way shape or form, make legitimate UHF HAM radios illegal to use on the 420-430 MHz band. Mainly because HAM transceivers are not designed for, or capable of, operating on TRUNKED radio networks - which is what the police use.

Though I would point out that hams are allowed to use the 420-430 MHz range only on a secondary basis - i.e., they must not cause interference

to other licensed services in that same frequency range, who have priority.

Now, as to provisions in the proposed law making internet re-broadcasts of police scanners illegal, that's an entirely different matter, and one which I strongly oppose. I completely support the right of citizens to MONITOR any and all radio transmissions.

>police scanners.

Those devices are *receivers* and do not transmit, correct?

>[The bill] prohibits anyone from buying a radio and reprogramming
>it, Crutcher said. It would be unlawful to go buy a Motorola
>handheld radio and modify it to be able to hear our calls and talk on
>it.

So how does problems with unauthorized *transmitters* justify
outlawing *receivers*? And isn't it already illegal for civilians
to transmit on frequencies assigned to police, per FCC regulations?

What use is assigned to the frequency band in question, anyway?

>Listening to the information on a certified police scanner is
>permitted, but when citizens are able to broadcast on cloned devices,
>it creates another set of problems

There's a difference between transmitters and receivers. Duh!
Are there any consumer devices which are receivers only but it's easy
to modify them into transmitters as well? I doubt it.

>I think [5194] is a good bill regarding cloning, Lieutenant Bonnie
>Devore of the ISU Police Department said. If somebody is able to
>clone and then is able to transmit on police radio frequency, they
>could disrupt emergency services, which is dangerous for the public.

If you want to outlaw transmitters on a particular band, that's got
nothing to do with receivers.

The bill does not outlaw receivers or scanners used by individuals. Don't depend on the accuracy of anything "radioguy" posts in these newsgroups, as he consistently distorts and misinterprets existing and proposed radio-related regulations and legislation to make himself look like a "victim".

Better to go straight to the source, such as:

http://scannerfood.com/news/HB5194.htm

There IS a provision in the law seeking to prohibit re-broadcasting police communications on the internet via streaming audio - but that is under debate in the legislature.

This is SPAM.
I don't know how newsline got the idea these courses are free.

I went to the URL go.bluevolt.com/CoBrandTemplate/home.aspx?brandï¿½co
that was cited.

These courses are NOT free.
They seem to individually cost about what a Community College would
charge for continuing education courses.

Read my post as to what they are trying to stop
it has to do with cloning trunking radios which transmit to access the
system so that it can follow the system as it switches freqs and lockout
the radio who's ID has been cloned

Kev

> The 420-430 mhz which is a police band in Illinois or more accurately,
> in parts of Illinois is a ham radio band in the rest of Illinois and
> most of the rest of the country

Under what provision? The only exceptions to the use, U.S. Government
radiolocation (primary) and Amateur use (secondary), inside the United
States are:

1) Certain land mobile uses in Detroit, MI, Cleveland, OH, and Buffalo, NY,
and

2) North of "Line A" (defined at 47 CFR 97.3(a)(26) - roughly paralleling
the U.S/Canadian border 50 miles distant).

Amateur operation in 420-430MHz south of "Line A" may continue as long as
it doesn't cause harmful interference to the above mobile users. I don't
see Illinois as among those users.

From:
http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?type=simple;c=ecfr;cc=ecfr;sid=1e65c7a198eb7d479ac3083fc924244e;idno=47;region=DIV1;q1=90.273;rgn=div6;view=text;node=47%3A5.0.1.1.3.1.10
(As of today's date)

"[47 CFR] § 90.273 Availability and use of frequencies in the 421-430 MHz
band.
"The frequency bands 422.1875-425.4875 MHz and 427.1875-429.9875 MHz are
available for use in the Detroit, Michigan and Cleveland, Ohio areas. The
bands 423.8125-425.4875 MHz and 428.8125-429.9875 MHz are available for use
in the Buffalo, New York area. Sections 90.273 through 90.281 address the
specific rules applicable to these bands. Use of these bands is also
subject to the general technical standards and application procedures
contained in other subparts of part 90. The technical standards applicable
in this band are the same as those contained in subpart I of part 90 for
the 450-470 MHz band. Private land mobile use of these frequencies is
subject to accepting any interference from Federal Government radiolocation
operations.

"(c) [For purposes of computing the distance radii:]
Buffalo, NY 42°52'52.2" North latitude.78°52'20.1" West longitude.
Cleveland, OH 41°29'51.2" North latitude.81°41'49.5" West longitude.
Detroit, MI 42°19'48.1" North latitude.83°02'56.7" West longitude."

I see nothing that permits land mobile [radio] use by the State of Illinois
or any political subdivision thereof in the 420-430MHz range.

> Hams are authorized by the FEDERAL government to transmit on the
> 420-430 mhz amateur band, therefore you are not allowed to outlaw
> their equipment just because it can transmit on police frequencies in
> parts of Illinois and parts of other states..
>
> Under federal law, you may not outlaw any ham transcievers just
> because they can recieve police frequencies.

The ruling you want is FCC PR Docket #91-36 (published 03 Sept. 1993).

> The federal government ruled such in response to the several local and
> state police who were arressting hams just because their ham
> transcievers could recieve police frequencies of which you can't buy
> any new ham transciever that doesn't.
> ....

It's got to be all those Illinois Nazis you have.... Makes me glad I don't
live there.

==> HAMVENTIONï¿½: EXPERIENCE THE ARRL EXPO AT THE DAYTON HAMVENTION

<http://www.arrl.org/arrl-expo-at-2010-dayton-hamvention> On May
14-16, hams from all over the world will make their way to the Hara
Arena, located in Trotwood, Ohio for the 2010 Dayton Hamventionï¿½. Held
annually since 1952, Hamvention is one of the largest Amateur Radio
gatherings in the world, and as we have been doing since 2005, the ARRL
will bring the ARRL EXPO -- a showcase of ARRL exhibits and activities
that celebrate the very best of Amateur Radio -- to thousands of radio
amateurs. ARRL staff will also present a number of exciting,
interactive forums throughout Hamvention weekend. Read more here
<http://www.arrl.org/news/experience-the-arrl-expo-at-the-dayton-hamvention>.

==> HAMVENTIONï¿½: DAYTON HAMVENTION ORGANIZERS ANNOUNCE FORUM SCHEDULE

<http://www.hamvention.org> One of the many highlights at Dayton
Hamventionï¿½ -- sponsored by the Dayton Amateur Radio Association (DARA)

-- is the myriad of educational and fun forums that take place the entire weekend at Hara Arena. DARA has coordinated 43 unique programs that encompass nearly 80 hours of programs and activities for the thousands of people expected to attend these programs. Hamvention, the largest event of its kind, will be May 14-16 at Hara Arena in Trotwood, Ohio. Please keep in mind that the schedule may change before Hamvention. Read more here <http://www.arrl.org/news/forum-schedule-announced-for-2010-dayton-hamvention>.

==> ARRL WEB SITE: FIND YOUR WAY AROUND THE NEW ARRL WEB SITE

By ARRL News Editor S. Khrystyne Keane, K1SFA

When the new ARRL Web site launched on April 13, we received an overwhelming, enthusiastic response to it. But along with that, we have also received a few questions on how to find certain features on the new site. Click here <http://www.arrl.org/news/find-your-way-around-the-new-arrl-web-site> for a quick guide to find some of the more popular features, such as the ARRL Periodical Archive Search and Logbook of The World, on the new ARRL Web site.

<http://www.arrl.org/images/view/News/ForgotPassword.JPG> Have you forgotten your password? You can easily get a temporary password by clicking on the "Forgot Password? <http://www.arrl.org/forgot-password>" link, located directly under the log-in box at the top of the page (see photo). You can either request a temporary password via e-mail (you must use the e-mail you originally used to register for the previous ARRL Web site), or you may retrieve a temporary password immediately by providing your user name (for hams, this is usually your call sign) and your ARRL member ID number (found on your QST mailing label). You must also provide either your call sign or your last name. Click here <http://www.arrl.org/forgot-password> to receive a temporary password.

<http://www.arrl.org/images/view/News/YourFavorites.JPG> We have also received inquiries regarding the "Favorites" function on the new Web site. Once you successfully log in to the Web site, you will see a drop-down box that says "Your Favorites" right underneath your name (see photo). Go to any page on the new ARRL Web site. Would you like to find it in just one step? The "Your Favorites" feature will do just that! When you are on the desired page, just click on the "Your Favorites" drop-down menu, click "Add to Favorites" then click the "Go" button. Now you have stored that Web

<http://www.arrl.org/images/view/News/YourFaveSignIn.JPG> page as one of your favorites; each time you wish to go to that page, you can just access it through the "Your Favorites" drop-down menu (see photo).

Of course, with a project as large as the new ARRL Web site, there are still some bugs to be worked out. Our IT Department is busy fixing

them, so please know that we are trying to solve these problems as quickly as possible.

==> FCC NEWS: ARRL FILES REPLY WITH FCC OVER RECONROBOTICS' OPPOSITION TO LEAGUE'S PETITION FOR RECONSIDERATION

Following the ARRL's March 24 Petition for Reconsideration of the FCC's grant of a waiver to permit the operation of a robotic video device in the 430-450 MHz band, ReconRobotics filed an Opposition to the ARRL's Petition, declaring that, among other things, the ARRL did not follow proper procedure when submitting it. On April 16, ARRL General Counsel Chris Imlay, W3KD, filed a reply, asking the Commission to "reconsider, rescind and stay the ReconRobotics waiver and the effectiveness of the Order" in accordance with the ARRL's Petition for Reconsideration. Read more on the ARRL's reply here <http://www.arrl.org/news/arrl-files-reply-with-fcc-over-reconrobotics-opposition-to-league-s-em-petition-for-reconsideration>.

==> ARRL FOUNDATION AWARDS PRESTIGIOUS GOLDFARB SCHOLARSHIP TO KYLE EBERSOLD, KB1MNN

The Board of Directors of the ARRL Foundation proudly awarded the 2010 William R. Goldfarb Memorial Scholarship to Kyle Ebersold, KB1MNN, of Holland, Massachusetts. Kyle is a senior at Tantasqua Regional High School in Fiskdale, carrying a 4.31 GPA. He was first licensed in August 2005, holds a General class license and is a member of several Amateur Radio organizations including the ARRL, the Hampden County Radio Association and FISTS. He operates SSB, CW and PSK31 with most contacts on 17, 20, 40 and 80 meters. Kyle's interest in ham radio began in December 2004 when he received an SWL radio as a gift. Inspired by stories from his grandfather -- who operated in the 1960s as a Novice -- Kyle was bitten by the bug! He plans to attend Bryant University in Smithfield, Rhode Island where he will pursue studies in business. Applications for the Goldfarb Scholarship and other ARRL Foundation Scholarships are accepted each year beginning October 1 and ending February 1 for the academic year that starts the following August/September. Read more here <http://www.arrl.org/news/arrl-foundation-awards-prestigious-goldfarb-scholarship-to-kyle-ebersold-kb1mnn>.

==> ARRL PUBLICATIONS: QEX -- THE MAY/JUNE ISSUE

The May/June issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. QEX is edited by Larry Wolfgang, WR1B. Subscribe to QEX today. Read more here

<http://www.arrl.org/news/qex-the-may-june-2010-issue>.

==> SOLAR UPDATE

Tad "The early mist had vanished and the fields lay like a silver shield under the Sun <http://www.americanliterature.com/Wharton/EthanFrome/10.html>" Cook, K7RA, reports: A haunting specter from the past -- a Sun with no spots -- returned this week. As of Wednesday, we've seen seven days with no spots, a quiet Sun unseen since early December. A spot may be emerging in the solar northeast quadrant, and NOAA and USAF predict a rising solar flux of 76, 78, and 78 for April 22-24, followed by 80 for nine days, so perhaps this will turn around. Look for more information on the ARRL Web site on Friday, April 23. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Edith Wharton's Ethan Frome <http://www.americanliterature.com/Wharton/EthanFrome/EthanFrome.html> (Chapter 8).

==> ARRL FIELD DAY : ARRL PUBLIC RELATIONS COMMITTEE TO HOST FIELD DAY WEBINAR

The ARRL Public Relations Committee -- in conjunction with the ARRL's Atlantic Division -- will host a "webinar" -- an interactive Web-based seminar designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Thursday, April 22 at 9 PM EDT, join ARRL Media and Public Relations Manager Allen Pitts, W1AGP, along with ARRL Field Day Manager Dan Henderson, N1ND, and members of the League's Public Relations Committee as they tell you how to use ARRL Field Day to bring attention to Amateur Radio in your area. Learn how to set up a Field Day publicity calendar, invite elected officials and dignitaries, get proclamations issued, post your Field Day event on local media outlets and community bulletin boards, get audio and video PSAs on local radio and TV stations, how to use newer social networks like Facebook and Twitter and more to draw people to your Field Day event. Click here <https://www1.gotomeeting.com/register/932645064> to register for this informative, interactive Internet meeting.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week, the 10-10 International Spring Contest, the SP DX RTTY Contest, QRP to the Field, the Florida QSO Party and the Nebraska QSO Party are April 24-25. The SKCC Sprint is April 28. Next week, the Microwave Spring Sprint (local time) and the AGCW QRP/QRP Party are May 1. The 10-10 International Spring Contest (Digital), the 7th Call Area QSO Party, the Indiana QSO Party, the ARI International DX Contest and the New England QSO Party are May 1-2. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest

Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> W1AW NEWS: W1AW OFFERS CODE PRACTICE, BULLETINS VIA ECHOLINK

Audio from W1AW's CW code practices and CW/digital bulletins is now available using EchoLink via the W1AW Conference Server "W1AWBDCT." The 9:45 PM ET phone bulletin is currently unavailable via W1AWBDCT. The audio is sent in real-time and runs concurrently with W1AW's regular transmission schedule <http://www.arrl.org/w1aw-operating-schedule>. According to W1AW Station Manager Joe Carcia, NJ1Q, this server is currently at an experimental stage: "Since the server is located at ARRL -- and uses the ARRL's Internet connection -- there may be an issue as to how many users can connect to W1AWBDCT via EchoLink. The current number of connections is set to 350. If the current system can properly handle these connections without adversely affecting the performance of the conference server, this number will be bumped up higher." All users who connect to the conference server are muted. Please note that any questions or comments should not be sent via the "Text" window in EchoLink. Please send any questions or comments via e-mail <w1aw@arrl.org>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, April 25, 2010, for these online course sessions <http://www.arrl.org/courses-training> beginning on Friday, May 7, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Antenna Design and Construction; RF Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1706 - April 23 2010

Amateur Radio Newsline report number 1706 with a release date of
Friday, April 23rd, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams are true first responders at a
landslide in Rio de Janeiro, the volcanic eruption in Iceland delays an
IARU meeting, two new ham radio organizations are announced at the
International DX Convention in California and 800 attend a ham radio
reception at NAB in Las Vegas. All this and more on Amateur Radio
Newsline(tm) report number 1706 coming your way right now.

RESCUE RADIO: HAMS RESPOND TO RIO STORMS AND LANDSLIDE

Ham radio operators in Brazil responded to the recent emergency caused
by severe rainstorms in the region near Rio de Janeiro. Bill
Pasternak, WA6ITF, is in the newsroom with the details:

--

According to Marcio Ribeiro, PY1RJ, director of Teaching for the Brazilian
Amateur Radio League, beginning on Tuesday, April 6th a group of ham radio
volunteers went on duty. This, to assist in communication between the
people of Rio and the citys public agencies.

Ribeiro says that days of rain caused a landslide for which radio amateurs
became what amounts to true communications first responders. He says
that some 10 hams immediately set up a network with each having a specific
duty. One was assigned the fire department, another for the Civil Defense,
yet another for the Military Police, and so on.

The major ham response was to the landslide where at least one home was
completely destroyed. On his way to that location PY1RJ warned two police
cars about the slide and the overall danger in the area. Ribeiro remained
at the disaster site as both a communicator and rescue volunteer.

M�rcio Chehab, PY1MNC was also the landslide site. Chehab, who maintains
of
electronic equipment, helped by calling ambulances from hospitals in the
region. He also kept in contact with radio amateurs in other cities who in
turn were in communications with relief agencies.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

In all, there were about 30 hams involved in this rescue radio response. Those outside the area helped by maintaining a ham radio communications infrastructure that included radio, the internet and telephones.
(G1, Southgate)

**

RADIO POLITICS: ICELAND VOLCANO CANCELS IN PERSON IARU REGION 1 MEETING

The volcanic eruption in Iceland has disrupted an International Amateur Radio Union Region 1 Executive Committee meeting slated for April 17th and 18th in Sofia, Bulgaria.

The IARU Region 1 website reports that many participants at the yearly meeting were unable to reach Sofia from various parts of the world. This, due to flight restrictions and cancellations caused by the volcanic ash at the altitudes commercial passenger jets fly.

In the end only five delegates were able to reach the meeting site. The rest are either stranded at a transit airport or were on the way back home by any possible means possible.

The gathering did finally take place, but by on-line web conference on Sunday April 18th. (IARU Region 1)

RADIO POLITICS: NEW WORLD WIDE RADIO OPERATORS FOUNDATION ANNOUNCED

There is a new player on the ham radio political and educational scene with the goal of improving the skills of amateur radio operators around the world,. This, by utilizing education, competition, advancement of technology and scientific research to promote international friendship and goodwill. It also wants to help prepare hams to better serve society in times of communication need. These are the lofty goals of the World Wide Radio Operator's Foundation, Inc. and it has the backing of some of the heaviest of the true heavyweights in the hobby. Amateur Radio Newsline's Norm Seeley, KI7UP, has the whose' who in this new game in town:

--

Although it was founded quietly back in 2009, the World Wide Radio Operator's Foundation, Inc. or WWROF was officially launched on Friday, April 16th at the 61st International DX Convention held in Visalia, California. And the groups Board of Directors reads like a whose-who in the world of amateur radio.

According to its leadership, the World Wide Radio Operator's Foundation was
created with the goal of advancing the skill and art of radio operating. The group's mission statement states that it is dedicated to improving the skills of amateur radio operators around the world, utilizing

education, competition, advancement of technology and scientific research, promoting international friendship and goodwill, and preparing them to better serve society in times of communication need. The World Wide Radio Operator's Foundation further believes that on-the-air contests provide a good test of operating skills and are of immeasurable value to amateur radio overall.

The groups is made up of a group of well-known and very highly respected DX'ers, contesters and public service operators. This includes Chairman Doug Grant, K1DG; Vice Chairman John Dorr, K1AR; Treasurer Ralph Bowen, N5RZ and Secretary Tom Lee, K8AZ. Other board members are Bob Cox, K3EST; Tim Duffy, K3LR and Mark Beckwith, N5OT.

In addition, the organization has an Advisory Committee that includes Ken Wolff, K1EA; George Fremin, K5TR; Randy Thompson, K5ZD; Trey Garlough, N5KO; and Larry "Tree" Tyree, N6TR.

Among other things, the group says that it intends to support high impact operating-oriented projects. These include training activities and content, contest administration improvements, recruitment programs for new contesters and deployment of state-of-the-art technologies for enhanced log checking or simply improved awards programs. They also plan on establishing an equipment donation program for young contesters and those radiosports oriented hams residing in third world nations.

In looking at the overall structure the World Wide Radio Operator's Foundation appears to have adopted some of the finer points of organizations like that of the Radio Club of America, the Quarter Century Wirerless Association, major DX and contest groups and even the ARRL and put them all under one roof. Its then added an emphasis on High Frequency radiosports as an operational training ground. The only questions are will this approach succeed and if it does, what will its long term affect be on the overall hobby.

The World Wide Radio Operator's Foundation is incorporated as a non-profit organization in the state of Ohio, and is pursuing tax-exempt status under Section 501(c)3 of the Internal Revenue Code so that donations made to it will be tax-deductible.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale

--

More information about the World Wide Radio Operator's Foundation can be found at www.wwrof.org. (WWROF release)

**

RADIO POLITICS: NEW HAM RADIO ANTENNA LITIGATATION ASSISTANCE ORGANIZATION FORMED

Radio amateurs involved in the struggle to secure reasonable accommodation for amateur radio antennas have formed a new California public-benefit corporation. This, to receive tax-deductible donations from those wishing

help support litigation against local jurisdictions that ignore federal and state preemption statutes.

Chief Financial Officer Marty Woll, N6VI, announced at the recent International DX Convention that the Amateur Radio Antenna Defense Foundation, or ARADF, has been approved by the Internal Revenue Service as a public charity under Section 501(c)(3). This means donations to it are tax deductible.

According to Woll, turning to the courts can be prohibitively expensive for the radio amateurs while cities have taxpayer-funded attorneys on staff, giving them the upper hand. The goal of ARADF is to help level the playing field with financial assistance that will allow deserving antenna lawsuits to go forward.

It should be noted that the ARRL has a committee that has helped fund antenna litigation around the country, but it focuses primarily on cases that have reached the appellate level. The new organization will concentrate on lower-court cases. Its web site is currently under construction. (ARADF)

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the AA6DP repeater of the Catalina Amateur Repeater Association serving the Southern California coastline from 26 miles across the sea.

(5 sec pause here)

**

ENFORCEMENT: OFCOM ACTS AGAINST SCOTLAND REPEATER JAMMING

Jamming of Central Scotland's repeaters has brought enforcement action from UK telecommunications regulator Ofcom. Jeramy Boot, G4NJH, is in Nottingham with more:

--

Following the ongoing jamming and abuse problems on a number of Central Scotland FM Group repeaters, a meeting has taken place between Ofcom, the repeater group and the RSGB to discuss options to address the problem.

Ofcom has indicated that the problem is under active investigation and as a result enforcement action has been taken against one individual resulting in the forfeiture of equipment and a number of others being warned of their conduct.

The investigations are still ongoing and Ofcom has asked that any evidence of abuse is in the first instance forwarded to GM8HBY to co-ordinate information rather than create duplicate reports.

Ofcom have also reminded repeater users not to respond to any abuse or jamming heard on the repeaters.

I'm Jeramy Boot, G4NJH

--

It appears that bringing repeater jammers to justice in the British Empire may be a lot swifter than over here in the USA. (GB2RS)

**

ENFORCEMENT: FCC ASKS ARRL TO INSTRUCT OO'S ON 14.275 MHz ISSUE

The ARRL at the request of the FCC has issued an advisory to all of its Official Observers regarding the situation on and near a specific frequency in the 20 meter band. In his note to the OO's, Chuck Skolaut, K�BOG, who is the Leagues Field & Regulatory Correspondent wrote and we quote:

"Laura Smith at the FCC has asked me to relay the following information regarding 14.275 and what you may be hearing. She wanted all OO's to be aware of what is happening.

"There is quite an interesting situation developing at 14.275 and the surrounding frequencies. For some reason, a Canadian operator has elected to play a recording of a conversation that took place back in 2006 between him and another licensee -- N1FM. Brian Crow (K3VR) was not involved in that conversation -- although the Canadian licensee is currently trying to ascribe the comments of N1FM to Brian. Again let me reiterate, Brian Crow, K3VR, was not involved in that conversation back in 2006." -- End quote.

Skolaut's statement was first published in the newsletter of the Official Observer Coordinator Ohio Section edited by Rick Swain, KK8O. The Canadian station in question was not identified in the message to the Official Observers.

The original statement is on-line at http://www.arrl-ohio.org/ooc/feb-2010.html (ARRL OHIO Official Observer Website)

**

ENFORCEMENT: FCC ISSUES $25000 TO PHONEJAMMER.COM FOR U.S. SALES

The FCC has notified a United Kingdom-based firm known as notified Phonejammer.com of its Apparent Liability for Forfeiture in the amount of $25,000. This, for marketing in the United States of radio frequency devices designed to intentionally interfere with licensed cellular and Personal Communications Services.

Phonejammer.com was originally issued a Citation by the FCC after it discovered instances where businesses in the United States were found using the devices. In both cases the sale of the items was traced directly to the Phonejammer.com website. In its reply to the citation, Phonejammer.com through its attorney claimed that it does not market to the United States,

and has not shipped or distributed units to the United States. This despite the fact that the FCC has receipts from Phonejammer showing that such purchases were made.

In affirming the fine the FCC said that regardless of what Phonejammer may claim, the evidence clearly demonstrates that on at least two occasions within the past year, Phonejammer has sold and shipped phone jamming units to individuals in the United States. One was bought by an individual in Carrollton, Texas on April 21, 2009 and the other by an individual in Port St. Lucie, Florida on September 24, 2009. Both purchases were made through the Phonejammer.com website and that Phonejammer shipped both devices to addresses in the United States.

Phonejammer.com was given the customary 30 days to pay the fine or to file an appeal. (FCC)

THE SOCIAL SCENE: 800 ATTEND NAB HAM RADIO RECEPTION IN LAS VEGAS

The Ham Radio Reception at this years National Association of Broadcasters Convention in Las Vegas, Nevada is reported to have been an overwhelming success. Over 800 hams turned out for the gathering held Wednesday evening April 14th at the Las Vegas Hilton Hotel.

About $14,000 in door prizes handed out this year. In addition to ham radio suppliers several broadcast and industrial suppliers such as Harris and Eimac came through with prizes as well. Perhaps the biggest in sheer size was a tower from Universal tower valued at $3500.

This years ham radio reception was again hosted by Heil Sound Ltd. and Broadcast Supply Worldwide. The latter is better known by its initials of BSW. (ARNewsline(tm))

**
THE SOCIAL SCENE: N6R FROM THE REAGAN LIBRARY FOR FIELD DAY 2010
And for the tenth consecutive year, the callsign N6R will operate as a Field Day station from the grounds of the Ronald Reagan Presidential Library and Museum in Simi Valley, California. This, to commemorate the lives of President Ronald and Mrs. Nancy Reagan.
Joining the Ventura County Amateur Radio Society which is the primary organizer will be a number of other local groups. These include the Amgen Amateur Radio Club. The Conejo Valley Amateur Radio Club the Simi Settlers Amateur Radio Club and the Ventura County Amateur Radio Club. And a late addition is the Hollywood Hills QRP Contest Club with be joining this year as well.
N6R will operate from 1800 UTC on June 25th to 1800 UTC on June 27th with up to 16 stations on all of the High Frequency bands. Also look for the N6R call on the VHF and UHF bands from 6 meters on-up using many modes including fast-scan ATV and satellite operations.
If you are lucky enough to make contact with N6R this year, please QSL with an Self Addressed Stamped Envelope to VCARS, in care of Peter Heins, N6ZE, 1559 Norwich Ave., Thousand Oaks, CA, 91360 (N6ZE, W6AQ)

HAMVENTION NEWS: NEW DISCOVER HOMEBREW DEMONSTRATION AREA

The Dayton Hamvention and the Midwest VHF/UHF Society have teamed up to host the first ever Discover Homebrew demonstration area at Hamvention 2010.

Located in booths 179, 180, 191, 192, and booths 203, 204, 215, and 216 in the North Hall, there will be 6 eight foot tables available to accommodate many homebrewers and their gear simultaneously. The Hamvention will provide AC power along with H-F and possibly VHF antenna access. All you need to do is bring your favorite home built project, set it up and demonstrate it to anyone who is interested.

This demonstration area will operate on an open schedule basis. This means that you can be there when you want for as long as you want, space permitting. A sign-in sheet will be provided where you can record your project description, contact information and times you will be providing a demonstration.

The only restriction is that no sales of these demonstration items will be permitted as a courtesy to paying exhibitors. However, if you have commercial plans for your project, it is fine to go ahead and talk about them.

More about this and other Hamvention happenings is on line at www.hamvention.org. (Dayton Hamvention®)

NAMES IN THE NEWS: HEIL SOUND NAMES SARAH HEIL ITS NEW PRESIDENT

Some names in the news. First up congratulations to Sarah Heil, the wife of Heil Sound Ltd. Chief Executive Officer Bob Heil, K9EID, on her being named company president.

Sarah Heil holds two degrees from McKendree University in Lebanon, Illinois. She began working at Heil Sound in Informatioin Technology in 1999 and has played in increasingly active role in the company's activities ever since.

No stranger to the company's workload and business philosophies, she can often be found in the shipping department helping to meet deadlines for product delivery. She is also a very visible face of the company at trade events. Because of this she has gained industry wide respect from dealers and customers alike.

Heil Sound Ltd. was founded as a sound reinforcement specialty company by Bob Heil back in 1966. It has since evolved into one of the worlds leading manufacturers of cutting edge technology dynamic microphones for live sound, recording and two-way communications. In her new role Sarah Heil will oversee all aspects of Heil Sound's financial management as well as the company's long-term strategies. (RW)

**

NAMES IN THE NEWS: RSGB HONORS BATH BUILDATHON HAMS

The Radio Society of Great Britain has awarded the Kenwood Trophy for outstanding contribution to amateur radio training to the Bath Buildathon event and the follow-up DVD that its sponsors have produced. All six of the Bath Buildathon crew received certificates of merit for their part in this special event. To date, over 60 copies of the DVD have been sent out across the U-K and abroad. The award presentation took place at the RSGB's recent Annual General Meeting. (GB2RS)

WORLDBEAT: HAM TO WALK ACROSS AUSTRALIA - AGAIN

The ham who once walked Australia North to South is planning to do it again. But this time Jeff Johnson VK4XJJ plans to go across that nation. Trevor Tage, VK4BT, has more from down-under:

--

Well Jeff has another little walk planned but this time it is from east to west! right across Australia!!

The Royal Flying Doctor Service has approached Jeff to complete this huge fund-raising walk on their behalf. They will be providing support along the way and the Gympie Communications & Electronics Group will be Jeff's official East Coast Amateur Radio contact station.

The walk is being planned to commence early April 2011. With anticipated radio and TV coverage, 'Jeff's Walk' will once again raise money and awareness for a good cause and help to promote and demonstrate Amateur Radio.

--

One thing you can be sure of is that ham radio will once again be an important part of VK4XJJ's long distance walking odyssey. (WIA News)

**

HAM HAPPENINGS: ARMAD 2010 ON MAY 29

ARMAD an acronym for Amateur Radio Military Appreciation Day is slated for this coming May 29th. Amateur Radio Military Appreciation Day is a chance

for hams to show their support for the United States men and women stationed world wide in defense of our nation, its citizens and our liberty. Information for sites near you planning to take part in Amateur Radio Military Appreciation Day can be found at www.armad.net/eventinfo.htm. Questions and comments go to event planner Emery McClendon, KB9IBW by email to armad07(at) yahoo dot com. (ARMAD)

WORLDBEAT: SAVE ANALOG RADIO CAMPAIGN BEGINS IN THE UK

A ham radio magazine in the United Kingdom wants to try to halt that nations transition to all digital radio broadcasting. VK2LAW, has the details:

--

A UK National Campaign to maintain traditional analogue broadcast radio for everyday listening and for use in times of national emergencies is trying to spring up.

The pressure is on to replace traditional analogue radio broadcasting with Digital Audio Broadcasting (DAB) radio. Indeed, the UK Government has provisionally set 2015 as the date when the world wide standard frequency modulation services are to disappear from 87.5 to 108MHz in the v.h.f. f.m. band), to be replaced with DAB radio transmissions. Eventually, the analogue services on long waves at 198 kHz and medium waves from 500kHz to 1.6MHz will also be replaced by digital transmissions.

If you do want to know more you can contact Rob G3XFD, oh and Rob is actually Dr. Rob B Mannion the Editor of Practical Wireless magazine.

I'm Jason, VK2LAW.

--

For those not aware, Practical Wireless is Great Britain's best selling independently published amateur radio magazine. (WIA News)

HAM RADIO IN SPACE: AMSAT DEVOTES SECOND AO-51 REPEATER TO SCOUTING

AMSAT North America says that AO-51 is now running two FM repeaters to support contacts by the Boy Scouts celebrating their 100th anniversary this week. The second repeater's uplink is 145.88 with a downlink on 435.150 MHz. Its available primarily for Scouting stations but when not in use by the Boy Scouts, other low power stations are welcome. AMSAT defines low power as 10 watts or less, and uplinking using omnidirectional or handheld antennas only.

Meantime, the main repeater on AO-51 is still open for general traffic and the 67 Hz tone access testing continues. That uplink: 145.920 MHz and downlink at 435.300 MHz for general contacts. Both orbital repeaters operate narrowband FM. Please see http://www.amsat.org/amsat-new/echo/CTNews.php for the latest AO-51 Control Team News. (AMSAT)

**

ON THE AIR: EURPOES EURODAY ON THE AIR FROM SPAIN MAY 1 - 20

On the air, listen out for the special callsigns AO1EU, AO2EU, AO3EU, AO4EU, AO5EU, AO6EU, AO7EU, AO8EU and AO9EU between May 1st to the 20th. This, to commemorate the 60th anniversary of Robert Schuman's presentation of his proposal for the creation of what is now known as the European Union.

The activity is organized this year by Spains EA Digital Federation under the auspices of the European Radio Amateurs' Organization. All bands and all modes will be used. A special QSL card will be available only via EuroBureauQSL at www.eurobureauqsl.org. (Southgate)

**

DX

In DX, word that G5XW will be active from Malta as 9H3XW between June 12th to the 19th. His operation will be on the H-F bands using SSB with no set times or frequencies. QSL via his home callsign, direct only.

And listen out for VK6DXI to be active as 9M8DX/2 from Kuala Lumpur between April 20th and the 23rd and the 26th to the 29th. In between he will operate from Tioman Island between April 24th and the 26th. His activity will be focused on 30, 17 and 12 meter CW. QSL via SP5UAF, either direct or via the bureau.

RD3AF says that he will be on from the Canary Islands from May 29th to the 30th for this years CQ World Wide WPX CW Contest. QSL via UA3DX.

IW1PRT will be active from Liechtenstein portable HB0 between April 30th and May 1st. He usually operates on 160 through 10 meters including the WARC bands. QSL via his Manager IZ1MKR
via EURAO Bureau.

Lastly, W2LPL will be active from Antigua as V26LPL between April 26th and the 30th on 20 meters using 100 watts. QSL via W2LPL.

(Above from various DX news sources)

**

THAT FINAL ITEM: SHOCK ABSORBER POWER SUPPLY

And finally this week, imagine being able to power your radio gear and recharge your car's battery with power derived from your auto's shock absorbers. Well its more than a pipe dream as we hear from Amateur Radio Newsline's Frank Haas, KB4T:

--

In a recent study, mechanical engineers from the State University of New York designed and tested a retrofit regenerative shock absorber that recovers a vehicle's vibration as energy. The researchers built a small scale prototype of the regenerative shock absorber, and demonstrated its ability to harvest 2 to 8 watts of power during typical driving conditions. This, at a speed of about 45 mph.

The researchers predict that a full-scale system on a four-wheel car should be able to recover up to 256
watts under real world driving conditions. They also believe the ability to harvest approximately 64 watts per wheel will increase considerably when the system is used on irregular or poorly paved roadways.

For the Amateur Radio Newsline. I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

In their research the scientists also discovered that the power regenerated by this system is proportional to the square of the magnetic flux across the coils in the shock absorber system. Consequently, increasing the flux by a factor of two quadruples the peak power output. More on this discovery is on line at
http://iopscience.iop.org/0964-1726/19/4/045003/ (Elektor E-Magazine and WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard

Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm David Black,
KB4KCH, saying 73 and we thank you for listening.

That is a blatant lie. Something you just made up.

Please give examples. Please tell us even ONE real-world city, town or village where an EXISTING property (whose owner has clear legal title), has to "acquire" a covenant in order to meet local building codes or zoning restrictions.

The very fact you even make such a claim shows that you have no understanding whatsoever of concepts such as "title" "deed" and "covenant", and how those apply in real property law.

Why do you keep posting this nonsense? You have zero credibility. The only thing that you are "proving" to anyone who reads these groups is that you are a complete and utter whack job.

Are you REALLY such and Idiot, that you think your interpretation of the
Statute is the way it is... what a Morooon... Bugs Bunny Definition...

the simple FACT is that any unlicensed Part 15 Transmitters and Receivers
MUST NOT interfere, and MUST accept Interference for any Licensed
Transmitters in the same Band, PERIOD. That is Federal Statue as part of
Title 47... This supersedes ANY State or Local Restriction or Statute,
that some Yahoo local Politico thinks would be nice to pass. All one
would have to do when the case came before a Judge, IF it EVER Went That
Far, would be to trout out the Title 47 Statute and the Judge would
dismiss the Case Post Haste....

> Furthermore, the news said any rfi.
>

>
>> don't think it should be legal to use anything that requires you taking your hands off the wheel and eyes off >>the road.

Then you have just outlawed all cars with a manual transmission/
stickshift and half of the automatic transmission cars which have the
gearshift in the same place stickshifts do instead of on the steering
wheel.

so no, making it illegal to have only one hand on the steering wheel
yo prevent cellphone and two way radio use while driving also makes
most cars theirselves illegal.

The only cars we have here are automatics with the gearshift in the
same place as stickshifys so you HAVE to take at least one hand off
the steering wheel in order to follow the laws about shifting.

I just read in another newsgroup a post by a persn who lives in a hoa
He can not put up an antenna for broadcast reception even though
federal law says hoas can not prevent people from putting up antennas.

the way the hoa got around the dederal law is by outlawing him and
everyone from putting up any antenna masts at all..

Since they outlawed the antenna masts and not the antennas, as far as
the hoa is concerned, they'tre not breaking any of the federal laws
about them not being allowed to ban people from putting up tv
antennas.

So what is it that these clowns can do to you if you own the property
why are you so scared of them
put up a fucking big fence and get an even bigger dog
then tell them to go fuck them selves.

Either that or fucking move.

Why would anyone live in such a shitty place and have their life
controlled by fun Police

>
<snip>

You obviously know just a tiny bit about zoning ordinances, so you take this
a step or two beyond that and hope to instill fear in the uneducated.
There is NO municipality or county agency in this country that will
"condemn" a house, any house, for non-compliance to a code that exists only
of your creation.
A few municipalities have attempted to enact local ordinances that control
dish antennas...such as mandating that the satellite dishes have to be
located toward the back of the house, but the FCC has overruled those
ordinances and rendered the city's ordinances unenforceable.
So what you are doing is "playing" with others in this group by fomenting
lies, lies and more lies.

There is NO nationwide code requirement that, "all houses to now have cc&rs
which require a homeownner (SP) association."
Might I also enlighten everybody that Govt. agencies do NOT and cannot
enforce HOA rules.
HOA rules, as per deed restrictions, can ONLY be enforced by the
neighborhood association...and even at that the Association has to hire an
attorney to file a civil suit against the alleged "offending" party.
Enforcement of HOA regulations is strictly a civil matter, NOT a criminal
matter.

Condemnation of a structure MUST meet stringent, legal guidlines before a govt. agency, such as a Building Dept. can step in. The first and formost of these guidelines is that the structure MUST be a threat to life and limb or the public safety of a community as a whole.

So, yes. If a Ham wants to get from beneath restrictive HOA rules, by all means that Ham should move to an area where there are no such rules. Such rules are plainly included in the purchase agreement...as deed restrictions that the buyer should be aware of before making a purchase.

Damn, Radioguy. Which Planning Department did you get tossed out of?

1023. Roger asks Dr. Phil

Roger. How is the medication I prescribed doing for those infected knee scabs you have?
I can give you one more 30 day prescription, but as I warned, you are absolutely going to have to stop going down on Lloyd.

Your knee infections will only get better if you sit on a chair and take it easy. Make Lloyd stand in front of you for a change.
You can still pleasure Lloyd, but doing it while kneeling is not advised.

You are getting older, Roger, and putting undue stress on your knees is not advisable at this stage in your life.

And Roger? Lloyd tested clean, so you two are good to go.

And as per your question? It will probably be OK for you to swallow. That option is entirely up to the two of you.

==> HAMVENTION®: DX ACTIVITIES ABOUND AT ARRL EXPO AT DAYTON
HAMVENTION®

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N,
reports that plans for a plethora of DX activities at the ARRL EXPO --
part of the 2010 Dayton Hamvention -- are wrapping up. "We are excited
about the activities that will be taking place," he said. "Visitors to
the EXPO will see a lot of activities relating to DX, including DXCC
card checking, a chance to drop off QSL cards for the ARRL Outgoing QSL
bureau and even an expanded International Amateur Radio Union (IARU)
area." The Dayton Hamvention will take place May 14-16 at Hara Arena,
located near Dayton, Ohio. Read more here
<http://www.arrl.org/news/dx-activities-abound-at-arrl-expo-at-the-dayton-ham
vention>.

==> FCC NEWS: FCC SEEKS COMMENTS ON NEWLY PROPOSED RULES FOR AMATEUR
RADIO OPERATORS AND EMERGENCY DRILLS

<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>
In March, the FCC released
<http://www.arrl.org/news/fcc-issues-notice-of-proposed-rule-making-on-govern
ment-disaster-drills-and-amateur-radio>
a Notice of Proposed Rulemaking (NPRM
```

<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>)
(Docket #10-72) that proposed to amend the Part 97 rules --
specifically 97.113(a)(3) -- governing the Amateur Radio Service. The
new rules would provide that, under certain limited conditions, Amateur
Radio operators may transmit messages during emergency and disaster
preparedness drills, regardless of whether the operators are employees
of entities participating in the drill. On April 22, a summary of the
NPRM was published in the Federal Register
<http://edocket.access.gpo.gov/2010/pdf/2010-9092.pdf> and the FCC is
seeking comments on it. Comments must be filed on or before May 24,
2010 (30 days after publication in the Federal Register); reply
comments must be filed on or before June 7, 2010 (45 days after
publication in the Federal Register). Instructions on how to file
comments are listed beginning on page 5 of the NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>.

==> LEGISLATIVE ACTIONS: MORE SUPPORT FOR HR 2160

Last week, two more Congressional Representatives -- Greg Walden,
W7EQI (R-OR-2) and Jeff Fortenberry (R-NE-1) -- pledged their support
for HR 2160
<http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&doc
id=f:h2160ih.txt.pdf>,
The Amateur Radio Emergency Communications Enhancement Act of 2009,
bringing the total number of cosponsors to 39, including original
sponsor Sheila Jackson-Lee
<http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bil
l-in-congress>
(D-TX-18). HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael
Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), Jo Bonner, (R-AL-1), John
Boozman (R-AR-3), Madeleine Bordallo (D-Guam), André Carson (D-IN-7),
Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Scott Garrett (R-NJ-5),
Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey
(D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Ron
Klein, (D-FL-22), Tom Latham (R-IA-4), Zoe Lofgren (D-CA-16), Blaine
Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Michael E. McMahon,
(D-NY-13), Cathy McMorris Rodgers, (R-WA-5), Charlie Melancon (D-LA-3),

==> THE DOCTOR IS IN: WINDOW LINE AND COAX LOSS

Andy Anderson, AE5EA, of Placitas, New Mexico, has an old three band, three element quad that was built by a company no longer in business. This quad was designed to be fed with coax to a 1:1 balun. Andy told the ARRL's Doctor that he plans on putting the quad back up and was wondering if he can feed it with 450 Ω window line to avoid the loss in over 180 feet of coax.

Here's what the Doctor had to say:

There are two approaches that should work with the window line (assuming the feedpoint's impedance is 50 Ω -- a quad is typically a bit higher).

- Feed the driven element directly with the window line. At the station, you will then need a wide range antenna tuner that can match balanced loads. This could be a regular unbalanced one with a balun on the output. Note that the impedance will be neither 50 nor 450 Ω, but will vary widely due to the transformation through the mismatched line, which will be different on every band. The 9:1 SWR with 180 feet of typical window line will result a bit less than 1 dB loss at 28.5 MHz and 0.67 dB on 14 MHz.
- Use a 9:1 balun at each end of the window line. You may want to use coax (with a coil choke) from the antenna to below the rotator. Then attach a balun (waterproof units are available or you can build your own). Run the window line to (or near to) the station and use another 9:1 balun and coax to the radio. The two baluns combined will have less than 1 dB loss. The matched window line will have 0.2 dB additional loss on 14, 0.26 dB on 28 MHz.

· Use a 9:1 balun at each end of the window line. You may want to use coax (with a coil choke) from the antenna to below the rotator. Then attach a balun (waterproof units are available or you can build your own). Run the window line to (or near to) the station and use another 9:1 balun and coax to the radio. The two baluns combined will have less than 1 dB loss. The matched window line will have 0.2 dB additional loss on 14, 0.26 dB on 28 MHz.

Another thought is to use really good coax. 180 feet of LMR 400 or Belden 9913 coax, for example (both fit standard UHF connectors), will have a matched loss of 1.2 dB at 28.5 MHz, but only 0.8 dB on 20 meters. While not cheap, it probably will cost less than the window line plus two baluns. A section of special "LMR Flex 400" can be used around the rotator.

The performance differences among the various approaches are small. If I were starting from scratch, I think I'd go with low loss coax, based on simplicity and ease of operation.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst> , the official journal of the ARRL.

==> MORE IMPROVEMENTS TO THE ARRL WEB SITE

<http://www.arrl.org> As more and more people use the new ARRL Web site <http://www.arrl.org/>, we are finding some minor bugs in the system and fixing them. Here are the latest improvements to the Web site:

- A link to your Section News is located right underneath the "Edit Your Profile" link at the top of the page. Just click on "Section News" and you will be directed to the appropriate page. This link is only available on the home page of the site.
- Users no longer have to log in each time they access the Web site. The site now remembers your log-in information and you will automatically be logged in on each visit.
- The DXCC standings and Honor Roll <http://www.arrl.org/dxcc-standings>, DXCC application <http://www.arrl.org/files/file/DXCC/dxccapp.pdf> and the DXCC order form <http://www.arrl.org/files/file/DXCC/dxccitem.pdf> are now available online.
- You can now register hamfests and conventions <http://www.arrl.org/hamfest-convention-application> on the Web site.
- Find an Amateur Radio licensing class <http://www.arrl.org/find-an-amateur-radio-license-class> or an exam session <http://www.arrl.org/finding-an-exam-session> near you. In earlier versions of the Exam Session Locator Service, all exam sessions were listed as "no walk-ins." This has now been fixed.
- An amateur's current license class is now listed in the Call Sign Search <http://www.arrl.org/fcc/search>. Extraneous numbers in the amateur's FRN have also been removed.

<http://www.arrl.org/images/view/News/SectionNews.JPG> "With a Web site as large as the ARRL's, we are constantly making improvements and changes," said ARRL Chief Operating Officer Harold Kramer, WJ1B. "We have received a lot of feedback from members and are trying to implement many of these ideas. One of our main goals at the moment is optimizing the club search function. We also understand that the Web site search function is not as functional as we would like. In time, once the Google engines crawl through the site and catalog it, the search function should greatly improve. We appreciate your patience and understanding as we work through the issues."

==> ARRL PUBLICATIONS: CHECK OUT THE MAY/JUNE ISSUE OF NCJ

The May/June issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle -- you will find something in NCJ just for you. In addition to the

contest-related articles, there are all the regular columns and features you expect from NCJ: "Workshop Chronicles" by Don Daso, K4ZA; "Contest Tips, Tricks and Techniques" by Gary Sutcliffe, W9XT; "VHF-UHF Contesting" by Jon Jones, N0JK; "RTTY Contesting" by Don Hill, AA5AU; "Propagation" by Carl Luetzelschwab, K9LA; "Contesting on a Budget" by Ralph Bellas, K9ZO; "Software for Contesters" by Pete Smith, N4ZR, and "Contesting 101 "by Kirk Pickering, K4RO. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in their shack -- subscribe today! Read more here <http://www.arrl.org/news/check-out-the-may-june-issue-of-em-ncj-em>.

==> SOLAR UPDATE

<http://sdo.gsfc.nasa.gov/gallery/firstlight/> Tad "The sunlight struck them with an ever-varying rainbow bloom as they moved <http://arthursclassicnovels.com/doyle/lostw10.html>" Cook, K7RA, reports: After 13 days of no sunspots, new region 1063 appeared late on Wednesday, April 28. Unknown at this point (early Thursday) is how strong or fast-growing this new sunspot region will be. Earlier region 1062 was only with us for three days, April 12-14. Look for more information on the ARRL Web site on Friday, April 30, including some e-mails about the European ash cloud and the possibility that 72 MHz propagation was depressed because no aircraft were in the sky. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Sir Arthur Conan Doyle's The Lost World <http://arthursclassicnovels.com/doyle/lostw10.html> (Chapter 15).

==> THIS WEEK ON THE RADIO

This week the Microwave Spring Sprint (local time) and the AGCW QRP/QRP Party are May 1. The 10-10 International Spring Contest (Digital), the 7th Call Area QSO Party, the Indiana QSO Party, the ARI International DX Contest and the New England QSO Party are May 1-2. Next week, the FISTS Spring Sprint is May 8.The CQ-M International DX Contest and the VOLTA WW RTTY Contest are May 8-9. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the

CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1707 - April 30 2010

CLOSED CUIRCUIT ADVISORY: A REPORT FROM THE AMATEUR RADIO SUPPORT FUND

This is a closed circuit advisory and no necessarily for air. I'm Bill Pasternak, WA6ITF, and I'm here with a financial update on Newsline.

First the good news. As we go to air this week, all the bills through the end of March have been paid. The bad news? As I prepare this report we have only about $220 in our account and come early May, there will not be enough to cover the April bills which will be in the $800 to $1000 range. In reality, not much different than in the months and years past.

In checking the PayPal account, a few moments ago, between April 4th to April 27th we have received only $60 in contributions. And when you deduct the fee charged by Pay Pal, our net income this month was only $57.34. Clearly that's just not enough to make ends meet. And that's also the reason I'm here making this report to you.

We do our part to hopefully bring you the news that you want to hear. But we need your help to keep going. As Amateur Radio Newsline is a 501(c)(3) not for profit corporation, to make a tax deductible contribution is easy. Either send it to us at the address you will hear at the end of this weeks newscast, or go to arnewsline.com ad click on the PayPal logo to make your contribution electronically. Whichever way you choose, the all volunteer staff of Amateur Radio Newsline joins me in saying a big "thank you."

That ends the closed circuit advisory. I'm Bill Pasternak, WA6ITF, and now here's Jim Davis, W2JKD, with this weeks report. Jim:

**

Amateur Radio Newsline report number 1707 with a release date of Friday, April 30th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The comment period begins on an FCC proposal to permit hams to communicate for their employers during emergency training drills, the dates for the 2010 Global Simulated Emergency Tests are announced, a Wisconsin town challenges the tower of a 10 year old ham who suffers from Cerebral Palsy and a phone call clears Radio Kuwait out of the 40 meter ham band. Find out the details on Amateur Radio Newsline(tm) report number 1707 coming your way right now.

RADIO LAW: COMMENT DATE SET IN WT DOCKET 10-72 ON USE OF EMPLOYEE HAMS INDRILLS

The FCC's Notice of Proposed Rule Making on providing communications on behalf of an employer during a government-sponsored emergency or disaster drill has finally been published in the Federal Register. Its now time for you to voice your opinion. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

On April 22, a summary of the Notice of Proposed Rule Making in WT Docket 10 - 72 was published in the Federal Register and starting the clock on the 30 day commentary period and 15 additional day Reply Comment period. Comments are due on or before May 24th with reply comments due by June 7th.

By way of background, back on March 24th, the FCC released the Notice of Proposed Rulemaking. It suggests amending the Part 97 rules to permit, under certain limited conditions for hams to transmit messages during emergency and disaster preparedness drills, regardless of whether the operators are employees of entities participating in the drill.

Current rules provide for amateur radio use during emergencies. At the same time, the rules -- specifically section 97.113 (a)(3) -- prohibits communications in which the station licensee or control operator has a pecuniary interest. This includes any communications on behalf of an employer, whether direct or indirect. Translated it means that even if a ham employee is off the clock he or she cannot take part in emergency training exercises.

The FCC says that while there are some exceptions to this prohibition, there is currently none that would permit amateur station control operators who are employees of public safety agencies and other entities, such as hospitals, to participate in drills and tests in preparation for emergency situations. Nor may they transmit messages on behalf of their employers during such drills and tests.

The FCC notes that public safety land mobile radio systems are the primary means of radio-based communications for emergency responders. But it goes on to add that experience has shown that amateur radio has played an important role in preparation for, during, and in the aftermath of natural and man-made emergencies and disasters.

The FCC says that amateur radio is often an essential element of emergency preparedness and response. Because of this, many state and local governments and public safety agencies incorporate amateur radio operators and their communication capabilities into their emergency planning. In this regard, some entities, such as hospitals, emergency operations centers, and police, fire, and emergency medical service stations, have

emphasized the participation of their employees who are amateur station operators in emergency and disaster drills and tests.

Based on what it terms as a public need, the FCC is proposing to amend Section 97.113 of the Amateur Service rules to provide that, under certain limited conditions, amateur radio operators may transmit messages during emergency and disaster preparedness drills. This, regardless of whether the operators are employees of government entities participating in the drill. It also seeks comments on whether certain other drills that are not sponsored by government agencies -- such as those conducted by hospitals -- should be included in the proposed exemption as well.

Again, comments on WT Docket 10 - 72 must be filed on or before May 24th with reply comments due by June 7th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Anyone planning to file on WT Docket 10 - 72 should completely read the Notice of Proposed Rule Making before submitting comments. You can access it
at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf)
(N1ND, ARRL, CQ Newsroom, ARNewsline(tm))

**

RESCUE RADIO: FCC GRANTS 97.113 WAIVER FOR HAWAII HURRICANE DRILL

Meantime, the FCC has granted the Vice Director of Civil Defense for the State of Hawaii Department of Defense a waiver for section 97.1123 of the Amateur Radio Rules. This, to permit participation of 5 hams directly in the agency's employ, and an unspecified number of others who are employees of other entities associated with emergency communications to take part in a hurricane preparedness exercise between May 24 and June 4th with ham radio operations slated May 29th and June 1st.

In approving the request, Scot Stone, who is Deputy Chief, Mobility Division of the FCC's Wireless Telecommunications Bureau noted that the public interest is served in facilitating amateur operations in support of this public safety exercise. As such, it warrants this limited waiver of Section 97.113 to permit transmission of communications by the amateur licensees on behalf of their employers on those dates. (FCC)

**

RESCUE RADIO: GLOBALSET 2010 DATES ANNOUNCED

The International Amateur Radio Union Region 1 Emergency Communications Group has announced that there will be two Global Simulated Emergency Tests this year. One to be held on the 15th of May and the other on November 13th.

GlobalSET is an opportunity to demonstrate how communications can occur across national borders. It also tests use the emergency Center of Activity Frequencies on the 80, 40, 20, 17 and 15 meter bands, and creates standardized practices for international emergency communications.

Registrations are now being taken for IARU member societies and emergency communications groups to participate in next month's GlobalSET. More is on-line a www.iaru-r1.org. (IARU Region 1)

**

WORLDBEAT: IARU INTRUDER MONITOR SYSYEMS CLEARS RADIO KUWAIT FROM 40 METERS

A phone call has ended Radio Kuwait broadcasting in the Amateur Radio 7 MHz allocation.

From April 12th to the 19th, the broadcaster had been transmitting programs in the Arabic language with up to S9+30dB signals. Its signal blocked almost 20 kHz of the 40 meter band from 7150 and 7190 kHz.

Soon reports began to surface of the Radio Kuwait broadcasts in the exclusive amateur spectrum and the matter was reported to the IARU Intruder Watch Monitoring System. Soon, many national coordinators had requested their telecommunications authorities to send International Complaints to the State of Kuwait.

But it was 9K2RR, the IARU Monitoring System Intruder Watch Coordinator in Kuwait who solved the problem. He made a call to Radio Kuwait, explained the situation and asked for a frequency change. And with additional support by DJ9KR, the broadcaster quickly complied. (IARU Region 1)

RADIO LAW: OHIO HAM DETAINED AT NC AIRPORT AFTER HE IS SEEN WITH FIREARM

Police in Ashville, North Carolina have charged a Ohio ham with going armed to the terror of the public. This after he was spotted at an airport parking lot. Mark Abramowicz, NT3V, tells us who the person is and explains what the charge means:

--

Joseph Sean McVey, K8JSM, is from the town of Coshocton, Ohio, northeast of Columbus and just south of Akron. McVey, in his posted QRZ.com biography, says he prefers to go by Sean.

The FCC database shows he was first licensed as a Technician in 2008 and upgraded to General in March 2009 and sought a Vanity call sign which just happens to match the initials of his name - Joseph Sean McVey.

McVey is 23 and was released Tuesday, April 27 on 100-thousand-dollars bond by authorities in suburban Asheville, N.C. where he was taken into custody on a misdemeanor charge of going armed to the terror of the public.

The attorney general's office in North Carolina says it essentially means he was carrying a gun for the purpose of terrifying others.

McVey was arrested on Sunday, April 25, near the Asheville Regional Airport just after Air Force One took off with President Obama and his family on board. They had been in the Asheville area on getaway weekend.

The Secret Service initially wanted McVey detained after law enforcement found him on airport property inside a car made up like a police vehicle with a light bar and siren. It was also equipped with police scanners and other radios.

On April 27, The New York Daily News quoted the Secret Service as saying it didn't consider McVey a threat and passed him off as a law enforcement buff.

The Coshocton Tribune and it's related publications did an exhaustive check on McVey, including examining postings on Facebook, MySpace and Twitter. It found McVey had posted two Tweets on Friday, April 23, from Limestone, N.C., just south of Asheville.

The FCC has a track record of revoking the licenses of amateurs who it considers displaying improper or unacceptable conduct clashing with the good character it expects of all licensed hams.

It's unclear whether the FCC will take any action regarding McVey's license.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

At the time of his arrest McVey did have a concealed weapons permit that had been issued in Ohio. That permit has been at least temporarily revoked pending the outcome of the case against him. If the charges are not dismissed and if he is convicted, McVey faces a maximum sentence of 120 days in jail. His next court appearance is scheduled for June 10th. (ARNewsline(tm), NT3V, various news reports)

RADIO LAW: WISCONSIN CITY CHALLENGES 10 YEAR OLDS TOWER AND ANTENNA

A Wisconsin's pre-teen ham who suffers from cerebral palsy could loose his tower and antenna system over a dispute with the city. But the family of 10 year old Samuel Markstrom, KC9POP, is fighting back by saying that their sons hobby has changed his life by building his self confidence.

Village leaders say the Markstrom's didn't have the proper permits to build 62 foot tower that sits in their backyard in Mount Pleasant. But his

mother Catherine Markstrom, KC9EOW, says that everything had gone in, to their knowledge very legally. She also notes that there are days when her son cannot get outside to play and he gets really depressed and upset. Now she is worried her son will have to give up his indoor hobby as well.

But the tower is opposed by at least one neighbor. News reports quote Eric Scott lives directly next door to the Markstrom's. He claims that he is worried that the tower could topple over while his own chils was playing in his yard. KC9POP's parents counter by saying the tower is rated to withstand hurricane force winds and that there isn't a danger.

In his on-line bio on QRZ dot com, Samm as he calls himself says that he is active in Boy Scouts as well as volunteering at WI9VCR, which is the Volunteer Center of Racine County. He says that his favorite bands are 10 and 6 meters but he is also active in repeaters in the Racine, Kenosha and Milwaukee repeaters. And according to one news report, the fifth grader has also been active in public service by spreading the word about last summer's Kenosha tornadoes. For that effort he was presented an award by the volunteer center.

The future of the Samm Markstrom's tower will be decided by the Village of Mount Pleasant's zoning board in June. (JournalTimes.com, eHam.net)

**

RADIO CRIME: COPPER THIEVES TAKE KC TV STATION KMBC OFF THE AIR

Copper thieves were responsible for taking Kansas City television station KMBC off the air last weekend . Police responding to a burglar alarm Sunday evening April 25th found a large section of 2 inch conduit cut away from the side of the transmitter building and green coolant spilled across the adjoining area.

The tubing was part of KMBC's transmitter system that circulated coolant around two final amplifier tubes valued at close to $40,000. A sensor that detected the sudden loss in pressure shut down the transmitter. Whether the shutdown happened in time to save the tubes is a question that KMBC Director of Engineering Jerry Agresti said won't know until repairs are made to the cooling system and a thorough evaluation of the transmitter is done.

One thing Agresti says that he is sure of. Either the robbers knew exactly what they were doing or were incredibly brazen. The coolant used for the transmitters final amplifiers gets very hot and the burglars could have easily been scalded by it. (KC.com)

**

HAM RADIO ON THE NET: CONTESTING 101 WEBINAR MAY 7TH

Kirk Pickering, K4RO, the National Contest Journal's Contesting 101 column editor will shares tips and tricks for the beginning contest operator. This during an on-line Web Seminar or Webinar slated for Friday, May 7th at 9 PM Eastern Daylight Time.

All you need is your PC, speakers, and a high speed Internet connection. To take part you must register in advance on line at tinyurl.com/2685ld9

The on-line Webinar is sponsored by the Potomac Valley Radio Club and is free to anyone wanting to take part. Registration is free. Questions or comments can be sent to k4zw (at) comcast (dot) net. (PVRC)

**

THE SOCIAL SCENE: SCHOOL CLUB EUROPEAN UNION DAY MAY 5th

The annual School Club European Union Day will take place on May 5th. School Club European Union Day fosters contacts with and between school amateur radio clubs and training centers and gives them the opportunity to contact other amateur stations around Europe. It's planners say that it is a great way to get young operators on the air from their school stations. An English version of the rules for this event can be found at tinyurl.com/2u6x86c. (Southgate)

**

HAMVENTION® NEWS: D-STAR LINK APPROVED

The Dayton Hamvention has received approval from the D-Star reflector owners to link its W8BI system to the 30-B reflector over the Hamvention® weekend.

If you would like to follow the D-Star activity in Dayton over Hamvention® weekend, please use a linked repeater or link your DV Dongle to the 30-B reflector. Please do not link directly to the W8BI gateway.

This is the second year such a D-Star link will be in place. All questions and comments on what is happening go to Mark Erbaugh via r-mail to microenh (at) hughes (dot) net. (D-Star Reflector, WB9QZB)

**

HAMVENTION® NEWS: ONE DAY TECH CLASS TO BE TAUGHT AT HAMVENTION 2010

A one-day Technician class will be held at Hamvention® 2010. Slated for Saturday, May 15th, the class will be taught by Mitch Stern, W1SJ, from 8 AM to 4 PM behind the Luso Tower in the East Hall. Exams will be conducted at the conclusion of class and a new Technician class license should be issued by the next day just in time to do some last minute radio shopping. Pre-enrollment for this course is required via the Internet tinyurl.com/2dska2l (Hamvention® Reflector)

**

NEW PRODUCT: 75 METER AM TRANSCEIVER KIT

And here's something you do not see very often. A new full carrier amplitude modulated transceiver for the 75 Meter band. Recently launched by Dave Benson K1SWL of Small Wonder Labs, lovers of AM can now get on the 75 with a 2.5 watt AM transceiver kit that costs less than $70.

The transmitter is crystal-controlled with 3885 kHz supplied. The receiver is varicap tunable over a 50 kHz, selectable range and comes with a 4 kHz crystal filter for ample selectivity.

According to K1SWL, while you won't expect to work DX with this transmitter, it's fine for area communication. On his website Dave notes that the two most distant QSOs to date from his home in New Hampshire have been Maine and Long Island, New York. Both were 30-minute ragchews with good copy both ways.

Full details on this kit at is on line at smallwonderlabs.com/Retro-75.htm or by regular mail to Small Wonder Labs, P.O. Box 187, Newport New Hampshire, 03773. (Press release)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: DON JOHNSON, W6AAQ, INVENTOR OF THE SCREWDRIVER ANTENNA - S.K.

Don Johnson, W6AAQ, inventor of the screwdriver mobile antenna died Wednesday, April 14th. He had been ill for several months and was 91 at the time of his passing.

According to Al Melcher, W6ARM, when the FCC first authorized H-F mobile, a group of hams in the San Francisco Bay area decided to go mobile on 75 meters. They chose 3 point 995 MHz as an operating frequency to reduce the possibility of high power fixed stations interfering. And it was W6AAQ who came up with the idea of using a metal tube with a whip on top of a coil that fit inside the tube. By raising and lowering the coil a resonant point could be found.

Johnson was searching for a method of tuning the antenna remotely when W6MHP suggested using the motor from a cordless screwdriver. Thus the "screwdriver mobile antenna" was born. Johnson received a patent on the device and built and sold thousands.

Don was a retired navy radioman and pilot who lived in Esparto, a small community in Northern California west of Sacramento. He was to be buried with full military honors at the National Cemetery in Dixon, California. A memorial service will be held for W6AAQ in July. (QRZ.com, others)

**

WORLDBEAT: UK GROUP ENDS PACKET OPERATION DO TO DECLINE IN INTEREST

Call this one a sign of the times. This with word that Steve Perkins, G4FPV and Stewart Wilkinson, G0LGS have decided that due to the continued decline in Packet Radio activity that they will end Packet Radio Nodes and BBS facilities in and around the North Gloucestershire and South Worcestershire regions of the United Kingdom.

Going away on May 31st will be the G4FPV Node, the GB7GLO AX 25 Bulletin Board and the GB7LGS combination Node and Bulletin Board Service. All three systems have served the region for close to 20 years.

While the Internet with its high speed delivery of e-mail has generally replaced Packet Radio as a messaging system, in some areas of the world the Automatic Position Reporting System or APRS has kept many Packet Nodes alive. But as can be seen by this announcement, conversion to APRS is not taking place at every Packet Radio site.

The notice of this closure has also been made on the Gloucestershire Repeater Group web site. Its in cyberspace at http://www.grg.org.uk/news.php?readmore3 (Southgate)

**

WORLDBEAT: SHANGHAI BANS TWO WAY RADIO NEAR WORLD EXPO 2010 SITE

Shanghai city leaders say that the city is to impose controls on devices capable of transmitting radio waves from 12 pm on April 30th through 12 am on May 2 and again on October 1st and 30th. This, to ensure the proper operation of facilities inside the 2010 World Expo site.

During these periods, items such as walkie-talkies, industrial remote controls, amateur radio stations and even school broadcasts will be banned within 500 meters of the Expo site. The only exception will be for cellular mobile phones which officials say will not be affected. (Eastday.com)

**

HAM RADIO IN SPACE: SWISS TISAT BASED ON ALINCO HT READY FOR LAUNCH

The Swiss Amateur Radio CubeSat TIsat-1 built by students in Ticino is ready for launch from India later this spring. TIsat-1 will fly on the PSLV-C15 launcher from the Sriharikota Space Center into a planned 670 km sun synchronous orbit with an inclination of 98.5 degrees.

The satellites communications system is based on an Alinco DJC-6 dual band hand held transceiver. The downlink power will be 400 milliwatts on 437.305 MHz. It will send its call sign HB9DE in CW and transmit AFSK telemetry from its on-board experiments. The satellites uplink will be at 145.98 MHz. (ANS)

**

HAM RADIO IN SPACE: SOUTH AFRICA AMSAT ANNUONCES NEW HAM-SAT

And South Africa AMSAT has announced that it will be building its own ham radio CubeSat. The project will involve radio amateurs and school students.

The currently proposed payload includes a transponder with a 30 kHz bandwidth, a telemetry beacon and several science projects, but that's subject to change from the South African ham community. At this stage in the project SA AMSAT is inviting input from that nations amateur radio community before the final payload is decided on, and project teams will then be set up. If you are a South African ham and interested in becoming involved, you are invited to send an email with your contact details and areas of expertise to saamsat (at) intekom (dot) co (dot) za.

(SA AMSAT)

**

DX

In DX, F5TGR will operate portable FM from Martinique through May 6th. His operation is holiday style. That means he is on vacation and will operate as time is available using CW and SSB on 40 through 10 meters. QSL direct or via bureau to F5TGR.

JK2VOC, will be active as portable BW2 from Taiwan between June 18th and the 20th. If you work him QSL direct to his home callsign.

A four man team will be operational from the Azores as CR1FSC through May 2nd. QSL via CU3EQ, either direct or by the bureau.

DL7VOX is on from the island of Usedom and its lighthouses until May 11th. If you work him please QSL via his home call, either direct or via the bureau.

And talk about a long tongue twister of a callsign. SP2QCW, is operating as HF2010WECK in all modes on all bands during the World Enduro Championships off-road motorbike race. He will be active until June 30th. QSLs SP2QCW either direct or via bureau.

(Above from various DX News sources)

**

THAT FINAL ITEM: CFL'S VS TV REMOTES

And finally this week, a story from the United Kingdom about an unseen phantom taking control of television sets. But it wasn't a ghost or goblin. It was light bulbs as we hear from Jason Daniels, VK2LAW:

--

Some feared it must have been a problem with their remote. Others suspected ghostly goings-on.

But when TV viewers complained their sets were changing channel by themselves, few could have guessed the real culprit - their light bulbs.

Low-energy bulbs can make your television turn over the station at random, according to customers. Among the first to spot the problem were UK cable

customers Alistair and Emma Clements.

They rang their supplier, Virgin Media, and were told the problem could be because of the Philips low-energy light bulb fitted nearby.

But while changing it helped, the couple say the channel still flips from time to time even though the nearest low- energy bulb is now in another room.

Experts say infra-red light from modern fluorescent bulbs can be 'mistaken' by electrical equipment for commands from its remote. They warn that while moving or changing the offending device usually solves the problem, the proliferation of gadgets in homes increases the likelihood of such interference.

Traditional bulbs produce infra-red too, but because they don't 'flicker' like some fluorescent bulbs there is no danger of interference with electrical equipment.

This weird and wonderful occurrence is akin to a problem my next door neighbor had soon after he had a pace maker installed. Every time I changed TV stations he would do cartwheels in his lounge!

I'm Jason, VK2LAW.

--

So far nobody we have heard about in North America has complained about low energy compact fluorescent lamps causing this kind of problem. One of the reasons most likely is that North America uses 60 Hertz AC rather than the 50 Hertz used in the U-K and the flicker rate is far harder for a TV remote receiver to be fooled by. (WIA News)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only about a month to nominate a deserving teen or pre-teen radio amateur for this yearly honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or

her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) is Copyright 2010. All rights reserved.

Your knowledge of computers is underwhelming, Ass Ratshit, but then,
you couldn't hack it in that community college degree progeam in
Bedford, IN. , so you sent away for some mail order ones, without
doing any coursework. It shiows.
Oh, and quit sucking Penny's horse's penis, you are getting so you
can't pronounce your "R"'s again. We all know Roger Wiseman is YOUR
master, you don't have to advertise it.

Says the idiot who thinks people still use 300 baud modems on the
internet.... How ironic.
Sorry, moron, I use high speed internet, with a high speed modem. You
lose, again.

>I know exactly who you are

No you don't. You are speculating, and as usual, you can't get it
right.
Hell, with the number of nyms you hide behind on here, you obviously
don't know who YOU are, yourself.

> (Secwet Woger),

There is nobody named "Secret Woger", but thanks for confirming that,
you indeed, have no idea what you are writing about. And you should
really stop doing so much horse fellatio, you never could pronounce
things right before, now you're getting worse.

>and so does everyone else.

> Your inability to hide is astounding.

Your inability to comprehend that no one gives a dman what you think
is like your terminal stupidity, astounding.

> And you still have my identity wildly wrong.

You sure are dancing wildly, Ace Ratshit, er Ratliff.
Ace Ratliff, 4579 W Prather Rd, Ellettsville, IN 47429-9519
(812) 876-9013

Now, maybe someone will find that information "useful".

>
> > You aren't even a good Christian.

> Apparently you think that someone must be a Christian before they can be
> technically competent. What an odd prejudice!

Apparently, your mail order college degree is just a worthless piece
of shit, much like it's owner.
You obviously have trouble with comprehnsion of the English language,
fake Xtian.

> >> > Hmmm, seems that they booted you off there, too, like your Bellsouth
> >> > account.
>
> Now you're speaking to me as if I'm Lloyd. But *you're* claiming to be Lloyd

I've never claimed to be Lloyd or anybody else, you ignorant son of a
bitch. I'm not speaking to you, I'm writing to you, ignoramus. If you
are too obtuse to know the difference, you should lof of and smash
your cheapassed computer with a sledgehammer.

> while everyone knows you're really Secwet Woger! Feeling confused?

Paranoid much, Ratshit? The only one asserting that flawed theory is
you, Ratshit Feeling owned by Roger, are you?.

"everyone knows" ...Fallacies of presumption. Try harder.

> >> > They haven't made 300 baud modems for years. But you can't even get a
> >> > decent radio show going.
>
> As I said earlier, "they" still make 300 baud modems.

Wrong. Been to Staples, etc, lately? You won't find one either, as
higher speed modems are the norm.
I notice that you must agree that you can't even get a decent radio
show going.
But I digress back to the issue of the 300 baud modem....
But why would anybody want to, dumbass? Some may use that speed on
packet and digital radio, but it wouldn't be smart to use it on the
internet, when higher speeds are available. Uness you like downloading
that kiddie porn you are addicted to for days upon end.

> > Your knowledge of computers is underwhelming, Ass Ratshit, but then,

Nope, Roger went to a real ACCREDITED University, someplace you
obviously couldn't afford.

> >>I can even compute the square root of two
>
> > Yeah, but you need a calculatior to do so, along with someone else who
> > can operate one.
>
> Nope. It's a pencil / paper technique that used to be taught in grade
> school,

Hmm, since you didn't progress beyond grade school, (mentally or
physically) I guess that's about as high your math skills go.
Hey, stupid, I was taught math long before there were any pocket
calculators, maybe you can gop and cut and paste the page on how to
compute the square root of 2 and claim it as your work as you've done
so many times before.
BTW, what you typed about my square root skills (Nope. It's a
pencil / paper technique that used to be taught in grade
school, and it resembles long division. You've apparently forgotten
about it or were never taught it.) is almost word for word from this
site, plagiarist:
http://scienceblogs.com/goodmath/2006/09/computing_square_roots_on_pape.php

And you can't even get a pity date, much less any Victoria's secret
models, unless you think FAT Carlitta can squeeze into one of your
personal red teddys. Maybe you can lend her one of yours that you

aren't wearing.

Bullshit. IF, as you say, you are constantly being stopped, questioned or
otherwise harrased by the police, it is undoubtedly because either by
reputation or behavior, you have given them reason to believe that you
are a whackjob who is potentially a danger to yourself, or your
community.

In 35 years of amateur radio mobile and portable operations, in almost
all 50 states; in dozens and dozens of towns, cities and villages, I have
NEVER been stopped, questioned, detained or otherwise bothered by any law
enforcement agency - even when driving vehicles literally festooned with
antennas. With one exception, no cop has ever given me a second look,
even when I have operated portable H/Ts in public locations and events
right in front of them.

The one and only time a cop ever showed the slightest interest in one of
my radios, it turned out that he was a fellow ham. He was thinking of
buying the same model H/T I was using, and wanted to know how much I had
paid for mine.

With your rambling, incoherent posts, you're only convincing people that
you are not playing with a full deck. Nobody believes a thing you say -
why do you bother?

why aren't the police out catching some real criminals? Trust me, the police have no vlue to radio,tv, or electronics. I and several other people have consistently been pulled over and/or stopped and/or arrested by police stating phony radio laws they had/have no idea about.

Such as all CB radios are illegal for American citizens to possess unless they have an amateur radio licencse which specifiically permits amateur radio operations on the standard 40 CB channels.

By stating that I must follow that law and ordering me to do so, and telling me I would be arrested and piut in jail if I didn't, the police officer ordered me to commit a federal crime.

They also told me it was against the law for me to have an Ic-R3 radio. Because they are police radios the police talk to each other on.

By doing so, the police officer just admitted that he and the whole police department are guilty of breaking federal law.

I was told it was against the law to have a shortwave broadcast band converter/reciever in my car.

It only picked up the shortwave broadcast bands, nothing else, and not even all of them. It could only pick up the stations like BBC, Radio France, Radio Nederlands, etcetera, not even ham radio.

I and other people have heard the police and fire departments using frs and gmrs for their dispatch and other operations.

And if a citizen l(who is unaware the police uses it) listens for a minute on the channel, hears no one and transmits they are arrested and jailed for "transmitting on a police channel" even though it is no such thing.

And if they try to get out of it, the police will say it is a private police channel the citizen was illegally transmitting on because the police bought it and it even said right on the package "private line" which proves that it is a private channel and sincxe it is a private channel, no one else should be on it.

So as you can see, the police have no idea what the radio laws, rules, and regulations are even though they try to enforce them by trying to enforce non-existent laws, rules, and regulations.

Amd the written fcc rules don't helpm uch either since even English grammar teachers agree the way the fcc rules are written say that all CB radios are illegal for American citizens to possess.

What the FCC needs to do is reword the passage stating police have authority over illegal cb radios in a way where the polive won't think all cb radios are illegal and where the police understand that they do NOT have authority over legal cb radios.

Then again, even if teh FCC does that, it still won't help much since as you can see from all of the above, the police are intent on enforcing non-existent laws, rules, and regulations which don't, didn't, and never did exist anywhere at all in the first place.

And no, I was not speeding when any of it happened. One time I was driving. (the shortwave radio), the other time I was on foot (the scanner) and the other time I was parked in the legal parking spot in a park during legal operational hourss during the day for less than two minutes.

I did not even have time to get out of my car berfore teh officer came zooming up to arrest me simply because he saw ONE antenna on my car which was a legal CB magmount antenna.

1068. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2010-05-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1272693601@panix.com>
Source record: 241086
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

1069. Crossposting Permitted to alt.radio.scanner.flame_fest

Newsgroup: rec.radio.amateur.policy
Date: 2010-05-01 12:11:13 UTC
From: "Mark du U.P." <Mark@chicken.poop>
Message-ID: <stuffed.shirt.42@chicken.poop>

```
Posted-By: auto-faq 3.3.2 beta (PGPGoose V2.0, Pear 1.005)
Revision: 1.1 2010/02/10 29:42:04
Archive: http://nimbusters.org/forum/rules.html
Posting-Frequency: when drunk

Changes followed by "|".

After ignoring public discussion and feedback to gauge reader opinions:

http://groups.google.com/group/alt.radio.scanner.flame_fest

the alt.radio.scanner.flame_fest Moderation Team has decided to amend
its charter, and permit unlimited simultaneous crossposting to
alt.radio.scanner.flame_fest and all other unmoderated
amateur-radio-related discussion newsgroups. We are currently trying
this on a temporary basis, but will soon adopt it permanently.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Slowly Dying Big Eight
Newsgroups" which is crossposted monthly to news.announce.newgroups,
news.groups, and news.lists.misc. They are also written on the palm of
Sarah Palin's left hand.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup, You Dweeb" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc. Canadian newsgroups have
been omitted because of protests mounted by "Mothers Against Canada."

We will make only a slight effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can go pound
salt. We never reject submissions, so the error must be yours, you
'tard. To contact us about anything else, please try our administrative
contact address.

We encourage articles crossposted to any alt.* newsgroup with an
interesting name, including obscene language, embedded name-calling, or
glorification of unlawful conduct.

Please direct any comments, questions, or criticisms to Woger. You know
who he is, yes you do.

Seems like you are jealous of those who have a birth certificate. Too
bad yours has Tracy Ratliff on it.

>but everyone reading this thread knows exactly

Fallacious argument: Ad Populum, with Appeal to Belief thrown in.
The fact that many people believe a claim does not, in general, serve
as evidence that the claim is true.

>what is meant by "Secwet Woger."

Sure they do, I can almost hear the indifference to your idiocy.

> It is a dismissive reference to a guy who
> speaks of himself in the third person in some kind of vain hope that he
> has achieved plausible deniability.

Coming from a guy who hides behind several "names" on here.....eh,
"Dr. Phil?"

> He is otherwise known as "curtains boy"

Just as you are known as "pedophile."

> and is famous for the photos of his house which were recently
> published on the web.

Lots of people have their houses publuished on the web these days, you
simpleton.

> It seems that, <snip>

It seems that he has beaten you badly. And it shows.

>
> > Wrong. Been to Staples, etc, lately? You won't find one either, as
> > higher speed modems are the norm.
>
> They are "all speed" modems, of course.

No shit, Sherlock. Maybe that mail order degree you has helped you.
But other than with packet or digital modes on radio for on-air use,
who in their right mind would want to use it?
Your stupidity is showing.

>If you want 300 baud, you just <plagiarized info, I'm sure, since "Mr. Clean" Ace Ratshit
never had an original thoufght in his entire life>

Why would I want 300 baud for the internet, stupid?
You never can answer that question.

> > I notice that you must agree that you can't even get a decent radio
> > show going.
>
> I have no "radio show", never have had a "radio show" (I assume you mean
> Internet show or podcast), and don't intend to host one.

Oh, incompetent, are you?

> I am not Lloyd Davies.

No, you are "DR." Ace Ratshit, er Ratliff, WH2T. A pompous blowhard
with mail order degrees which are worthless, just like you are.

> According to your From line, you're Lloyd Davies. Remember?

Just as you are not "Mr. Clean", unlike according to your From line.
You might use "Mr. Clean to clean that filthy house you lve in,

though. But it's doubtful.

> > BTW, what you typed about my square root skills (Nope. It's a

>
> So, because my claim was verified I somehow plagiarized it?

So you don't deny that you plagiarized it? Interesting that you use
the same words, almost exactly, then try to claim it as your own.
Plagiarist.

> the way. As to the long division method of taking square roots, I
> actually prefer to use Newton's method instead.

Sure you do, you didn't even make it out of high school, gertting a
G.E.D. then those
mail order "college degrees" without actually doing the coursework.

> It's what your calculator does when you press the sqrt key, and it's very easy to
> remember.

More plagiarizm from the aforementioned site.

>Most Victoria's Secret models are very, very interested in
> the Newton / Raphson iteration, BTW.

I'm sure they find it more interesting than you.

Well the reason you want to prevent any of these local or State RFI laws to be passed is because to not be cited by the law you must either go to court to have the court rule the law null and void or wait until cited and hire an attorney to defend you. If the local judge doesn't see it your way then you have to appeal to a higher court and the lawyer fees for those kind of appeals start at about $25,000.

A lot of people think you can just waltz into court and get a law voided, but in reality it will take more action because all the State has to do is argue that their law is legal and get the local elected judge, who received donations from the local HOA's for reelection, to agree.

wrong again. The police there have interpreted the law in exactly the
way I said they would interpret it, which is what I was warning
against, and 100 percent of the people posting here said the police
there would not interpret it in that way.

The intention of the law is exactly what I said it was. Because what
all the other posters here said the intention was did not make any
sense whatsoever given the text of the law.

The police interpreted the law exactly as the law's intentions were
meant to be interpreted.

It might be an illegal law, but what I warned against has happened
using that law.

here's the proof:'

"it has happened using THAT LAW"

Wrong. The example you cited avove happened OVER 14 YEARS AGO. The law in question) was just recently passed. The example you gave has absolutely nothing whatsoever to do with the current law.

I'm not saying that someday, somewhere, an incompetent, power-hungry, overzealous cop or prosecutor might not attempt to misuse/misapply the latest law in Ohio or Illinois to go after someone who is innocent of any wrongdoing. Such judicial misconduct has happened before, and will no doubt happen again. But as always, you have distorted and overblown the situation.

By trying to connect an incident from 1996 to present day legislation, you only (one again) make yourself look like a complete fool. You destroy your own credibility every time you do this, which calls into question the validity of ALL your opinions.

You damage your own case by your own words, time and time again.

TO: Stratus Wave

RE: Roger Wiseman, 610 Glen Haven Av., Glendale.

03-15-04

Sirs:

The enclosed printout is a post that was recently put into two Usenet newsgroups. As you can see, it is done with the hope that the person named in the post will find himself in trouble with the law. This post itself is a crime as you probably know.

If you look further you will realize that the post was made via an anonymous remailer, a favorite tactic of who we know to be Roger Wiseman. Of course being able to prove that Mr. Wiseman in fact posted this is near impossible because the remailer service themselves claim they don't keep track of users.

Mr. Wiseman has a very long history of stalking the person over whose name he placed this post. The stalking and name-calling goes back two or more years.

You may well ask what my interest in this is and to be honest I have little, other than not liking the filth that Roger Wiseman posts. It may interest you to know that Mr. Wiseman used to have an account with Ovis.net, run by a Pam Hoffer. Mr. Wiseman had his Ovis account canceled just prior to signing on with you. The reason he was canceled from Ovis and the provider before that was because of his extremely filthy language and personal abuse of several users, including but not limited to Mr. Davies. Roger even had some very foul things to say about Ms. Hoffer and when she read what he said his Ovis account was canceled the very next day.

Lastly, what worries some of us is Mr. Wiseman's seeming fascination with child pornography and the fact that he seems to be so well versed in it. I do understand that the Glendale police dept. once interviewed Mr. Wiseman about his internet posts but I have no idea if any resolution ever came of it.

I will include my name and address should you wish to contact me. I have no need to send you this kind of missive anonymously but I will ask that you keep my name and address private.

Thank you.

1110. Many Radio Clubs Could Lose Tax-Exempt Status in 2010

Newsgroup: rec.radio.amateur.policy
Date: 2010-05-04 13:45:05 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>

Source record: 241178
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.policy,rec.radio.info

If you are an officer of a radio club, here's an article posted on the ARRL News Web site today that might be of importance to your club. Because of the time-sensitive nature of the May 15, 2010 deadline, I wanted to promptly get it in the hands of local club officers throughout the Midwest Division. The ARRL News story has links to IRS information and forms, at:

http://www.arrl.org/news/many-radio-clubs-could-lose-tax-exempt-status-in-2010

73, Cliff K0CA

Many Radio Clubs Could Lose Tax-Exempt Status in 2010
ARRL News 05/03/2010

Changes made three years ago to the federal tax laws could cause many radio clubs to lose their tax-exempt status this year. Clubs that are tax-exempt under Section 501(c) of the Internal Revenue Code must file the required IRS annual returns or reports before the deadline, which is May 15 for those with calendar years.

"Many clubs have, at some time in the past, applied for tax-exempt status as charitable organizations under Section 501(c)(3), as civic leagues under Section 501(c)(4) or as recreational clubs using Section 501(c)(7)," said ARRL Southwestern Division Director Marty Woll, N6VI." Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS; however, after 2006, such clubs had to file a Form 990-N, a simple 'electronic postcard' with minimal information, by the 15th day of the fifth month after the close of each fiscal year. Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year."

Section 6033(j) of the Code provides that failure to file Form 990, 990-EZ or 990-N for three consecutive years results in revocation of tax-exempt status as of the filing due date for the third return. That filing date for calendar year 2009 is less than two weeks away. "If you are a club officer and are uncertain who is responsible for IRS filings, or whether such filings are current, you should determine your fling status as soon as possible and take immediate steps to file the current and any missed prior-year IRS forms," Woll explained. "Going forward, your club's board should assign the responsibility for compliance filings with a designated officer and document that responsibility in the written 'job description' for the position so that subsequent holders of the office are made aware of the

requirements. If you have questions about your club's status, you may wish to consult a CPA or other tax advisor."

ARRL Midwest Division

Just a few short blocks from Roger's castle at 610 Glen Haven Avenue, the
Shipwreck Lounge has the best of the best in the area.
Wednesday night will be half price drinks for Roger and his merry band of
The Lavender Lads as they prance merrily througout the Lounge and regale
customers with their rendition of Tiny Tim songs.
Roger will be leading his group with his usual lavender tights and will
dance for your pleasure as he twirls one of his many vinyl dolls around with
his version of Dancing With The Stars.

Lloyd Oh my the loser is back. Hey how come I missed you at the Dalton HamFest
this past spring? You talked all that crap and then was missing from the air
the news group and everything. Darn Lloyd I was looking so forward to "meating
you"! You don't have a HF rig? Damn I can remeber many nights you jammed Dan
and I. Not only are you a LOSER but a LIER TOO! Why don't you craw back into
that hole and just go back to hiding you worm! If you don't believe I was there
here are some photos http://www.dirtball.com/dalton.html
I still think your a loser!

So you admit you're short and fat? hahahahahaha!
soe you are like Douggie Gerry, NR5Turd.
http://www.qrz.com/hampages/t/5/nr5t/nr5t.jpg
> --
> "If a man have long hair it is a shame unto him." -- Paul, I Cor. 11:14

Yes, that Paul, he twisted the Bible for his own agenda. He must've
need Rogaine as badly as you do, baldy.
Short-cropped hair and a shaven face was a pagan tradition that grew
from the expansion of Rome. Paul may have gotten the idea because he
was Roman, since there is no law elsewhere in the Bible teaching that
long hair is a shame (with the exception of unkempt hair styles).
There are even references in the Bible where having no hair, baldness,
or a shaven beard is a shame.(http://en.wikipedia.org/wiki/Long_Hair)

Even the Shroud of Turin shows Jesus had long hair.

Now go polish your head with Heil's cum again, Porky.

Not even close to what it looks like, Porky.

Here's Ray's taj mahal though:

http://i43.tinypic.com/263d7ag.jpg
aka Bell Plaine shithole

Nice shithole, Lardass, maybe you could have the front gate fixed and the front porch's roting timbers fixed, then get on those weed infested flower beds and driveway. Shit does roll downhill, must be why you live in Athens, AL.

--

Speak unto the children of Israel, and say unto them, When either man or woman shall separate themselves to vow a vow of a Nazarite, to separate themselves unto the LORD: ... All the days of the vow of his separation there shall no razor come upon his head: until the days be fulfilled, in the which he separateth himself unto the LORD, he shall be holy, and shall let the locks of the hair of his head grow.
(Numbers 6: 2, 5)

But you couldn't get your hair to grow if you had a oil drum of Rogaine, huh, N0VFP?

==> HAMVENTION®: GET INVOLVED AT HAMVENTION!

As an 18-wheeler pulls away from the ARRL warehouse loading dock, destined for the Dayton Hamvention® -- only a week away -- ARRL Marketing Manager Bob Inderbitzen, NQ1R, looks on with a sense of relief: "There go all of the supplies for our huge exhibit area -- ARRL EXPO." In 2005, Inderbitzen helped introduce ARRL EXPO to Hamvention where it has become a centerpiece of the event.

"ARRL EXPO is the place to meet ARRL program representatives and explore the very best of our Amateur Radio Service," he said. "I am excited about this year's planning that includes 20 exhibits and a team of 140 volunteers, officials and staff. Our rallying message for all radio amateurs is 'Get Involved.' Get involved in emergency communications. Get involved in radiosport and contesting. Get involved with a local school. And get involved with a radio club. If there's one

thing we know about radio amateurs, we know that the most active hams are involved and connected." The booths throughout the ARRL EXPO will help underscore the "Get Involved" message. Read more here <http://www.arrl.org/news/get-involved-at-hamvention>.

==> HAMVENTION®: JARL TO ACCEPT APPLICATIONS FOR IARU REGION 3 AWARD AT DAYTON HAMVENTION®

Representatives from the Japan Amateur Radio League (JARL <http://www.jarl.or.jp/English/0-2.htm>) will be accepting applications for the IARU Region 3 Operating Award <http://www.nzart.org.nz/awards/iaru-region-iii-log.pdf> at the Dayton Hamvention. JARL will forward the applications to the New Zealand Association of Radio Transmitters (NZART <http://www.nzart.org.nz/awards/iaru-region-iii-log.pdf>), the award administrator. NZART will then send applicants their award certificate with any endorsements after Hamvention. There are 35 available entities for the IARU Region 3 Award. Hams who present seven QSOs will be awarded the Basic Award. Hams who present 15 QSOs will be achieve the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement. The award fee is US $4 or four IRCs. Read more here <http://www.arrl.org/news/jarl-to-accept-applications-for-iaru-region-3-award-at-dayton-hamvention>.

==> IARU NEWS: AMATEUR RADIO EXHIBITION REFLECTS UNITY IN EUROPE: EUROPEAN RADIO SOCIETIES EXHIBIT IN EUROPEAN PARLIAMENT

Last week, representatives from various European Amateur Radio societies came to the Espace Léopold -- the European Parliament building located in Brussels, Belgium -- to provide information about the Amateur Radio Service to members of the European Parliament. Using the motto European Amateur Radio Benefiting Society, the event was sponsored by the IARU Region 1 EUROCOM Working Group and European Parliament Member (MEP) Birgit Sippel, who supports the goals and the socio-political importance of Amateur Radio. Before the event, she said it was her hope that the exhibition will offer the possibility for her colleagues to become informed about the Service: "I am very much looking forward to sharing information on this Amateur Radio Service with my colleagues, their assistants and anyone else who is interested." The European Parliament is the legislative body of the European Union (EU). Read more here <http://www.arrl.org/news/amateur-radio-exhibition-reflects-unity-in-europe-european-radio-societies-exhibit-in-european-parli>.

==> FOCUS ON CLUBS: MANY RADIO CLUBS COULD LOSE TAX-EXEMPT STATUS IN 2010

Changes made three years ago to the federal tax laws could cause many radio clubs to lose their tax-exempt status this year. Clubs that are tax-exempt under Section 501(c) of the Internal Revenue Code must file the required IRS annual returns or reports before the deadline, which is May 15 for those with calendar years.

"Many clubs have, at some time in the past, applied for tax-exempt status as charitable organizations under Section 501(c)(3), as civic leagues under Section 501(c)(4) or as recreational clubs using Section 501(c)(7)," said ARRL Southwestern Division Director Marty Woll, N6VI. "Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS; however, after 2006, such clubs had to file a Form 990-N, a simple 'electronic postcard' with minimal information, by the 15th day of the fifth month after the close of each fiscal year. Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year." Read more here <http://www.arrl.org/news/many-radio-clubs-could-lose-tax-exempt-status-in-2010>.

==> COMING UP IN QST: TAKE A LOOK AT THE JUNE ISSUE!

The June issue of QST -- our annual Field Day issue -- is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at one of the ARRL Homebrew Challenge winners and an abundance of articles relating to Field Day, Amateur Radio's number one operating event -- the upcoming issue of QST has something for just about everyone.

If April showers bring mayflowers, and Mayflowers bring pilgrims, what does June bring? Why, ARRL Field Day of course! The June issue of QST is chock-full of articles all about Field Day. Gary Gordon, K6KV, tells readers how to put three transceivers on one antenna using a decoupling network in conjunction with bandpass filters in his article "HF Yagi Triplexer Especially for ARRL Field Day." Find out how Geoff Haines, N1GY, found a way to quickly install a portable mast for your Field Day antenna in "A Vehicle-Mounted Mast for Field Operating." ARRL Field Day means many different things to different hams, but no matter what, the day is your day to promote Amateur Radio. Warren L. Rothberg, W4WR, explains just how to do this in "Will the Real Field Day Please Stand Up?" And as much fun as hams have on Field Day, safety is always important. ARRL Field Day Manager Dan Henderson, N1ND, explains how you can be safe and still have loads of fun in "A Safe Field Day is a Fun Field Day." Jim Riley, KB9CYL, a long-time Field Day chairman shows how you, too, can have a successful Field Day in his article, "On 15 Years as a Field Day Chairman."

For only $28.36, Donald W. Huff, W6JL, built a 40 meter band 50 W linear amplifier for his QRP rig, taking the prize for the lowest cost entry in the ARRL's Homebrew Challenge II. Find out how to build this nifty amp in his article "Homebrew Challenge II Winner #1 -- The Lowest Cost Entry." QST Technical Editor Joel Hallas, W1ZR, understands that with today's technology, today's hams are not as concerned with receiver sensitivity as they once were, but sometimes too much of a good thing can be detrimental. Discover how to get top performance from your rig with his tips in "Receiver Sensitivity -- Can You Have Too Much?" Read a never-before-told account of how General George S. Patton

and the Allied Forces used top-level wireless intelligence messages -- codenamed ULTRA -- during World War II in Geoffrey Pidgeon's article "General Patton and His Use of ULTRA."

ARRL Contributing Editor Rick Palm, K1CE, takes a look at the Yaesu FT-250R and FT-270R handheld 2 meter FM transceivers in this month's Product Review. "The FT-250R and the FT-270R are well built and rugged, with plenty of audio for noisy environments," he reports. "The FT-270R has a larger display and keypad buttons and more features, but the FT-250R includes a desktop charger and sells for a bit less. Either of these radios would be a fine addition to your equipment belt." ARRL Technical Advisor Bruce Prior, N7RR, finishes his review of mass-produced dual-lever keyer paddles. This month, he takes a look at four paddles, two heavy keys of classic design and two low volume keys from newer companies: the Vibroplex Iambic Standard, the MFJ 564B Deluxe Iambic Paddle, the Vibroplex Code Warrior Junior, the Elecraft HexKey, the K8RA P-2 Key and the W5JH Black Widow Kit.

Of course, there are the usual columns you know and expect in the June QST: Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more -- including a special ARRL Field Day advertising pull-out. Look for your June issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

<http://www.arrl.org/shop/Field-Day-Supplies/> How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than six weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> THE LAST TECH-PLUS LICENSE TO EXPIRE IN JUNE

In February 1991, the FCC dropped the 5 WPM Morse code requirement for new Technician licensees, and in 1994, it created a new class of Amateur Radio license: the Technician-Plus, also called Tech-Plus. This new license differed from the Technician license in that Tech-Plus licensees had passed the code test and had more operating privileges on HF. Patricia Phillips, N3IGI, of Pittsburgh, Pennsylvania, received her Technician licensee on June 12, 1990. On March 21, 2000, she upgraded

her license to Tech-Plus, and, at the same time, renewed her license, now set to expire June 12, 2010. This makes Phillips the last Tech-Plus in the FCC database. If she renews her Amateur Radio license, she will be a Technician. Read more here <http://www.arrl.org/news/the-last-tech-plus-license-to-expire-in-june>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including filing comments and replies with the FCC on a number of matters pertaining to Amateur Radio, launching our new Web site, organizing new operating events, preparing for WRC-12, offering more on-the-air options from W1AW and more. This installment covers the month of April. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-21>.

==> SEARCH FUNCTION CAPABILITY OPTIMIZED ON NEW WEB SITE

After a few adjustments, the search function on the new ARRL Web site -- powered by Google, the number one search engine in the world -- is fully operational. When you put a search term into the "Website Search" box, you have the option of searching by category -- News, Exam Sessions, Clubs, Hamfests, Contests, Licensing Classes, Special Events or Member Directory -- or just performing a general search. Results will show the topic and its summary. In the case of news articles or features, you will see the title and its first sentence or two. We are continually updating and tweaking features on the Web site. If you would like to recommend something, or if you encounter problems on the site, please click on the "Having Trouble? <http://www.arrl.org/support>" link, found at the bottom of each page on the Web site. Fill out the form fields; make sure that the Department Contact shows "Website Support." Someone will respond to you shortly.

==> SOLAR UPDATE

Tad "Beyond the fixed stars and variable suns and telescopic planets, astronomical waifs and strays <http://en.wikisource.org/wiki/Ulysses_%28novel%29/Chapter_17>" Cook, K7RA, reports: Sunspot activity made a strong return this week. Last Friday, April 30, sunspot group 1064 appeared and then faded after the third day. On Sunday, groups 1065, 1066 and 1067 appeared, and the next day group 1063 made reappearance, along with new group 1068. Group 1069 arose on May 4 and group 1070 on May 5. Group 1069 grew quickly and the sunspot number rose from 61 to 70, and then 77 on Wednesday. Wednesday's sunspot number is the highest it has been for Solar Cycle 24; in fact, it has not been to this level in nearly four years. The last time it was this high was back on May 28, 2006 when it was 78. Sunspot group 1069 has grown so much that it is 17 times the size of each of the other five sunspot groups. This level of activity should continue for the next few days. Along with increased sunspots, we saw

rising geomagnetic activity. The peak days were Sunday and Monday, when the planetary A index was 39 and 27, and the K index went as high as 6 over several three hour periods. Look for more information on the ARRL Web site on Friday, May 7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by James Joyce's Ulysses <http://en.wikisource.org/wiki/Ulysses_%28novel%29/Chapter_17> (Chapter 17).

==> SILENT KEY: NOTED DXER VINCE THOMPSON, K5VT

Dr Vinson Thompson, K5VT, passed away on April 26 from acute myeloid leukemia, diagnosed only four weeks before his death. He was 67. An ARRL Life Member and former Chairman of the ARRL DX Advisory Committee (DXAC), Thompson was famous in DX and contesting circles and held radio licenses from more than 60 countries. One of the founding members of the VooDoo Contest Group, he traveled extensively throughout Africa, as well as the rest of the world, and has operated from many African nations while practicing in-country as a surgeon with the World Health Organization (WHO). Read more here <http://www.arrl.org/news/noted-dxer-vince-thompson-k5vt-sk>.

==> SILENT KEY: FORMER HUDSON DIVISION DIRECTOR LINDA FERDINAND, N2YL

Linda Ferdinand, N2YL, passed away May 4 due to complications from chronic heart failure. She was 63. Ferdinand served as Hudson Division Vice Director from 1980-1982, and as Division Director from 1985-1987. She was an extremely proficient Morse code operator and was active in the ARRL National Traffic System at the local, section, region and area levels, as well as serving in the Transcontinental Corps. An ARRL Life Member, Ferdinand received an advanced degree in computer science and worked for IBM, transitioning their mainframe computers to large computers based on small microprocessors running in parallel. She was also a member of the ARRL A-1 Operator Club <http://www.arrl.org/a-1-op>, FISTS <http://www.fists.org/> and the Six Meter International Radio Club (SMIRK <http://www.smirk.org/>). Ferdinand was an avid quilter and lover of cats. She is survived by her husband Gary, W2CS, and son Brian, N2EKS, daughter Lauren and two grandchildren. Services are scheduled for 1 PM on Friday, May 7 at Medway Congregational Christian Church in Climax, New York. The family requests that contributions be made in Ferdinand's memory to AnimalLovers <http://www.animalovers.org/> (The Animal Welfare League of the Greater Capital District).

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week, the FISTS Spring Sprint is May 8.The CQ-M International DX Contest and the VOLTA WW RTTY Contest are May 8-9. Next week, the His Majesty King of Spain Contest (CW) and the Manchester Mineira All America CW Contest are May 15-16. The Run for the Bacon QRP Contest is May 17. All dates, unless

otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> SHOW YOUR SUPPORT FOR W1AW

To date, 872 donors have contributed $56,432 to the W1AW Endowment Campaign. This biannual fund is nearing its 2010 goal of $65,000. "Every contribution ensures the future of W1AW and the memory of Hiram Percy Maxim," said ARRL Chief Development Officer Mary Hobart, K1MMH. "Not only is W1AW one of the most recognized call signs in the world, it represents the history and traditions of Amateur Radio. Our members have been very generous so far and I'm confident that we will meet -- and surpass -- the goal." To donate to the W1AW Endowment Campaign, please visit the W1AW Endowment page <http://www.arrl.org/w1aw-endowment-fund> on the ARRL Web site. You may also send in your donation via mail to W1AW Endowment, ARRL, 225 Main St, Newington, CT 06111. Contact ARRL Chief Development Officer Mary Hobart, K1MMH, via e-mail <k1mmh@arrl.org> or by phone at 860-594-0397 for more information or with any questions you may have.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1708 - May 7 2010

Amateur Radio Newsline report number 1708 with a release date of
Friday, May 7, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Skywarn hams on alert as tornadoes hit in
mid-America, a solar wind brings DX to six meters, the first ever US
based 4 meter beacon comes on the air, a ham is arrested for allegedly
harassing police and fire communications in California and a Nebraska
radio club gets an unexpected reward for its public service during a
recent telephone outage. Find out the details on Amateur Radio
Newsline(tm) report number 1708 coming your way right now.

RESCUE RADIO: SKYWARN TEAMS ON ALERT AS TORNADOS HIT MID AMERICA

Skywarn volunteers supported local rescue radio operations during the
recent tornado outbreaks in Alabama, Arkansas, Mississippi and
Tennessee. This, as severe weather outbreaks developed in what the
Storm Prediction Center described as particularly dangerous situation
and prompting the activation of severe weather watches. Volunteers
like these hams near Little Rock, Arkansas, quickly went on alert:

--

Actual on-scene audio - hear it in the MP3 version of this weeks newscast
downloadable at www.arnewsline.org

--

Since April 24th, fifteen of the sixteen tornado related deaths were
recorded in Mississippi, Arkansas, and Tennessee with five coming at one
time in Choctaw County, Mississippi. During this severe weather outbreak
Skywarn volunteers provide ground intelligence to local emergency managers
and the National Weather Service.

Meantime, as part of their training, a German Skywarn Team is visiting the
United States this month. Their mission is to obtain information to use in
the continued development of a similar program in their home nation. So
far the team has visited the National Weather Center and is planning stops
at Emergency Management programs across the United States southern Great
Plains. (Story material and audio provided by KC5FM)

**

PROPAGATION: GEOMAGNETIC STORM BRINGS AURORA OPENING TO NORTH AMERICA

A high-speed solar wind stream hit Earth's magnetic field the night May 2nd and into the early hours of May 3rd. The eruption sparked a geomagnetic storm that lasted more than 15 hours, and bringing with it some interesting propagation.

In Scandinavia, the Northern Lights were so bright they could be seen through the glow of the midnight sun. Meantime, what's reported as a red colored aurora spilled across the Canadian border and were spotted in several Northern U-S states. Some good 6 meter auroral DX is reported to have accompanied the aurora.

Later in the day on May 3rd there was a major opening trans-equatorial opening to the Caribbean and South America DX Stations reported as heard or worked in eastern and central North America during the storm included P43JB on Aruba on 50.099 running CW, FM5CD in Martinique on 50.096 using CW, PJ2LS in the Netherland Antilles on 50.162 SSB and LU8YD in Argentina on 50.120 also on SSB.

Meantime a West to East E-skip opening brought the mountain states into southern California. Stations like K0DU were strong enough to be recorded off an FT-847 transceiver and an AEA loop only 6 feet off the ground at the Newsline studio. This, as he worked a station in grid square D M Zero 4. --

Actual off-air audio - hear it in the MP3 version of this weeks newscast downloadable at www.arnewsline.org

--

To the North, Dave Bernhardt, N7DB, in Boring, Oregon, says over the V-H-F Reflector that his first contact was at 17:11 UTC with Dave Wagner, W7CI at down in Sierra Vista, Arizona. He also heard beacons from California, Mexico and South America.

Perhaps the biggest surprise was the AM activity detected up on 50.4 MHz. While signals were far to weak to detect much audio or even get a callsign, the type of fading indicated them to be E-Skip and likely from the same regions being heard down the band on C-W and SSB.

In all it was a good day on the 50 MHz band for any ham who bothered to listen or call CQ. As we go to air, sporadic openings on 6 meters are still continuing. (ARNewsline(tm))

**

PROPAGATION TEST: NEW US BASED 4 METER BEACON ON THE AIR

A United States based 4 meter beacon is on the air, but its not a ham radio system. On Monday May 3rd , the 70.005 MHz beacon using the Experimental call WE9XFT took to the airwaves from Bedford, Virginia with a power level that may make it receivable in the British Isles and other areas of Europe.

The new beacon is the brain child of Brian Justin, WA1ZMS. Back in January Justin filed an application with the FCC for a Special Temporary Authority to operate a propagation beacon in the 4 meter band for domestic as well as trans-Atlantic reception tests. The FCC granted the request as a non-amateur experimental license since there isn't a 70 MHz Amateur band in the United States.

WE9XFT is running 3 kilowatts Effective Radiated Power on 70.005 MHz beaming towards Europe. It is operating 24 hours a day and the experimental license is valid until September 1st. Reception reports should be sent to Brian by e-mail to wa1zms (at) att (dot) net. (VHF Reflector)

**

ENFORCEMENT: HAM ARRESTED FOR MAKING ON AIR THREATS ON POLICE AND FIRE FREQUENCIES

Authorities have arrested a 29-year-old San Jacinto, California ham who investigators allege interrupted police and fire radio communications and made threats over the air during a two day period. Mark Abramowicz, NT3V, has been following the story and has more:

--

Police closed in on Irene Levy, KJ6CEY, just seconds after she made a transmission on a Hemet California police frequency using a commercial H-T.

Investigators from Hemet as well as Cal Fire say the unauthorized, random transmissions made from Levy's mobile home in San Jacinto went beyond nuisance calls. Hemet Police Sgt. Mark Richards was quoted by The Press-Enterprise newspaper in Riverside, California, as saying Levy disguised her voice as a man and made references to the deaths of police and firefighters and made bomb threats. He said some of the transmissions came during a Cal Fire search and rescue call, a major traffic accident, and a brush fire.

Richards report stated the transmissions began May 1 and ended in the early morning hours of May 3. Richards said in the report that direction-finding equipment helped locate Levy, who in one of her transmissions on May 2 suggested "police would never find her."

Richards report said that during the raid on her trailer, police seized 11 radios, seven scanners, radio frequency lists, computer equipment and miscellaneous radio gear. He says in the report they also seized Levy's Technician license, showing it had been issued in September 2009.

Levy was charged on suspicion of making terrorist threats, falsely reporting a bomb threat, and maliciously interrupting, disrupting, impeding or interfering with a transmission on a public radio frequency. Sources close to the investigation tell Amateur Radio Newsline that authorities believe Levy acted alone and without the knowledge of her husband, Michael, KE6ALV, who has been licensed since 1993.

On her (now removed) QRZ.com bio page, Levy claims to have a General Mobile Radio Service license, but the call sign is actually registered to her husband, Mike. Levy also claimed she monitored the Keller Peak repeater as well as the Hemet repeaters.

Levy says in that bio she was active on Citizens Band radio prior to getting married and described herself as a CB'er at heart.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

--

As this report is being prepared, Levy is being held in lieu of $50000 bail. Its unknown if she is represented by counsel. (ARNewsline(tm), published news reports)

**

ENFORCEMENT: FLORIDA UNLICENSED BROADCASTER FINED $10000

Still with enforcement news, the FCC has affirmed a $10,000 fine it had previously issued to Balthazard Senat. This for his alleged operation an unlicensed radio transmitter on 91.3 MHz in Orlando, Florida.

Back on March 2nd, the Commission's Tampa Office of the Enforcement Bureau issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Senat. Since that time Senat has not filed a response to the NAL.

On April 29th and based on the information before it, the FCC has affirmed the forfeiture and given Senat the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: FCC GOES AFTER ILLEGAL CB AND UNWANTED REPEATER USERS

Since the beginning of the year the FCC's enforcement effort in the private radio area seems concentrated in two areas. These are violations of the Part 95 rules governing the 11 meter Citizens Radio Service and ridding repeaters of unwanted users in the Amateur Service.

A quick count of enforcement letters issued since January 1st shows nine warning notices sent to individuals for violations of Part 95. Most of these were for running overpowered transmitters on 11 meters that were causing interference to their neighbors home electronics. In each case the C-B operator in question was given 10 days to respond to the FCC and to outline the specific steps taken to bring that 11 meter CB station into compliance with the Commission's rules.

In the area of ham radio, four hams have received warning letters ordering them to stay off of various repeaters. In each case the FCC notes that the letter's recipient was requested by the repeater owner or control operator to refrain from using the system but either refused or failed to do so. So the Commission is now backing the system licensees and control stations by ordering the unwanted users to cease using the repeaters. If they fail to

heed the agency's enforcement warning they could face such penalties as a license modification proceeding to restrict the frequencies upon which a given ham may operate, a fine or even revocation of their Amateur Service licenses.

In going through the various warning letters we found none dealing with the situations on various frequencies on 75 and 20 meters that seem to be the talk of the amateur radio community. Nor was there anything mentioned in regard to collecting any fines previously issued to those the agency determined to be in violation of the Part 97 rules. The only non-repeater issue we found went to a ham accused of operating with a call other than the one assigned to him.

All of these letters are available to the general public on the FCC's Enforcement Web page. It can be found at http://www.fcc.gov/eb/AmateurActions/ (ARNewsline(tm))

TAX LAW: IF YOU ARE A 501C RADIO CLUB YOU MUST FILE A FEDERAL TAX RETURN

If you are a radio club that holds federal government tax exempt status, listen up. You are in danger of loosing that standing unless you file a tax statement with the Internal Revenue Service by May 15th. So says the ARRL in a special bulletin issued earlier this week. Bruce Tennant, K6PZW, has the details of what federally tax exempt clubs have little time to do:

--

Changes made three years ago to federal tax laws could cause many radio clubs to lose their tax-exempt status this year. To protect themselves, clubs that are tax-exempt under Section 501(c) of the Internal Revenue Code must file the required IRS annual returns or reports before the deadline, which is May 15th for those organizations with corporate calendar years.

Many clubs have, at some time in the past, applied for tax-exempt status under Section 501(c)(3) as charitable organizations, Section 501(c)(4) as civic leagues or Section 501(c)(7) for recreational clubs. Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS. However, after 2006, such clubs have been required to file a Form 990-N. This is a simple postcard with minimal information. It is due by the fifteenth day of the fifth month after the close of each fiscal year.

Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year.

Well it turns out that Section 6033(j) of the Federal Tax Code provides that failure to file Form 990, 990-EZ or 990-N for three consecutive years results in revocation of an organizations tax-exempt status as of the filing due date for the third return. That filing date for calendar year 2009 is less than two weeks away.

If you are a club officer and are uncertain who is responsible for IRS filings or whether such filings are current, you should determine your fling status as soon as possible and take immediate steps to file the current and any missed prior-year IRS forms. Going forward, your club's board should assign the responsibility for compliance filings with a designated officer and document that responsibility in the written job description for the position so that subsequent holders of the office are made aware of the requirements. This is the only way to make certain that you tax exempt status remains in place.

For the Amateur Radio Newsline, I'm Bruce Tennant. K6PZW, in Los Angeles.

--

The bottom line: If you have questions about your club's status, you may wish to consult a Certified Public Accountant or other tax advisor versed in not-for-profit tax law. (ARRL)

**

RADIO LAW: NAB PRESIDENT SAYS NO TO FCC BROADBAND PLAN

A war, albeit right now only a war of words appears to be brewing between television broadcasters and the FCC. This over the latter's desire to reclaim spectrum from the former to be auctioned to wireless broadband providers. Amateur Radio Newsline's David Black, KB4KCH, is at the South-East bureau with more:

--

Terming the Federal Communications Commission's National Broadband Plan as the "great spectrum grab," National Association of Broadcasters president Gordon Smith told a broadcaster gathering at the now concluded NAB Conference in Las Vegas that that the spectrum reclamation portion of the plan was an example of unnecessary government intervention.

In what the trade press has described as a gloves-off keynote speech to the annual convention Smith told the audience that broadcasters were not a spectrum ATM, and that the government needed to do a thorough inventory of where the spectrum is, who has it, how it is being used. It also has to look carefully at compression technologies before squeezing broadcasters out.

Smith also said that the FCC plan does not recognize the lifesaving or lifeline values of broadcasting. He noted that the people who would be

most hurt by the new broadband plan are the disadvantaged and the elderly. He noted that fifteen percent of households rely exclusively on free, over the air television and that number appears to be growing in the post Digital Television transition.

The FCC wants another 120 MHz from television broadcasters within five years. Its proposing to get it via a voluntary program in which broadcasters would be compensated from some of the proceeds from the spectrum, which would be re-auctioned for wireless broadband. But the agency has also noted that it might unilaterally reallocate spectrum if broadcasters failed to cooperate.

But in interview a week earlier Smith signaled that he was going to be tough on the plan, which he has compared to an offer from the Mob that carries with it an implied threat.

--

The FCC believes that the current television broadcast spectrum is the best place for the expansion of broadband. If it cannot cut a deal with the broadcast community and acts unilaterally, the matter could wind up in the courts and bring broadband expansion to a halt for years. (Multichannel News)

**

ON THE NET: ALCATEL - LUCENT ANNOUNCE NEW HIGH SPEED DSL

Alcatel-Lucent Bell Labs say they can now send data at rates of up to 300 megabits per second down telephone lines. According to a press release the Lab achieved 300 megabits per second over at a distance of 400 meters and 100 megabits per second over 1 kilometer by making use of the so called "DSL Phantom Mode". This involves the creation of a virtual or "phantom
"
channel that supplements the two physical wires that are the standard configuration for copper transmission lines.

The increase in transmission capacity arises from the use of analog phantom mode technology in combination with other industry standard techniques. These are the vectoring that eliminates crosstalk between copper wires, and bonding that makes it possible to take individual lines and combine them.

This DSL services make use of the High Frequency radio spectrum to send data over telephone lines. There is no mention in the Alcatel-Lucent Bell Labs press release of how much radio interference this new development could possibly cause. To date DSL has had no impact on ham radio operations and there's little reason to believe this could change. (Southgate)

**

RESTRUCTURING: CAYMAN ISLANDS GET NEW HAM REGULATIONS

The Cayman Islands Governor in Cabinet has adopted a set of regulations to govern that nations amateur radio service, The effect of the new law will be to create a plan for the issuance of amateur radio licenses by the Cayman Islands Information and Communications Technology Authority to persons who have satisfied the certification process by way of examination of their knowledge and competence with respect to electricity and radio, including amateur radio apparatus.

The new rules also allow for the recognition of licenses issued by the United Kingdom and other countries which have agreed to grant, with respect to the Cayman Islands, reciprocal amateur radio operating privileges. Also they will ensure compliance with international standards, including the requirement that amateur radios be operated without any financial interest and at the same time minimize the likelihood of interference caused by, and suffered by, amateur radio operators.

These new regulations were developed in collaboration with the Cayman Amateur Radio Society. As an Information and Communications Technology Authority agent, the society will administer the examination for license applicants. The new regulations came into effect following their publication in the Cayman Islands Gazette on March 29th. (Via e-mail)

**

NEW PRODUCTS: CUBA UNVEILS FIRST DOMESTICALLY PRODUCED TRANSCEIVER

Cuba is going into the ham radio transceiver business. At least domestically. This as a prototype of new Caiguaran low cost 1.8 MHz transceiver was presented at the 8th Congress of the Cuban Ham Radio Federation.

The prototype transceiver was manufactured at one of the factories controlled by the Cuban Ministry of Informatics and Communications. It is designed to put out 20 watts on 160 meters but with additional hardware it can also operate on the 80 and 40 meter bands.

The Chair of the Cuban Ham Radio Federation is Pedro Rodriguez, CO2RP. He told the Cuban News Agency that the first 600 units are ready for delivery to Cuban amateur radio operators. The radios primary purpose is to help to support emergency communication in Cuba. (Southgate)

**

NEW PRODUCTS: WOUXON US TO INTRODUCE CHINESE BUILT HT AT HAMVENTION

If the information on the Hamvention Yahoogroups Reflector is correct, then there is a new player in town to rival Alinco, Icom, Kenwood and Yaesu in the dual band handheld radio competition for your dollar. The new company is called Wouxon dot US and their first radio for the United States market is their new model KG-UVD1P 2 meter and 70 centimeter Dual-Bander will be available at the Dayton Hamvention.

In a news release, Wouxon.US says that it will be at booth is #172, just inside the North Hall entrance and to the right. The company says that it will have 100 units plus accessories packed up and ready to go at a special

Hamvention price. The news release did not specify what that price will be, but from Hong Kong dealers advertising on eBay, these radios, complete with a rechargeable battery, desktop drop-in charger, auxiliary earphone and a belt clip seem to sell for an average of around $80 plus $40 shipping to the United States That said, few expect the price to be that low in a retail environment such as Hamvention or your favorite radio store.

The home company is Quanzhou Wouxun Electronics Co. Ltd. of Fujian, China. It says that the new ham radio dual bander has received FCC certification. It's approved as FCC ID: WVTWOUXUN04. More on the new radio is on-line at www.Wouxun.US (Hamvention Yahoogroups, Wouxon.US Web page)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: FAMED DX'ER VINCE THOMPSON, K5VT - S.K

The changing of the guard in ham radio continues with word of the passing of famed DX'er Vince Thompson, K5VT who passed away on April 24th. Thompson was best known as a DX-peditioner known for activating many African countries, and a founder of the Voodoo Contest Group. A physician, K5VT trained doctors overseas on his trips, and practiced medicine in the Phoenix, Arizona area. Thompson also served as the ARRL Southwestern Division representative to the Leagues's DX Advisory Committee (ARRL)

**

THE CHANGING OF THE GUARD: FORMER ARRL SW DIVISION DIRECTOR GARY STILLWELL, KI6T -S.K.

And Gary Stillwell, KI6T, served as Southwestern Division Vice Director in the 1973 era when he was W6NJU has also become a Silent Key. Stillwell had relinquished the post when he moved to Sacramento in Northern California for his work with the California Transportation Agency also known as Caltrans. He was a well known DXer at the top of the DXCC honor roll. Stillwell was also the founder and original owner of The Radio Place, a Sacramento store serving the needs of that city's amateur radio community. (ARRL)

**

MOONBOUNCE: K1JT GIVES INITIAL KP4AO REPORT

One of the organizers of the recent EME operation using the 1000 foot dish in Arecibo, says the operation was a definite success. Amateur Radio

Newsline's Jim Davis has the details:

--

WSJT inventor Joe Taylor, K1JT, has provided a report on the recent KP4AO amateur radio moon bounce operation from the Arecibo Observatory in Puerto Rico.

According to K1JT, the wall of stations calling was simply incredible. A rough estimate suggests that the Arecibo group may have worked something like 20% of the callers potentially workable on SSB, 10% of those workable on CW, and only a few percent of those workable on JT65.

From Joe's memory he says that the log shows nearly 240 completed QSOs with some 57 DXCC entities, in a total of 8 operating hours. He notes that they made recordings of the whole 432 MHz EME sub-band for most of the time KP4AO was on the air. He says that in due course it will be possible to "tune the band again carefully picking out callsigns. If and when this is done he will be happy to post a list of received callsigns.

In the meantime Joe has some requests to all who took part in the operation. I f you worked KP4AO with a setup significantly smaller than is normally required for EME, please send him a short note describing your antenna, receiver, and transmit power. Or if you only heard KP4AO, please also send him a note describing your antenna and receiver. Joe's direct e-mail is k1jt(at) arrl (dot) net.

I'm Jim Davis, W2JKD.

--

Again, if you missed that e-mail address where to send your reports its k1jt(at) arrl (dot) net. (Southgate)

**

WORLDBEAT: UK PREPARES FOR DIGITAL RADIO SWITCHOVER

The United Kingdom's Digital Economy Bill which will force all analog radio off the air in coming years has become law. The move came barely a week after a British Parliament's House of Lords report questioned the wisdom of moving all national and regional radio broadcasting to Digital Audio Broadcasting. It echoed many criticisms voiced over the bill, which is likely to consign all FM and AM radios to landfill in five years, except for listening to ultra-local FM stations.

But digital radio switch-over arguments are unlikely to cease for long time. This is because the new law constructs a framework of conditions rather than fixing a date. It requires Digital Audio Broadcasting coverage and listening-share to reach a certain level before FM switch-off can be initiated. This in turn will be followed by a delay before the transmitters are actually turned off. (Electronics Weekly)

**

HAM RADIO IN SPACE: BEQUEST WILL HELP LAUNCH FUNCUBE

Great Britain's Radio Communications Foundation has announced that it is handling a legacy donation that will help fund the AMSAT-UK FUNcube project. This grant to the Foundation stipulates that the funding must be used for the development of a suitable amateur satellite project.

So the Radio Communications Foundation went looking for a suitable candidate. It found what it was looking for in a proposal from AMSAT-UK to use the inheritance to help with the FUNCube educational project that has the aim of educating young people about radio, space, physics and electronics.

By way of background, FUNcube is the first ever cubesat designed to benefit young spectators and is expected to be the first British cubesat to reach space. Its target audience consists of primary and secondary school children. The FUNcube satellite itself will feature a 145 MHz telemetry beacon that will provide a strong signal for the students to receive.

A tentative launch date is sometime this fall. This, after FUNcube completes its flight readiness review. (Southgate)

**

HAM RADIO IN SPACE: THE SMALL SATELLITES SYMPOSIUM

The Small Satellites Systems and Services Symposium takes place in Madeira, Spain, from May 31 to June 4, 2010 and this year features a CubeSat Workshop. This biennial event covers all aspects of small satellite programs such as flight experiences, mission definition, technologies, launches, ground segment and data exploitation. An abstract of the papers to be presented can be seen in PDF format at tinyurl.com/2423paz. (AMSAT-UK)

**

WORLDBEAT: NEW 10 METER FM REPEATER IN PORTUGAL

A new 10 meter FM amateur radio repeater has come on the air in Portugal. Sponsored by the Ham Radio Association of Beira Alta, CQ0HAR operates on European repeater channel RH4 with an input of 29.5 and an output of 29.6 MHz. A 67 hertz CTCSS tone is required for access CQ0HAR. More on the system is on-line at www.ct1arb.com (EC1AME)

**

DX

In DX, PA7JWC, will be active as 3B8/PA7JWC from Pereybere, Mauritius Island (AF-049) between May 5-22nd. Activity will be on the HF bands and 6 meters, using CW, SSB, RTTY and PSK31. QSL via the LoTW or to his home callsign direct or by the Dutch QSL Bureau.

DF5AU will be active portable H B Zero from Lichtenstein through May the 12th. His operation will be on the HF bands using CW and SSB with his focus on 80 meters. QSL via his home callsign.

IK8HCG will be active as IB0R from Ventotene Island during the RSGB Islands on the Air Contest July 24th and 25th. QSL via his home callsign, direct only.

Lastly, listen out for Bulgarian special event station LZ2010KM to be on the air through May 31st. This activity is to celebrate St. Kiril and Methodius' Day. Operations will be on all bands and modes. QSL to LZ1BJ, by the Bureau (preferred). Logs will be uploaded to LoTW.

(Above from various DX news sources)

**

THAT FINAL ITEM: WINDSTREAM COMMUNICATIONS DONATES $5000 TO LINCOLN ARC

And finally this week an old adage that says do good to others and it will be repaid in droves has come true for one radio club. A club that has long been known for its dedication to public service. Bill Pasternak, WA6ITF, is here with the details:

--

Windstream Communications has announced that it is donating $5,000 to Nebraska's Lincoln Amateur Radio Club. This, in appreciation of the group's communications support to residents and the Lincoln-Lancaster County 911 center during the telecommunications outage that took place back on April 1st.

As previously reported, the outage occurred after an upgrade to an internal timing system in a switch that hosts the 911 routing system. Roughly 36,000 customers lost landline phone service. The failure of the routing switch interrupted 911 service for cell phones and landlines in at least a dozen counties for nearly 15 hours, forcing authorities to take reports in person and by e-mail. It also caused a callout of local ARES and Lincoln Club members who were stationed on street corners and at strategic public service agencies as a replacement for the interrupted 911 service.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

Windstream Communications announced the $5000 donation to the Lincoln Amateur Radio Club on Monday, May 3rd. At same time its spokesman said that the company had determined that timing cables were not in conformance with industry and company specifications. As a result, this had caused the phone system outage. (Lincoln Journal-Star, K0NEB)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is

newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a few short weeks to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Carlson, KQ6FM, saying 73 from Reno, Nevada, and we thank you for listening.

> Even the Shroud of Turin shows Jesus had long hair.

There is no compelling evidence that the shroud is genuine. Therefore, any conclusion about Jesus which is based upon its appearance is without merit.

On the other hand, we DO have verified photographs of Woger Wiseman which show that he had long hair at the time the photos were taken. You can find one copy that Woger can't get pulled from the net at http://nimbusters.org/forum/roger.jpg - a photo which clearly shows Woger's shameful long hair. Larger versions exist which include Woger's Yaesu chart on the wall behind him. They were discovered in a Yahoo singles' group by a detective named Schwartz. After that discovery, Woger pulled all photos of himself off the net and removed his Yahoo singles' group entry. Poor, lonely Woger remains unmarried to this day.

"Woger", what is that? For that matter, Ace, why do you live in a
trashy trailer on 2-2.5 acres?

It is better than N0VP's filthy HUD apartment in the ghettos of
Athens, AL, though. I'd rather have about 10 acres, though.

There was a show which proved that is was genuine on the History
Channel, just a few weeks ago.
Maybe you can't afford cable or satellite TV, being out there in Bean
Blossom.

>Therefore, any conclusion about Jesus which is based upon its appearance is without merit.

Sort of like YOUR conclusions, from a mail order religious degree from
a sham of a "college."

> On the other hand, we DO have verified photographs of Woger Wiseman

No, you don't. All you have is lies and bullshit.
Roger doesn't have long hair, or a beard. You lose.

> Woger's shameful long hair.

N0VFP and WH2T's shameful baldness.....get some Rogaine so
you won't be so jealous.
Paul twisted the word of the Bible, since he obviously had an agenda,
being a Roman, who wore short cropped hair, because it could be used
in battle by an opponent.
The Bible praises "long hair" in:
Judges 16:17
2 Kings 1:8
2 Samuel 14:25-26
etc.....
Would God in one place in the Bible encourage long hair, and then in
another place condemn it?

Or are you, like Paul, daring to "speak" for God?

> Larger versions exist which include Woger's
> Yaesu chart on the wall behind him.

Except Roger doesn't have a Yaesu chart.

> They were discovered in a Yahoo
> singles' group by a detective named Schwartz.

Yes, from an account N0VFP set up.
And Schwartz sure did give N0VFP questions he could not answer on
9/27/04 like:
"Why did you post those pictures of yourself on NIM Busters Lloyd?"
"The one of the man hugging and kissing you and the one of you picking
your nose?"
"The real answer Lloyd"

The last question was said because even he knew Lloyd was untruthful,
even though he claims to be a "born-again Christian."

>Poor, lonely Woger remains unmarried to this day.

Poor lonely N0VFP remains a 38 year old VIRGIN, never married either.
Roger was married before, stupid, and not to anybody named "Regina" as
you purport.

> --
> "If a man have long hair it is a shame unto him." -- Paul, I Cor. 11:14

You learn that twisted view of the Bible from that sham of a college,
did, you?

Roger later had three different versions of the visit by the Heils.
His best, though was that he had gone to the store and that his "girlfriend"
was in his house, alone.
He said she was afraid to answer the door.
I didn't know that blowup dolls were capable of such things.

On May 8, 5:48 am, "Tyler" <666@anon> wrote:
> When I grow up

You haven't grown up after 38 yerars, Porky, you pretend that you are
a science fiction "timelord" Or in your case you are the Time Tard or
Time Lard.

"speeler"

LARDASS Lloyd N0VFP's ENGLISH FUCK-UPS!

"breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation
session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also
"forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies" too
bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of
hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd
deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead
in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in
the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the
dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame
Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole
axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere
"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters

"enfighting" - Lloyd's two brain cells are infighting for control of his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?
"Tonite" - There's nothing in Lloyd's brain "tonight" or any night
"segmant" - What Lloyd's communications are, only sentence "segments"
"I just listening" - Too bad he doesn't listen to his poor English
"buffon" - The Athens, Alabama "buffoon" strikes again!
"museium" - Where LARDASS LLoyd keeps his "muse"
"nastey" - How everybody describes LARDASS' body stench, especially in the ghetto
"loose" - Lloyd's description of his spinchter muscles...
"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"
"awhile" - It will be "a while" before Davies gets a clue
"freinds" - Lloyd's conglomeration of "friends" and "fiends"
"thier" - "There" just isn't any hope for LARDASS Lloyd "ill-educated" Davies
"backstabers" - Lloyd's version of the OJays' hit
"becuase" - Home of the "Deliverance Extras" spelling by LARDASS Lloyd
"obselete" - What LARDASS thinking is to him, others see it as 'obsolete'.....
"belive" - What fools like LARDASS Lloyd "believes"
"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language skills!
"marshalls" - Mongolloyd spell "marshals" real good!
Wisemand - LARDASSd fucksd upd againd
"compay" - Mongolloyd never gets any female "compay," while others do get "company"
" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in your miserable life!
"and do the nasty!" You don't really know what that means, do you, 30 year old VIRGIN?
"It's does" - Mongolloyd use good English
"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a "moment"
"seriuosly" - Lavender Lad President Mongolloyd wants to be taken "seriously" instead of "seriuosly"
"annouced" - Mongolloyd "announces" his stupidity again
"tonite" - Davies never lets his lack of education stop him from announcing to the world he's a fucking imbecile!
"nite" - When LARDASS Lloyd molests those kids he makes them say "nite, nite" at "night"
"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his FATASS....put it on his welfare bill
"so fuck of" - When Mongolloyds who have man tits talk tough......
"fukcing funney" - Alabama deliverance extra Davies speak
"pictrue" - "Picture" yourself as a Davies Mongolloyd
"isseus" - Davies has "issues" too many to list here
"resortjng" - Is Lloyd from Finland?
"attsxks" - When LARDASS Davies "attacks" he uses illiteracy
"basturds"- What mental illness patient LARDASS Lloyd calls his nurses

"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd’s got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does "dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is "disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make good sentence
"jellous" - Most of LARDASS Lloyd’s cellulite body is "jealous" of skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those nutsacks for pizza topping, Pappa John's terminated him saying he didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his

fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus
spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him
an education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of
tying his penis with a light cord and masturbating to the word
"chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good
sentence!
"straming" - Lardass usually has to wash his sheets from the "stream"
of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of
stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd
talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's"
them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd
revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head
collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good
sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic
relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be

said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has "despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say "sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses" on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to, to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the

impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
“conquor” - Lardass Lloyd has yet to “conquer” his idiocy.
“I always new that your stupidity would trip you up, Mr. Wiseman.” - I just “knew” Llardass Lloyd couldn’t pose as “Christy Davies” without fucking it up and outing himself.
“I have given it some though and decided to come back” - Mongolloyd has never given anything any “thought.” (from another “I’m leaving” speech/lie)
“usaul” - As “usual” Lardass lloyd Davies fucks up!
“Secwet Woger “ Llardass Llavender Llad Lloyd’s been sucking so many cocks he’s got a lisp!
“douters” - Even though he has his “doubters”, it’s “doubtful” Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a “bipolar bisexual”.
"desperite" - Lardass Lloyd is so “desperate” to win at something, anything.
"situtation" - Most people get in “situations, ” but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets “a hold” of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, “mysterious” survivor of a coat

hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time" now.
"mommie's" - When Mongolloyds say "Mommy’s" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!

"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites by now
"red head" - Little Red is shoving his big ole black dickhead in Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets "harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide "whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard Lardass never notices when he fucks up.

"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity "activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
“turd in the punch bowel.” - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.

"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.
"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!
"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!
"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.
"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to

a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!
You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.
""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."
"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....
"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.
"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!
"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat

faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English
language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent
sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so
"we won't" see it ever again.
"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his
syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny
dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this
board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a
Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty
board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue
around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his
retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being
more stupid, "are we now," Lardass?
"I just you like a brother" - Mongolloyd would take it up the ass from
you just like he did from his brother, too.
"I've been to two Hamfest" - Mongolloyd's never been to two English
classes, though!
"Wogie" - Mongolloyd shows off his cocksucker's lisp.
"his paint size" - Mongolloyd wears size 50 "pants," does he also wear
"paint" because he is a walking billboard for obesity?
"HAMFEST'S" - Mongolloyd has never shown at any "hamfests"! He's too
big of a coward!
"Woger" - Lardass likes to think of "Roger" when he sucks nigger
dicks!
"West Vagina" - Yes, "Virginia," Mongolloyd hasn't ever seen any
vagina, west or east, north or south.
"reconize" - Mongolloyd, your fuckups are easy to "recognize"
"thopught" - Mongolloyd never has any "thoughts", except to show off
his lisp again!
"Who hear likes" - Mongolloyd nobody likes you, "here" or anywhere!

"Wogie" - Lardass Lloydie's lisp exposes him again!
"really beated" - Mongolloyd really "beats" off, since he can't get a woman.
"Woger" - Mognolloyd makes like faggot.
"Curtain's" - Mongolloyd always fucks up when he hides behind his "curtains" of sockpuppets.
"cocksuckers" - Lardass always fucks up and punctuates incorrectly, must be his "cocksucker's" lisp.
"spinctor" - Mongolloyd has the "spinchter" muscle the size of a #10 washtub, since his drunk daddy, his felon older brother and his mommy's dildoe has stretched it out.
"reconized" - Lardass Davies stupidity is easily "recognized".
"porpuse" - Mongolloyd's stupidity is on "purpose"!
"worlds" - Mongolloyd is the "world's" worst speller!
"comfortbale" - Mongolloyd confessed he is "comfortable" looking at dicks all day long.
"For the recod" - For the "RECORD," Mongolloyd is retarded!
"all these yours" - "All these years" of posting, and Lardass has yet to post in English.
"I have no worked for 22 days straight" - Too bad you don't concentrate on your English for the same legnth of time, Porky!
"Roger'" - "Roger's" what's always on your little mind, Porky!
"Shittpacker" - Mongolloyd has a "shitpacker" for a father.
"revoaked" Mongolloyd your life will soon be "revoked."
"Upeset?" BWHAHAHAHAHA..Mongolloyd you get "upset" so easily, BITCH!
"knumskull" - Mongolloyd, I could fucking care less since I'm not Catholic, you fucking "Numbskull"
"BEVERY FUCKNH AWARE" - Mongolloyd should "BE VERY FUCKING AWARE" of his surroundings and who is watching him!
"orafice" - Mongolloyd has had a big greasy dick stuck in every "ORFICE" in his obese body.
"YOUR STILL" Mongolloyd, "you're still" a fucking imbecile!
"Funn" - Mongolloyd's face sure is "FUNNY" looking.
"Your whole life has past you by." - Lardass, your life has already "passed" you by the minute you were shit out of your whore mommy.
"Eldery" - If you were a bit more "ELDERY," Porky ,you would be a better speller.
"Jelous" - Nobody, I repeat nobody is "JEALOUS" of a retard like Mongolloyd Davies!

"He 4F for the Air Force" - Wrong, Mongolloyd, you are 4F for LIFE!
"plagarize" - Mongolloyd, you couldn't even "plagiarize" from "See Jack Run" correctly.
"Is like our her Steve and Lloyd" - Mongolloyd fucks up again! Mongolloyd calls himself and Holstan a "her."

"to much" - Mongolloyd tries to communicate in English but it's just "too much" for his tiny brain to handle.
"beutiful" - Mongolloyd is as "beautiful" as a WART HOG!
"Trough" - Mongolloyd can't get that everybody sees that he is fucking stupid "THROUGH" his malformed skull.

"would all upset" - Try posting in English, DUMBFUCK Davies!
"backpedd;e" - Mongolloyd "backpedals" when he gets upset and misspells words!
"Good are you ever pathetic" - Mongolloyd, Goddamn, are YOU ever pathetic when you fuck up like that.
"Make ne" - Mongolloyd is trying to say "make me" like a little girl, but naturally, he fucks it up! HAHAHAHAHAHA!!!!!!
"I'm not into, unlike you" - Mongolloyd isn't into looking smart, either.
"Rare end" - Lardass, you "rear end" is so big, when you back up, you beep.
"hygienne" - Mongolloyd hasn't got any "hygiene" habits.
"suprise" - "SURPRISE", Mongolloyd fucks up again!
"poved" - Mongolloyd "proved" he is a fucking idiot once again!
"Momma" "marbels"- Your Crackwhore "Mama" knows you don't have all your "marbles", Porky!
"secoondly" - Mongolloyd is trying to count the times he has given blowjobs "secondly"
"atten" - Lardass you didn't "attend" school, either!
"backwerds" -Mongolloyd is always ass-"backwards!"
"Were" - "We're" sure you are a fucking moron, Mongolloyd!
"he's laugh and go on" - Lardass we laugh at your fat dumbass, and go on with our fucking lives, but you don't have a life!
"tradion" - Mongolloyd's "tradition" is to fuck up!
"Mitzah" - Porky the Jew didn't have anything to cut off at the Bar "Mitzvah!"
"mines for his baby batter" - Mongolloyd shouldn't drink , take drugs and post!
"Ralley" - Mongolloyd should try to "rally" his few remaining brain cells!
"Vagina" - Something Lardass Davies has only sees when his whore mommy shit him out.
"Your welcome" - Mongolloyd, "you're" one stupid fucking retard.
"Llouyds" - "Lloyd's" such a fucking DUMBASS, he can't even spell his own name correctly!
"stagnanat?" - Do you mean "stagnant" like what is between your fucking Dumbo ears, Mongolloyd?
"accomadations" - Do you mean "accommodations" which are quite unlike your flithy HUD apartment in the Athens, AL ghetto?
"oppurtunity" - Mongolloyd never misses an "opportunity" to be stupid.
"Stubbenville" - Mongolloyd couldn't find WV on the map much less "Stubenville, Ohio."
"copy & past" - Mongolloyd spams with his "copy & paste" of every fucking idiotic thing he sees!
"appretince" - Mongolloyd makes good spell for a quarter-wit "apprentice".
"glorius" - Mongolloyd make "glorious" FUCK UP!
"weekened" - Mongolloyd's "weekend" consists of getting drunk and whining about another man! That is, between delivering pizzas.

"Woger mkae" - "Roger make"s Mongolloyd look like a fool, time and time again!
"noddle" - Lardass your little "noodle" of a dick is like a fucking shard of thin spaghetti!
"usae" - Mongolloyd never "use"s any fucking sense or correct spelling.
"I ambored" - Mongolloyd, you are an idiot as well!
"you ae one to talk" - Mongolloyd, you "are" the king of the morons!
"i has bought Roger a birthday presetn" - Mongolloyd should buy himself a birthday "present" known as a dictionary!
"my minions will desent on Glendale" - Mongolloyd Davies' shitty drawers "descend" on his flabby ankles, too!
"show the welfare roles" - Mongolloyd shouldn't show the "rolls" on his fat gut, especially when people are trying to eat!
"When I "die" I will ascend to higher plane of existance!" - No, Lardass, you will always be a piece of shit in any "existence."
"whose photo is on that button" - "Who's the retard who can't use English, Lloydie, that's who!
"bif fucking deal" - Lloydie is a "big" fucking fuckup, isn't he?
"you are to coward to use your own name" - Mongolloyd is "too" stupid to post in English!
"what wrong Tor afarid" - "What's" wrong, Mongolloyd, "afraid" to admit English isn't your first language?
"you and woger see Lloyd everywhere, what you fail to realize is the people on this board hat you and Roger and not Lloyd" - Mongolloyd fails to realize how fucking stupid and "hated" he is!But Mongolloyd sees his unrequited gay love Roger everywhere!
"I have neber heard of stick pussy" - You sure have tasted it, "never" straight Mongolloyd!
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"instaslling" - Mongolloyd makes good spell! Mongolloyd should be "installing" a working brain.

" wiv what i earn i go to IKEA" - "Whatever" you earn isn't enough to pay all your past-due bills, Mongolloyd.

Mongolloyd make good spells!

I, Woger, the bane and scourge of Lloyd Davies, wish to thank my mother for
the house I live in.
Were it not for my adoptive mother I would not have inherited this castle
and the curtains behind which I hide.
Thank You, Mother for all you have left me.
If it weren't for you I would be living in a small apartment next to Lloyd.

Woger

There was a show which proved that is was genuine on the History
Channel, just a few weeks ago.
Maybe you can't afford cable or satellite TV, being out there in Bean
Blossom.

>Therefore, any conclusion about Jesus which is based upon its appearance is without merit.

Sort of like YOUR conclusions, from a mail order religious degree
from
a sham of a "college."

> On the other hand, we DO have verified photographs of Woger Wiseman

No, you don't. All you have is lies and bullshit.
Roger doesn't have long hair, or a beard. You lose.

> Woger's shameful long hair.

N0VFP and WH2T's shameful baldness.....get some Rogaine so
you won't be so jealous.
Paul twisted the word of the Bible, since he obviously had an agenda,
being a Roman, who wore short cropped hair, because it could be used
in battle by an opponent.
The Bible praises "long hair" in:
Judges 16:17
2 Kings 1:8
2 Samuel 14:25-26
etc.....
Would God in one place in the Bible encourage long hair, and then in
another place condemn it?

Or are you, like Paul, daring to "speak" for God?

> Larger versions exist which include Woger's
> Yaesu chart on the wall behind him.

Except Roger doesn't have a Yaesu chart.

> They were discovered in a Yahoo
> singles' group by a detective named Schwartz.

Yes, from an account N0VFP set up.
And Schwartz sure did give N0VFP questions he could not answer on
9/27/04 like:
"Why did you post those pictures of yourself on NIM Busters Lloyd?"
"The one of the man hugging and kissing you and the one of you
picking
your nose?"
"The real answer Lloyd"

The last question was said because even he knew Lloyd was untruthful,
even though he claims to be a "born-again Christian."

>Poor, lonely Woger remains unmarried to this day.

Poor lonely N0VFP remains a 38 year old VIRGIN, never married either.
Roger was married before, stupid, and not to anybody named "Regina"
as
you purport.

> ---------------------------------------
breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's"
masturbation
session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also
"forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies"
too
bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor
Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of
hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd
deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead
in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in
the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the
dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame

Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole
axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere
"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters
"enfighting" - Lloyd's two brain cells are infighting for control of
his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?
"Tonite" - There's nothing in Lloyd's brain "tonight" or any night
"segmant" - What Lloyd's communications are, only sentence "segments"
"I just listening" - Too bad he doesn't listen to his poor English
"buffon" - The Athens, Alabama "buffoon" strikes again!
"museium" - Where LARDASS LLoyd keeps his "muse"
"nastey" - How everybody describes LARDASS' body stench, especially
in
the ghetto
"loose" - Lloyd's description of his spinchter muscles...
"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"
"awhile" - It will be "a while" before Davies gets a clue
"freinds" - Lloyd's conglomeration of "friends" and "fiends"
"thier" - "There" just isn't any hope for LARDASS Lloyd "ill-
educated" Davies
"backstabers" - Lloyd's version of the OJays' hit
"becuase" - Home of the "Deliverance Extras" spelling by LARDASS
Lloyd
"obselete" - What LARDASS thinking is to him, others see it as
'obsolete'.....
"belive" - What fools like LARDASS Lloyd "believes"
"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language
skills!
"marshalls" - Mongolloyd spell "marshals" real good!
Wisemand - LARDASSd fucksd upd againd
"compay" - Mongolloyd never gets any female "compay," while others do
get "company"
" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in
your miserable life!
"and do the nasty!" You don't really know what that means, do you, 30
year old VIRGIN?
"It's does" - Mongolloyd use good English
"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a
"moment"
"seriuosly" - Lavender Lad President Mongolloyd wants to be taken
"seriously" instead of "seriuosly"
"annouced" - Mongolloyd "announces" his stupidity again
"tonite" - Davies never lets his lack of education stop him from
announcing to the world he's a fucking imbecile!
"nite" - When LARDASS Lloyd molests those kids he makes them say
"nite, nite" at "night"
"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his

FATASS....put it on his welfare bill
"so fuck of" - When Mongolloyds who have man tits talk tough......
"fukcing funney" - Alabama deliverance extra Davies speak
"pictrue" - "Picture" yourself as a Davies Mongolloyd
"isseus" - Davies has "issues" too many to list here
"resortjng" - Is Lloyd from Finland?
"attsxks" - When LARDASS Davies "attacks" he uses illiteracy
"basturds"- What mental illness patient LARDASS Lloyd calls his
nurses
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey
rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law
suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth
feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went
over
English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the
retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets
upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to
debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a
scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let
him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd’s got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor
kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich
in
ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his
favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does

"dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is
"disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make
good sentence
"jellous" - Most of LARDASS Lloyd’s cellulite body is "jealous" of
skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those
nutsacks for pizza topping, Pappa John's terminated him saying he
didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his
fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus
spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him
an education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of
tying his penis with a light cord and masturbating to the word
"chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes
good
sentence!
"straming" - Lardass usually has to wash his sheets from the "stream"
of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of
stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS
Lloyd.
"Cause i'll have law lock you up and throw away the key!" -
Mongolloyd
talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS
"here's"
them!
"forgotton" - LARDASS has "forgotten" what he was taught in special
Ed
"I want your seriousness" - LARDASS does his take on "I want your
sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd
revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head

collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good
sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier
Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic
relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be
said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack
thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad
LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over
literacy
by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain
neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read,
and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-
E-
R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy
apartment ...

"woger" - nuff'said.

1172. Lloyd, you should really stop talking with your mouth full like this:

Turin Shroud confirmed as a fake
June 21, 2005
by Richard Ingham

http://www.physorg.com/news4652.html

PARIS, June 21 (AFP) - A French magazine said on Tuesday it had carried out experiments that proved the Shroud of Turin, believed by some Christians to be their religion's holiest relic, was a fake.

"A mediaeval technique helped us to make a Shroud," Science & Vie (Science and Life) said in its July issue. The Shroud is claimed by its defenders to be the cloth in which the body of
Jesus Christ was wrapped after his crucifixion.

It bears the faint image of a blood-covered man with holes in his hand and wounds in his body and head, the apparent result of being crucified, stabbed by a Roman spear and forced to wear a crown of thorns.

In 1988, scientists carried out carbon-14 dating of the delicate linen cloth and concluded that the material was made some time between 1260 and 1390. Their study prompted the then archbishop of Turin, where the Shroud is stored, to admit that the garment was a hoax. But the debate sharply revived in January this year.

Drawing on a method previously used by skeptics to attack authenticity claims about the Shroud, Science & Vie got an artist to do a bas-relief -- a sculpture that stands out from the surrounding background -- of a
Christ-like face.

A scientist then laid out a damp linen sheet over the bas-relief and let it dry, so that the thin cloth was moulded onto the face. Using cotton wool, he then carefully dabbed ferric oxide, mixed with gelatine, onto the cloth to make blood-like marks. When the cloth was turned inside-out, the reversed marks resulted in the famous image of the crucified Christ.

Gelatine, an animal by-product rich in collagen, was frequently used by Middle Age painters as a fixative to bind pigments to canvas or wood.

The imprinted image turned out to be wash-resistant, impervious to temperatures of 250 C (482 F) and was undamaged by exposure to a range of harsh chemicals, including bisulphite which, without the help of the gelatine, would normally have degraded ferric oxide to the compound ferrous oxide.

The experiments, said Science & Vie, answer several claims made by the pro-Shroud camp, which says the marks could not have been painted onto the

cloth.

For one thing, the Shroud's defenders argue, photographic negatives and scanners show that the image could only have derived from a three-dimensional object, given the width of the face, the prominent cheekbones and nose.

In addition, they say, there are no signs of any brushmarks. And, they argue, no pigments could have endured centuries of exposure to heat, light and smoke.

For Jacques di Costanzo, of Marseille University Hospital, southern France, who carried out the experiments, the mediaeval forger must have also used a bas-relief, a sculpture or cadaver to get the 3-D imprint.

The faker used a cloth rather than a brush to make the marks, and used gelatine to keep the rusty blood-like images permanently fixed and bright for selling in the booming market for religious relics.

To test his hypothesis, di Costanzo used ferric oxide, but no gelatine, to make other imprints, but the marks all disappeared when the cloth was washed or exposed to the test chemicals.

He also daubed the bas-relief with an ammoniac compound designed to represent human sweat and also with cream of aloe, a plant that was used as an embalming aid by Jews at the time of Christ.

He then placed the cloth over it for 36 hours -- the approximate time that Christ was buried before rising again -- but this time, there was not a single mark on it.

"It's obviously easier to make a fake shroud than a real one," Science & Vie report drily.

The first documented evidence of the Shroud dates back to 1357, when it surfaced at a church at Lirey, near the eastern French town of Troyes. In 1390, Pope Clement VII declared that it was not the true shroud but could be used as a representation of it, provided the faithful be told that it was not genuine.

In January this year, a US chemist, Raymond Rogers, said the radiocarbon samples for the 1988 study were taken from a piece that had been sewn into the fabric by nuns who repaired the Shroud after it was damaged in a church blaze in 1532.

Rogers said that his analysis of other samples, based on levels of a chemical called vanillin that results from the decomposition of flax and other plants, showed the Shroud could be "between 1,300 and 3,000 years old.

There was a show which proved that is was genuine on the History
Channel, just a few weeks ago.
Maybe you can't afford cable or satellite TV, being out there in Bean
Blossom.

>Therefore, any conclusion about Jesus which is based upon its appearance is without merit.

Sort of like YOUR conclusions, from a mail order religious degree
from
a sham of a "college."

> On the other hand, we DO have verified photographs of Woger Wiseman

No, you don't. All you have is lies and bullshit.
Roger doesn't have long hair, or a beard. You lose.

> Woger's shameful long hair.

N0VFP and WH2T's shameful baldness.....get some Rogaine so
you won't be so jealous.
Paul twisted the word of the Bible, since he obviously had an agenda,
being a Roman, who wore short cropped hair, because it could be used
in battle by an opponent.
The Bible praises "long hair" in:
Judges 16:17
2 Kings 1:8
2 Samuel 14:25-26
etc.....
Would God in one place in the Bible encourage long hair, and then in
another place condemn it?

Or are you, like Paul, daring to "speak" for God?

> Larger versions exist which include Woger's
> Yaesu chart on the wall behind him.

Except Roger doesn't have a Yaesu chart.

> They were discovered in a Yahoo
> singles' group by a detective named Schwartz.

Yes, from an account N0VFP set up.
And Schwartz sure did give N0VFP questions he could not answer on
9/27/04 like:
"Why did you post those pictures of yourself on NIM Busters Lloyd?"
"The one of the man hugging and kissing you and the one of you
picking
your nose?"
"The real answer Lloyd"

The last question was said because even he knew Lloyd was untruthful,
even though he claims to be a "born-again Christian."

>Poor, lonely Woger remains unmarried to this day.

Poor lonely N0VFP remains a 38 year old VIRGIN, never married either.
Roger was married before, stupid, and not to anybody named "Regina"
as
you purport.

> --
> "If a man have long hair it is a shame unto him." -- Paul, I Cor. 11:14

You learn that twisted view of the Bible from that sham of a college,
did you?

You mean like this quote: :"If a man have long hair it is a shame unto
him." -- Paul, I Cor. 11:14 "?????
It's from a whole book of fairy tales.

Sorry, Dipshit, the program was on the HIstory Channel, "The Real Face
of Jesus" (2010), they did tests and used computer reconstruction to
get the 3 D image from the cloth.
http://www.huffingtonpost.com/2010/03/31/the-real-face-of-jesus-hi_n_519825.html

Maybe if you could hold down a job, you could afford cable TV.

Well, you believe less credible sources.

> Well then, you probably believe Wikipedia too, and Wikipedia says that the History
> Channel program reached no definite conclusion about the origin of the
> shroud. Until radiocarbon dating confirms the shroud's age, there will
> never be any compelling evidence one way or the other.

Hahahahaha, you just discredit your own comments by using Wikepedia as
a counterpoint, stupid.
If you doubt Wikipedia's credibility, why did you use it as an example
as to why the show had incorrect conclusions?
Radio-counter dating should be used on a piece of the shroud that
wasn't a Middle ages add on.
But getting facts straight isn't your forte, like when you claimed
Eric Clapton wrote "Layla" about a fatassed ham's frumpy wife, instead
of the model Patty Boyd Harrison.

Yes, the History channel is more credible than YOU are.

> > No, you don't. All you have is lies and bullshit.
> > Roger doesn't have long hair, or a beard. You lose.
>

Who are as big a liar as you are.
Roger doesn't have long hair nor a beard. You lose.

> hence his scruffy appearance in the photo. Fortunately, he couldn't be
> smelled.

But you sure would like to smell Roger's ass, wouldn't you, freak? If
these so-called local amateur operators got that close to him, they
should've been able to detect any alleged "smell".....your circular

logic is invalid.

> > Would God in one place in the Bible encourage long hair, and then in
> > another place condemn it?
>
> Yes. The New Testament changed some of the rules of the Old Testament,

So you are saying that the Bible is full of contradictions and fairy
tales and is not the word of God.
According to you, the Old Testament is just invalid as the word of
God.
>
> > Or are you, like Paul, daring to "speak" for God?
>
> Paul was speaking for Paul,

Yes, Paul was twisting the words to suit his agenda. He was a Roman,
so Short-cropped hair and a shaven face was a pagan tradition that
grew from the expansion of Rome. Probably so that the soldiers
couldn't have their beards or hair pulled during battle.
The epistles in the New Testament were written, first and foremost, to
groups of Christians in the first century particularly in Corinthia.
The instructions and advice that they contain were not always
applicable to other groups of first century Christians, and they are
not always applicable to us, living in the 21st century. We can't
pluck one verse out of context - that is out of its literary context
or out of its cultural context - and generalize to get a hard and fast
rule to live by today.
So you continue to live in the 1st Century, hypocrite.

> That's why his letters
> (epistles) were included in the New Testament.

No, the Bible has left out texts that didn't suit the Church's narrow
minded view.

> > Poor lonely N0VFP remains a 38 year old VIRGIN, never married either.

HI Ace, you fucking mail order college degreed fucktard.

>office it to say that I possess a vastly
> superior education to yours

Oh, that why you plagiarize and try to pass it off as your own
thoughts?

> am much better looking than you.

Really, is that why Sandra Bullock laughed at you when you unzipped
and exposed your tiny penis?

> Just ask any of the women of CUM.

Why, they would've rejected your short bald self just like Sandra
Bullock did. Besides, you went to a "college" that gave out mail order
degrees for a price and didn't complete any coursework. Otherwise you
wouldn't take a verse of the Bible out of context and try to use it as
some sort of condemnation.
Or did you forget:

"Judge not, lest ye be judged."

LARDASS Lloyd's ENGLISH FUCK-UPS!

"breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation
session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also
"forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies" too
bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of
hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd
deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead
in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in
the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the
dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame
Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole
axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere
"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters
"enfighting" - Lloyd's two brain cells are infighting for control of
his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?
"Tonite" - There's nothing in Lloyd's brain "tonight" or any night

"segmant" - What Lloyd's communications are, only sentence "segments"
"I just listening" - Too bad he doesn't listen to his poor English
"buffon" - The Athens, Alabama "buffoon" strikes again!
"museium" - Where LARDASS LLoyd keeps his "muse"
"nastey" - How everybody describes LARDASS' body stench, especially in the ghetto
"loose" - Lloyd's description of his spinchter muscles...
"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"
"awhile" - It will be "a while" before Davies gets a clue
"freinds" - Lloyd's conglomeration of "friends" and "fiends"
"thier" - "There" just isn't any hope for LARDASS Lloyd "ill-educated" Davies
"backstabers" - Lloyd's version of the OJays' hit
"becuase" - Home of the "Deliverance Extras" spelling by LARDASS Lloyd
"obselete" - What LARDASS thinking is to him, others see it as 'obsolete'.....
"belive" - What fools like LARDASS Lloyd "believes"
"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language skills!
"marshalls" - Mongolloyd spell "marshals" real good!
Wisemand - LARDASSd fucksd upd againd
"compay" - Mongolloyd never gets any female "compay," while others do get "company"
" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in your miserable life!
"and do the nasty!" You don't really know what that means, do you, 30 year old VIRGIN?
"It's does" - Mongolloyd use good English
"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a "moment"
"seriuosly" - Lavender Lad President Mongolloyd wants to be taken "seriously" instead of "seriuosly"
"annouced" - Mongolloyd "announces" his stupidity again
"tonite" - Davies never lets his lack of education stop him from announcing to the world he's a fucking imbecile!
"nite" - When LARDASS Lloyd molests those kids he makes them say "nite, nite" at "night"
"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his FATASS....put it on his welfare bill
"so fuck of" - When Mongolloyds who have man tits talk tough......
"fukcing funney" - Alabama deliverance extra Davies speak
"pictrue" - "Picture" yourself as a Davies Mongolloyd
"isseus" - Davies has "issues" too many to list here
"resortjng" - Is Lloyd from Finland?
"attsxks" - When LARDASS Davies "attacks" he uses illiteracy
"basturds"- What mental illness patient LARDASS Lloyd calls his nurses
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law suit

"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd’s got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does "dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is "disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make good sentence
"jellous" - Most of LARDASS Lloyd’s cellulite body is "jealous" of skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those nutsacks for pizza topping, Pappa John's terminated him saying he didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus spirit.....
"bllod" - How LARDASS Lloyd spells "blood"

"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him
an education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of
tying his penis with a light cord and masturbating to the word
"chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good
sentence!
"straming" - Lardass usually has to wash his sheets from the "stream"
of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of
stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd
talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's"
them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd
revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head
collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good
sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic
relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be
said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack
thereof from the
niggers his mommy Amanda serviced.

"I lost TEN POUNDS on my diet simce first of the year!" - Too bad LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has "despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say "sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses" on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to, to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!

"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
“conquor” - Lardass Lloyd has yet to “conquer” his idiocy.
“I always new that your stupidity would trip you up, Mr. Wiseman.” - I just “knew” Llardass Lloyd couldn’t pose as “Christy Davies” without fucking it up and outing himself.
“I have given it some though and decided to come back” - Mongolloyd has never given anything any “thought.” (from another “I’m leaving” speech/lie)
“usaul” - As “usual” Lardass lloyd Davies fucks up!
“Secwet Woger “ Llardass Llavender Llad Lloyd’s been sucking so many cocks he’s got a lisp!
“douters” - Even though he has his “doubters”, it’s “doubtful” Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a “bipolar bisexual”.
"desperite" - Lardass Lloyd is so “desperate” to win at something, anything.
"situtation" - Most people get in “situations, ” but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets “a hold” of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, “mysterious” survivor of a coat hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some

time" now.
"mommie's" - When Mongolloyds say "Mommy’s" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.

"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites by now
"red head" - Little Red is shoving his big ole black dickhead in Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets "harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide "whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never contained anything to begin with.

"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity "activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
“turd in the punch bowel.” - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.

"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.
"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!
"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!
"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.
"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less

anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!
You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.
""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."
"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....
"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.
"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!
"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!

"Wait till" - Mongolloyd we will "wait until" you compose a coherent sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.
"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being more stupid, "are we now," Lardass?
"I just you like a brother" - Mongolloyd would take it up the ass from you just like he did from his brother, too.
"I've been to two Hamfest" - Mongolloyd's never been to two English classes, though!
"Wogie" - Mongolloyd shows off his cocksucker's lisp.
"his paint size" - Mongolloyd wears size 50 "pants," does he also wear "paint" because he is a walking billboard for obesity?
"HAMFEST'S" - Mongolloyd has never shown at any "hamfests"! He's too big of a coward!
"Woger" - Lardass likes to think of "Roger" when he sucks nigger dicks!
"West Vagina" - Yes, "Virginia," Mongolloyd hasn't ever seen any vagina, west or east, north or south.
"reconize" - Mongolloyd, your fuckups are easy to "recognize"
"thopught" - Mongolloyd never has any "thoughts", except to show off his lisp again!
"Who hear likes" - Mongolloyd nobody likes you, "here" or anywhere!
"Wogie" - Lardass Lloydie's lisp exposes him again!
"really beated" - Mongolloyd really "beats" off, since he can't get a woman.
"Woger" - Mognolloyd makes like faggot.

"Curtain's" - Mongolloyd always fucks up when he hides behind his "curtains" of sockpuppets.
"cocksuckers" - Lardass always fucks up and punctuates incorrectly, must be his "cocksucker's" lisp.
"spinctor" - Mongolloyd has the "spinchter" muscle the size of a #10 washtub, since his drunk daddy, his felon older brother and his mommy's dildoe has stretched it out.
"reconized" - Lardass Davies stupidity is easily "recognized".
"porpuse" - Mongolloyd's stupidity is on "purpose"!
"worlds" - Mongolloyd is the "world's" worst speller!
"comfortbale" - Mongolloyd confessed he is "comfortable" looking at dicks all day long.
"For the recod" - For the "RECORD," Mongolloyd is retarded!
"all these yours" - "All these years" of posting, and Lardass has yet to post in English.
"I have no worked for 22 days straight" - Too bad you don't concentrate on your English for the same legnth of time, Porky!
"Roger'" - "Roger's" what's always on your little mind, Porky!
"Shittpacker" - Mongolloyd has a "shitpacker" for a father.
"revoaked" Mongolloyd your life will soon be "revoked."
"Upeset?" BWHAHAHAHAHA..Mongolloyd you get "upset" so easily, BITCH!
"knumskull" - Mongolloyd, I could fucking care less since I'm not Catholic, you fucking "Numbskull"
"BEVERY FUCKNH AWARE" - Mongolloyd should "BE VERY FUCKING AWARE" of his surroundings and who is watching him!
"orafice" - Mongolloyd has had a big greasy dick stuck in every "ORFICE" in his obese body.
"YOUR STILL" Mongolloyd, "you're still" a fucking imbecile!
"Funn" - Mongolloyd's face sure is "FUNNY" looking.
"Your whole life has past you by." - Lardass, your life has already "passed" you by the minute you were shit out of your whore mommy.
"Eldery" - If you were a bit more "ELDERY," Porky ,you would be a better speller.
"Jelous" - Nobody, I repeat nobody is "JEALOUS" of a retard like Mongolloyd Davies!

"He 4F for the Air Force" - Wrong, Mongolloyd, you are 4F for LIFE!
"plagarize" - Mongolloyd, you couldn't even "plagiarize" from "See Jack Run" correctly.
"Is like our her Steve and Lloyd" - Mongolloyd fucks up again! Mongolloyd calls himself and Holstan a "her."

"to much" - Mongolloyd tries to communicate in English but it's just "too much" for his tiny brain to handle.
"beutiful" - Mongolloyd is as "beautiful" as a WART HOG!
"Trough" - Mongolloyd can't get that everybody sees that he is fucking stupid "THROUGH" his malformed skull.
"would all upset" - Try posting in English, DUMBFUCK Davies!
"backpedd;e" - Mongolloyd "backpedals" when he gets upset and misspells words!
"Good are you ever pathetic" - Mongolloyd, Goddamn, are YOU ever

pathetic when you fuck up like that.
"Make ne" - Mongolloyd is trying to say "make me" like a little girl, but naturally, he fucks it up! HAHAHAHAHAHA!!!!!!
"I'm not into, unlike you" - Mongolloyd isn't into looking smart, either.
"Rare end" - Lardass, you "rear end" is so big, when you back up, you beep.
"hygienne" - Mongolloyd hasn't got any "hygiene" habits.
"suprise" - "SURPRISE", Mongolloyd fucks up again!
"poved" - Mongolloyd "proved" he is a fucking idiot once again!
"Momma" "marbels"- Your Crackwhore "Mama" knows you don't have all your "marbles", Porky!
"secoondly" - Mongolloyd is trying to count the times he has given blowjobs "secondly"
"atten" - Lardass you didn't "attend" school, either!
"backwerds" -Mongolloyd is always ass-"backwards!"
"Were" - "We're" sure you are a fucking moron, Mongolloyd!
"he's laugh and go on" - Lardass we laugh at your fat dumbass, and go on with our fucking lives, but you don't have a life!
"tradion" - Mongolloyd's "tradition" is to fuck up!
"Mitzah" - Porky the Jew didn't have anything to cut off at the Bar "Mitzvah!"
"mines for his baby batter" - Mongolloyd shouldn't drink , take drugs and post!
"Ralley" - Mongolloyd should try to "rally" his few remaining brain cells!
"Vagina" - Something Lardass Davies has only sees when his whore mommy shit him out.
"Your welcome" - Mongolloyd, "you're" one stupid fucking retard.
"Llouyds" - "Lloyd's" such a fucking DUMBASS, he can't even spell his own name correctly!
"stagnanat?" - Do you mean "stagnant" like what is between your fucking Dumbo ears, Mongolloyd?
"accomadations" - Do you mean "accommodations" which are quite unlike your flithy HUD apartment in the Athens, AL ghetto?
"oppurtunity" - Mongolloyd never misses an "opportunity" to be stupid.
"Stubbenville" - Mongolloyd couldn't find WV on the map much less "Stubenville, Ohio."
"copy & past" - Mongolloyd spams with his "copy & paste" of every fucking idiotic thing he sees!
"appretince" - Mongolloyd makes good spell for a quarter-wit "apprentice".
"glorius" - Mongolloyd make "glorious" FUCK UP!
"weekened" - Mongolloyd's "weekend" consists of getting drunk and whining about another man! That is, between delivering pizzas.
"Woger mkae" - "Roger make"s Mongolloyd look like a fool, time and time again!
"noddle" - Lardass your little "noodle" of a dick is like a fucking shard of thin spaghetti!

"usae" - Mongolloyd never "use"s any fucking sense or correct spelling.
"I ambored" - Mongolloyd, you are an idiot as well!
"you ae one to talk" - Mongolloyd, you "are" the king of the morons!
"i has bought Roger a birthday presetn" - Mongolloyd should buy himself a birthday "present" known as a dictionary!
"my minions will desent on Glendale" - Mongolloyd Davies' shitty drawers "descend" on his flabby ankles, too!
"show the welfare roles" - Mongolloyd shouldn't show the "rolls" on his fat gut, especially when people are trying to eat!
"When I "die" I will ascend to higher plane of existance!" - No, Lardass, you will always be a piece of shit in any "existence."
"whose photo is on that button" - "Who's the retard who can't use English, Lloydie, that's who!
"bif fucking deal" - Lloydie is a "big" fucking fuckup, isn't he?
"you are to coward to use your own name" - Mongolloyd is "too" stupid to post in English!
"what wrong Tor afarid" - "What's" wrong, Mongolloyd, "afraid" to admit English isn't your first language?
"you and woger see Lloyd everywhere, what you fail to realize is the people on this board hat you and Roger and not Lloyd" - Mongolloyd fails to realize how fucking stupid and "hated" he is!But Mongolloyd sees his unrequited gay love Roger everywhere!
"I have neber heard of stick pussy" - You sure have tasted it, "never" straight Mongolloyd!
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"instaslling" - Mongolloyd makes good spell! Mongolloyd should be "installing" a working brain.
" wiv what i earn i go to IKEA" - "Whatever" you earn isn't enough to pay all your past-due bills, Mongolloyd.

Mongolloyd make good spells!

{restore]
If you doubt Wikipedia's credibility, why did you use it as an
example
as to why the show had incorrect conclusions?
Radio-counter dating should be used on a piece of the shroud that
wasn't a Middle ages add on.
But getting facts straight isn't your forte, like when you claimed
Eric Clapton wrote "Layla" about a fatassed ham's frumpy wife,
instead
of the model Patty Boyd Harrison.

Yes, the History channel is more credible than YOU are.

> > No, you don't. All you have is lies and bullshit.
> > Roger doesn't have long hair, or a beard. You lose.

> Local amateur operators <lies>

Who are as big a liar as you are.
Roger doesn't have long hair nor a beard. You lose.

> hence his scruffy appearance in the photo. Fortunately, he couldn't be
> smelled.

But you sure would like to smell Roger's ass, wouldn't you, freak? If
these so-called local amateur operators got that close to him, they
should've been able to detect any alleged "smell".....your circular
logic is invalid.

> > Would God in one place in the Bible encourage long hair, and then in
> > another place condemn it?

> Yes. The New Testament changed some of the rules of the Old Testament,

So you are saying that the Bible is full of contradictions and fairy
tales and is not the word of God.
According to you, the Old Testament is just invalid as the word of
God.

> > Or are you, like Paul, daring to "speak" for God?

> Paul was speaking for Paul,

Yes, Paul was twisting the words to suit his agenda. He was a Roman,
so Short-cropped hair and a shaven face was a pagan tradition that
grew from the expansion of Rome. Probably so that the soldiers
couldn't have their beards or hair pulled during battle.
The epistles in the New Testament were written, first and foremost,
to
groups of Christians in the first century particularly in Corinthia.
The instructions and advice that they contain were not always
applicable to other groups of first century Christians, and they are
not always applicable to us, living in the 21st century. We can't
pluck one verse out of context - that is out of its literary context
or out of its cultural context - and generalize to get a hard and
fast
rule to live by today.
So you continue to live in the 1st Century, hypocrite.

> That's why his letters
> (epistles) were included in the New Testament.

No, the Bible has left out texts that didn't suit the Church's narrow
minded view.

> > Poor lonely N0VFP remains a 38 year old VIRGIN, never married either.
> > Roger was married before, stupid, and not to anybody named "Regina"
> > as you purport.

> Make up your mind.

KB, you know nothing, that's for sure!

> >> "If a man have long hair it is a shame unto him." -- Paul, I CO. 11:14

> > You learn that twisted view of the Bible from that sham of a college,
> > did you?

> Again, you have no idea of what universities I attended, because I am
> neither Lloyd nor "Ace."

>office it to say that I possess a vastly
> superior education to yours

Oh, that why you plagiarize and try to pass it off as your own
thoughts?

> am much better looking than you.

Really, is that why Sandra Bullock laughed at you when you unzipped
and exposed your tiny penis?

> Just ask any of the women of CUM.

Why, they would've rejected your short bald self just like Sandra
Bullock did. Besides, you went to a "college" that gave out mail
order
degrees for a price and didn't complete any coursework. Otherwise you
wouldn't take a verse of the Bible out of context and try to use it
as
some sort of condemnation.
Or did you forget:

"Judge not, lest ye be judged."

--

Mr. Clean geography idiot and imbecile fucks up
as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6a...@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain?
It sure looks like the Marshall County ARES, and it even has a place
to
send email."

Aww, what's the matter, did I hurt the little boy with the mail order
degrees?

> You obviously <IKYABWAI, lamer.>

You obviously need some Rogaine, BALDY! You are obviously in more need
of brain activity underneath the scalp, too.

INDEED!!!

Don't forget Lloyd A.Davies cried like a bitch when Oris, N4CND,
showed up at his HUD apartment.
I happened to be traveling through Huntsville, Alabama early this
morning, I deceided to stop in Athens and see just how tough Lloyd
Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several
people in the Deja Newsgroup (now Google) and I issued a challenge to
him. I told him I would be attending the Dalton, Ga. Hamfest if he
wanted to continue the conversation. He said he would be there and he
was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the
newsgroups. He always talks tough behind his keyboard. And, I
understand he is now doing the same sort of thing on the NIM Busters
Board.

Well, about 8.35 this morning (December 23, 2004) I located his
apartment in a nasty looking section of town. I'm a pretty good sized
man, but I put my gun in my back waistband after exiting the car. I
located his apartment and knocked on the door. The doorbell was
missing and bare wires were sticking out of the wall. I heard someone
say I'm coming and shortly the door opened with a safety chain lock
still engaged. He asked what I wanted and I introduced myself and
asked if we could have a conversation. He turned white as a sheet and
attempted to slam the door, but I already had a foot wedged in the
opening. He started shaking uncontrollably and was shouting leave me
alone, leave me alone! I told him he didn't seem so tough now face to
face and then noticed a putrid odor of urine and he was pissing his
pants and crying like a baby. Please leave me alone Oris he said, I
was just having fun and meant no harm, please leave, please. I could
see the filthy floor of this apartment and the dirty floors and the
stench of a grown man pissing on himself were almost enough to make me
want to vomit, and I don't have a queasy stomach. Upon telling him

that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

If you doubt Wikipedia's credibility, why did you use it as an
example as to why the show had incorrect conclusions?
Radio-counter dating should be used on a piece of the shroud that
wasn't a Middle ages add on.
But getting facts straight isn't your forte, like when you claimed
Eric Clapton wrote "Layla" about a fatassed ham's frumpy wife,
instead of the model Patty Boyd Harrison.

Yes, the History channel is more credible than YOU are.

> > No, you don't. All you have is lies and bullshit.
> > Roger doesn't have long hair, or a beard. You lose.
> Local amateur operators <lies>

Who are as big a liar as you are.
Roger doesn't have long hair nor a beard. You lose.

> hence his scruffy appearance in the photo. Fortunately, he couldn't be
> smelled.

But you sure would like to smell Roger's ass, wouldn't you, freak? If
these so-called local amateur operators got that close to him, they
should've been able to detect any alleged "smell".....your circular
logic is invalid.

> > Would God in one place in the Bible encourage long hair, and then in
> > another place condemn it?
> Yes. The New Testament changed some of the rules of the Old Testament,

So you are saying that the Bible is full of contradictions and fairy
tales and is not the word of God.
According to you, the Old Testament is just invalid as the word of
God.

> > Or are you, like Paul, daring to "speak" for God?
> Paul was speaking for Paul,

Yes, Paul was twisting the words to suit his agenda. He was a Roman,
so Short-cropped hair and a shaven face was a pagan tradition that
grew from the expansion of Rome. Probably so that the soldiers
couldn't have their beards or hair pulled during battle.

The epistles in the New Testament were written, first and foremost,
to groups of Christians in the first century particularly in
Corinthia.
The instructions and advice that they contain were not always
applicable to other groups of first century Christians, and they are
not always applicable to us, living in the 21st century. We can't
pluck one verse out of context - that is out of its literary context
or out of its cultural context - and generalize to get a hard and
fast rule to live by today.
So you continue to live in the 1st Century, hypocrite.

> That's why his letters
> (epistles) were included in the New Testament.

No, the Bible has left out texts that didn't suit the Church's narrow
minded view.

> > Poor lonely N0VFP remains a 38 year old VIRGIN, never married either.
> > Roger was married before, stupid, and not to anybody named "Regina"
> > as you purport.
> Make up your mind.

KB, you know nothing, that's for sure!

> >> "If a man have long hair it is a shame unto him." -- Paul, I CO. 11:14
> > You learn that twisted view of the Bible from that sham of a college,
> > did you?
> Again, you have no idea of what universities I attended, because I am
> neither Lloyd nor "Ace."

HI Ace, you fucking mail order college degreed fucktard.

>office it to say that I possess a vastly
> superior education to yours

Oh, that why you plagiarize and try to pass it off as your own
thoughts?

> am much better looking than you.

Really, is that why Sandra Bullock laughed at you when you unzipped
and exposed your tiny penis?

> Just ask any of the women of CUM.

Why, they would've rejected your short bald self just like Sandra
Bullock did. Besides, you went to a "college" that gave out mail
order degrees for a price and didn't complete any coursework.
Otherwise you
wouldn't take a verse of the Bible out of context and try to use it
as some sort of condemnation.
Or did you forget:

"Judge not, lest ye be judged."

Lloyd's cousin the Rabbi is Michael Davies [http://
www.bethjacoboakland.org/members/davies.pdf]. He says that Lloyd
shouldn't be in denial of his Jewish heritage, and that Lloyd should
really get back to coming to temple. Rabbi Michael says he knows Lloyd
can't afford to come to his temple, much less a $5 trip outside of
Athens, AL, but he should find a local one and quit obsessing about
men over the internet. Rabbi Michael says Lloyd is not all there, and
that he is childlike, pretending to be a "timelord" and playing with
his daleks dolls.Lloyd was always in the slower kid's classes in
school, and even got his g.e.d. after 5 times. Lloyd flunked out of
freshman year in community college, though. Like his ham radio license
endeavors, Lloyd just didn't want to put the time in to learn. Lloyd's
drinking has him worried, as well, since his "Weekend Computer"
"business" failed miserably, Lloyd had to cobble together some parts
for his current computer.
Lloyd's homosexuality came up, and Rabbi Michael said that Lloyd is an
okay mensch, but his personal hygiene and mental illness, his
personality or lack of one and his behavior turn off women right after
the introduction.

This year Lloyd wil be a 38 year old virgin. Pity him.

INDEED!!!

Don't forget Lloyd A.Davies cried like a bitch when Oris, N4CND,
showed up at his HUD apartment.
I happened to be traveling through Huntsville, Alabama early this
morning, I deceided to stop in Athens and see just how tough Lloyd
Davies was going to act when
<snip>

The above and the snipped portion of the rest of the post was not written by
Oris Grim.
I've seen the posts by Oris.
I know well about Oris's poor spelling and poor punctuation, and Oris did
not write this as Roger so presented.

Oris "may" have written parts of it, but clearly Roger has rewritten the
main body of the post and has clearly embellished it in the process.

Nice try, Woger, but no dice.

Do you know why Lloyd Davies, N0VFP can't get a real woman to love
him?

Answer:
How it must suck to be almost 38 years old and still be a virgin. But
then you
play Star Trek and Dr. Who and sit on your fat ass and whine on the
internet, unable to hold down a real job. You couldn't even hold on to
your pizza delivery boy "job."
You really do come across as a total whining bitch. This is probably
the reason why you never have gotten laid. Women want men, they don't
want whiny little girls like you. If you were to actually act like a
man, you
would have no problem getting some snatch. But you are nothing but a
8
year old kid in a almost 38 year old body.

<restore of Oris' account of his visit>

I happened to be traveling through Huntsville, Alabama early this morning, I deceided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to

face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me
want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy
grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Given your penchant for lying Roger, you are not to be believed.
The first "account" I saw of this was a copy/paste of a posting that you
allegedly glommed from somewhere in the Web. The original, it seems, was far
shorter than your 'version' and replete with the usual Oris grim spelling
and grammar errors.
That one was more believable, what with Oris' inability to write beyond the
third grade level.
Now you are claiming that you transcribed this from the actual recording?

Post a link so we can all listen to it.
Post proof.

><whaaaaaaaaaaaaaa!!!!! don't make fun of me because several hams have heard the recording
of me whining when Oris stopped by>

Say, Porky, you've had more than your share of spelling errors, too!

LARDASS Lloyd's ENGLISH FUCK-UPS!

"breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation
session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also
"forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies" too
bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of
hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd

deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere
"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters
"enfighting" - Lloyd's two brain cells are infighting for control of his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?
"Tonite" - There's nothing in Lloyd's brain "tonight" or any night
"segmant" - What Lloyd's communications are, only sentence "segments"
"I just listening" - Too bad he doesn't listen to his poor English
"buffon" - The Athens, Alabama "buffoon" strikes again!
"museium" - Where LARDASS LLoyd keeps his "muse"
"nastey" - How everybody describes LARDASS' body stench, especially in the ghetto
"loose" - Lloyd's description of his spinchter muscles...
"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"
"awhile" - It will be "a while" before Davies gets a clue
"freinds" - Lloyd's conglomeration of "friends" and "fiends"
"thier" - "There" just isn't any hope for LARDASS Lloyd "ill-educated" Davies
"backstabers" - Lloyd's version of the OJays' hit
"becuase" - Home of the "Deliverance Extras" spelling by LARDASS Lloyd
"obselete" - What LARDASS thinking is to him, others see it as 'obsolete'.....
"belive" - What fools like LARDASS Lloyd "believes"
"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language skills!
"marshalls" - Mongolloyd spell "marshals" real good!
Wisemand - LARDASSd fucksd upd againd
"compay" - Mongolloyd never gets any female "compay," while others do get "company"
" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in your miserable life!
"and do the nasty!" You don't really know what that means, do you, 30 year old VIRGIN?
"It's does" - Mongolloyd use good English

"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a
"moment"
"seriuosly" - Lavender Lad President Mongolloyd wants to be taken
"seriously" instead of "seriuosly"
"annouced" - Mongolloyd "announces" his stupidity again
"tonite" - Davies never lets his lack of education stop him from
announcing to the world he's a fucking imbecile!
"nite" - When LARDASS Lloyd molests those kids he makes them say
"nite, nite" at "night"
"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his
FATASS....put it on his welfare bill
"so fuck of" - When Mongolloyds who have man tits talk tough......
"fukcing funney" - Alabama deliverance extra Davies speak
"pictrue" - "Picture" yourself as a Davies Mongolloyd
"isseus" - Davies has "issues" too many to list here
"resortjng" - Is Lloyd from Finland?
"attsxks" - When LARDASS Davies "attacks" he uses illiteracy
"basturds"- What mental illness patient LARDASS Lloyd calls his nurses
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey
rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law
suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth
feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over
English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets
upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to
debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a
scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd’s got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor
kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in

ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does "dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is "disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make good sentence
"jellous" - Most of LARDASS Lloyd’s cellulite body is "jealous" of skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those nutsacks for pizza topping, Pappa John's terminated him saying he didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good sentence!
"straming" - Lardass usually has to wash his sheets from the "stream" of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's" them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head collide they have an "argument"

"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good
sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic
relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be
said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack
thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad
LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy
by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain
neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read,
and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-E-
R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy
apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has
"despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say
"sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses"
on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his
obesity and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't

care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to, to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
“conquor” - Lardass Lloyd has yet to “conquer” his idiocy.
“I always new that your stupidity would trip you up, Mr. Wiseman.” - I

just “knew” Llardass Lloyd couldn’t pose as “Christy Davies” without fucking it up and outing himself.
“I have given it some though and decided to come back” - Mongolloyd has never given anything any “thought.” (from another “I’m leaving” speech/lie)
“usaul” - As “usual” Lardass lloyd Davies fucks up!
“Secwet Woger “ Llardass Llavender Llad Lloyd’s been sucking so many cocks he’s got a lisp!
“douters” - Even though he has his “doubters”, it’s “doubtful” Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a “bipolar bisexual”.
"desperite" - Lardass Lloyd is so “desperate” to win at something, anything.
"situtation" - Most people get in “situations, ” but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets “a hold” of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, “mysterious” survivor of a coat hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time" now.
"mommie's" - When Mongolloyds say "Mommy’s" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light

a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky
protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!"
- Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup,
Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd
is in denial about his imbecility and has the "potential" to become an
even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises
about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he
"connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's
and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring
such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and
pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites
by now
"red head" - Little Red is shoving his big ole black dickhead in
Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten
in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed
skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't
he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any
pussy.
"harrasment" - Lardass just loves when his fat asshole gets
"harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite
the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down

wino nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide "whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity "activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
“turd in the punch bowel.” - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably

discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.
"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!
"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!
"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.
"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to

"show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!
You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.
""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."
"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.

"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....
"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.
"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!
"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.
"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being

more stupid, "are we now," Lardass?
"I just you like a brother" - Mongolloyd would take it up the ass from you just like he did from his brother, too.
"I've been to two Hamfest" - Mongolloyd's never been to two English classes, though!
"Wogie" - Mongolloyd shows off his cocksucker's lisp.
"his paint size" - Mongolloyd wears size 50 "pants," does he also wear "paint" because he is a walking billboard for obesity?
"HAMFEST'S" - Mongolloyd has never shown at any "hamfests"! He's too big of a coward!
"Woger" - Lardass likes to think of "Roger" when he sucks nigger dicks!
"West Vagina" - Yes, "Virginia," Mongolloyd hasn't ever seen any vagina, west or east, north or south.
"reconize" - Mongolloyd, your fuckups are easy to "recognize"
"thopught" - Mongolloyd never has any "thoughts", except to show off his lisp again!
"Who hear likes" - Mongolloyd nobody likes you, "here" or anywhere!
"Wogie" - Lardass Lloydie's lisp exposes him again!
"really beated" - Mongolloyd really "beats" off, since he can't get a woman.
"Woger" - Mognolloyd makes like faggot.
"Curtain's" - Mongolloyd always fucks up when he hides behind his "curtains" of sockpuppets.
"cocksuckers" - Lardass always fucks up and punctuates incorrectly, must be his "cocksucker's" lisp.
"spinctor" - Mongolloyd has the "spinchter" muscle the size of a #10 washtub, since his drunk daddy, his felon older brother and his mommy's dildoe has stretched it out.
"reconized" - Lardass Davies stupidity is easily "recognized".
"porpuse" - Mongolloyd's stupidity is on "purpose"!
"worlds" - Mongolloyd is the "world's" worst speller!
"comfortbale" - Mongolloyd confessed he is "comfortable" looking at dicks all day long.
"For the recod" - For the "RECORD," Mongolloyd is retarded!
"all these yours" - "All these years" of posting, and Lardass has yet to post in English.
"I have no worked for 22 days straight" - Too bad you don't concentrate on your English for the same legnth of time, Porky!
"Roger'" - "Roger's" what's always on your little mind, Porky!
"Shittpacker" - Mongolloyd has a "shitpacker" for a father.
"revoaked" Mongolloyd your life will soon be "revoked."
"Upeset?" BWHAHAHAHAHA..Mongolloyd you get "upset" so easily, BITCH!
"knumskull" - Mongolloyd, I could fucking care less since I'm not Catholic, you fucking "Numbskull"
"BEVERY FUCKNH AWARE" - Mongolloyd should "BE VERY FUCKING AWARE" of his surroundings and who is watching him!
"orafice" - Mongolloyd has had a big greasy dick stuck in every "ORFICE" in his obese body.
"YOUR STILL" Mongolloyd, "you're still" a fucking imbecile!

"Funn" - Mongolloyd's face sure is "FUNNY" looking.
"Your whole life has past you by." - Lardass, your life has already "passed" you by the minute you were shit out of your whore mommy.
"Eldery" - If you were a bit more "ELDERY," Porky ,you would be a better speller.
"Jelous" - Nobody, I repeat nobody is "JEALOUS" of a retard like Mongolloyd Davies!

"He 4F for the Air Force" - Wrong, Mongolloyd, you are 4F for LIFE!
"plagarize" - Mongolloyd, you couldn't even "plagiarize" from "See Jack Run" correctly.
"Is like our her Steve and Lloyd" - Mongolloyd fucks up again! Mongolloyd calls himself and Holstan a "her."

"to much" - Mongolloyd tries to communicate in English but it's just "too much" for his tiny brain to handle.
"beutiful" - Mongolloyd is as "beautiful" as a WART HOG!
"Trough" - Mongolloyd can't get that everybody sees that he is fucking stupid "THROUGH" his malformed skull.
"would all upset" - Try posting in English, DUMBFUCK Davies!
"backpedd;e" - Mongolloyd "backpedals" when he gets upset and misspells words!
"Good are you ever pathetic" - Mongolloyd, Goddamn, are YOU ever pathetic when you fuck up like that.
"Make ne" - Mongolloyd is trying to say "make me" like a little girl, but naturally, he fucks it up! HAHAHAHAHAHA!!!!!!
"I'm not into, unlike you" - Mongolloyd isn't into looking smart, either.
"Rare end" - Lardass, you "rear end" is so big, when you back up, you beep.
"hygienne" - Mongolloyd hasn't got any "hygiene" habits.
"suprise" - "SURPRISE", Mongolloyd fucks up again!
"poved" - Mongolloyd "proved" he is a fucking idiot once again!
"Momma" "marbels"- Your Crackwhore "Mama" knows you don't have all your "marbles", Porky!
"secoondly" - Mongolloyd is trying to count the times he has given blowjobs "secondly"
"atten" - Lardass you didn't "attend" school, either!
"backwerds" -Mongolloyd is always ass-"backwards!"
"Were" - "We're" sure you are a fucking moron, Mongolloyd!
"he's laugh and go on" - Lardass we laugh at your fat dumbass, and go on with our fucking lives, but you don't have a life!
"tradion" - Mongolloyd's "tradition" is to fuck up!
"Mitzah" - Porky the Jew didn't have anything to cut off at the Bar "Mitzvah!"
"mines for his baby batter" - Mongolloyd shouldn't drink , take drugs and post!
"Ralley" - Mongolloyd should try to "rally" his few remaining brain cells!
"Vagina" - Something Lardass Davies has only sees when his whore mommy shit him out.

"Your welcome" - Mongolloyd, "you're" one stupid fucking retard.
"Llouyds" - "Lloyd's" such a fucking DUMBASS, he can't even spell his own name correctly!
"stagnanat?" - Do you mean "stagnant" like what is between your fucking Dumbo ears, Mongolloyd?
"accomadations" - Do you mean "accommodations" which are quite unlike your flithy HUD apartment in the Athens, AL ghetto?
"oppurtunity" - Mongolloyd never misses an "opportunity" to be stupid.
"Stubbenville" - Mongolloyd couldn't find WV on the map much less "Stubenville, Ohio."
"copy & past" - Mongolloyd spams with his "copy & paste" of every fucking idiotic thing he sees!
"appretince" - Mongolloyd makes good spell for a quarter-wit "apprentice".
"glorius" - Mongolloyd make "glorious" FUCK UP!
"weekened" - Mongolloyd's "weekend" consists of getting drunk and whining about another man! That is, between delivering pizzas.
"Woger mkae" - "Roger make"s Mongolloyd look like a fool, time and time again!
"noddle" - Lardass your little "noodle" of a dick is like a fucking shard of thin spaghetti!
"usae" - Mongolloyd never "use"s any fucking sense or correct spelling.
"I ambored" - Mongolloyd, you are an idiot as well!
"you ae one to talk" - Mongolloyd, you "are" the king of the morons!
"i has bought Roger a birthday presetn" - Mongolloyd should buy himself a birthday "present" known as a dictionary!
"my minions will desent on Glendale" - Mongolloyd Davies' shitty drawers "descend" on his flabby ankles, too!
"show the welfare roles" - Mongolloyd shouldn't show the "rolls" on his fat gut, especially when people are trying to eat!
"When I "die" I will ascend to higher plane of existance!" - No, Lardass, you will always be a piece of shit in any "existence."
"whose photo is on that button" - "Who's the retard who can't use English, Lloydie, that's who!
"bif fucking deal" - Lloydie is a "big" fucking fuckup, isn't he?
"you are to coward to use your own name" - Mongolloyd is "too" stupid to post in English!
"what wrong Tor afarid" - "What's" wrong, Mongolloyd, "afraid" to admit English isn't your first language?
"you and woger see Lloyd everywhere, what you fail to realize is the people on this board hat you and Roger and not Lloyd" - Mongolloyd fails to realize how fucking stupid and "hated" he is!But Mongolloyd sees his unrequited gay love Roger everywhere!
"I have neber heard of stick pussy" - You sure have tasted it, "never" straight Mongolloyd!
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law

suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth
feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over
English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets
upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to
debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"instaslling" - Mongolloyd makes good spell! Mongolloyd should be
"installing" a working brain.
" wiv what i earn i go to IKEA" - "Whatever" you earn isn't enough to
pay all your past-due bills, Mongolloyd.

Mongolloyd make good spells!

Now whine and cry and snivel "I dare you!"
BWHAHAHAHAHAHAHAHAHA!!!

> I know well about Oris's poor spelling and poor punctuation

Yes, you know all about poor spelling and punctuation, don't you,
Lardass?

>and Oris did not write this as Roger so presented.

No, according to the recording, it happened word for word as it was
related in that post.

> Oris <pathetic attempt to lie bby N0VFP.>

Oris did stop by and you cried like a bitch, Porky.

><snip>
>Given your penchant for lying Roger, you are not to be believed.

That's rich coming from a lying fatass like you.
>

Evading the challenge are you?

Again. Post a link to this alleged 'recording' and back your lies up with
proof.

You can't, can you?

I put you in a corner and challenged you and,as usual, you skirt the issue
and change the topic.
Odd too, that you poke fun at the spelling mistakes of others.
You have far more than your share of same.

Below are just a few of the examples taken from your posts.

"Ignroant" Typical, considering the source."Sluprs" Only Rogie knows what
this means."Travelled" A Rogerism, replete with ignorance."Postss"
Pssst...Roger..that should be Posts."Defgenerate" Well, it's Roger's
word..."Faity" He meant to say Fairy, but you know Roger."Ghet" Get a load
of Curtain Boy!"Distribiution" Roger likes using phonics."Biotch" He meant
Bitch, but his phonics took over again."Methjadone" A West Virginia
substitute for Heroin."Sumbliminal" One of Roger's favorites."Recepticle"
Either of Roger's moist cavities."Cociane" A West Virginia drug of
choice?"Tiome" Roger meant to say Time...but his fingers were
numb."Beraking" No definition. Could he 'beraking' the leaves?

Roger is on the verge of yet another nervous breakdown.
His greasy fingers are flying across his keyboard just as fast as he can type, his dirty hair is flying to and fro as his head jerks up and down, and the droplets of spittle are spraying from his angry, spastic mouth to his old CRT monitor.

Entertain me again, Roger. I can keep this up all night. Can your Juno account do so?

Thank you for the cheap entertainment.

Oh, so you were molesting young children before you became a minister,
WH2T Ace Ratshit?

P.S. Good luck with Monroe County declaring the property around your
trailer a code violation since it's overgrown with weeds and making
you pay that big fine and cleanup costs for your trashy property.

BTW, the city of Glen Dale has no such proceedings planned. Looks like
you, as usual, don't know what you are talking about.

WH2T's trailer and overgrown 2 acres!

==> FCC NEWS: FCC PROPOSES ADDITIONS, CHANGES TO AMATEUR 5 MHZ ALLOCATION

Acting on a 2006 Petition for Rulemaking filed by the ARRL, the FCC has issued a Notice of Proposed Rule Making (NPRM), ET Docket No 10-98 to modify the rules that govern amateurs' secondary use of five

channels in the 5 MHz frequency range known as 60 meters. The proposed changes would substitute a new channel for one that is seldom available because of occupancy by the fixed service, which is primary in this range. Also proposed is an increase in power from 50 to 100 W effective radiated power (ERP) and the addition of CW, PSK31 and PACTOR-III modes with provisions to ensure that such operations would be compatible with the primary service. Read more here <http://www.arrl.org/news/fcc-proposes-additions-changes-to-amateur-5-mhz-allocation>.

==> HAMVENTION: FCC FORUM AT DAYTON HAMVENTION TO FEATURE FCC EMERGENCY COMMUNICATIONS EXPERT

The annual FCC forum at the 2010 Dayton Hamvention is scheduled for Saturday, May 15 9:15-10:15 AM in Forum Room 3 at the Hara Arena. Moderating again for 2010 will be Bill Cross, W3TN, of the FCC's Mobility Division. Cross's portfolio of responsibilities includes the Amateur Radio Service rules. Also speaking at this year's forum will be Curt Bartholomew, N3GQ, of the FCC's Public Safety and Homeland Security Bureau. Missing from this year's program will be Laura Smith, FCC Special Counsel who is responsible for Amateur Radio enforcement issues. She is unable to attend due to a previously scheduled family commitment.

==> PUBLIC SERVICE: NATIONAL HURRICANE CENTER'S WX4NHC SETS ON-THE-AIR STATION TEST

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center (NHC) in Miami will take place Saturday, May 29, 1300-2100 UTC. "The purpose of this annual station test is to test all of our radio equipment, computers and antennas using as many modes and frequencies as possible," said WX4NHC Assistant Amateur Radio Volunteer Coordinator Julio Ripoll, WD4R. "This is not a contest or simulated hurricane exercise." WX4NHC also will be testing new computers and software, as well as conducting operator training, and NHC Director Bill Read, KB5FYA, will be at WX4NHC making contacts. Read more here <http://www.arrl.org/news/national-hurricane-center-s-wx4nhc-sets-on-the-air-station-test-2>.

==> ARRL FOUNDATION: ARRL FOUNDATION AWARDS 66 SCHOLARSHIPS IN 2010

The ARRL Foundation Board of Directors is pleased to announce the scholarship recipients for 2010. Each year, the Foundation's Directors have the honor and privilege of selecting Amateur Radio operators who will receive monetary assistance to further their undergraduate or

graduate education. For 2010, the Foundation awarded 65 annual scholarships to young Amateur Radio operators valued at $71,450, almost $17,000 more than awarded in 2009. Four new scholarships were added for 2010: The Ted, W4VHF, and Itice, W4LVV Goldthorpe Scholarship; The Magnolia DX Association Scholarship and The Gwinnett Amateur Radio Society Scholarship. A second scholarship for the Bill, W2ONV and Ann Salerno Memorial Scholarship was also added this year.

The application period for ARRL Foundation Scholarships opens October 1 each year and closes on February 1 the following year, with awards announced in May. Descriptions of all the available scholarships and selection criteria, as well as application instructions and forms can be found on the ARRL Foundation pages of the ARRL Web site. Beginning fall 2010, the application process for ARRL Foundation scholarships will "go green," with application forms and transcripts accepted via electronic means only. Click here <http://www.arrl.org/news/arrl-foundation-awards-66-scholarships-in-2010> for a list of the scholarship recipients.

==> ARRL FIELD DAY: ARRL ATLANTIC DIVISION TO HOST FIELD DAY WEBINAR

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Wednesday, May 19 at 9 PM EDT, Atlantic Division

Director Bill Edgar, N3LLR -- along with some "Field Day Experts" -- will present a Field Day-oriented webinar entitled "Making the Most of Field Day." Moderated by ARRL Regulatory Information Branch Manager and Field Day Manager Dan Henderson, N1ND, the webinar will share information, hints and tips to individuals and groups to maximize their Field Day experience -- not just in terms of points, but in gaining valuable experience and knowledge to help groups and individuals to help maximize their Field Day fun! Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-field-day-webinar>.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than six weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of

the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> INTERNATIONAL: CANADIAN HAMS MAKE USE OF NEW PRIVILEGES

After several years of hard work by the Radio Amateurs of Canada (RAC) and Industry Canada (IC) -- Canada's equivalent to the FCC -- Canadian amateurs received privileges on 2200 meters (135.7-137.8 kHz) at the first of the year. Scott Tilley, VE7TIL, of Roberts Creek, British Columbia, and John Gibbs, VE7BDQ, of Delta, British Columbia, completed the first official Canadian two-way 2200 meter QSO on April 24. Using CW, the Canadian amateurs reported strong signals during daylight QSO on 137.100 kHz. Roberts Creek and Delta are about 41 miles (66 km) apart. Gibbs used a homebrew tube transverter at 100 W output into a short top-loaded backyard wire vertical, while Tilley was running 400 W from a homebrew FET transmitter into a 60 foot top-loaded wire antenna. "As well as heralding the arrival of a new 'top band,' the QSO demonstrates that even amateurs located in typically small city-sized lots can enjoy the challenges that 2200 meters has to offer," Tilley told the ARRL. "Hopefully many other Canadian amateurs will soon be melting solder to join the fun on our new band!" More information on Canadian 2200 meter activity may be found on Tilley's Web site <http://www3.telus.net/sthed/argo/> and at the VE7SL Radio Notebook Web site <http://members.shaw.ca/ve7sl/136.html>.

==> GOOD NEWS FROM RADIO KUWAIT: 7150 KHZ AND 7190 KHZ BOTH FREE!

The IARU Region 1 Monitoring System is ever vigilant in monitoring the amateur bands for intruders. It is ably led by Coordindators Wolf Hadel, DK2OM, and Uli Bihlmayer, DJ9KR. To aid in their work they initiated an online reporting system via intruderalert@iaru-r1.org last year. On April 12, Uli first observed a shortwave station on 7150 and 7190 and alerted the monitoring group to listen and send reports to their appropriate authorities. Through combined efforts, Uli identified the station as Radio Kuwait. Once the station was identified, Uli immediately informed the German Federal Net Agency (Bundesnetzagentur) to monitor the QRGs and to send an official complaint to KWT. Also he sent a FAX and an e-mail to the Embassy of KWT in Berlin and e-mails to Radio Kuwait (radiokuwait@radiokuwait.org <http://us.mc506.mail.yahoo.com/mc/compose?to=radiokuwait@radiokuwait.org>) and to the Ministry of Telecoms in Kuwait. Read more here <http://www.arrl.org/news/good-news-from-radio-kuwait-7150-and-7190-khz-both-free>.

==> SOLAR UPDATE

Tad "The Sun does not shine upon this fair earth to meet frowning eye <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/>s" Cook, K7RA, reports: Sunspots disappeared again. After a strong

showing and nine days of sunspots, there have been four days with no sunspots. No indication when they will return, although the STEREO image <http://stereo.gsfc.nasa.gov/> shows an active area coming next week. With no sunspots again, perhaps our focus should return to low frequencies. Tom V. Segalstad, LA4LN, reports from Norway that a new temporary beacon on 509 kHz will be transmitting from grid-square JP20LL using a 35 meter (115 feet) tall vertical and 5 W until the middle of June. Look for more information on the ARRL Web site on Friday, May 14. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' The Life and Adventures of Nicholas Nickleby <The%20Life%20and%20Adventures%20of%20Nicholas%20Nickleby> (Chapter 6).

==> THIS WEEK ON THE RADIO

This week, the Portuguese Navy Day Contest is May 15. The His Majesty King of Spain Contest (CW) and the Manchester Mineira All America

CW Contest are May 15-16. The Run for the Bacon QRP Contest is May 17. Next week, the Baltic Contest is May 22-23. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page

<http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

in tennessee they give you plates which say "emergency" when you
appluu for ham plates.

But having legal license plates issued to him by his home state of Ohio was part of the reason Joseph LaVey was arrested by thee cops in
north carolina since the cops said his legal plates issued to him by the dmv are fake.

Maybe instead of getting and having ham plates, he should have had these plates his home state of ohio issues to regular people (the general public) to anyone who wants them just because they want them.

http://www.bmv.ohio.gov/sp_ohio_cops.stm

then just maybe he might not have been arrested.

Does this radio guy just make this shi* up as he goes along?
He apparently does.
In fact I think that I actually caught a fleeing glimpse of radioguy just last week.
I was driving past a truck stop in Ohio and was about to pull in for fuel when I saw a skinny little guy in speedos running across the parking lot for all he was worth. He had pink sneakers on and he was running like the wind. There were three or four guys and two women chasing him, but he was outdistancing them. Fear makes a guy run faster and I could tell by the brown stains that he was in fear for his life.

I later learned that radio dude propositioned one of the gals at the truck stop, a Hispanic waitress. She went for it, too, but when she swiped his credit card she discovered that it had been stolen from a Mexican who had stolen it from another Mexican who had stolen it from from a deceased old lady in West By God Virginia.

Radioguy was last seen vaulting a fence and disappearing into the nearby woods. But he did leave a bit of his "memory" behind. There, on the string of barbed wire he clambered over was a piece of his feces stained speedos, and that was when his breathless pursuers opted to end the pursuit.

One of the pursuers later laughed that, as they stood at the fence, they could hear radioguy crashing through the wooded undergrowth as he made his getaway.

So, if you are ever driving along the Interstate in Ohio and see a skinny little geek with pink tennies and speedos hitch-hiking, don't pick him up. That little Mexican gal is still looking for him and says that she has a very sharp knife with which she plans to seperate radioguy from his little cujones...if he even has any.

Son, by no stretch of the imagination would anyone who has read your long, rambling whacked-out posts describe you as being "normal".

But, by all means do go - and the sooner the better. You are one of the biggest trolls here - you're a fine one to be accusing anyone else of trolling.

Amateur Radio Newsline(tm) Report 1709 - May 14 2010

Amateur Radio Newsline report number 1709 with a release date of Friday, May 14, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Dayton opens its doors for Hamvention 2010, Australian hams fear the possible loss of 450 MHz, a ham accused of jamming police pleads not guilty and a broadcast transmitter is stolen while its on the air. Find out the details on Amateur Radio Newsline(tm) report number 1709 coming your way right now.

(Billboard Cart Here)

**

THE SOCIAL SCENE: HAMVENTION 2010 IS ON

The doors of the 2010 Dayton Hamvention are opening as we go to air. Since 1952 the Dayton Hamvention has been sponsored by Dayton Amateur Radio Association. It has grown to be the world's largest amateur radio gathering, attracting hams from throughout the globe. And according to Assistant General Chairman Mike Kalter, W8CI, this years Hamvention is dedicated to radio clubs and the work that they doworldwide:

--

Kalter: "This years theme is amateur radio clubs worldwide. We decided that as our club is a big club. The Dayton Amateur Radio Association. And it takes a lot of people to put on something like this, so we were thinking that there are a lot of clubs that do a lot of good in the world so we thought that this would be our theme this year. We even have a Club of the Year award that we instituted this year."

--

Mike Kalter made that comment in an interview with RAIN's Hap Holly, KC9RP. At the same time he said that 2010 may be a year of growth for the Hamvention itself:

--

Kalter: "We have sold more tickets to date than we did last year at this time. We have more inside exhibits and more Flea Market spaces sold than we did last year at this time. So it looks as though we are going to be successful on those counts."

--

And what can visitors expect this year? Again, Mike Kalter, W8CI:

--

Kalter: "We have some interesting things that are going to happen. "Discover Homebrew" will be in our demonstration area where anyone wants to bring their homebrew project and set it up.

"We will have a ham radio (training) class this year.

"Returning again this year will be the emergency communications display. That's been a big hit so we have that back as well.

"Also we have some D-Star information. The clubs W8BI Gateway will be linked to the 30-B reflector during Hamvention weekend.

"And this year at the (W8BI) special events station we will have speech units so that the visually impaired are able to participate -- so we are pretty excited about that. The exact frequencies are listed at our website at www.hamvention.org"

--

Kalter also says that there will be a lot of interesting speakers leading this years forums:

--

Kalter: "Dr. Paul Bernhart, KF4FOR, the Senior Research Physicist for the Naval Research Lab. He heads up the HAARP project at the Haval Research Lab in Alaska and Aricebo in Puerto Rico. He will be talking about HAARP which is the High Frequency Active Auroral Research Program.

"Gordon West will be there taking stage. He's going to talk about the latest in DSP speakers from Clear Speech and others. If you have never seen a Gordon West forum, they are always a lot of fun.

"Carole Perry is a professional educator from New York City and she will be presenting her Youth Forum.

"And Van Hoi, VR2HF, will be talking about what its like to be a ham in Hong Kong.

"The BalloonSat: forum will be back with Bill Brown, WB8ELK. And we are actually planning a balloon launch on Friday afternoon."

--

By way of background, the Dayton Hamvention started out life as the Southwestern Ohio Hamvention. The first organizational meeting was held in January 1952 with the convention taking place on March 22nd at the old Biltmore Hotel in downtown Dayton. And at that first gathering there were only seven exhibitors and six forums. Even so, it was a far greater success than the Dayton Amateur Radio Association could

have ever anticipated. They had hoped to attract 300 visitors but over 600 showed up. Now, almost six decades after John Willig, W8ACE, had asked the Dayton Amateur Radio Association to sponsor a ham radio convention the Dayton Hamvention remains the shining star in the ham radio sky.

We will have a full report on Hamvention 2010 next week. Meantime you can hear Hap Holly's complete interview with Mike Kalter, W8CI, by directing your web browser to www.therainreport.com and downloading this weeks Rain Report file. (ARNewsline(tm), RAIN)

**

RESTRUCTURING: 70CM IN JEOPARDY DOWN-UNDER

Radio Amateurs in Australia are worried that they may soon loose access to some or all of the 420 to 450 MHz band. This after the Australian Communications and Media Authority issues a statement on future use of the spectrum from 403 to 520 MHz.

Attachment 1 of the statement shows proposals for 420-430 MHz, there is no mention of the Amateur Service. With regard to 440-450 MHz the section on Proposed Transition Arrangements says that users in 452.5 to 453 MHz and 462 and 462.5 MHz spectrum will need to relocate either elsewhere in the 450 to 470 MHz band, or into another part of the 400 MHz band. Spectrum in 440 to 450 MHz will also be made available in consultation with the Department of Defense on a temporary basis.

The Australian Communications and Media Authority also propose to increase the number of UHF Citizen Band Radio Service channels from 40 to 80 by the use of 12.5 kHz channel spacing. More is on-line at www.acma.gov.au/WEB/STANDARD/pc_312108 (WIA)

**

RADIO RECORDS: FIRST ROS CONTACT ON 500 KHZ

While it may not yet be legal to use in the United States FCC rules, the first Q-S-O using the new ROS digital protocol has been made on 500 kHz between G0NBD and G4WGT.

The contact took place on April 30th over a 30 mile path. Initially they used ROS 500/16 mode and then the ROS E-M-E mode. During the contact power was reduced from 3 watts output to 30 milliwatts. The antennas were 35ft top loaded whips.

Practical Amateur antennas for this band are very hard to come by due to the wavelengths involved. It can require 50 or more watts of transmitter output just to get 100 milliwatts Effective Radiated Power. The success of the contact between the two U-K hams is proof that efficient weak signal modes such as R-O-S can help extend the communications range that is achieved using simple albeit inefficient antennas such as those used in this record setting test. (Southgate)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Hamvention repeater, W8BI, serving greater Dayton, Ohio on FM and D-Star.

ENFORCEMENT: KJ6CEY PLEADS NOT GUILTY TO ALL CHARGES

A follow-up to last weeks story on the ham radio operator accused of making bomb threats, jamming police and fire channels, and interrupting the regions emergency radio traffic. Irene Marie Levy, KJ6CEY, has pleaded not guilty to felony charges of making criminal threats and making a false bomb report. She is also facing misdemeanor counts of maliciously interrupting a communications transmission and obstructing arrest.

According to the Desert Sun on-line newspaper, the intentional interference with police and fire radio communications allegation involved a bomb threat. Court papers say that it also contained what the newspaper terms as "specific" and "unequivocal" threats made to a certain sergeant, leading him to fear for the safety of his family,

Hemet police Lt. Mark Richards says that Levy was arrested at her home after investigators tracked her down by investigators using radio direction finding techniques according. A felony settlement conference was set for Wednesday May 12th and a preliminary hearing was tentatively scheduled a week later on May 20th. (Desert Sun, other published news reports)

**

TELECOMMUNICATIONS POLITICS: CONGRESSIONAL LEADERS SAY FCC MUST MOVE AHEAD ON BROADBAND

Two Washington lawmakers say that Congress should get ready to write new telecommunications policy, if needed. This following a recent court ruling that threw into doubt the government's ability to move forward with an ambitious broadband plan. Representative Henry Waxman and Senator John Rockefeller said the Federal Communications Commission should also consider short-term options, including a controversial idea to bring broadband under a stricter regulatory regime.

In a recent letter to the FCC, the lawmakers said that it is vitally important the agency be empowered to move forward with its National Broadband Plan unveiled earlier this year. To accomplish these objectives, the Commission should consider all viable options. This includes a change in classification of broadband, provided that doing so entails a light regulatory touch, with appropriate use of forbearance authority.

Reclassification would mean putting broadband under the same set of rules governing telephone services rather than its current status as a lightly regulated information service. For broadband providers, the option could mean more restrictions on pricing and having to share lines with competing Internet service providers. In the longer term, the lawmakers said that, if there is a need to craft a new telecommunications policy, that Congress will do so.

As previously reported here on Newsline, in April a Federal appeals court ruled that the FCC lacked the legal authority to stop Comcast from blocking online applications for distributing television shows and other large, bandwidth-hogging files. The FCC has since acknowledged the ruling does question its authority over broadband, but it vowed to press ahead. The big players in the industry including such entities as Verizon and Comcast fear reclassification would be overly burdensome and would likely challenge such a move in the courts. (Published news reports)

**

TELECOMMUNICATIONS POLITICS: STUDY SAYS 33% OF ALL AMERICANS LACK BROADBAND

Meantime, the FCC has determined that about one third of all Americans do not have a broadband Internet connection at home. According to a report from the regulatory agency the main barriers to adoption appear to be cost and literacy.

The FCC is working on a plan to deploy nationwide wireless broadband. The usage study titled Broadband Adoption and Usage in America was released at the Brookings Institute. But in the report there appears to be no mention of how many Americans do not want or feel that they have no need for any kind of broadband connectivity. (Telecom News)

HAMVENTION(R) NEWS: JARL TO ACCEPT IARU REGION 3 AWARD APPLICATIONS

The ARRL reports that representatives from the Japan Amateur Radio League will be attending the Dayton Hamvention and will accepting applications for the International Amateur Radio Union Region 3 Operating Award. The JARL will forward the applications to the New Zealand Association of Radio Transmitters who administers the award. NZART will then send applicants their certificate with any endorsements after Hamvention closes.

To be eligible for this honor, applicants must present a completed application, listing at least seven contacts from entities in IARU Region 3 whose amateur societies are member societies of the International Amateur Radio Union. No QSL cards are necessary, but only QSOs made after April 5, 1982 are eligible.

There are 35 available entities for the International Amateur Radio Union Region 3 Award. Hams who present seven QSOs will be awarded the

Basic Award. Hams who present 15 QSOs will be achieve the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement. The award fee is $4 or four International Reply Coupons. (ARRL)

THE SOCIAL SCENE: HAM RADIO EXHIBIT OPENS AT EUROPEAN PARLIAMENT

An amateur radio exhibition has opened in the European Parliament. Organized by the IARU Region 1 EUROCOM working group, the display focuses on emergency communications, education and space, with the aim to raise awareness among European politicians of the important role played by radio amateurs.

The new exhibition is sponsored by Mrs. Brigit Sippel. It was opened by IARU Region 1 President, Hans Blondeel Timmerman, PB2T. Photos of the event and further details are available on the IARU Region 1 website at www dot iaru-1 dot org. (IARU)

NAMES IN THE NEWS: GI4FUM FUN DXPEDITION TO MOZAMBIQUE

Some names in the news. First up is David Hutchinson, GI4FUM who is also known as 3DA0DJ. He is sponsoring a DXpedition to Bilene, Mozambique this coming October.

Bilene is a coastal resort on the Indian Ocean about 150 kilometers north of Maputu. GI4FUM says that he will fly from London's Heathrow Airport to Johannesburg and drive up to Mozambique. He says that plans are to run a station for Jamboree on the Air with local scouts on the weekend of October 16th and 17th and that they will also enter a station for CQWW SSB over the weekend of the 30th and 31st.

GI4FUM adds that there will be numerous opportunity for individuals to operate under their own C91 callsigns as well as sun bathing on an Indian Ocean beach in late African spring. More information on this fun sounding DX adventure is on line at www.3da0ss.net (Southgate)

**

NAMES IN THE NEWS: DIANA ENG, KC2UHB, DEVELOPS COLLAPSIBLE FABRIC YAGI

Designer and electronics enthusiast Diana Eng, KC2UHB, has developed a collapsible fabric Yagi for portable amateur radio satellite operation. In her column in MAKE Magazine she writes that one of her favorite ham radio activities is making contacts on satellites. She says that it is really fun to know that you're controlling something that's receiving and sending communications from space.

Eng notes that communicating with satellites means carrying a big Yagi antenna around. So she decided to use her fashion sewing skills to make a collapsible fabric Yagi antenna that's much easier to transport.

Eng notes that the actual antenna design is based on the work of engineer and writer Kent Britain, WA5VJB. The difference is the materials used in the final assembly. Thin brass tubing is used for the antenna elements while rolled up cloth doubles as both the boom and as a carrying case for the finished antenna. This makes it easily transportable as well as quick to set up in the field or for classroom satellite demonstrations. Full instructions on how to build one is on line at http://blog.makezine.com/archive/2010/05/collapsible_fabric_yagi_antenna.html (MAKE Magazine)

**

NAMES IN THE NEWS: K7BW TO OPERATE 6 METERS FROM SAN ANDREAS

Dennis Motschenbacher, K7BV will be active as 5J0BV from San Andreas Providencia from June 9th to the 20th. This to once again try and give out this extremely hard to contact location to Europeans on 6 meters. While not as rare in the USA, there still appears to be a large demand for this location world-wide even after Dennis's two previous operations devoted to 6 meters. More on this operation including QSL routing is on-line at tinyurl.com/2unguet (K7BV)

RADIO STRANGE: BROADCAST TRANSMITTER STOLEN WHILE ON THE AIR

Here's a story that may be hard to believe, but its true. The London Daily Record newspaper reports that a broadcast transmitter has been stolen while it was on the air.

The newspaper says that Mike Smith's Log In To Lunch show was being broadcast on Lanarkshire's radio station L107 when the airwaves went dead. After investigating the reason behind the sudden silence the station owners found that the transmitter had been taken from the 17th floor of an office building in the town of Hamilton.

Station managers told the police that the transmitter is about the size of a large refrigerator. Surveillance cameras from the office block show two men pushing it out on a dolly and loading it into a van. A potential audience numbering close to 600,000 listeners may have heard the popular station go off the air.

You can read more at http://tinyurl.com/3ay3492. And you thought these things only happened at remote, isolated hilltop radio sites. (RW)

**

EMERGING TECHNOLOGY: CELLPHONE RADIATION IMPROVES THE THOUGHT PROCESS OF MICE

>From the science page comes this interesting story regarding radiation from cellular telephones that claims it can improve your intelligence, but only if you are a mouse.

According to Gary Arendash of the University of South Florida in Tampa and colleagues, research being conducted using mice prone to an animal form of Alzheimer's disease showed that long-term exposure to electromagnetic radiation typical of cell phones slowed and reversed the course of the illness. Moreover, a similar exposure in normal mice for two hours a day over seven to nine months improved their cognitive abilities compared with control specimens.

Arendash and colleagues provided their data in a recent issue of the Journal of Alzheimer's Disease. They also say that the findings provide striking evidence for both protective and disease-reversing effects of long-term exposure to radiation at cell phone level.

But other experts cautioned that the science in the study while mainstream is still in its very early stages. Dr. Alan Lerner is a Neurologist at Case Western Reserve University in Cleveland, Ohio. In a public e-mail he said that the researchers took an an innovative approach to modulating Alzheimer's disease models in mice. but he said it's too early to say whether the finding have any relevance to humans. (Science OnLine)

**

HAM RADIO IN SPACE: SATELLITE LAUNCH DELAY

The launch of two amateur radio satellites, STUDSAT and TIsat-1, on the Indian PSLV-C15 launcher has been postponed until June. The rescheduling of the launch took place after a marginal drop in the pressure in second stage of the vehicle was noticed during the mandatory checks carried out on the launch vehicle. (AMSAT-UK, Southgate)

**

HAM RADIO IN SPACE: NEW AO-51 POWER MANAGEMENT SYSTEM ENABLED

A new power management system has been enabled on the Amsat Oscar 51 ham radio satellite. According to control station Drew Glasbrenner, KO4MA, if everything works right, the repeater should run at 1.01 watt while in sun, and 290 milliwatt while in eclipse and after exiting eclipse until the batteries recover to around 7.9 volts. Observations from the southern hemisphere while entering and leaving eclipse would be very helpful. They can be sent by e-mail to KO4MA (at) amsat dot

org. (ANS)

**

HAM RADIO NEAR SPACE: ALIEN-1 HAM BALLOON A BIG SUCCESS

The flight of the ALIEN-1 high altitude balloon package, built by three students at Reading School, in the United Kingdom has proved to be an overwhelming success. According to several sources the 434.075 MHz beacon worked as expected and over 3000 pictures were taken during the flight.

Due to the 434.075 MHz telemetry messages being sent at just 50 baud the payload could only send down one telemetry string every 15 seconds.

The highest altitude achieved by ALIEN-1 was 33.158km. This is believed the third highest in UK records. Some of the photos taken by ALIEN-1 Pictures on line at http://www.flickr.com/photos/alienhab/ (Southgate, WIA News)

**

ON THE AIR: TAIWAN SPECIAL EVENT STATIONS

On the air, keep an ear open for special event stations 3H100TW, 3T100TW and 3T0TW. All are operational from the capital city of Taipei, Taiwan, through December 31st. QSL's for all three stations should be sent via the BV bureau.

**

ON THE AIR: THE GREAT PATRIOTIC WAR

And if you worked Ukrainian special event station EO65JM between May 1st and the 15th you talked to an operator helping to commemorate the 65th anniversary of the victory in the great Patriotic War. The QSL Manager for this event is K2PF.

**

DX

In DX word that TU5KG will soon be fishing again around Crozet and Kerguelen islands. He has secured the callsigns FT5WQ and FT5XT and hopes to become active during shore leaves. No exact dates for his operation or QSL route has yet been announced

PA7JWC portable 3B8 is spending his holidays on Mauritius. He will be on the island through May 22nd or thereabouts. QSLs via his home call or via Logbook of the World.

K8LJG will be active portable 4 from Amelia Island, Florida in the Florida State North East Group through May 25th. He will be operating on 20 through 10 meters using CW and SSB, on the IOTA frequencies. QSL to John C. Kroll, K8LJG, 3528 Craig Drive, Flint, Michigan, 48506 in

the USA.

Lastly, VE3ZZ will be active as VE3ZZ stroke VY2 from Prince Edward Island between July 21st and the 26th. His operation will include an entry in the RSGB Islands on the Air Contest on July 24th and 25th as VY2X. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: CONGRATULATIONS TO "BIG JIM" DAVIS W2JKD ON HIS 50 YEAR BROADCAST CAREER

And finally this week, here's a voice that's well known to listeners to this news service. It belongs to a ham who is about to pass a truly important milestone in his career and in his life. Take a listen:

--

Archive audio of W2JKD

--

Yes, that's Amateur Radio Newsline's longtime news anchor Jim Davis, W2JKD. And in just a few short weeks Jim will be celebrating his 50th year as a professional broadcaster both behind the microphone and behind the scenes.

Jim Davis, W2JKD, is a native of Buffalo, New York. He is a second generation and life long broadcaster who followed in the footsteps of his mother who was a singer on WKBW radio. In fact, "Big Jim" as he's known to his many friends began his career on June 19th, 1960 at a small radio station in Cheektowga, New York whose call letters were WNIA. Jim was only 14 at the time but convinced station managers that he was a lot older and went on the air using the name Mac Maguire. The first record he ever played was "Cathy's Clown" by the Everly Brothers. In the five decades he has been on the air, Jim has interviewed numerous politicians, radio, TV and film stars and has played an estimated 600,000 songs.

Over the years Jim has had successful runs at some of the nation's biggest radio stations. These include such well known calls as WOR - FM in New York City; KHJ in Los Angeles; CKLW in the "Motor City" of Detroit and Chicago's famed WLS-AM. While employed by RKO General Broadcasting, Jim was twice nominated for Billboard Magazine's "Major Market Air Personality Of The Year."

In 1981, Jim entered senior management by becoming Vice President and General Manager of Radio Station WVAF in Charleston, West Virginia. Currently, he is Vice President and General Manager for Florida's Vero Beach Broadcasters, L.L.C. which operates four FM and two AM stations. In December of 2008, and in addition to keeping the radio stations on the air, Jim was appointed Chief Operating Officer of Home Town Cable

Plus. This is a company that provides a state-of-the-art fiber-to-the-premises system in Port St. Lucie, Florida delivering High-Speed Internet, Cable TV, Telephone and Security Alarm Monitoring. Jim has also authored a book entitled "The Sales Success Spectrum-A System Of Radio Sales" which is used as a teaching and training manual radio stations.

In his spare time, Jim Davis is a licensed Multi Engine Commercial Instrument rated pilot and owner of a Piper Pathfinder. As a Civil Air Patrol member he has been trained as a Search and Rescue pilot and participates in looking for downed aircraft survivors.

Jim has been an amateur radio operator since age twelve and currently holds an Extra class license. He received a "designated examiner" status from the American Radio Relay League in 1985.

And since the early days of this news service when we were still the Westlink Radio Network, Jim has been an important part of the Newsline family. To many radio amateurs around the world W2JKD is considered as being "the voice" of Amateur Radio Newsline and a person that they have come to rely on for ham radio news since the early 1980's.

So please join us in congratulating Jim Davis, W2JKD, on an astonishing 50 years as a broadcaster who has contributed so mightily to the ongoing success of the radio broadcast industry and for his years of service to amateur radio as well. As Jim would likely be the first to tell you, its all been a truly fun ride. (ARNewsline)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

==> PUBLIC SERVICE: AMATEUR RADIO OPERATORS "STAND DOWN" FROM CHINESE
EARTHQUAKE RELIEF

The earthquake that struck China's Qinghai province on April 14
killed more than 2000 people and left thousands injured and homeless.
According to Fan Bin, BA1RB, of the Chinese Radio Sports Association
(CRSA), relief efforts are continuing for those left homeless. Amateur
radio operators from Beijing, Sichuan, Shandong, Anhui, Qinghai and
Jiangsu were widely involved in the disaster relief actions, traveling
to the disaster center. Working through the poor weather conditions,
they helped with transportation of medicines, tents, food and clothes
to the disaster area. The Amateur Radio operators were even directly
involved in disaster rescue activities -- one Beijing Amateur Radio
rescue team saved six people. Read more here

==> ARRL AUDIO NEWS TO RETURN MAY 27

After a hiatus of four months, the ARRL Audio News is scheduled to return Thursday, May 27. With the advent of the new ARRL Web site, we have had to make some changes in the way the Audio News is presented. It will only be available as one mp3 file; we will no longer be breaking it up into segments. For the time being, it will not be available by telephone, but that feature may return in the future. You can find the ARRL Audio News here <http://www.arrl.org/arrl-audio-news> on the ARRL Web site.

==> THE 2010 ARRL EXPO AT THE DAYTON HAMVENTION®: LOVING EVERY MINUTE OF IT!

It just wouldn't be a "real" Hamvention if the weather didn't cooperate, and on Friday -- the first day of the 2010 Dayton Hamvention -- the humidity was brutal. Be it too much rain, too much sun (or not enough!) or maybe even a snowstorm, thousands of radio amateurs flock to Hara Arena. But late on Friday afternoon, the sweltering atmosphere gave way to clear skies and frisky breezes, a harbinger of the rest of the weekend.

Inside Hara, aisles were packed with hams from all over the world seeking the latest in Amateur Radio technology, products, gadgets, gizmos and more. It's said that if you can't find it at Dayton, it just doesn't exist. If you were looking for the latest in top-of-the-line transceivers, there were more than a few to choose from. If you needed a 45 tube for your 1920s-era TNT oscillator, take your pick from the more than 200 exhibitors and vendors - not to mention the acres of flea market booths -- attending Hamvention.

The largest exhibit at Dayton is the ARRL EXPO. Almost 150 ARRL staff members, officers, Board members and volunteers made their way to Dayton, bringing with them the best that Amateur Radio has to offer. With 25 exhibits and activities located in the EXPO area -- ranging from youth activities, kit building, QSL card checking and an expanded ARRL Bookstore -- throngs of amateurs wound their way through to check everything out. Read more here <http://www.arrl.org/news/the-2010-arrl-expo-at-the-dayton-hamvention-loving-every-minute-of-it>.

==> ARRL'S ANNUAL DONOR RECEPTION WELCOMES RECORD CROWD

The annual reception for ARRL donors in Dayton welcomed the largest attendance since its inception in 2002. Nearly 150 donors who contributed $1000 or more during the previous year enjoyed the reception on May 13 at the Meadowbrook Country Club in Clayton, Ohio. Guests at the reception included international visitors IARU President Tim Ellam, VE6SH; IARU Region 2 Secretary Ramon Santoyo, XE1KK; IARU Secretary Rod Stafford, W6ROD; IARU Region 1 President Hans Blondeel Timmerman, PB2T, and his wife Margareet, K2XYL; Seike Hidefumi, JA5CKZ;

Keko Diez, TI5KD, and Deutscher Amateur Radio Club (DARC) Board Member Mitch Wolfson, DJ0QN.

The Guest of Honor was new ARRL President Kay Craigie, N3KN, who mingled with the crowd and shared her thoughts on what it takes to be successful in the Amateur Radio world. Her comments began with the story of how she launched her involvement with the ARRL as an Assistant Section Manager in Eastern Pennsylvania when she said "yes" to a request for her to prepare the Section's newsletter. Her steps to the Presidency of ARRL continued with her role as Section Manger, Vice Director, Director, Vice President, culminating with her election to ARRL President in January 2010. Her message to the audience was simple but straightforward -- those who continue to say "yes" make a commitment to service, as well as a willingness to contribute generously to support the League make significant contributions to both Amateur Radio and to the ARRL.

At the conclusion of President Craigie's remarks, the ARRL announced new members of the Maxim Society. Current Maxim Society Donors gathered to recognize William Fugate, W8IYD; Kenneth Goodwin Jr, K5RG; Charles Heath, K6ZIZ; Henry Pownall, W4FWR; Walter Wooten, W1LW; Kurt Pauer, W6PH, Ted Goldthorpe, W4VHF, and his wife Itice Goldthorpe, K4LVV. The ARRL Maxim Society recognizes donors whose lifetime giving to various ARRL funds reaches $10,000 or more. As of May 2010, the Maxim Society numbers 67 members. For more information -- including all the benefits of membership in the Maxim Society -- visit the Maxim Society Web page on the ARRL Web site <http://www.arrl.org/maxim-society> or call the ARRL Development Office at 860-594-0397.

==> FCC NEWS: FCC SEEKS COMMENTS ON NEWLY PROPOSED RULES FOR AMATEUR RADIO OPERATORS USING SPREAD SPECTRUM COMMUNICATIONS

In March, the FCC released
<http://www.arrl.org/news/fcc-proposes-to-eliminate-spread-spectrum-apc-requirement-reduce-spread-spectrum-power-limit-cleans>
a Notice of Proposed Rulemaking (NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>)
that proposed to amend Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control (APC) to reduce transmitter power when the station transmits a spread spectrum (SS) emission, and reducing the maximum transmitter power output when transmitting a SS emission (WT Docket No 10-62). On May 14, a summary of the NPRM and the Order was published in the Federal Register; the FCC is seeking comments on the NPRM. Comments must be filed on or before June 14, 2010 (30 days after publication in the Federal Register); reply comments must be filed on or before June 28, 2010 (45 days after publication in the Federal Register). Instructions on how to file comments are listed beginning on page 5 of the NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-38A1.pdf>.

The Commission also attached an Order <http://edocket.access.gpo.gov/2010/pdf/2010-11385.pdf> to the NPRM that makes certain non-substantive revisions to Part 97. According to the FCC, the rules are necessary to amend the Amateur Service rules or conform them to prior Commission decisions, enhancing the usefulness of the Amateur Service rules by making them conform with other Commission rules, thereby eliminating licensee confusion when applying the rules to Amateur Service operations. According to the Federal Register, the new rules take effect July 13, 2010.

==> FCC NEWS: FCC AGAIN DENIES AMATEUR'S PETITION REGARDING STATION IDENTIFICATION

On May 18, the FCC denied a Petition for Reconsideration filed by Glen Zook, K9STH, that asked for changes in Part 97 regarding how often amateurs must identify themselves on the air. This action follows the Commission's denial of Zook's April 2009 Petition for Rulemaking requesting that the Commission amend Section 97.119(a) to change how often amateur stations must identify themselves, specifically "to require that an amateur station transmit its call sign during the first transmission of any communication or series of transmissions, and to allow an amateur station to not transmit its call sign at the end of a communication when the communication or series of transmissions lasts less than three minutes." Read more here <http://www.arrl.org/news/fcc-again-denies-amateur-s-em-petition-em-regarding-station-identification>.

==> ARRL SECTION NEWS: SPRING SECTION MANAGER ELECTION RESULTS

In the only Section Manager race this spring, Tom Ciciora, KA9QPN, of Sandwich, was re-elected as the ARRL Illinois Section Manager with 954 votes. His opponent, Michael J. Schulz, W9MJS, of Wayne, received 799 votes. Election ballots were counted Tuesday at ARRL Headquarters. Ciciora starts his new third two-year term of office on July 1, 2010; he was first elected Section Manager in 2006. The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next terms of office beginning July 1: John Poindexter, W3ML, Indiana; Bill Woodhead, N1KAT, Maine; Paul Eakin, KJ4G, Northern Florida; Bonnie Altus, AB7ZQ, Oregon; Paul Gayet, AA1SU, Vermont, and Don Michalski, W9IXG, Wisconsin. There were no nominations received for the next term of office of Section Manager in the Santa Clara Valley Section. Nominations will be re-solicited this summer for an 18-month term of office starting in January 2011.

==> THERE'S STILL TIME TO ENTER THE 2010 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2011 ARRL Calendar. For more information, including rules and requirements, click

here
<http://www.arrl.org/news/there-s-still-time-to-enter-the-2010-arrl-photo-con
test>.

==> CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES

On May 14, CQ magazine announced its 2010 Hall of Fame inductees, welcoming 15 new members into the CQ Amateur Radio Hall of Fame and two new members each into the CQ DX Hall of Fame and the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals -- whether licensed hams or not -- who have made significant contributions to Amateur Radio, as well as those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet. The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of Amateur Radio, but who also "give back" to the hobby in outstanding ways. Read more about the 19 new inductees here <http://www.arrl.org/news/cq-announces-2010-hall-of-fame-inductees>.

==> AMATEUR RADIO OUTREACH: MAKER FAIRE TO FEATURE AMATEUR RADIO AGAIN IN 2010

Ham radio demonstrations and displays are in the works for Maker Faire, the world's largest do-it-yourself (DIY) festival. As in 2009, the festival will take place at the San Mateo County Expo Center in San Mateo, California on May 22-23. According to ARRL Sales and Marketing Manager Bob Inderbitzen, NQ1R, this annual event showcases the country's best innovations in science and technology, engineering, arts and crafts, food and music. "Like last year, there is a very well-coordinated effort among area groups to help represent the Amateur Radio Service at Maker Faire," Inderbitzen explained. "Volunteers are planning a variety of visual, interactive and hands-on displays for the thousands of attendees." Read more here
<http://www.arrl.org/news/maker-faire-to-feature-amateur-radio-again-in-2010>
.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

<https://www.arrl.org/shop/Field-Day-Supplies/> How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than five weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site
<http://www.arrl.org/shop/Field-Day-Supplies/>.

==> SOLAR UPDATE

Tad "The wonderfulness of the sundown, or stars shining so quiet and bright <http://www.daypoems.net/poems/2084.html>" Cook, K7RA, reports: We've now seen 11 days with no sunspots. The average daily solar flux from May 6-12 dropped from 75.8 to 69.2 for the week of May 13-19. This may end soon, as sunspot group 1063 is due to return in the next two days, and predictions show a rising solar flux: 70 for May 20-21, 72 for May 22-23, 74 for May 24-25, 76 for May 26 and 80 for May 27-June 4. There is also a prediction of geomagnetic instability for today, May 20, with planetary A index for May 20-23 of 18, 15, 8 and 5. The latest issue of WorldRadio online is available for download <http://www.worldradiomagazine.com/> and it contains an interesting propagation column from Carl Luetzelschwab, K9LA, with an analysis of 6 meter propagation from California to New Zealand. Look for more information, including a look at 6 meter propagation reports, on the ARRL Web site on Friday, May 21. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Walt Whitman's Miracles <http://www.daypoems.net/poems/2084.html>.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week, the Baltic Contest is May 22-23. Next week, the CQWW WPX Contest (CW) is May 29-30. The Michigan QRP Memorial Day CW Sprint is May 30-31. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline Report 1710 - May 21 2010

Amateur Radio Newsline report number 1710 with a release date of Friday, May 21, 2010 to follow in 5-4-3-2-1. The following is a Q-S-T. Hamvention 2010 is a big hit. We take you there. Also, an I-A-R-U report says that hams saved lives following the April earthquake, Kenya gives its hams expanded privileges on 40 meters and super-capacitors may replace batteries in critical uses. Find out the details on Amateur Radio Newsline report number 1710 coming your wayright now.

(Billboard Cart Here)
**

The 2010 Dayton Hamvention is now history and by all accounts this years event was bigger than last even considering the poor economy, as we hear from Henry Raminsky, Hamvention's Media and Public Relations Chairman.

(AUDIO Raminsky opening morning)

Heil sounds Chip Margelli, K7JA, echoes Henry's observations about the increased attendance at this years Hamvention.

(AUDIO Margelli)

Henry goes on to tell us that Hamvention is a lot more than just new toys at the vendors and manufacturers inside and everything under the sun outside in the flea market. There's something for just abouteveryone.

(AUDIO Raminsky balloon and forums)

One of the best attended and most anticipated forums is Fridays Ham Radio and the Law forum. Since 1980 James O'Connell, W9WU, has kept attendees abreast of the latest developments as they relate to covenants and antenna restrictions.

(AUDIO O'Connell 1)

If you're thinking about erecting a tower or large antenna this is one forum you really need to attend.

(AUDIO O'Connell 2)

Of course, it wouldn't be Hamvention without the Amateur Radio Newsline Town Hall Meeting. Several hams, well known and not so well known explained how your ham ticket could open the door to your next job.

Well have more on the Town Hall Meeting next week.

**

HAMVENTION 2010: SOME OF THE NEW GEAR

In addition to the Wouxon dual band hand held we told you about previously, there were a number of other new products of interest to those strolling the display area at the HARA arena. Among them, the long awaited Kenwood TS-590S HF/50 MHz All-Mode Transceiver. According to Kenwood, the new radio features a 32-bit floating-point DSP, advanced receiver performance and an extensive range of features that make it ideal for beginner and seasoned DXer alike. The radio's exceptional ease of operation, true to the Kenwood tradition, will be especially welcome for contest and mobile operations. No firm manufacturers suggested retail price for the TS-590 was announced.

But the TS-590S was not the only new entry from Kenwood. Also displayed was the companys APRS capable TH-D72 144 and 430MHz dual band FM Portable. Kenwood says that thanks to the internal GPS unit, APRS operations will be more enjoyable than ever. The TH-D72 also offers Echolink memory compatibility and a mini-USB connector for enhanced computer connectivity.

On the audio side, here's Bob Heil, K9EID on his new microphone and headset offerings.

(AUDIO Bob Heil)

There was lots more new gear shown at Hamvention 2010. We will cover some of it in upcoming Newsline reports.

RESCUE RADIO: CHINA QUAKE IARU R-1 FINAL REPORT

Hams in China became true first responders following last April's Qinghai earthquake. According to a report on the IA-R-Us Region One website, one Beijing based amateur radio rescue team was responsible for saving the lives of 6 people following the tremor. In its final report on ham radio activities following the 7.1 Richter scale earthquake that struck on April 14th the I-A-R-U say that amateur radio operators in China were widely involved in the disaster relief activities. The report says that hams traveled from as far away as Beijing, Sichuan, Shandong, Anhui, Qinghai and Jiangsu to provide

communications aid.

The quake killed more than 2,000 people and relief efforts are continuing for those left homeless. The high altitude caused 90% of the amateur radio rescue team members to suffer altitude sickness, but no one was injured during their efforts to help others affected by the earthquake disaster. (IARU R-1)

**

RESTRUCTURING: KENYA EXPANDS 40 METER PRIVILEGES

The Communications Commission of Kenya has just approved an extension of the amateur radio 40-metre band in that nation. This gives radio amateurs in Kenya the use of the sub-band 7100 to 7200 kHz in the 40 meter band. More is on line at the web link found in this weeks text version of Newsline at www dot newsline dot org.

(DO NOT READ: Communications Commission of Kenya (CCK) http://www.cck.go.ke/) (Southgate)

**

RADIO LAW: FCC SEEKS COMMENTS ON SPREAD SPECTRUM NPRM

The FCC says its time for you to voice your opinion on liberalizing the use of spread spectrum in ham radio.

According to the ARRL, in March the FCC released a Notice of Proposed Rulemaking in WT Docket No 10-62 that suggested amending Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control. This, to reduce transmitter power when the station transmits a spread spectrum emission, and reducing the maximum transmitter power output when transmitting a Spread Spectrum signal.

On May 14th, a summary of the NPRM and the Order was published in the Federal Register and the FCC is seeking comments on the NPRM. Comments must be filed on or before June 14th and reply comments must be filed on or before June 28th. The Commission also attached an Order to the NPRM that makes certain non-substantive revisions to Part 97.

HAM HONORS: CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES

CQ magazine has announced its 2010 Hall of Fame inductees. The 15 new members include some names well known in the hobby. Among these is late ARRL President George S. Wilson who led the ARRL portion of the effort to create the vanity call sign program.

Also being honored this year is the late Gene Harlan, WB9MMM, who was the editor and publisher of ATV Quarterly and founder of Cyberham

magazine. The 2010 inductees to the CQ DX Hall of Fame are writer and DXer Robert Locher, W9KNI, author of the "The Complete DXer" and Lynn Lamb, W4NL who is a co-founder of the Southeastern DX and Contesting Organization. This group sponsors an annual convention featuring well-known speakers on DXing and contesting. Last but by no means least are Don Hill, AA5AU and Larry Weaver, N6TW who have been inducted into the CQ Contest Hall of Fame. The complete list of this year's inductees can be found on-line at www dot cq dash amateur dash radio dot com.

RADIO BUSINESS: BELTRONICS TO ABANDON HAM RADIO REPAIR

The Nashua Telegraph reports that Beltronics is ending ham radio repairs because of too much demand.

Until last month, the company had two employees who did part-time repair work on amateur radio gear. When one of those employees retired, company co-owner Dorothy Peabody said, the decision was made to get out of that business because there were more requests for repairs than the one remaining worker could handle.

Dorothy Peabody owns Beltronics with her husband Bernie. She told the newspaper that the desire for repair work is so great that over the past decade Beltronics has repaired radios mailed from as far away as Saudi Arabia, Puerto Rico and South America. The company will now concentrate on its core business of commercial, municipal and ambulance radiosystems.

(DO NOT READ: You can read the full Nashua Telegraph story dated Friday,May 14 at http://www.nashuatelegraph.com/news/738077-196/beltronics-ending-ham-radio-repairs.html)

TELECOMMUNICATIONS LAW: SUPREME COURT REFUSES CHALLENGE TO MUST CARRY RULE

The United States Supreme Court has declined to take up a challenge from a cable television system operator. This, to the FCC's 18 year old requirement that cablecasters carry local broadcast stations on theirsystems.

On Monday, May 17th the justices rejected an appeal from Cablevision Corporation. Instead the court upheld a federal "Must Carry" law, enacted in 1992.

Cablevision, the nation's fifth-largest cable TV operator, sued the Federal Communications Commission over its ruling that forced Cablevision to carry the signal of a distant home-shopping station on its Long Island cable systems. The federal appeals court in New York had previously upheld the FCC's determination that the cablecaster

provide a channel for WRNN, based in the town of Kingston which is about 90 miles north of New York City. The case was assigned the designation Cablevision v. FCC, 09-901.

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: KEN MILLER K6IR - S.K.

We are very sad to report the passing of 1999 Dayton Radio Amateur of the Year, Kenneth Miller, K6IR, on March 24th.

Ken Millers professional career spanned over four decades in the executive management and development of products in the electronic equipment manufacturing business segment of industry in the United States, Europe and Asia. In his role as an executive with Lear Jet, Motorola, American Standard, Penril, the Singer Company and other well known corporations, K6IR participated in the production and marketing of a broad array of high-tech electronic products including airborne and ground based communications, navigation instrumentation and digital communications devices.

In ham radio, Ken Miller served the Radio Club of America for several years as Chairman of the Grants-in-Aid Committee. The Quarter Century Wireless Association had named K6IR as recipient of its 1995 Distinguished Service Award for his "engineering accomplishments and his leadership of the Radio Club of America Scholarship Program."

(RCA, QCWA)

THE CHANGING OF THE GUARD: TWO SOUTH AFRICAN HAMS KILLED IN PLANE CRASH

The recent airline accident in Tripoli has claimed the lives of 2 well-known South African amateur radio operators. Norbert Taferner, ZS6ANL, his wife Paula and Anton Matthee, ZS6A were killed when the Airbus aircraft they were passengers on crashed.

According to Dennis Green, ZS4BS, Norbert Tafener will be remembered for his years of involvement with the Johannesburg Branch of the South African Radio League. Although retired, he was still active in teaching and lecturing to young and new amateur radio operators in helping them to obtain their licenses. The Tafeners are survived by

one son.

Anton Matthee, ZS6A, lived in Stellenbosch and was a keen off road adventurer, painter and photographer. From reports, he was a truly outgoing person. (Southgate)

HAM RADIO IN SPACE: VIETNAM TO LAUNCH HAMSAT

News has been received from XV9AA in Hanoi of a Vietnamese Amateur Radio CubeSat under development. The new bird is designated as F-1. It is expected to be launched by the end of 2010 into a Sun-synchronous, 98 deg inclination low earth orbit.

The satellite F-1 will carry several low-resolution cameras to take photos of the Earth along with temperature and magnetic sensors to study space environment. The satellite will use amateur VHF and UHF frequencies. The IARU has coordinated a downlink frequency of 437.485 MHz to support a 1200 baud AX.25 telemetry link. The F-1 satellite will also transmit a beacon using a modulated Morse code audio signal on FM when it is not in range of the earth station in Hanoi.

(DO NOT READ: More is on line at: http://fspace.fsoft.com.vn/) (Southgate)

**

HAM RADIO IN SPACE; VIOLET SAT TO LAUNCH IN 2011

And the Violet is an Amateur Radio satellite being built at Cornell University. It will launch in early 2011. This bird is described as a 50 cm cube sat and will carry 4k8 UHF simplex packet links with 5 watts of RF downlink power. It will use a star tracker and fiber optic gyro for fine attitude estimation and propagation.

A submission for frequencies has been made to the IARU Amateur Satellite Frequency Coordination panel for operational frequency assignments. The name Violet is derived from its ultraviolet telescope, which includes flight-spare Deep Impact CCDs.

**

HAM RADIO NEAR SPACE: THE ALIEN-1 BALLOON LAUNCH

The flight of ALIEN-1, a high altitude balloon built by three students at Reading School, proved a success. This despite the 50 baud transmission rate of the payload. That meant it could only send down one telemetry string every 15 seconds. As a result it initially looked as though the highest altitude achieved was 33.116km. However, having recovered the payload they got the second-by-second GPS log and this shows the highest achieved altitude was 33.158km: It is believed this altitude is the third highest in the UKHAS UK records. The 434.075 MHz beacon worked well and some great pictures were taken.

**

DX

In DX, G7COD has been issued the call sign D2AK and will be operational nearly every day from the capital of the Republic of Angola. This, for the next 12 months while on a work assignment there. His operation will be on 80 to 10 meters, including WARC frequencies, using SSB and CW. QSL via G7COD, direct only to Andrew Kitchen, 4 Dairy Cottage, Newton Hall Farm, Bank Newton, Skipton, North Yorkshire, BD23 3NT, England.

The Dundalk Amateur Radio Society, using the call EI7DAR stroke P will be activating St. Johns Castle, Carlingford, County Louth Ireland on Saturday and Sunday, May 29th and 30th. Full details of the event are on line at www dot ei7dr dot com. Lastly, ZS1HF is now active as ZS8M from Marion Island. He's reportedly been heard on 7.140, 14.250, 18.150 and 21.266 Mhz. He will be on Marion Island for a full year so there will be plenty of time to have a chat. QSL as he directs on the air.

**

THAT FINAL ITEM: SUPERCAPACITORS MAY REPLACE BATTERIES

And finally this week, failed batteries are a problem that plague both cell-phones and Amateur Radio satellites. But Micro-Super capacitors may provide a solution.

Science Daily reports that Berkeley Lab researcher John Chmiola believes he has found a solution in electrochemical capacitors, which are commonly referred to as "super capacitors." This is because of their higher energy storage densities than conventional dielectric capacitors and higher abuse tolerance than batteries.

In a paper published in the April 23rd issue of the journal Science, titled "Monolithic Carbide-Derived Carbon Films for Micro-Super capacitors," Chmiola and Yury Gogotsi of Drexel University, along with other co-authors, describe a unique new technique for integrating high performance micro-sized super capacitors into a variety of portable electronic devices through common micro-fabrication techniques. They say that this evolving technology could eventually lead to an end to failed batteries in critical equipment including satellites where there is no way to replace a defective battery once the bird has been launched and is on-orbit.

(DO NOT READ: You can Read the full ScienceDaily article 'Is There a Micro-Super capacitor in Your Future?' at http://www.sciencedaily.com/releases/2010/04/1 00426092805.htm)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline. Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline, 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both mail-in and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, back home in Picayune, Mississippi, after enjoying Hamvention 2010. I also say 73 and we thank you for listening.

Amateur Radio NewslineT Report 1709 - May 14 2010

Amateur Radio Newsline report number 1709 with a release date of Friday, May 14, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Dayton opens its doors for Hamvention 2010, Australian hams fear the possible loss of 450 MHz, a ham accused of jamming police pleads not guilty and a broadcast transmitter is stolen while its on the air. Find out the details on Amateur Radio NewslineT report number 1709 coming your way right now.

(Billboard Cart Here)

**

THE SOCIAL SCENE: HAMVENTION 2010 IS ON

The doors of the 2010 Dayton Hamvention are opening as we go to air. Since 1952 the Dayton Hamvention has been sponsored by Dayton Amateur Radio Association. It has grown to be the world's largest amateur radio gathering, attracting hams from throughout the globe. And according to Assistant General Chairman Mike Kalter, W8CI, this years Hamvention is dedicated to radio clubs and the work that they doworldwide:

--

Kalter: "This years theme is amateur radio clubs worldwide. We decided that as our club is a big club. The Dayton Amateur Radio Association. And it takes a lot of people to put on something like this, so we were thinking that there are a lot of clubs that do a lot of good in the world so we thought that this would be our theme this year. We even have a Club of the Year award that we instituted this year."

--

Mike Kalter made that comment in an interview with RAIN's Hap Holly, KC9RP. At the same time he said that 2010 may be a year of growth for the Hamvention itself:

--

Kalter: "We have sold more tickets to date than we did last year at this time. We have more inside exhibits and more Flea Market spaces sold than we did last year at this time. So it looks as though we are going to be successful on those counts."

--

And what can visitors expect this year? Again, Mike Kalter, W8CI:

--

Kalter: "We have some interesting things that are going to happen. "Discover Homebrew" will be in our demonstration area where anyone wants to bring their homebrew project and set it up.

"We will have a ham radio (training) class this year.

"Returning again this year will be the emergency communications display. That's been a big hit so we have that back as well.

"Also we have some D-Star information. The clubs W8BI Gateway will be linked to the 30-B reflevtor during Hamvention weekend.

"And this year at the (W8BI) special events station we will have speech units so that the visually impaired are able to participate -- so we are pretty excited about that. The exact frequencies are listed at our website at www.hamvention.org"

--

Kalter also says that there will be a lot of interesting speakers leading this years forums:

--

Kalter: "Dr. Paul Bernhart, KF4FOR, the Senior Research Physicist for the Naval Research Lab. He heads up the HAARP project at the Haval Research Lab in Alaska and Aericebo in Pureto Rico. He will be talking about HAARP which is the High Frequency Active Auroral Research Program.

"Gordon West will be there taking stage. He's going to talk about the latest in DSP speakers from Clear Speech and others. If you have never seen a Gordon West forum, they are always a lot of fun.

"Carole Perry is a professional educator from New YorknCity and she will be presenting her Youth Forum.

"And Van Hoi, VR2HF, will be talking about what its like to be a ham in Hong Kong.

"The BalloonSat: forum will be back with Bill Brown, WB8ELK. And we are actually planning a balloon launch on Friday afternoon."

--

By way of background, the Dayton Hamvention started out life as the Southwestern Ohio Hamvention. The first organizational meeting was held in January 1952 with the convention taking place on March 22nd at the old Biltmore Hotel in downtown Dayton. And at that first gathering there were only seven exhibitors and six forums. Even so, it was a far greater success than the Dayton Amateur Radio Association could have ever anticipated. They had hoped to attract 300 visitors but over 600 showed up. Now, almost six decades after John Willig, W8ACE, had asked the Dayton Amateur Radio Association to sponsor a ham radio convention the Dayton Hamvention remains the shining star in the ham radio sky.

We will have a full report on Hamvention 2010 next week. Meantime you can hear Hap Holly's complete interview with Mike Kalter, W8CI, by directing your web browser to www.therainreport.com and downloading this weeks Rain Report file. (ARNewslineT, RAIN)

**

RESTRUCTURING: 70CM IN JEOPARDY DOWN-UNDER

Radio Amateurs in Australia are worried that they may soon loose access to some or all of the 420 to 450 MHz band. This after the Australian Communications and Media Authority issues a statement on future use of the spectrum from 403 to 520 MHz.

Attachment 1 of the statement shows proposals for 420-430 MHz, there is no mention of the Amateur Service. With regard to 440-450 MHz the section on Proposed Transition Arrangements says that users in 452.5 to 453 MHz and 462 and 462.5 MHz spectrum will need to relocate either elsewhere in the 450 to 470 MHz band, or into another part of the 400 MHz band. Spectrum in 440 to 450 MHz will also be made available in consultation with the Department of Defense on a temporary basis.

The Australian Communications and Media Authority also propose to increase the number of UHF Citizen Band Radio Service channels from 40 to 80 by the use of 12.5 kHz channel spacing. More is on-line at www.acma.gov.au/WEB/STANDARD/pc=PC_312108 (WIA)

**

RADIO RECORDS: FIRST ROS CONTACT ON 500 KHZ

While it may not yet be legal to use in the United States FCC rules, the first Q-S-O using the new ROS digital protocol has been made on 500 kHz between G0NBD and G4WGT.

The contact took place on April 30th over a 30 mile path. Initially they used ROS 500/16 mode and then the ROS E-M-E mode. During the contact power was reduced from 3 watts output to 30 milliwatts. The antennas were 35ft top loaded whips.

Practical Amateur antennas for this band are very hard to come by due to the wavelengths involved. It can require 50 or more watts of transmitter output just to get 100 milliwatts Effective Radiated Power.

The success of the contact between the two U-K hams is proof that efficient weak signal modes such as R-O-S can help extend the communications range that is achieved using simple albeit inefficient antennas such as those used in this record setting test. (Southgate)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Hamvention repeater, W8BI, serving greater Dayton, Ohio on FM and D-Star.

**

ENFORCEMENT: KJ6CEY PLEADS NOT GUILTY TO ALL CHARGES

A follow-up to last weeks story on the ham radio operator accused of making bomb threats, jamming police and fire channels, and interrupting the regions emergency radio traffic. Irene Marie Levy, KJ6CEY, has pleaded not guilty to felony charges of making criminal threats and making a false bomb report. She is also facing misdemeanor counts of maliciously interrupting a communications transmission and obstructing arrest.

According to the Desert Sun on-line newspaper, the intentional interference with police and fire radio communications allegation involved a bomb threat. Court papers say that it also contained what the newspaper terms as "specific" and "unequivocal" threats made to a certain sergeant, leading him to fear for the safety of his family,

Hemet police Lt. Mark Richards says that Levy was arrested at her home after investigators tracked her down by investigators using radio direction finding techniques according. A felony settlement conference was set for Wednesday May 12th and a preliminary hearing was tentatively scheduled a week later on May 20th. (Desert Sun, other published news reports)

**

TELECOMMUNICATIONS POLITICS: CONGRESSIONAL LEADERS SAY FCC MUST MOVE AHEAD ON BROADBAND

Two Washington lawmakers say that Congress should get ready to write new telecommunications policy, if needed. This following a recent court ruling that threw into doubt the government's ability to move forward with an ambitious broadband plan. Representative Henry Waxman and Senator John Rockefeller said the Federal Communications Commission should also consider short-term options, including a controversial idea to bring broadband under a stricter regulatory regime.

In a recent letter to the FCC, the lawmakers said that it is vitally important the agency be empowered to move forward with its National Broadband Plan unveiled earlier this year. To accomplish these objectives, the Commission should consider all viable options. This includes a change in classification of broadband, provided that doing so entails a light regulatory touch, with appropriate use of forbearance authority.

Reclassification would mean putting broadband under the same set of rules governing telephone services rather than its current status as a lightly regulated information service. For broadband providers, the option could mean more restrictions on pricing and having to share lines with competing Internet service providers. In the longer term, the lawmakers said that, if there is a need to craft a new telecommunications policy, that Congress will do so.

As previously reported here on Newsline, in April a Federal appeals court ruled that the FCC lacked the legal authority to stop Comcast from blocking online applications for distributing television shows and other large, bandwidth-hogging files. The FCC has since acknowledged the ruling does question its authority over broadband, but it vowed to press ahead. The big players in the industry including such entities as Verizon and Comcast fear reclassification would be overly burdensome and would likely challenge such a move in the courts. (Published news reports)

**

TELECOMMUNICATIONS POLITICS: STUDY SAYS 33% OF ALL AMERICANS LACK BROADBAND

Meantime, the FCC has determined that about one third of all Americans do not have a broadband Internet connection at home. According to a report from the regulatory agency the main barriers to adoption appear to be cost and literacy.

The FCC is working on a plan to deploy nationwide wireless broadband. The usage study titled Broadband Adoption and Usage in America was released at the Brookings Institute. But in the report there appears to be no mention of how many Americans do not want or feel that they have no need for any kind of broadband connectivity. (Telecom News)

HAMVENTIONr NEWS: JARL TO ACCEPT IARU REGION 3 AWARD APPLICATIONS

The ARRL reports that representatives from the Japan Amateur Radio League will be attending the Dayton Hamvention and will accepting applications for the International Amateur Radio Union Region 3 Operating Award. The JARL will forward the applications to the New Zealand Association of Radio Transmitters who administers the award. NZART will then send applicants their certificate with any endorsements after Hamvention closes.

To be eligible for this honor, applicants must present a completed application, listing at least seven contacts from entities in IARU Region 3 whose amateur societies are member societies of the International Amateur Radio Union. No QSL cards are necessary, but only QSOs made after April 5, 1982 are eligible.

There are 35 available entities for the International Amateur Radio Union Region 3 Award. Hams who present seven QSOs will be awarded the Basic Award. Hams who present 15 QSOs will be achieve the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement. The award fee is $4 or four International Reply Coupons. (ARRL)

THE SOCIAL SCENE: HAM RADIO EXHIBIT OPENS AT EUROPEAN PARLIAMENT

An amateur radio exhibition has opened in the European Parliament. Organized by the IARU Region 1 EUROCOM working group, the display focuses on emergency communications, education and space, with the aim to raise awareness among European politicians of the important role played by radio amateurs.

The new exhibition is sponsored by Mrs. Brigit Sippel. It was opened by IARU Region 1 President, Hans Blondeel Timmerman, PB2T. Photos of the event and further details are available on the IARU Region 1 website at www dot iaru-1 dot org. (IARU)

**

NAMES IN THE NEWS: GI4FUM FUN DXPEDITION TO MOZAMBIQUE

Some names in the news. First up is David Hutchinson, GI4FUM who is also known as 3DA0DJ. He is sponsoring a DXpedition to Bilene, Mozambique this coming October.

Bilene is a costal resort on the Indian Ocean about 150 kilometers north of Maputu. GI4FUM says that he will fly from London's Heathrow Airport to Johannesburg and drive up to Mozambique. He says that plans are to run a station for Jamboree on the Air with local scouts on the weekend of October 16th and 17th and that they will also enter a station for CQWW SSB over the weekend of the 30thth and 31st.

GI4FUM adds that there will be numerous opportunity for individuals to operate under their own C91 callsigns as well as sun bathing on an Indian Ocean beach in late African spring. More information on this fun sounding DX adventure is on line at www.3da0ss.net (Southgate)

**

NAMES IN THE NEWS: DIANA ENG, KC2UHB, DEVELOPS COLLAPSABLE FABRIC YAGI

Designer and electronics enthusiast Diana Eng, KC2UHB, has developed a collapsible fabric Yagi for portable amateur radio satellite operation. In her column in MAKE Magazine she writes that one of her favorite ham

radio activities is making contacts on satellites. She says that it is really fun to know that you're controlling something that's receiving and sending communications from space.

Eng notes that communicating with satellites means carrying a big Yagi antenna around. So she decided to use her fashion sewing skills to make a collapsible fabric Yagi antenna that's much easier to transport.

Eng notes that the actual antenna design is based on the work of engineer and writer Kent Britain, WA5VJB. The difference is the materials used in the final assembly. Thin brass tubing is used for the antenna elements while rolled up cloth doubles as both the boom and as a carrying case for the finished antenna. This makes it easily transportable as well as quick to set up in the field or for classroom satellite demonstrations. Full instructions on how to build one is on line at http://blog.makezine.com/archive/2010/05/collapsible_fabric_yagi_antenna.html (MAKE Magazine)

**

NAMES IN THE NEWS: K7BW TO OPERATE 6 METERS FROM SAN ANDREAS

Dennis Motschenbacher, K7BV will be active as 5J0BV from San Andreas Providencia from June 9th to the 20th. This to once again try and give out this extremely hard to contact location to Europeans on 6 meters. While not as rare in the USA, there still appears to be a large demand for this location world-wide even after Dennis's two previous operations devoted to 6 meters. More on this operation including QSL routing is on-line at tinyurl.com/2unguet (K7BV)

RADIO STRANGE: BROADCAST TRANSMITTER STOLEN WHILE ON THE AIR

Here's a story that may be hard to believe, but its true. The London Daily Record newspaper reports that a broadcast transmitter has been stolen while it was on the air.

The newspaper says that Mike Smith's Log In To Lunch show was being broadcast on Lanarkshire's radio station L107when the airwaves went dead. After investigating the reason behind the sudden silence the station owners found that the transmitter had been taken from the 17th

floor of an office building in the town of Hamilton.

Station managers told the police that the transmitter is about the size of a large refrigerator. Surveillance cameras from the office block show two men pushing it out on a dolly and loading it into a van. A potential audience numbering close to 600,000 listeners may have heard the popular station go off the air.

You can read more at http://tinyurl.com/3ay3492. And you thought these things only happened at remote, isolated hilltop radio sites. (RW)

**

EMERGING TECHNOLOGY: CELLPHONE RADIATION IMPROVES THE THOUGHT PROCESS OF MICE

From the science page comes this interesting story regarding radiation from cellular telephones that claims it can improve your intelligence, but only if you are a mouse.

According to Gary Arendash of the University of South Florida in Tampa and colleagues, research being conducted using mice prone to an animal form of Alzheimer's disease showed that long-term exposure to electromagnetic radiation typical of cell phones slowed and reversed the course of the illness. Moreover, a similar exposure in normal mice for two hours a day over seven to nine months improved their cognitive abilities compared with control specimens.

Arendash and colleagues provided their data in a recent issue of the Journal of Alzheimer's Disease. They also say that the findings provide striking evidence for both protective and disease-reversing effects of long-term exposure to radiation at cell phone level.

But other experts cautioned that the science in the study while mainstream is still in its very early stages. Dr. Alan Lerner is a Neurologist at Case Western Reserve University in Cleveland, Ohio. In a public e-mail he said that the researchers took an an innovative approach to modulating Alzheimer's disease models in mice. but he said it's too early to say whether the finding have any relevance to humans. (Science OnLine)

**

HAM RADIO IN SPACE: SATELLITE LAUNCH DELAY

The launch of two amateur radio satellites, STUDSAT and TIsat-1, on the Indian PSLV-C15 launcher has been postponed until June. The rescheduling of the launch took place after a marginal drop in the pressure in second stage of the vehicle was noticed during the mandatory checks carried out on the launch vehicle. (AMSAT-UK, Southgate)

**

HAM RADIO IN SPACE: NEW AO-51 POWER MANAGEMENT SYSTEM ENABLED

A new power management system has been enabled on the Amsat Oscar 51 ham radio satellite. According to control station Drew Glasbrenner, KO4MA, if everything works right, the repeater should run at 1.01 watt while in sun, and 290 milliwatt while in eclipse and after exiting eclipse until the batteries recover to around 7.9 volts. Observations from the southern hemisphere while entering and leaving eclipse would be very helpful. They can be sent by e-mail to KO4MA (at) amsat dot org. (ANS)

**

HAM RADIO NEAR SPACE: ALIEN-1 HAM BALLOON A BIG SUCCESS

The flight of the ALIEN-1 high altitude balloon package, built by three students at Reading School, in the United Kingdom has proved to be an overwhelming success. According to several sources the 434.075 MHz beacon worked as expected and over 3000 pictures were taken during the flight.

Due to the 434.075 MHz telemetry messages being sent at just 50 baud the
payload could only send down one telemetry string every 15 seconds.

The highest altitude achieved by ALIEN-1 was 33.158km. This is believed the third highest in UK records. Some of the photos taken by ALIEN-1 Pictures on line at http://www.flickr.com/photos/alienhab/ (Southgate, WIA News)

**

ON THE AIR: TAIWAN SPECIAL EVENT STATIONS

On the air, keep an ear open for special event stations 3H100TW, 3T100TW and 3T0TW. All are operational from the capital city of Taipei, Taiwan, through December 31st. QSL's for all three stations should be sent via the BV bureau.

**

ON THE AIR: THE GREAT PATRIOTIC WAR

And if you worked Ukranian special event station EO65JM between May 1st and the 15th you talked to an operator helping to commemorate the 65th anniversary of the victory in the great Patriotic War. The QSL Manager for this event is K2PF.

**

DX

In DX word that TU5KG will soon be fishing again around Crozet and Kerguelen islands. He has secured the callsigns FT5WQ and FT5XT and hopes to become active during shore leaves. No exact dates for his operation or QSL route has yet been announced

PA7JWC poprtable 3B8 is spending his holidays on Mauritius. He will be on the island through May 22nd or there abouts. QSLs via his home call or via Logbook of the World.

K8LJG will be active portable 4 from Amelia Island, Florida in the Florida State North East Group through May 25th. He will be operating on 20 through 10 meters using CW and SSB, on the IOTA frequencies. QSL to John C. Kroll, K8LJG, 3528 Craig Drive, Flint, Michigan, 48506 in the USA.

Lastly, VE3ZZ will be active as VE3ZZ stroke VY2 from Prince Edward Island between July 21st and the 26th. His operation will include an entry in the RSGB Islands on the Air Contest on July 24th and 25th as VY2X. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: CONGRATULATIONS TO "BIG JIM" DAVIS W2JKD ON HIS 50 YEAR BROADCAST CAREER

And finally this week, here's a voice that's well known to listeners to this news service. It belongs to a ham who is about to pass a truly important milestone in his career and in his life. Take a listen:

--

Archive audio of W2JKD

--

Yes, that's Amateur Radio Newsline's longtime news anchor Jim Davis, W2JKD. And in just a few short weeks Jim will be celebrating his 50th year as a professional broadcaster both behind the microphone and behind the scenes.

Jim Davis, W2JKD, is a native of Buffalo, New York. He is a second generation and life long broadcaster who followed in the footsteps of his mother who was a singer on WKBW radio. In fact, "Big Jim" as he's known to his many friends began his career on June 19th, 1960 at a small radio station in Cheektowga, New York whose call letters were WNIA. Jim was only 14 at the time but convinced station managers that he was a lot older and went on the air using the name Mac Maguire. The first record he ever played was "Cathy's Clown" by the Everly Brothers. In the five decades he has been on the air, Jim has interviewed numerous politicians, radio, TV and film stars and has played an estimated 600,000 songs.

Over the years Jim has had successful runs at some of the nation's biggest radio stations. These include such well known calls as WOR - FM in New York City; KHJ in Los Angeles; CKLW in the "Motor City" of Detroit and Chicago's famed WLS-AM. While employed by RKO General Broadcasting, Jim was twice nominated for Billboard Magazine's "Major Market Air Personality Of The Year."

In 1981, Jim entered senior management by becoming Vice President and General Manager of Radio Station WVAF in Charleston, West Virginia. Currently, he is Vice President and General Manager for Folrida's Vero Beach Broadcasters, L.L.C. which operates four FM and two AM stations. In December of 2008, and in addition to keeping the radio stations on the air, Jim was appointed Chief Operating Officer of Home Town Cable Plus. This is a company that provides a state-of-the-art fiber-to-the-premises system in Port St. Lucie, Florida delivering High-Speed Internet, Cable TV, Telephone and Security Alarm Monitoring. Jim has also authored a book entitled "The Sales Success Spectrum-A System Of Radio Sales" which is used as a teaching and training manual radio stations.

In his spare time, Jim Davis is a licensed Multi Engine Commercial Instrument rated pilot and owner of a Piper Pathfinder. As a Civil Air Patrol member he has been trained as a Search and Rescue pilot and participates in looking for downed aircraft survivors.

Jim has been an amateur radio operator since age twelve and currently holds an Extra class license. He received a "designated examiner" status from the American Radio Relay League in 1985.

And since the early days of this news service when we were still the Westlink Radio Network, Jim has been an important part of the Newsline family. To many radio amateurs around the world W2JKD is considered as being "the voice" of Amateur Radio Newsline and a person that they have come to rely on for ham radio news since the early 1980's.

So please join us in congratulating Jim Davis, W2JKD, on an astonishing 50 years as a broadcaster who has contributed so mightily to the ongoing success of the radio broadcast industry and for his years of service to amateur radio as well. As Jim would likely be the first to tell you, its all been a truly fun ride. (ARNewsline)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio NewslineT. Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio NewslineT, 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear

-- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Amateur Radio Newsline report number 1710 with a release date of Friday, May 21, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hamvention 2010 is a big hit. We take you there. Also, an I-A-R-U report says that hams saved lives following the April earthquake, Kenya gives its hams expanded privileges on 40 meters and super-capicators my replace batteries in critical uses. Find out the details on Amateur Radio Newsline(tm) report number 1710 coming your way right now.

(Billboard Cart Here)

**

The 2010 Dayton Hamvention is now history and by all accounts this year's event was bigger than last even considering the poor economy, as we hear from Henry Raminsky, Hamventions's Media and Public Relations Chairman&

(AUDIO Raminsky opening morning)

Heil sound's Chip Margelli, K7JA, echoes Henry's observations about the increased attendance at this year's Hamvention.

(AUDIO Margelli)

Henry goes on to tell us that Hamvention is a lot more than just new toys at the vendors and manufacturers inside and everything under the sun outside in the flea market. There's something for just about everyone.

(AUDIO Raminsky balloon and forums)

One of the best attended and most anticipated forums is Friday's Ham Radio and the Law forum. Since 1980 James O'Connell, W9WU, has kept attendees abreast of the latest developments as they relate to covenants and antenna restrictions.

(AUDIO O'Connell 1)

If you're thinking about erecting a tower or large antenna this is one forum you really need to attend.

(AUDIO O'Connell 2)

Of course, it wouldn't be Hamvention without the Amateur Radio Newsline Town Hall Meeting. Several hams, well known and not so well known explained how your ham ticket could open the door to your next job. We'll have more on the Town Hall Meeting next week.

**

HAMVENTION 2010: SOME OF THE NEW GEAR

In addition to the Wouxon dual band hand held we told you about previously, there were a number of other new products of interest to those strolling the display area at the HARA arena. Among them, the long awaited Kenwood TS-590S HF/50MHz All-Mode Transceiver. According to Kenwood, the new radio features a 32-bit floating-point DSP, advanced receiver performance and an extensive range of features that make it ideal for beginner and seasoned DX'er alike. The radio's exceptional ease of operation, true to the Kenwood tradition, will be especially welcome for contest and mobile operations. No firm manufacturers suggested retail price for the TS-590 was announced.

But the TS-590S was not the only new entry from Kenwood. Also displayed was the company's APRS capable TH-D72 144 and 430MHz dual band FM Portable. Kenwood says that thanks to the internal GPS unit, APRS operations will be more enjoyable than ever. The TH-D72 also offers Echolink memory compatibility and a mini-USB connector for enhanced computer connectivity.

On the audio side, here's Bob Heil, K9EID on his new microphone and headset offerings.

(AUDIO Bob Heil)

There was lots more new gear shown at Hamvention 2010. We will cover some of it in upcoming Newsline reports.

RESCUE RADIO: CHINA QUAKE IARU R-1 FINAL REPORT

Hams in China became true first responders following last April's Qinghai earthquake. According to a report on the IA-R-U's Region One website, one Beijing based amateur radio rescue team was responsible for saving the lives of 6 people following the temblor. In its final report on ham radio activities following the 7.1 Richter scale

earthquake that struck on April 14th the I-A-R-U say that amateur radio operators in China were widely involved in the disaster relief activities. The report says that hams traveled from as far away as Beijing, Sichuan, Shandong, Anhui, Qinghai and Jiangsu to provide communications aid.

The quake killed more than 2,000 people and relief efforts are continuing for those left homeless. The high altitude caused 90% of the amateur radio rescue team members to suffer altitude sickness, but no one was injured during their efforts to help others affected by the earthquake disaster.(IARU R-1)

**

RESTRUCURING: KENYA EXPANDS 40 METER PRIVELEGES

The Communications Commission of Kenya has just approved an extension of the amateur radio 40-metre band in that nation. This gives radio amateurs in Kenya the use of the sub-band 7100 to 7200 kHz in the 40 meter band. More is on line at the web link found at <http://www.cck.go.ke/>http://www.cck.go.ke/ (Southgate)

**

RADIO LAW: FCC SEEKS COMMENTS ON SPREAD SPECTRUM NPRM

The FCC says its time for you to voice your opinion on liberalizing the use of spread spectrum in ham radio.

According to the ARRL, in March the FCC released a Notice of Proposed Rulemaking in WT Docket No 10-62 that suggested amending Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control, This, to reduce transmitter power when the station transmits a spread spectrum emission, and reducing the maximum transmitter power output when transmitting a Spread Spectrum signal.

On May 14th , a summary of the NPRM and the Order was published in the Federal Register and the FCC is seeking comments on the NPRM. Comments must be filed on or before June 14th and reply comments must be filed on or before June 28th.

The Commission also attached an Order to the NPRM that makes certain non-substantive revisions to Part 97.

(ARRL)

**

HAM HONORS: CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES

CQ magazine has announced its 2010 Hall of Fame inductees. The 15 new members include some names well known in the hobby. Among these is late ARRL President George S. Wilson who led the ARRL portion of the effort to create the vanity call sign program.

Also being honored this year is the late Gene Harlan, WB9MMM, who was the editor and publisher of ATV Quarterly and founder of Cyberham magazine.

The 2010 inductees to the CQ DX Hall of Fame are writer and DXer Robert Locher, W9KNI, author of the "The Complete DXer" and Lynn Lamb, W4NL who is a co-founder of the Southeastern DX and Contesting Organization. This group sponsors an annual convention featuring well-known speakers on DXing and contesting.

Last but by no means least are Don Hill, AA5AU and Larry Weaver, N6TW who have been inducted into the CQ Contest Hall of Fame. The complete list of this year's inductees can be found on-line at www dot cq dash amateur dash radio dot com. (CQ)

**

RADIO BUSINESS: BELTRONICS TO ABANDON HAM RADIO REPAIR

The Nashua Telegraph reports that Beltronics is ending ham radio repairs because of too much demand.

Until last month, the company had two employees who did part-time repair work on amateur radio gear. When one of those employees retired, company co-owner Dorothy Peabody said, the decision was made to get out of that business because there were more requests for repairs than the one remaining worker could handle.

Dorothy Peabody owns Beltronics with her husband Bernie. She told the newspaper that the desire for repair work is so great that over the past decade Beltronics has repaired radios mailed from as far away as Saudi Arabia, Puerto Rico and South America. The company will now concentrate on its core business of commercial, municipal and ambulance radio systems.

You can read the full Nashua Telegraph story dated Friday, May 14 at <http://www.nashuatelegraph.com/news/738077-196/beltronics-ending-ham-radio-repairs.html>http://www.nashuatelegraph.com/news/738077-196/beltronics-ending-ham-radio-repairs.html (Southgate)

**

TELECOMMUNICATIONS LAW: SUPREME COURT REFUSES CHALLENGE TO MUST CARY RULE

The United States Supreme Court has declined to take up a challenge from a cable television system operator. This, to the FCC's 18 year old requirement that cablecasters carry local broadcast stations on their systems.

On Monday, May 17th the justices rejected an appeal from Cablevision Corporation. Instead the court upheld a federal "Must Carry" law, enacted in 1992.

Cablevision, the nation's fifth-largest cable TV operator, sued the Federal Communications Commission over its ruling that forced Cablevision to carry the signal of a distant home-shopping station on its Long Island cable systems. The federal appeals court in New York had previously upheld the FCC's determination that the cablecaster provide a channel for WRNN, based in the town of Kingston which is about 90 miles north of New York City. The case was assigned the designation Cablevision v. FCC, 09-901

THE CHANGING OF THE GUARD: KEN MILLER K6IR -S.K

We are very sad to report the passing of 1999 Dayton Radio Amateur of the Year, Kenneth Miller, K6IR, on March 24th.

Ken Millers professional career spanned over four decades in the executive management and development of products in the electronic equipment manufacturing business segment of industry in the United States, Europe and Asia. In his role as an executive with Lear Jet, Motorola, American Standard, Penril, the Singer Company and other well known corporations, K6IR participated in the production and marketing of a broad array of high-tech electronic products including airborne and ground based communications, navigation instrumentation and digital communications devices.

In ham radio, Ken Miller served the Radio Club of America for several years as Chairman of the Grants-in-Aid Committee. The Quarter Century Wireless Association had named K6IR as recipient of its 1995 Distinguished Service Award for his "engineering accomplishments and his leadership of the Radio Club of America Scholarship Program."

(RCA, QCWA)

**

THE CHANGING OF THE GUARD: TWO SOUTH AFRICAN HAMS KILED IN PLANE CRASH

The recent airline accident in Tripoli has claimed the lives of 2 well-known South African amateur radio operators. ?Norbert Taferner, ZS6ANL, his wife Paula and Anton Matthee, ZS6A were killed when the Airbus aircraft they were passengers on crashed.

According to Dennis Green, ZS4BS, Norbert Tafener will be remembered for his years of involvement with the Johannesburg Branch of the South

African Radio League. Although retired, he was still active in teaching and lecturing to young and new amateur radio operators in helping them to obtain their licenses. The Tafener's are survived by one son.

Anton Matthee, ZS6A, lived in Stellenbosch and was a keen off road adventurer, painter and photographer. From reports, he was a truly outgoing person. (Southgate)

**

HAM RADIO IN SPACE: VIETNAM TO LAUNCH HAMSAT

News has been received from XV9AA in Hanoi of a Vietnamese Amateur Radio CubeSat under development. The new bird is designated as F-1. It is expected to be launched by the end of 2010 into a Sun-synchronous, 98 deg inclination low earth orbit.

The satellite F-1 will carry several low-resolution cameras to take photos of the Earth along with temperature and magnetic sensors to study space environment. The satellite will use amateur VHF and UHF frequencies. The IARU has coordinated a downlink frequency of 437.485 MHz to support a 1200 baud AX.25 telemetry link. The F-1 satellite will also transmit a beacon using a modulated Morse code audio signal on FM when it is not in range of the earth station in Hanoi.

More is on line at :
<http://fspace.fsoft.com.vn/>http://fspace.fsoft.com.vn/ (Southgate)

**

HAM RADIO IN SPACE; VIOLET SAT TO LAUNCH IN 2011

And the Violet is an Amateur Radio satellite being built at Cornell University. It will launch in early 2011. This bird is described as a 50 cm cube sat and will carry 4k8 UHF simplex packet links with 5 watts of RF downlink power. It will use a star tracker and fiber optic gyro for fine attitude estimation and propagation.

A submission for frequencies has been made to the IARU Amateur Satellite Frequency Coordination panel for operational frequency assignments. The name Violet is derived from its ultraviolet telescope, which includes flight-spare Deep Impact CCDs. (ANS)

**

HAM RADIO NEAR SPACE: THE ALIEN-1 BALLOON LAUNCH

The flight of ALIEN-1, a high altitude balloon built by three students at Reading School, proved a success. This despite the 50 baud transmission rate of the payload. That meant it could only send down one telemetry string every 15 seconds. As a result it initially looked as though the highest altitude achieved was 33.116km. However, having recovered the payload they got the second-by-second GPS log and this

shows the highest achieved altitude was 33.158km: It is believed this altitude is the third highest in the UKHAS UK records. The 434.075 MHz beacon worked well and some great pictures were taken. (Various)

**

DX

In DX, G7COD has been issued the call sign D2AK and will be operational nearly every day from the capital of the Republic of Angola. This, for the next 12 months while on a work assignment there. His operation will be on 80 to 10 meters, including WARC frequencies, using SSB and CW. QSL via G7COD, direct only to Andrew Kitchen, 4 Dairy Cottage, Newton Hall Farm, Bank Newton, Skipton, North Yorkshire, BD23 3NT, England.

The Dundalk Amateur Radio Society, using the call EI7DAR stroke P will be activating St. Johns Castle, Carlingford, County Louth Ireland on Saturday and Sunday, May 29th and 30th. Full details of the event are on line at www dot ei7dr dot com. Lastly, ZS1HF is now active as ZS8M from Marion Island. He's reportedly been heard on 7.140, 14.250, 18.150 and 21.266 Mhz. He will be on Marion Island for a full year so there will be plenty of time to have a chat. QSL as he directs on the air.

(Above from various DX ews sources)

**

THAT FINAL ITEM: SUPERCAPICITORS MAY REPLACE BATTERIES

And finally this week, failed batteries are a problem that plague both cell-phones and Amateur Radio satellites. But Micro-Super capacitors may provide a solution.

Science Daily reports that Berkeley Lab researcher John Chmiola believes he has found a solution in electrochemical capacitors, which are commonly referred to as "super capacitors." This is because of their higher energy storage densities than conventional dielectric capacitors and higher abuse tolerance than batteries.

In a paper published in the April 23rd issue of the journal Science, titled "Monolithic Carbide-Derived Carbon Films for Micro-Super capacitors," Chmiola and Yury Gogotsi of Drexel University, along with other co-authors, describe a unique new technique for integrating high performance micro-sized super capacitors into a variety of portable electronic devices through common micro-fabrication techniques. They say that this evolving technology could eventually lead to an end to failed batteries in critical equipment including satellites where there is no way to replace a defective battery once the bird has been launched and is on-orbit.

You can Read the full ScienceDaily article 'Is There a Micro-Super capacitor in Your Future?' at

<http://www.sciencedaily.com/releases/2010/04/100426092805.htm>http://www.sciencedaily.com/releases/2010/04/100426092805.htm

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, back home in Picayune, Mississippi, after enjoying Hamvention 2010. I also say 73 and we thank you for listening.

It was twenty years ago today,
Marky Morgan forced the boys to be gay
He's been going in and outa their rears
And he's made them into ravin' queers.
So watch out or I'll force on you
The act we've hated all these years,
Marky Morgan's Greyhound Men's Room Band.

We're Marky Morgan's Greyhound Men's Room Band,
Disciples of the Bucktoothed Choad,
Marky Morgan's Greyhound Men's Room Band,
Sit back and watch us shoot a load.
Marky Morgan's Greyhound, Marky Morgan's Greyhound,
Marky Morgan's Greyhound Men's Room Band.
It's wonderful to be here,
But Morgan's full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Morgan's going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Marky Morgan's Greyhound Men's Room Band.

How can it be possible, considerating how simple the Amateur Radio
exams of today are, KB9RQZ & KD8CTL can't pass the dumbed down extra ?

Can the two of them really be that stupid?

They both must be stupid. Stupid indeed !

Hello Steve:
you may want to get in touch with KB9RQZ or KD8CTL or both.

Not only do they love tasting body fluid of all types, they're also
into solid waste.

You can find Mark (KB9RQZ) most days here in
"Rec.Radio.Amateur.Policy" or
here:
http://nimbusters.org/hams/forum.php?board=1

Or just google "KB9RQZ".

Good Luck In TeH Contest !

Besides the fact that this kid has been real funny with the songs
since he had an AOL account, what the heck does ham radio have to do
with CB radio???? Uh REC.RADIO.CB ?????????????

"he they" You need to look for a new grammer book, Fatty.

shoveanovaupyourass day 3274 of watching a UP retard because his
brain
is still MIA as of course it must be since you can't act so wacked
and
stupid and actually believe that law enfocement requires you to
report anybody you can think of for an alleged pandering note that
everyone knows you created and sent to yourself, OTOH nobody wants to
sue because we would have to give our real names and we don't dare do
that because the UP kook AKA Fatty will lie and falsely report us too,
but
in the long run nothing will happen in return as law enforcement is
well informed that the UP fool is mentally unstable, that is ok
because the kooks fame as a total flake is slowly spreading across
the
net and in his area, I guess he likes getting banned from web sites
and being ejected from ham clubs and is seen as total obtuse impotent
buffoon, personally we do not care, but we do enjoy the laughs from
time-to-time
from the never ending rant, nevertheless it is clear however that the
UP
kook has no life, except to victimize his own wife by dragging her

down socially in the process. Shalom!

indeed

Word in teh UP is that they're both searching for a testing group that
will allow them to blow their way to an extra.

==> + FCC NEWS: BILL CROSS, W3TN, PRESENTS FCC FORUM AT 2010 DAYTON
HAMVENTION®

Bill Cross, W3TN, a staff member in the FCC's Mobility Division --
part of the Wireless Telecommunications Bureau
<http://wireless.fcc.gov/> -- spoke at the FCC Forum on Saturday
morning at the 2010 Dayton Hamvention <http://www.hamvention.org/>®.
Billed by the Hamvention's Forum Committee as more of an emergency
communications discussion, Cross discussed this and other matters --
such as FCC proceedings regarding vanity and club call signs, 60 meters
and power limits for spread-spectrum users, -- as well as the FCC's
National Broadband Plan (NBP
<http://download.broadband.gov/plan/national-broadband-plan.pdf>). The
```

FCC's Mobility Division handles the day-to-day administration of the Amateur Service, along with some of the rulemaking activities that affect Amateur Radio. The Division has staff members in Washington, DC and Gettysburg, Pennsylvania. The Gettysburg staff deals with most of the Amateur Radio applications and licensing matters, as well as the Universal Licensing System (ULS <http://wireless.fcc.gov/uls/index.htm?job=home>). Read more here <http://www.arrl.org/news/bill-cross-w3tn-presents-fcc-forum-at-2010-dayton-hamvention>.

==> + FCC NEWS: FCC UPHOLDS DECISION TO REVOKE AMATEUR LICENSE OF CONVICTED INDIANA HAM

Lonnie L. Keeney, KB9RFO, of Greencastle, Indiana, filed a Petition for Reconsideration <http://fjallfoss.fcc.gov/ecfs/document/view?id=7020382453> in March 2010, asking that the FCC re-evaluate the revocation of his Amateur Radio license <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-456A1.pdf>. Keeney -- who in 2002 was convicted of child molestation, a Class C felony -- was found by the FCC in February 2010 to be "lack[ing] the requisite character qualifications to be and remain a Commission licensee." Keeney appealed the decision, and on May 24, the FCC denied his Petition via an Order on Reconsideration <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-916A1.pdf>, affirming the revocation of his Amateur Radio license. Read more here <http://www.arrl.org/news/fcc-upholds-decision-to-revoke-amateur-license-of-convicted-indiana-ham>.

==> + ARRL AUDIO NEWS RETURNS THIS WEEK

After a hiatus of nearly four months, the ARRL Audio News is scheduled to return this week on Thursday, May 27. With the advent of the new ARRL Web site, we have had to make some changes in the way the Audio News is presented. For the time being, it will only be available as one mp3 file. Beginning this week, you can find the ARRL Audio News here <http://www.arrl.org/arrl-audio-news> most Thursdays on the ARRL Web site.

==> + NCVEC QUESTION POOL COMMITTEE WITHDRAWS FOUR QUESTIONS

The Question Pool Committee (QPC) of the National Conference of Volunteer Examiner Coordinators (NCVEC) announced the withdrawal of two questions from the Technician class pool and two questions from the Extra class pool. Volunteer Examiner Coordinators (VECs) and Volunteer Examiners (VEs) must take action to remove these questions from use by July 1, 2010. Due to a rules change and pending action by the FCC, questions T2C02 and T2C03 from the July 2010 Technician Pool and questions E1C04 and E1C05 from the July 2008 Extra Pool may not be used in examinations after June 30. Read more here <http://www.arrl.org/news/ncvec-question-pool-committee-withdraws-four-questions>.

==> + REGULATORY: NEW ZEALAND'S RADIO SPECTRUM MANAGEMENT CITES HAM FOR TRANSMITTING 3100 W

Last month, New Zealand's Radio Spectrum Management (RSM) -- that country's equivalent of the FCC -- charged and fined Alan Potter, ZL3II, of Christchurch, for transmitting outside the terms and conditions of the General User Radio License for Amateur Radio Operators. Potter was charged in the Christchurch District Court on April 14 and found guilty of breaching Section 113 of the Radiocommunications Act 1989. Section 113 deals with those who "commit an offence under this Act who transmit radio waves."

Potter was found in possession of radio transmitting equipment that was capable of operating at a significantly higher power than the Amateur Radio Operators General License allows. He was fined $1750 ($1164 USD) and $130 ($86 USD) for costs. Potter was also required to forfeit his radio equipment. Section 114 of the Radiocommunications Act of 1989 references Section 113 and presumes that "any person who erects, constructs, establishes, maintains, or is in possession of any radio transmitter is presumed to have used the radio transmitter." According to news reports, RSM was alerted to a video that Potter posted on YouTube (the video has since been removed), showing showed his transmitter operating at 3100 W. Operating at such high transmitting power is likely to cause interference to, and disruption of, a range of other licensed radio services in the local area. New Zealand amateurs are restricted to no more than 500 W PEP. Read more here <http://www.arrl.org/news/new-zealand-s-radio-spectrum-management-cites-ham-for-transmitting-3100-w>.

==> AMATEUR RADIO IN SPACE: AMATEUR COMMUNITY NEEDED TO ASSIST JAPANESE AMATEUR INTERPLANETARY SATELLITE

An informal network of ham radio experimenters, scientists and CW enthusiasts called FlyVenusCom -- a nonprofit, cross-cultural effort -- has been created to support communication efforts by Japanese scientists with its CubeSat Venus probe, UNITEC-1. This CubeSat was developed by 20 universities of the University Space Engineering Consortium (UNISEC), the Japanese community developing nano-satellites. The Japanese UNITEC-1 team has called for ham radio assistance worldwide in improving and testing two areas of the CubeSat's mission. What makes this mission of particular interest to amateurs is the fact that the UNITEC engineers have added a 5 GHz Amateur Radio beacon to the spacecraft and they are encouraging hams to attempt to receive it. On May 21, Japanese ground stations reported receiving the CW and FSK beacons (call sign JQ1ZUN) at a distance of about 30,000 km. They measured the beacon frequency at 5839.91 MHz. Even though the latest reports say that the signal has been lost, the UNITEC team is trying to re-establish contact with the satellite. Read more here <http://www.arrl.org/news/amateur-community-needed-to-assist-japanese-amateur-interplanetary-satellite>.

==> ARRL PUBLICATIONS: TWO NEW BOOKS AVAILABLE FROM ARRL

Just as many vendors release new products at the Dayton Hamvention, the ARRL will debut much-anticipated publications. This year was no exception. Two new books -- Remote Operating for Amateur Radio and the third edition of The ARRL RFI Book -- were introduced.

<http://www.arrl.org/shop/Remote-Operating-for-Amateur-Radio/>
Remote Operating for Amateur Radio shows amateurs how to assemble their own Internet-controlled stations. As many hams are discovering, it has become increasingly difficult to enjoy Amateur Radio at home. Some have been driven off the air altogether by antenna restrictions, local interference and other limiting factors. But the widespread availability of high-speed Internet offers a powerful solution: Amateurs can now setup a complete station at a remote location and operate via the Internet, just as though they are actually sitting in front of the radio. That radio could be just across town or 2000 miles away.

<http://www.arrl.org/shop/The-ARRL-RFI-Book-3rd-Edition/> ARRL's team of experts has compiled the best advice available on every type of radio frequency interference (RFI) in this brand new edition of The ARRL RFI Book. From automotive to television, from computers to DVD players, from audio equipment to telephones, amateurs will find a step-by-step process for eliminating problematic interference in one convenient book. The third edition of The ARRL RFI Book also includes resources for addressing new realities of digital cable TV and satellite systems, over-the-air TV signals and troubleshooting, as well as hybrid and all-electric automobiles. For more information on these two new exciting publications, including how to get your own copy, click here
<http://www.arrl.org/news/two-new-books-available-from-arrl>.

==> + INTERNATIONAL PERSPECTIVE: ORDER YOUR IRCS ONLINE AT USPS WEB SITE

Many hams have long complained about difficulties they have encountered when purchasing International Reply Coupons (IRC <http://www.upu.int/news_centre/2008/2008-08-08_irc.jpg>s) from their local post offices. Now the US Postal Service (USPS <http://www.usps.com/>) has made it easier to get those IRCs to send with your direct QSL cards -- order them online from the USPS Web site <https://shop.usps.com/webapp/wcs/stores/servlet/ProductDisplay?catalogId=10001&storeId=10052&productId=10006688&langId=-1&parent_category_rn=10000002&top_category=10000002&categoryId=10000034&top=&currentPage=0&sort=&viewAll=N&rn=CategoriesDisplay&WT.ac=10>.
The USPS ships all in-stock domestic orders for stamps and retail items within 1 business day via Priority Mail with Delivery Confirmation or First Class Mail. Shipments should arrive within 3-5 business days. All stamp orders are charged a $1 handling fee, regardless of the order amount. IRCs purchased from the USPS, whether online or in person at a post office, cost $2.10 each. Read more here
<http://www.arrl.org/news/order-your-ircs-online-at-usps-web-site>.

==> + INTERNATIONAL PERSPECTIVE: HAM VISITORS TO SOUTH AFRICA ABLE TO OPERATE, USE SPECIAL CALL SIGN PREFIX DURING WORLD CUP

Through an agreement between the South African Radio League (SARL <http://www.sarl.org.za/>) and the Independent Communications Authority of South Africa, those radio amateurs who will be attending the FIFA World Cup <http://www.fifa.com/worldcup/> in South Africa may use a special ZS call sign <http://www.amateurradio.org.za/worldcup.htm> during the event. SARL is South Africa's IARU Member-Society. After registering with SARL prior to arrival in South Africa, hams may attach ZS10 to the front of their own call sign (i.e. ZS10/K1SFA) from June 11-July 11. Hams interested in obtaining permission to use ZS10/ must complete the form and e-mail it to SARL <worldcup@sarl.org.za>, along with a copy of their passport page showing the ham's photograph and a copy of their current Amateur Radio license. Hams will need to keep a both a copy of the form and their license while in South Africa. In anticipation of the World Cup, SARL and its affiliated clubs have been using a special event call sign -- ZS10WCS -- since September 2009. SARL will provide a commemorative QSL card for those amateurs who work ZS10WCS. Direct QSLs must include a self-addressed envelope and one IRC or US $1. Amateurs may also QSL via e-mail <wcs@sarl.org.za>, but those hams sending an e-mail QSL will only receive an e-mail QSL in return, and not the commemorative printed QSL card.

==> THERE'S STILL TIME TO ENTER THE 2010 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2011 ARRL Calendar. Hurry -- the entry deadline is June 1! For more information, including rules and requirements, click here <http://www.arrl.org/news/there-s-still-time-to-enter-the-2010-arrl-photo-contest>.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

<http://www.arrl.org/shop/Field-Day-Supplies/> How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than five weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> + SOLAR UPDATE

Tad "So many journeys may the Sun and moon make us again count o'er,
ere love be done
<http://www.opensourceshakespeare.org/views/plays/playmenu.php?WorkID=hamlet>
"
Cook, K7RA, reports: Sunspots returned this week in the form of group
1072; the average daily sunspot number for May 20-26 was 16.3, and the
average daily solar flux rose nearly three points to 72.1. This was a
very quiet week for geomagnetic indicators, with the mid-latitude A
index at 0 on Sunday and Monday (May 23-24). The high latitude Alaska
college A index was 0; the K index was also 0 over all of both days,
actually extending from 1500 on May 22 through 0000 on May 25, a total
of 57 hours. The quiet will probably end, due to a coronal mass
ejection thrusting particles toward Earth. Australia's IPS Radio and
Space Services issued a warning of a minor geomagnetic storm at 2346 on
May 26. The prediction from NOAA/USAF calls for a planetary A index of
15, 22, 20, 22 and 12 from May 27 through the end of the month. In
addition to sunspot group 1072 -- which is currently fading and a few
days away from our Sun's western horizon -- a new spot appears to be
forming just above the center of the solar disk. You can see it on the
continuously updated (every few minutes) image from the STEREO
spacecrafts <http://stereo.gsfc.nasa.gov/>. On Wednesday evening, it
was right on the center 0 degree meridian, north of the solar equator.
By this Friday night, the STEREO image should cover about 89.5 percent
of the Sun's body. Look for more information on the ARRL Web site on
Friday, May 28. For more information concerning radio propagation,
visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" brought to you by William Shakespeare's Hamlet
<http://www.opensourceshakespeare.org/views/plays/playmenu.php?WorkID=hamlet>
(Act III, Scene 2
<http://www.opensourceshakespeare.org/views/plays/play_view.php?WorkID=hamlet
&Act=3&Scene=2&Scope=scene>).

==> + SILENT KEY: ROBERT BROWN PHD, NM7M (SK)

Bob Brown, NM7M, of Anacortes, Washington, passed away
<http://www.webfh.com/fh/obituaries/obituary.cfm?o_id=309624&fh_id=10428&ck=1
>
Sunday, May 23, from cardiac arrest. He was 87. Brown, the husband of
former ARRL Northwestern Division Director Mary Lou Brown, NM7N (SK),
was known worldwide for his contributions to the propagation studies on
160 meters. Brown wrote 12 articles for the ARRL from 1998-2001 that
appeared in QST, QEX and NCJ, most of them -- such as this December
1999 QST article <http://p1k.arrl.org/pubs_archive/97434> -- dealing
with propagation and contesting on the low bands. He also authored an
HF propagation tutorial that is available online
<http://www.astrosurf.com/luxorion/qsl-hf-tutorial-nm7m.htm>. Brown was
retired from the University of California where he was a physics
professor at the Space Sciences Lab (SSL
<http://www.ssl.berkeley.edu/>) in Berkeley; he also served as interim

dean of UC's graduate school. A memorial service is planned in Anacortes for Wednesday, May 26. A private burial service is planned for a later date.

==> THIS WEEK ON THE RADIO

This week, the CQWW WPX Contest (CW) is May 29-30. The Michigan QRP Memorial Day CW Sprint is May 30-31. Next week, the Ten-Ten International Open Season Contest and the Alabama QSO Party are June 5-6. The CWOps Mini-CWT Test is June 9-10. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1711 - May 28 2010

Please note that due to the amount of news covered that this is an extended newscast running 34 minutes and 19 seconds and contains 3 breaks at 9:55; 18:12 and 24:25.

Amateur Radio Newsline report number 1711 with a release date of Friday, May 28, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio heads to the planet Venus aboard UNITEC One but for the moment the signal has faded away. Also, the first ever U.S. license tests are held in India, the National Conference of Volunteer Examiner Coordinators withdraws several questions and lots more on Hamvention 2010. Enjoy being there with us on Amateur Radio Newsline(tm) report number 1711 comes your way right now.

HAM RADIO IN SPACE: PROBE CARRYING HAM TRANSPONDER ON ITS WAY TO VENUS

The UNITEC - 1 space probe is on its way to Venus and ham radio is along for the ride. But the ham radio transponder on board the spacecraft has not been heard from in several days. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

UNITEC-1 is a one of a kind experimental satellite that was developed by twenty educational institutions that are a part of Japan's University Space Engineering Consortium. This is the cooperative working on the development of so called nano-satellites for Japan.

What makes this mission is of particular interest to ham radio is that UNITEC-1 carries a 5 Gigahertz amateur radio beacon that signs the call JQ1ZUN and it has already been heard from space. On May 21st Japanese ground stations reported receiving both the CW and FSK beacons telemetry from the spacecraft when it was about 320,000 km from Earth. They report a measured beacon frequency of 5.839.91 Gigahertz which is very close to the previously published 5.840 Gigahertz planned frequency.

Then on Friday, May 21st at 1900 UTC, spacecraft controllers lost the signal from UNITEC-1. They could still hear the Planet-C and Ikaros telemetry transponders on 8.4 GHz but not the 5.84 GHz signal from UNITEC-1. Further attempts to re-acquire UNITEC-1 on subsequent days have

so far been unsuccessful.

UNITEC-1 controllers are encouraging hams world-wide to attempt to receive the spacecraft's amateur radio beacons and report back their observations. More information on this deep space project is available at the University Space Engineering Consortium website. Its in cyberspace at www.unisec.jp/unitec-1.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

The launch of UNITEC One took place on Thursday, May 20th from the Tanegashima Space Center in Japan. We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (UNITEC-1 Working Group)

**

HAM EXAMS: FIRST ARRL-VEC US LICENSE TESTS ADMINISTERED IN INDIA

The first-ever US amateur radio exams session in India were scheduled to be held May 24th in the city of Hyderabad under the auspices of an ARRL VEC team. The Technician, General and Amateur Extra were to have been administered during this session.

With growing interest by hams living outside the United States in holding a U-S license, the report from the Southgate news indicates that ARRL V-E-C test sessions are being conducted in Canada, Brazil, Germany, Japan, Mexico, Panama, Philippines, Italy, Trinidad and Tobago and other locations around the globe.

More information concerning US ham radio exams in India is on line at tinyurl.com/2g9njpa. (Southgate)

**

RADIO TESTING: NCVEC WITHDRAWS FOUR QUESTIONS FROM HAM TESTS

The Question Pool Committee of the National Conference of Volunteer Examiner Coordinators or NCVEC has announced the withdrawal of four questions. Two from the Technician class pool and two from the Extra class pool. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details on this action:

--

According to a May 25th bulletin released by the American Radio Relay League, the two Technician questions dealt with emergency communications and Section 97.113 of the FCC's rules governing amateur radio participation in emergency training drills. As most listeners already know, back in March the FCC released a Notice of Proposed Rule Making in W P Docket No 10-72, that proposes to amend Section 97.113 to provide that, under certain limited conditions, Amateur Radio operators may transmit messages during

emergency and disaster preparedness practice sessions. This, regardless of whether the operators are employees of entities participating in the drill.

The bulletin notes that the National Conference of Volunteer Examiner Coordinators believes that adoption of the NPRM appears more likely than not. This the NCVEC says will make the two questions dealing with the subject invalid. Therefore group feels it is best to withdraw the questions now to avoid the possible inclusion of invalid information in training material now being prepared

As to the two deleted Extra class exam questions. They dealt with third party restrictions as defined in 97.109(e) of the rules. The FCC has since deleted this rule, so the information is no longer applicable to the Amateur Service.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The four questions not to be used after June 30th are T2C02 and T2C03 from the July 2010 Technician Pool and questions E1C04 and E1C05 from the July 2008 Extra Pool. The ARRL Bulletin notes that Volunteer Examiner Coordinators and Volunteer Examiners must take action to remove these questions from use in exams given after July 1st. (ARRL, NCVEC)

**

RADIO RULES: FCC DENIES PETITION FOR RECONSIDERATION ON CALLSIGN ID TIMES

The FCC has denied a Petition for Reconsideration filed by Glen Zook, K9STH, that asked for changes in Part 97. This in regard to how often United States hams must identify themselves on the air.

The May 18th action follows the Commission's denial of Zook's April 2009 Petition for Rulemaking. At that time K9STH asked the Commission amend Section 97.119(a) to change how often amateur stations must identify themselves. Zook specifically asked that the FCC require that an amateur station transmit its call sign during the first transmission of any communication or series of transmissions, and to allow an amateur station to not transmit its call sign at the end of a communication when the communication or series of transmissions lasts less than three minutes.

In denying his reconsideration request the FCC stated that Zook's petition did not demonstrate that the current station identification rule is inadequate. Nor did he prove that revising the station identification requirement as requested would address the concern that many amateur radio operators do not identify their station in a timely manner or at all.

The FCC also noted that in response to Zook's 2006 petition, that many who commented believed that the current station identification rule properly balances the burden of requiring the station to transmit its call sign with the convenience of those receiving the transmissions to determine the identity of the station making the transmission. (FCC)

**

RADIO LAW: TWO LEGISLATORS TO LEAD REVIEW OF COMMUNICATIONS ACT

Two legislators have said that they would begin a process to modernize telecommunications laws that were last overhauled in 1996 with more of an emphasis on the Internet. In a joint statement on Monday, May 24th, Senator John D. Rockefeller of West Virginia and Representative Henry A. Waxman of California said that they will hold meetings in June to examine how the Communications Act meets the current needs of consumers, the telecommunications industry and the Federal Communications Commission.

The issue came into focus in April after a federal appeals court ruled that the FCC. had overstepped its authority in applying a portion of the Communications Act to an Internet service provider in a case dealing with so called Net Neutrality. Net Neutrality is the concept that Internet Service Providers must afford consumers with equal access to all types of content and applications.

In response, the FCC announced a plan to reclassify broadband Internet service, which is now lightly regulated as an information service. Under the change, it would become a telecommunications service and would come under tighter scrutiny by the agency. This reclassification would give the FCC the authority to implement portions of its recently released National Broadband Plan, as well as to enforce Net Neutrality,

No matter what the outcome of the Rockefeller and Waxman hearings, do not look for any changes to the Communications Act to happen ant time soon. It took more than five years to produce the 1996 rewrite. Thin in itself was the first major change of overall United States telecommunications law since the Communications Act became law way back in 1934.

For those not aware, Senator John D. Rockefeller IV is the Chairman of the Senate Commerce, Science and Transportation Committee. Representative Henry A. Waxman is the Chairman of the House Committee on Energy and Commerce. (Published News Reports)

ENFORCEMENT: FCC DENIES REQUEST FOR RECONSIDERATION OF LICENSE REVOCATION

The FCC has denied a request from Lonnie Keeney, the ex- KB9RFO in which he asked the regulatory agency for reconsideration of the Order of Revocation issued to him on February 25, 2009. The FCC says that Revocation Order was based on a determination by the FCC that Keeney lacks the requisite

character qualifications to be and remain a Commission licensee based on a prior felony conviction for child molestation.

In his Reconsideration Request Keeney asked that he be permitted to keep his amateur radio license. In support of his position he stated that he has no money to defend himself at a hearing, that his license is important to him and that he previously used his amateur station to provide services to his community. He also stated that he participates as a volunteer in a jail ministry and that he is trying to rebuild his reputation in the face of a lifelong requirement to register as a sex offender.

But in its denial, the FCC says that Keeney has provided no newly discovered facts or information that would, in the public interest, warrant reconsideration of the Order of Revocation. It says that the information Keeney presents in his Petition for Reconsideration is of the kind that was already presented to the Administrative Law Judge and described in the Revocation Order. The FCC also notes that even assuming, that Keeney did present a basis for reversing the Order of Revocation, that the relief to which he would be entitled would be a new hearing proceeding on his qualifications, not, as he seeks, authority to keep his amateur radio license.

Finally, the FCC concludes that based on the information before it that Keeney has failed to establish a basis for reconsideration of the Order of Revocation. Furthermore, the relief he seeks under the circumstances presented is inconsistent with the Commission's procedural rules. As such the FCC says that the Petition for Reconsideration filed by Lonnie Keeney on March 17, 2009, is denied.

You can read the entire decision in this matter on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-916A1.doc or http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-916A1.pdf (FCC)

RESCUE RADIO: NZ ARES ASSISTS IN SEARCH FOR MISSING HUNTERS

Members of the New Zealand Amateur Radio Emergency Corps provided communications during a search for two hunters lost in the bush. The New Zealand Stuff website reports that the two hunters went missing in a rugged mountain range, triggering an all out search to find them.

Involved in the hunt were local police along with search and rescue volunteers from area hiking and hunting clubs. Members of the New Zealand Amateur Radio Emergency Corps provided communications.

Senior Sergeant Luke Shadbolt, of Hastings, said the men were found on a near-by road after what the hunters suffered an uncomfortable night in the bush. The full story is on-line at tinyurl.com/25exrz6.

D-STAR NEWS: D-STAR AUDIO STREAM NOW ON THE WWW

KF4ZW says that anyone can now listen to D-Star ham radio contacts without purchasing any equipment for the mode. This, as a D-Star audio feed is now available via the radioreference.com website. Here's a sample of just how good it sounds:

--

D-Star Audio: Hear it in the MP3 version of this weeks newscast downloadable at www.arnewslineorg.

--

The audio usually originates from Reflector 1c which is generally the busiest feed. A direct link is in this weeks printed Newsline report. After you find the correct radioreference page just scroll to the bottom, look for the D-Star link and click on the "speaker" icon to start listening.

KF4ZW adds that you can also listen to any of these feeds via your iphone or blackberry as long as you have the unlimited data plan. The direct link is: www.radioreference.com/apps/audio/?ctid21 (KF4ZW, D-Star Reflector)

NAMES IN THE NEWS: G6UIM JOINS PARIS NEAR SPACE PROJECT

Some names in the news. From the U-K comes word that Steve Daniels, G6UIM, has joined the Paper Aircraft Released Into Space or PARIS project. The PARIS Project plan is for a paper aircraft named Vulture 1 to be released this summer from a weather balloon that will carry it to over 30 km in altitude.

G6UIM, who built his first computer in 1979, has been working on the main payload radio beacon as well as the Vulture 1 GPS board. Plans call for Yaesu FT-817 to be used to receive the signal. (Southgate)

**

NAMES IN THE NEWS: SWODXA NAMES DXPEDITION HONOREES

The Southwest Ohio DX Association has announced this years "DXpedition of the Year" and a "Special or DXpeditioner of the Year" awards. The 2010 DXpedition of the Year award went to the K4M Midway Atoll operation while this years Special Award was presented to the TX3A Chesterfield Island team. The presentations were made at the recent 2010 DX Banquet held in conjunction with the Hamvention in Dayton, Ohio. (SWODXA)

**

HAMVENTION 2010: THE FUTURE OF DIGITAL RADIO

Software Defined Radio was one of the big highlights at the recently concluded Dayton Hamvention, and we are not just talking about gear on the exhibit floor. The fact is that SDR as it has come to be called was a high priority with a good number of those attending the technical sessions as we hear from Amateur Radio Newsline's Mark Abramowicz, NT3V:

--

When it comes to being on the ground floor of digital communications, few do it better than the Tuscon Amateur Packet Radio group.

Scotty Cowling ,WA2DFI, is TAPR's vice president, and working to promote the next best thing in amateur radio high performance software defined radio.

Cowling says while many people still think of TAPR as a packet organization because of the name, it has come a long way from where it once stood in the 1980s. Now, Cowling says, the group's aim is to promote research and development to advance the state of the art of digital communications.

"Packet, I mean, it's still there obviously but I've seen it evolve from a novelty like keyboard clicking back and forth to backbones across the country, to it basically as a foundation for APRS, which is another thing that I really got into," explains Cowling.

"It's useful for that. But I see the future of digital radio as moving on."

"I mean digital radio is the future rather than packet radio. And, not to belittle packet radio but I mean we're for advancing the state of the art and software defined radio is a big part of that."

What is software defined radio? Cowling says it's where the actual mode selection-demodulation is done in software, not in hardware. He points out that it's different from a software controlled radio which is a conventional radio that might have some digital signal processing in it but is sent commands to do various operations switch bands switch modes, and switch filters. Essentially, Cowling says, the operation of the radio and capability of adapting to new modes is tremendous because the new modes are defined in software.

"So you can take the same old hardware you paid your good money five years ago and now, when they come out with PSK-32 it's just a software update," says Cowling. And then you don't have to worry about, well, where am I going to get the next $2,000 to buy a new radio."

And, Cowling acknowledges, the next generation of HPSDR may not be for everyone.

"Some people just can't deal with no knobs," says Cowlings. "But I think if you use it you will find that it will grow on you and it will grow on you and you will adapt to it just like you adapted to using your FT1000 over your, you know, 940."

But, he says, a lot of people are out there playing around with Software-Defined Radios and they're excited about the future.

"Some of the people are contesters who want absolute high performance," Cowling says.

"Most of the people that TAPR deals with are experimenter-types. Software guys, hardware guys, guys that are excited about something new in ham radio

that maybe they haven't seen anything new for years."

"Its kind of where I'm coming from, it's something that's exciting now where there hasn't been a lot other than the same old, same old for a long time."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the Dayton Hamvention.

--

Mark will be back next week with another look at a specialty interest that was big at Hamvention 2010. A facet of the hobby that uses small radios and low power to communicate world wide. (ARNewsline(tm), NT3V)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAMVENTION 2010: THE HAM RADIO TOWN MEETING

Still with Hamvention 2010, this year Amateur Radio Newsline devoted its two hour Ham Radio Town Meeting to something that might best be described as only peripheral to the hobby but important to everyone's day to day existence. With the economy only barely showing any signs of recovery and unemployment at near record levels, we thought it might be a good idea to try to help those hams in need of employment to do so by using their experience as licensed radio amateurs. The session title was " Amateur Radio As A Way To Find Or Keep A Job In Todays Shrinking Job Market" and while our speakers could not provide all the answers, but some like Bob Sherman, K2SJP, were able to share stories of the way in which being a ham as a teen did lead to a lifelong career:

--

K2SJP: "It helped me to pick up my trade in aircraft electronics. I went for an interview with Pan American World Airways at Kennedy Airport and I was a graduate of RCA Institute in New York City and had gone to George Westinghouse Radio and Television High School in Brooklyn, but they didn't seem to care about that to much.

"But when I listed my ham radio license, the girl that was interviewing me peaked up and said: '..you're a ham radio operator?'

"I said yes, I've been a ham radio operator for several years now.

"And she says: 'we need you.'

"And I spent 25 years with Pan American World Airways right to the day of its demise. And, I was actually in the top 7% of seniority in Avionics and stayed on with them after their demise for several months where we collected the aircraft from all over the world, brought them back to Miami and JFK (in New York City) and I performed final Avionics service on them before they were put up for sale."

--

After Pan Am folded Bob's ham license got him a position at Tower Air and later at Federal Express from which he recently retired.

Another speaker tackled the emerging interest by teens and early adults in electronic careers. Her name is Diana Eng, her call is KC2UHB, and she has a multi faceted professional life as a Fashion Designer of Electronic Integrated Clothing. In addition, Eng is a former Project Runway contestant. She also produces and hosts on-line videos explaining the various aspects of electronics and communications and is a writer for Make Magazine. Diana talked about the emerging interest in ham radio and how it might lead to niche careers:

--

KC2UHB: "The way that I got into all of this was because right now there is a huge revival in hobbyist electronics. A lot of young people are really getting into this as well as people in their teens, 20's and 30's and they are forming things called Hacker Groups. These are not evil hackers who do mean things to your computer. This is a different type of hacker. These are people who like to play with electronics and try to see if they can do something new with it.

"So this is my hacker group over here (pointing to photo on screen). Its called NYC Resistor and I am one of the co-founders of it. Right now we have about 30 members and are based in Brooklyn (New York).

--

Other speakers included Steve Mendelsohn, W2ML, of the ABC Television Network, Rich Moseson, W2VU who is the editor of CQ Magazine, Martin Jue, K5FLU the founder of MFJ Enterprizes, Allen Pitts, W1AGP who is Public Relations Director for the ARRL and ham radio's own "Mr. Audio" Bob Heil, K9EID, of Heil Sound Limited. Each had his or her own ham radio business success story to tell and you can hear the entire session by downloading the MP3 file at our website at www.arnewsline.org. Just scroll down until you see the words "Click here to download the entire 120 Minute 2010 Hamvention Town Meeting," settle back and we hope that what you hear is of some help to those who are seeking a job or trying to keep the one that they now have.

And less we forget, our thanks to Hap Holly, KC9RP, and the Radio Amateur Information Network for recording this years Town Meeting, to our on-site Producer Don Wilbanks, AE5DW, and our Prize Coordinator Cathy Anno,

KB0FDU. And a special thank you to Heil Sound and CQ Magazine who generously provided this years major door prizes. (ARNewsline(tm))

WITH NEWSLINE: PROBLEMS ON THE 296-2407 DIAL UP LINE

If you tried to access Newsline by telephone last week you likely found that the machine supplying the audio dropped out after only a few minutes. This made it impossible to get the entire newscast by telephone until late Tuesday the 25th. That's when we were finally able to get the unit feeding the phone line back up to speed. At least for the time being.

Well what happened is that the machine used to feed the telephone line is more than 20 years old and is frankly on its last legs. A quick call to Panasonic has confirmed that there are no longer any parts available.

Luckily we had one that we have been cannibalizing for parts. That said, once the unit now on line finally fails for good, there will be nothing that we can afford to buy to replace it.

Therefore we urge anyone who still uses the 661-296-2407 dial in line to begin thinking about switching to downloading the MP3 audio file from our website at www.arnewsline.org. Once the Panasonic machine goes to the electronic dumping ground, the 2407 line will be disconnected and all telephone feed service will end. We cannot tell you when that will be, but from the looks of the machine it could happen at anytime in the not to distant future. (ARNewsline(tm))

RADIO HONORS: WIRELESS INSTITUTE OF AUSTRALIA TURNS 100 IN YEAR LONG CELEBRATION

The Worlds oldest national ham radio society has turned 100 and there is a big celebration going on down-under. Of coarse we are talking about the Wireless Institute of Australia. Graham Kemp, VK4BB, is the voice of the WIA News and is here to tell us about the year long festivities that are taking place:

--

For the full year being January through December 2010 and with the help of it's members, the WIA is celebrating the Centenary of organized Amateur

Radio in Australia. The year long celebration, with the center point this weekends 100th WIA Annual General Meeting in the nations capital is in recognition of the foundation of the WIA and the very start of organized amateur radio in Australia during 1910.

11 March, 1910 a meeting of like-minded people in the Hotel Australia, Martin Place, Sydney, formed the Institute of Wireless Telegraphy of Australia, and soon after dropped the word 'telegraphy' from its name. Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit."

A range of initiatives and activities happening in 2010 provide an opportunity for every VK/AX radio amateur to be involved in what is already a memorable celebration.

Special event callsign VK100WIA is very popular.

The WIA annual general meeting and activities program in Canberra this weekend is in full swing!

Astronaut Tracy Caldwell-Dyson, KF5DBF, will be talking from space to this WIA Centenary Dinner in Canberra. As the ISS Expedition 23 Flight Engineer, Tracy is set to give a brief speech to the WIA Centenary Dinner on Saturday May the 29th before answering questions from up to ten students from Canberra's Trinity Christian School.

The weekly Sunday morning VK1WIA broadcast hosted by yours truly Graham, VK4BB, will be transmitted live from an outside broadcast studio set up in a Canberra park. The broadcast will be aired live at 8:00am and simultaneously recorded, with the mp3 recording uploaded to the WIA website at the conclusion of the broadcast for re-broadcasters around the world to download.

Public displays of amateur radio are being mounted in local Canberra venues with the assistance of the Canberra Region Amateur Radio Club. A chance to demonstrate the hobby of amateur radio to the people of Canberra, show how the skills learnt can be valuable for education, public service and communication
in times of emergency. An exercise in amateur radio public relations where the community can see and experience the fun and public service capability that their "radio amateur" neighbors bring to the community.

All in all a great weekend, a great year, 2010 the year the Wireless Institute of Australia turns 100.

I'm Graham Kemp, VK4BB, and you are listening to the Amateur Radio Newsline.

--

You can learn more about the 100th anniversary celebration of the Wireless Institute of Australia on line at www.wia.org.au. (WIA News, VK4BB)

RADIO HONORS: SARL CELEBRATES 85th YEAR AS SOUTH AFRICAN NATIONAL SOCIETY

The South African Radio League has celebrated its 85th anniversary. The society was founded on Wednesday 20 May 1925, a group of radio amateurs got together in the city of Cape Town to form a national organization .

Dennis Green, ZS4BS, is the current President of the South African Radio League. In his celebratory message, Green said -- and we quote -- "As we look to the future, we are faced with some challenges to the organization and to the hobby. I think the recruitment of members is important, not only the young people, but also those more settled." -- end quote.

Green went on to say that even though technologies change very rapidly and we as radio amateurs must stay abreast of development, we must be part of that development, we must take the lead. Green adds that ham radio has so many facets and that there are some many things radio amateurs can get involved in, that only the sky is the limit. (SARL)

RADIO FROM SPACE: COMET CRASH INTO SUN OBSERVED BY STEREO

Solar physicists at the University of California at Berkeley have captured for the first time the collision of a comet with the sun.

Using data radioed back to Earth from instruments aboard NASA's twin STEREO spacecraft, the four researchers at UC Berkeley's Space Sciences Laboratory were able to track the comet as it approached the sun and estimate an approximate time and place of impact. They then looked at data from the terrestrial Mauna Loa Solar Observatory in Hawaii, and found images in the predicted spot of what appears to be a comet approaching the edge of the sun from behind the solar disk. While the comet apparently survived the heat of the corona and disappeared in the chromosphere, evaporating in the 100,000-degree Kelvin heat.

The Solar Terrestrial Relations Observatory or STEREO was launched in 2006 and consists of identical spacecraft orbiting the sun. One is in orbit ahead of Earth and one behind. This provides a human eye-like stereo view of the sun. You can read more at tinyurl.com/28er687 (Science Daily)

**

THE CONTEST CORNER: CQWW WPX CW CONTESR MAY 29 - 30

In contesting news, a reminder that the CQWW WPX CW Contest takes place between May 29 and 30 between 0000 and 2359UTC. This is an HF contest only that uses the 160 through 10 meter bands and requires an exchange of signal report and serial number. More information on it is on line at www.cq-amateur-radio.com. (CQ)

**

DX

In DX, we start this week on the VHF bands. This with word that on Friday May 14th the 50MHz band was open from Great Britain to Bahrain. This

resulted in a 5270 kilometer contact being made between RSGB VHF Manager David Butler, G4ASR and A92IO. But it did not end there. On Monday May 17th G4ASR contacted stations in Greece on the 2 meter band. SSB contacts were made via Sporadic-E propagation to SV2JL at 2300 kilometers and SW6KRV at 2286 kilometers. A few minutes earlier G4ASR had SSB contacts on 4 meter with SV1DH at 2590 kilometers and SV2DCD at 2253 kilometers.

Turning to the High Frequency bands, news that a multi-national team of up to 30 operators from nine countries is in advanced preparation operate from Spratly Island group in the South China Sea. Following 12 months of discussions with military and civilian authorities permission has been received to operate on Thitu Island. The DXpedition, organized by the South Pacific Contest Club, will run from January 6th to the 24th 2011. More on this operation is on-line at www.dx0dx.net.

ZL4DB is going to Macquarie Island on a 3 month job assignment. He hopes to operate portable VK0 on SSB only when time permits from late May until mid-August. He is not an experienced DXer and, according to his QSL manager, ham radio activity will be minimal. QSL via ZL4PW, direct or via the bureau.

W6NWS will be in Vietnam until June 9th and expects to be active as XV2W when time permits. QSL via home call, direct or bureau and Logbook of The World.

Members of the Tifariti Gang are heading to the middle-East area of Palestine. Look for E4X to be active through June 6th. At airtime no QSL route is available for this one.

Lastly, the Ukrainian DX'peditioners Team has a new project called Pacific Odyssey 2010. They plan to be active as T31X from Central Kiribati through June 1st and Tokelau as ZK3X from June 2nd to 6th. T31 is ranked most needed number 7 in Europe, number 19 worldwide. Tokelau is number 29 in Europe and number 35 worldwide. QSL as directed on the air.

(Above from various DX news sources)

THAT FINAL ITEM: AMATEUR RADIO ASTRONOMERS FIND SUPER SECRET SPACE PLANE

And finally this week, a group of amateur radio-astronomers have accomplished what the military was likely hoping would not happen. They have spotted the super-secret U.S. Air Force X-37B mini space plane on-orbit. Amateur Radio Newsline's Frank Haas, KB4T, has the rest of the story:

--

The un-piloted X-37B Orbital Test Vehicle 1 was lofted on April 22 atop an Atlas launcher. It is being flown under the auspices of the U.S. Air Force Rapid Capabilities Office. From there it entered a proverbial cone of silence regarding its on-orbit duties. But thanks to a worldwide network of amateurs sky watchers, the spacecraft is reportedly in a 39.99 degrees

inclination, circling the Earth in an orbit 401 kilometers by 422 kilometers.

Greg Roberts of Cape Town, South Africa, a pioneer in using telescopic video cameras to track spacecraft, chalking up exceptional results over the years. He says that this data may change slightly as the spaceships orbit is better refined. Roberts adds that those sighting the craft have absolute confidence in their observations, claiming no chance of error or of it being any other type of orbital item such as a satellite.

Roberts says that the next phase in the amateur astronomers tracking of the X-37B will be an attempt to see if the space plane is emitting any radio signals on the frequency bands that he is able to monitor. He says that will be an even bigger challenge than that of locating the space plane itself because without any data as to emission type or frequencies on which it may be operating it will be like looking for a proverbial needle in a haystack.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

The Air Force has not said what the robotic ship is for, but analysts say the X-37B is but most guess that it is likely a high altitude spy craft. (Science OnLine, Yahoo News)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita
California, 91350

A quick reminder that the nominating period for the 2010 Young Ham of the Year Award closes at midnight on Sunday, May 30th. Any nomination form postmarked after that date or received electronically after the midnight hour on May 30th will not be considered in this years judging. Full instructions and a nominating form are on our website at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

> ENFORCEMENT: ?FCC DENIES REQUEST FOR RECONSIDERATION OF LICENSE REVOCATION
>
> The FCC has denied a request from Lonnie Keeney, the ex- KB9RFO in which he
> asked the regulatory agency for reconsideration of the Order of Revocation
> issued to him on February 25, 2009. ?The FCC says that Revocation Order was
> based on a determination by the FCC that Keeney lacks the requisite
> character qualifications to be and remain a Commission licensee based on a
> prior felony conviction for child molestation.
>
> In his Reconsideration Request Keeney asked that he be permitted to keep
> his amateur radio license. ?In support of his position he stated that he
> has no money to defend himself at a hearing, that his license is important
> to him and ?that he previously used his amateur station to provide services
> to his community. ?He also stated that he participates as a volunteer in a
> jail ministry and that he is trying to rebuild his reputation in the face
> of a lifelong requirement to register as a sex offender.
>
> But in its denial, the FCC says that Keeney has provided no newly
> discovered facts or information that would, in the public interest, warrant
> reconsideration of the Order of Revocation. ?It says that the information
> Keeney presents in his Petition for Reconsideration is of the kind that was
> already presented to the Administrative Law Judge and described in the
> Revocation Order. ?The FCC also notes that even assuming, that Keeney did
> present a basis for reversing the Order of Revocation, that the relief to
> which he would be entitled would be a new hearing proceeding on his
> qualifications, not, as he seeks, authority to keep his amateur radio
> license.
>
> Finally, the FCC concludes that based on the information before it that
> Keeney has failed to establish a basis for reconsideration of the Order of
> Revocation. ? Furthermore, the relief he seeks under the circumstances
> presented is inconsistent with the Commission's procedural rules. ?As such

> the FCC says that the Petition for Reconsideration filed by Lonnie Keeney
> on March 17, 2009, is denied.

> HAMVENTION 2010: THE FUTURE OF DIGITAL RADIO
>
> Software Defined Radio was one of the big highlights at the recently
> concluded Dayton Hamvention, and we are not just talking about gear on the
> exhibit floor. The fact is that SDR as it has come to be called was a high
> priority with a good number of those attending the technical sessions as we
> hear from Amateur Radio Newsline's Mark Abramowicz, NT3V:
>
> --
>
> When it comes to being on the ground floor of digital communications, few
> do it better than the Tuscon Amateur Packet Radio group.
>
> Scotty Cowling ,WA2DFI, is TAPR's vice president, and working to promote
> the next best thing in amateur radio high performance software defined
> radio.
>
> Cowling says while many people still think of TAPR as a packet organization
> because of the name, it has come a long way from where it once stood in the
> 1980s. Now, Cowling says, the group's aim is to promote research and
> development to advance the state of the art of digital communications.
>

> "Packet, I mean, it's still there obviously but I've seen it evolve from a
> novelty like keyboard clicking back and forth to backbones across the
> country, to it basically as a foundation for APRS, which is another thing
> that I really got into," explains Cowling.
>
> "It's useful for that. But I see the future of digital radio as moving on."
>
> "I mean digital radio is the future rather than packet radio. And, not to
> belittle packet radio but I mean we're for advancing the state of the art
> and software defined radio is a big part of that."
>
> What is software defined radio? Cowling says it's where the actual mode
> selection-demodulation is done in software, not in hardware. He points out
> that it's different from a software controlled radio which is a
> conventional radio that might have some digital signal processing in it but
> is sent commands to do various operations ?switch bands switch modes, and
> switch filters. Essentially, Cowling says, the operation of the radio and
> capability of adapting to new modes is tremendous because the new modes are
> defined in software.
>
> "So you can take the same old hardware you paid your good money five years
> ago and now, when they come out with PSK-32 it's just a software update,"
> says Cowling. And then you don't have to worry about, well, where am I
> going to get the next $2,000 to buy a new radio."
>
> And, Cowling acknowledges, the next generation of HPSDR may not be for
> everyone.
>
> "Some people just can't deal with no knobs," says Cowlings. "But I think if
> you use it you will find that it will grow on you and it will grow on you
> and you will adapt to it just like you adapted to using your FT1000 over
> your, you know, 940."
>
> But, he says, a lot of people are out there playing around with
> Software-Defined Radios and they're excited about the future.
>
> "Some of the people are contesters who want absolute high
> performance," ?Cowling says.
>
> "Most of the people that TAPR deals with are experimenter-types. Software
> guys, hardware guys, guys that are excited about something new in ham radio
> that maybe they haven't seen anything new for years."
>
> "Its kind of where I'm coming from, it's something that's exciting now
> where there hasn't been a lot other than the same old, same old for a long
> time."
>

I felched them from the Flonk, tholen@antispam.ham. The other groups just came along for the ride. HTH

> 5> hence the relevance of the articles felched from the OS/2 group,
>
> Once again, your reading comprehension problem is getting in
> the way, Checkmate. I didn't ask about the relevance to OS/2

> felching to OS/2.

What is the relevance of each of the groups that the article I felched was posted to, to the other groups from which the article that I felched was posted to, tholen@antispam.ham? It seems to be a rather eclectic mix of groups to begin with. Here's an idea: You could maybe set follow-ups to some totally different group... say, alt.test, for example. That might solve your perceived problem.

> 5> and my replies to said articles, tholen@antispam.ham.
>
> Classic illogic; you think that just because you felched
> articles from an OS/2 newsgroup, your replies to said
> articles are automatically relevant to OS/2, Checkmate?

A classically erroneous presumption on your part. Apparently, you presumed that anything that I might ever post should be totally relevant to every group in which that post appears. As stated previously, the group mix was rather eclectic. There was bound to be some irrelevance associated with some of those groups however, I can assure you that everything was totally relevant with respect to the Flonk. Work with me here.

> 5> What *doesn't* my question have to do with OS/2,

> Checkmate?

How does your spelling lame contribute to solving the problem that you perceive exists with respect to my replies to articles felched from my server, and how do you feel about clam chowder, tholen@antispam.ham? Before answering, you might want to bone up on the history of clam chowder at:
http://whatscookingamerica.net/History/ChowderHistory.htm
Did you know there were that many types of clam chowder? Neither did I! Uh-oh, that may have been a classic erroneous assumption on my part... you may very well know your clams and chowders. I've taken the liberty of adding a clam group in the hopes of generating yet another stimulating conversation for us to discuss.

6> Felching article from server...

What does your felching have to do with OS/2, Checkmate?

6> You didn't g00gle it, did you?

What does your question have to do with OS/2, Checkmate?

6> By the way, did you know the word "gullible" is
6> not in the dictionary?

What does your question have to do with OS/2, Checkmate?

6> It has to do with the articles in the OS/2 group that were felched
from the
6> server, tholen@antispam.ham.

On the contrary, it has to do with you posting in an OS/2 newsgroup
that you felched the articles from some server, Checkmate. What
does the method by which you obtain articles have to do with OS/2,
Checkmate? That the articles are supposedly about OS/2 is irrelevant
to the matter of why you find a need to talk about the method you
used, Checkmate.

6> I'm sorry that you're having difficulty understanding this.

What does your classic erroneous presupposition have to do
with OS/2, Checkmate? Rather ironic, coming from the person
who is having difficulty not only understanding the question,
but answering it as well.

6> I felched them from the Flonk, tholen@antispam.ham.

Classic contradiction. The statement of yours in question is:

"Felching article from server..."
--Checkmate

Notice how it says nothing about the Flonk, Checkmate.

6> The other groups just came along for the ride. HTH

Obviously not, given how follow-ups were redirected to a more
appropriate newsgroup for you, Checkmate.

6> What is the relevance of each of the groups that the article I
felched was
6> posted to, to the other groups from which the article that I
felched was posted
6> to, tholen@antispam.ham?

What does your question have to do with OS/2, Checkmate?

6> It seems to be a rather eclectic mix of groups to begin with.

What seems to you is irrelevant, Checkmate.

6> Here's an idea: You could maybe set follow-ups to some totally
6> different group... say, alt.test, for example.

Still suffering from reading comprehension problems, Checkmate?

6> That might solve your perceived problem.

Obviously not, Checkmate. You're still here.

6> A classically erroneous presumption on your part.

A classic unsubstantiated and erroneous claim on your part, Checkmate.

6> Apparently, you presumed
6> that anything that I might ever post should be totally relevant to
every group
6> in which that post appears.

Shall I presume that you're a troll who likes to post irrelevant
things to newsgroups, Checkmate?

6> As stated previously, the group mix was rather eclectic.

As stated previously, what seems to you is irrelevant, Checkmate.

6> There was bound to be some irrelevance associated with some of
those
6> groups however, I can assure you that everything was totally
relevant with
6> respect to the Flonk. Work with me here.

Irrelevant, given that I didn't ask you about the relevance of
your posting to the Flonk, Checkmate. Rather, I asked you about
the relevance of your posting to OS/2, which you would know by
now if you had better reading comprehension skills, Checkmate.

6> Why do you continue to dodge the issues of your penis envy, latent
6> homosexuality, and hemorrhoidal discomfort, tholen@antispam.ham?

What do your classic erroneous presuppositions have to do
with OS/2, Checkmate?

6> How does your spelling lame contribute to solving the problem that
you perceive
6> exists with respect to my replies to articles felched from my
server, and how
6> do you feel about clam chowder, tholen@antispam.ham?

What does your question have to do with OS/2, Checkmate?

6> Before answering, you
6> might want to bone up on the history of clam chowder at:

What does your URL have to do with OS/2, Checkmate?

6> Did you know there were that many types of clam chowder?

What does your question have to do with OS/2, Checkmate?

6> Neither did I!

What does your ignorance have to do with OS/2, Checkmate?

6> Uh-oh, that may have been a classic erroneous assumption on my
part... you may
6> very well know your clams and chowders. I've taken the liberty of
adding a
6> clam group in the hopes of generating yet another stimulating
conversation for
6> us to discuss.

Further evidence that you're a troll, Checkmate.

You don't care about music anymore?

Anyway, doesn't change my point that using the same server does not have
any relevance to my ability to check with somebody.

Several of us have been clicking on the new "report as spam" link on
Google Groups, but Google mostly doesn't care about the trash they
inject into Usenet. It's much better for a bot to cancel Mark's crap,
deleting it from most news servers other than Google's.

I hope it continues indefinitely. Usenet will be better off without
that disturbed spammer's crap.

1487. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2010-06-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1275372001@panix.com>
Source record: 241656
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

If you had a REAL news server, you could look in control.cancel and see all of the cancel messages the Exterminator bot is sending out to cancel your inane spew. Technically, you are guilty of excessive multiposting with a BI in excess of 10.

In real life you're guilty of being a LID. You are no ham.

==> + 2010 ATLANTIC HURRICANE SEASON BEGINS THIS WEEK

The Atlantic hurricane season could be the busiest since 2005, when
Katrina and Rita caused massive destruction along the same part of the
Gulf Coast now struggling with the largest offshore oil spill in US
history, government scientists with the National Oceanic and
Atmospheric Administration (NOAA) said last week. According to NOAA's
predictions, the 2010 season may spawn as many as 23 named tropical
storms, including up to seven major hurricanes. The Atlantic hurricane
season began Tuesday, June 1 and runs through November 30.

"This year's hurricane season is forecasted to be a busy one, with a
strong chance of a major hurricane making landfall in the US," said
ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC. "I
would encourage all amateurs in hurricane-prone areas to take part in
```

any planning, drills or exercises, have your go-kits in order, review your local plans, make sure your home and family are safe and be ready if called upon. We here at ARRL Headquarters are already making plans to assist amateurs in the field if and when needed this season." Read more here <http://www.arrl.org/news/2010-atlantic-hurricane-season-begins-today>.

==> + ON THE AIR: JOIN THE FUN ON VHF IN THE ARRL VHF QSO PARTY

Lots of RF will be generated on 6 meters and up the weekend of June 12-13 during the 2010 ARRL VHF QSO Party <http://www.arrl.org/june-vhf-qso-party>. While many amateurs think of the VHF+ bands as a "local" band for public service, emergency communications or even a bit of fun on FM repeaters, weak-signal VHF+ enthusiasts know better. Even with a modest station, it's possible to work hundreds, or even thousands of miles, on the VHF bands during a good opening.

ARRL Contest Branch Manager Sean Kutzko, KX9X, is a big VHF enthusiast himself. "In more than 25 years of Amateur Radio, weak-signal work on 6 and 2 meters remains the most fun and intriguing activity I do. There is nothing like a good VHF opening; with interesting propagation characteristics like Sporadic-E, tropospheric ducting, aurora and even meteor scatter and moonbounce, VHF offers QSO opportunities that HF can never satisfy." The ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party> runs from 1800 UTC Saturday, June 12 through 0300 UTC Monday, June 14 (Saturday afternoon to Sunday evening for most of the US and Canada). Complete rules and entry forms may be found on the ARRL Web site. Read more here <http://www.arrl.org/news/join-the-fun-on-vhf-in-the-arrl-vhf-qso-party>.

==> + AMATEUR RADIO IN SPACE: AUSTRALIA STUDENTS CELEBRATE WIA CENTENARY WITH ARISS QSO

Students from the Trinity Christian School at Wanniassa in the Australian Capital Territory made history on May 29 with the first Amateur Radio on the International Space Station (ARISS) contact to be held in Canberra. The event was part of the Wireless Institute of Australia (WIA) Centenary Dinner on May 29. More than 200 people attended the event, including international guests IARU President Tim Ellam, VE6SH/G4HUA, and ARRL International Vice President Jay Bellows, K0QB, as well as prominent Australians such as IARU Region 3 Chairman Michael Owen, VK3KI, Australian Communications and Media Authority Chairman Chris Chapman and WIA Centenary Patron Dick Smith, VK2DIK. The principal of Trinity Christian School is Carl Palmer, VK2TP/VK1TP. Read more here <http://www.arrl.org/news/australia-students-celebrate-wia-centenary-with-ariss-qso>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including bringing the ever-popular ARRL EXPO to the 2010 Dayton Hamvention®, awarding college scholarships, releasing new books, holding Section Manager elections and more. This installment covers the month of May. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-22>.

==> + TEXAS GROUP TO HOST INTERNATIONAL EARTH-MOON-EARTH CONFERENCE IN AUGUST

The North Texas Microwave Society (NTMS <http://www.ntms.org/>) will host the 14th International EME Conference <http://www.ntms.org/eme/> in Dallas, Texas on August 12-14. This is the first time the conference has been held in the US since 2004. Whether you are an experienced EMEer or new to EME, the conference will offer a wide range of technical, social and sight-seeing activities. Gerald Youngblood, K5SDR, President and Chief Executive Officer of FlexRadio, will be the lunchtime speaker on Friday, August 13; Nobel laureate Joe Taylor, K1JT, will speak about April's 432 MHz EME event at Arecibo <http://www.arrl.org/news/moonbounce-for-everyone-courtesy-of-the-arecibo-radio-telescope>
on Saturday, August 14. Presentations will include a noise figure workshop hosted by Al Ward, W5LUA, Tommy Henderson, WD5AGO, and Tony Emanuele, WA8RJF, as well as an EME demonstration by Paul Perryman, WA5WCP, and exhibits featuring a number of dealers. The event will also feature tours for both attendees and their spouses to various historic sites around the Dallas/Fort Worth area. Organizers are still soliciting people to speak or submit articles for the conference's Technical Proceedings. If interested, please contact Barry Malowanchuk, VE4MA, via e-mail <ve4ma@shaw.ca>. A block of rooms has been reserved <http://www.ntms.org/eme/hotel.php> at the Westin Hotel, a short shuttle ride from DFW Airport; rooms must be reserved by July 12 to take advantage of special rates.

==> + INTERNATIONAL PERSPECTIVE: 2010 IARU EYEBALL QSO CONTEST RESULTS

At the 2010 Dayton Hamvention®, the International Amateur Radio Union (IARU) and the ARRL sponsored a game that involved searching for hams visiting from outside the USA. According to ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, the idea was to obtain calls and names from as many different DXCC entities (from outside the USA) as possible by making "eyeball QSOs" during the Hamvention.

"No one knew exactly what to expect," Patton said, "as there hadn't been a formal list of attendees from outside the USA in the recent past. But amazingly, there were at least 138 hams from 48 DXCC entities -- not including all the DXpeditioners who signed with their DXpedition calls -- appearing on the eyeball QSO cards that were turned in to IARU officials at the end of the event to the IARU staff." As for the winners, Patton said that "everyone was a winner through the interaction with all the international guests, and the Top 10 will

receive gift certificates from the ARRL."

The Top 10 winners -- including a tie for first place --were (with number of international "eyeball QSOs" following their call sign): Margreet Blondeel Timmerman, K2XYL (24); Frank Butler, W4RH (24); Lewis Ankerbrand, W3GHU (19); Steve Gocala, KB8VAO (18); Allen Olender, WA8IWK (14); Stan Arnett, AC8W (14); Judy Attaya-Harris, KB1SRO (12); Coy Day, N5OK (12); Preben Mailand Christensen, OZ1HHH (10); Ed Moyer, AB3AH (9), and Ken Lowry, W8ND (6). For a list of the 138 call signs representing almost 50 DXCC entities, click here <http://www.arrl.org/news/2010-iaru-eyeball-qso-contest-results>.

==> + ARRL RECOGNIZES: MERT NELLIS, W0UFO, WINS MAY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for May is Mert Nellis, W0UFO, for his article "Build an Ampere-Hour Meter for Portable Operations." Congratulations Mert! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web Page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the June issue by Wednesday, June 30.

==> + SOLAR UPDATE

Tad "Fear no more the heat o' the Sun <http://www.absoluteshakespeare.com/plays/cymbeline/a4s2.htm>," Cook, K7RA, reports: Sunspot group 1072 -- reported in last week's bulletin -- was visible for nine days, until May 28. When it disappeared on May 29, three new groups appeared: 1073, 1074 and 1075. On May 29-31, the sunspot number was 43, 40 and 39, but geomagnetic indices were high as well, with the planetary A index at 33 on May 29 and the planetary K index up to 5. On the same day, the college A index (Alaska) was 53, with the college K index as high as 7. So we have had some increased sunspot activity, but the downside for HF operators has been geomagnetic storms. Look for more information, including a rare 2 meter sporadic-E opening, on the ARRL Web site on Friday, June 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Shakespeare's Cymbeline <http://www.absoluteshakespeare.com/plays/cymbeline/cymbeline.htm> (Act IV, Scene 2).

==> THIS WEEK ON THE RADIO

This week, the Ten-Ten International Open Season Contest and the Alabama QSO Party are June 5-6. The CWOps Mini-CWT Test is June 9-10. Next week, the ARRL June VHF QSO Party <http://www.arrl.org/news/join-the-fun-on-vhf-in-the-arrl-vhf-qso-party> is June 12-14. Another running of the NCCC Sprint Ladder takes place

June 11. On June 12, look for the BARTG Sprint, the Portugal Day Contest and the Bill Windle QSO Party. TheDRCG Long Distance Contest (RTTY) is June 12-13 and the SKCC Weekend Sprint is June 13. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Marconi and Beethoven both used OS/2 on a regular basis. This is well known,
Tholen.

What does your felching have to do with OS/2, Checkmate?

22> Marconi and Beethoven both used OS/2 on a regular basis.

Classic unsubstantiated and erroneous claim.

22> This is well known, Tholen.

Classic hallucination.

Amateur Radio Newsline(tm) Report 1712 - June 4 2010

Amateur Radio Newsline report number 1712 with a release date of
Friday, June 4, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. NOAA says to be prepared for an active
hurricane season. Will ham radio be ready? Also, an abandoned
Emergency Locator Transmitter triggers a search down-under, a request
to increase broadcast radio power levels in the United States is
denied, Germany makes ready to again host Europes largest amateur
radio convention and some fun with QRP operation. Find out the
details on Amateur Radio Newsline(tm) report number 1712 coming your
way right now.

RESCUE RADIO: NOAA PREDICTS AN ACTIVE HURRICANE SEASON

Be ready for an unusually high number of Tropical Storms that reach
hurricane level. So say the experts at the National Weather Service.
Amateur Radio Newsline Frank Haas, KB4T, is in hurricane country in
Florida with more:

--

An "active to extremely active" hurricane season is expected for the
Atlantic Basin this year according to the seasonal outlook issued by NOAA's
Climate Prediction Center. Across the entire region for the
six-month season, which began on June 1, NOAA is projecting a 70 percent
probability of 14 to 23 named storms with top winds of 39 mph or
higher. NOAA believes that 8 to 14 of these will be hurricanes with top
winds of 74 mph or higher while 3 to 7 could be major Category 3, 4 or 5
hurricanes with winds of at least 111 mph.

Dr. Jane Lubchenco, Ph.D. is the Under Secretary of Commerce for Oceans and
Atmosphere and NOAA Administrator. She says that if this outlook holds
true, this hurricane season could be one of the more
active on record.

This year's prediction exceeds the seasonal average of 11 named storms,
six
hurricanes and two major hurricanes. As with every hurricane season, this
outlook underscores the importance of having a
hurricane preparedness plan in place.

For hams involved in emergency response communications it means honing their message-handling skills through regular on-the-air practice sessions. Storm season reminds us how important it is to harden repeater and digital-relay installations to improve survivability in a Category 4 or 5 storm. Continued operation, without reliance on mains power, any form of telephone interconnect or any form of human intervention can be critical during or after a storm.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

The NOAA's Climate Prediction Center is a division of the National Weather Service. For more on this story please take your web browser to tinyurl.com/28plonh (NOAA, Science Daily)

RADIO LAW: POSSIBLE CHANGES IN EU DIRECTIVE ON INTERFERENCE COULD IMPACT HAM RADIO

DL9KCE reports via the IARU Region One website that a review of a possible revision of a European Union Directive on interference to and from telecommunications devices might impact on Amateur Radio.

In Article 3 the Directive contains a number of essential requirements to protect health and safety, ensure electromagnetic compatibility and to avoid harmful interference. The way in which these essential requirements are defined in the Directive is generally considered appropriate by stakeholders. However, the concept of 'intended use' of the equipment seems to create some confusion between the essential requirements of the Directive and other public interests, such as public security or freedom of communication, which are beyond its scope but which might affect the Amateur Radio Service in the future.

There has also been some evidence suggesting that harmonized standards may sometimes be too stringent. Market surveillance campaigns have shown that a proportion of unlicensed low power devices appear to be non conformant with the harmonized standards. However, the recorded level of harmful interference does not seem to have been affected by this.

In the end, the report on the Directive says that the scope of the Directive needs to be reviewed. For instance, the radio and TV receivers which are not able to transmit by radio or cable do not fall within the scope of the Directive, while those which are able to transmit signals do. And for ham radio, it means that any changes to the Directive will have to be carefully watched. (Southgate)

**

ENFORCEMENT: NEW ZEALAND HAM HIT WITH FINE FOR ILLEAL HIGH POWER OPERATION

A New Zealand ham is in trouble for running his station at power levels in excess of that nations maximum for radio amateurs. Jim Meachen, ZL2BHF, is

in Auckland with the details:

--

Alan Potter, ZL3II, of Christchurch, has been fined the equivalent of $1164 U.S. Dollars, ordered to pay $86 in court costs and had had his station confiscated by the government. This, after being found guilty of breaching Section 113 of the Radiocommunications Act 1989 by running power in excess of 3100 watts out of his station in a nation where 500 watts is the absolute limit.

Specifically, Potter was charged in the Christchurch District Court on April 14th after being found in possession of radio transmitting equipment that was capable of operating at a significantly higher power than the Amateur Radio Operators General License allows. He was found guilty of transmitting outside the terms and conditions of the General User Radio License for Amateur Radio Operators.

Potter might have gotten away with his illegal high power activities a bit longer if not for one little mistake. Instead of just keeping quiet and operating, news reports say that the New Zealand's Radio Spectrum Management agency became aware of Portter after he reportedly posted on YouTube. One showing showed his transmitter operating at the 3100 watt level. That video has since been removed.

I'm Jim Meachen, ZL2BHJF, in Auckland reporting for the Amateur Radio Newsline.

--

This was definitely one time when it definitely did not pay to advertise that one was violating a nations telecommunications law. (Southgate)

**

RESCUE RADIO: ABANDONED ELT TRIGGERS SEARCH DOWN-UNDER

Still with news from down-under, word that an old Emergency Locator Transmitter distress beacon that was deposited in a New Zealand rubbish dump was believed responsible for a costly search and rescue deployment that proved to be a false alarm.

The Tauranga Search and Rescue was called out after aircraft flying into local airports reported receiving a signal from an emergency beacon within the greater Tauranga area. The Coastguard spent more than two hours sweeping the harbor trying to locate the source without success. Finally, the Rescue Coordination Center brought in specialist radio direction finding equipment which tracked the signal down to a refuse center. While a T- hunter was at the refuse site the signal suddenly stopped. It is presumed the beacon was disabled as garbage was being crushed at the time.

According to news reports the beacon was likely an old 121 MHz model. This is because it was only heard by planes overhead and but picked up by satellite. (The NZ Sun)

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WD9GOE repeater serving Marissa Illinois.

(5 sec pause here)

**

RADIO LAW: FCC SAYS NO TO AM BROADCAST POWER INCREASE REQUEST

The FCC has acted quickly to dismiss a petition from Richard F. Arsenault dated April 13th of this year. The Arsenault petition had asked that the regulatory agency initiate a rulemaking to permit AM broadcast band stations to voluntarily implement an increase in authorized daytime operating power.

In it, Arsenault said that he believed that such rules changes would mitigate degradation of daytime AM signal reception resulting from the interference effects of digital computers and other computing devices, Broadband over Power Lines, energy efficient fluorescent lighting with solid state switching circuitry and other electronic devices.

Arsenault specifically proposed that the Commission allow a five-year period in which AM broadcast band stations may increase daytime operating power up to ten times their currently authorized power without formal application to the Commission. But the FCC says that's not going to happen
now or anytime in the foreseeable future.

In its denial letter to Arsenault the FCC says that in MM Docket No. 87-267,1 the Commission took many actions, both major and minor, to transform and revitalize the AM broadcast band. That it adopted revised AM technical standards, which were designed, over time, to reduce interference in a station's primary coverage area. It also allowed migration of many of
the highest AM interferers to an expanded AM band, which reduced existing interference and station congestion.

The FCC ends its May 28th denial by stating that Arsenault's proposal is not in the public interest because it would greatly increase the potential for interference between AM stations. Also that it would undermine the Commission's efforts to improve the AM broadcast radio service. (FCC)

**

HAM RADIO IN PRINT: GETTING READY FOR FIELD DAY

Two articles well worth reading in the June issue of Popular Communications magazine. The first is titled Getting Ready For Amateur Radio Field Day and was written by none other than noted DX'er, contester and all around nice guy Chip Margelli, K7JA.

With an emphasis on introducing the fun of Field Day to all hams, Margelli tackles such things as assembling a team to put on a local Field Day event, choosing a venue from where to operate, deciding on what gear and antennas to use and more. In fact Chip covers just about every aspect of setting up and operating a Field Day station you can think of and many items that might not ever cross your mind.

Getting Ready For Amateur Radio Field Day is a worthwhile read for any individual or group planning a Field Day operation this year or in the future. Its loaded with photos and begins on page 10 of the magazine. (PopComm)

**

HAM RADIO IN PRINT: CALLING FOR BACKUP

Once you finish reading Chip Margelli's Field Day item keep going because on the next item up is an article by Police Chief Mike Burg, N8QQN. It's the story on how he introduced ham radio as a back-up to an Ohio towns emergency communications system.

Titled "Calling For Backup: Ham Radio Enhances A Police Department's Preparedness," it's the true story of how Burg fulfilled a promise he had made to himself years ago. That being, if he ever found himself in a position to improve communications within the Rittman, Ohio Police Department, that he would do it. The story he tells is how this was accomplished by adding a ham radio station to the overall emergency communications system in the area while keeping amateur radio separate and distinct from the rest of the emcomm mix.

In his story, Burg takes the reader from his conceiving the idea of the station through its planning, installation and first operation last March 24th. That's when the Silvercreek Amateur Radio Association came in to use
it for a local tornado safety drill in conjunction with the National Weather Service and Skywarn out of Cleveland. You will find this one beginning on page 18. (PopComm)

**

RADIO HONORS: SUSSEX COUNTY DELAWARE HONORS HAM RADIO RESPONDERS

Following a year of unusual weather events, cold water rescues and county, state and nationwide drills, the Sussex County Delaware Council has honored the county's ham radio community by proclaiming June 2010 as Amateur Radio Month.

Council President Vance Phillips declared during a presentation in Council Chambers that the city owes a debt of gratitude to its amateurs. This, for providing thousands of volunteer hours protecting our citizens and providing valuable information to various county and state agencies

Councilman Sam Wilson presented the proclamation recognizing members of the Lewes Amateur Radio Society, the Nanticoke Amateur Radio Club, the Sussex Amateur Radio Association, along with the local the Amateur Radio Emergency

Service and Radio Amateur Civil Emergency Service for their service. (SussexCountian.com)

**

THE SOCIAL SCENE: HAM RADIO 2010 IN GERMANY JUNE 25 - 27

With Dayton 2010 now history, the next truly big social event will be the 61st Lake Constance Convention and Ham Radio 2010 gathering. Both of these events are organized by DARC which is Germany's national ham radio society, and will take place from June 25th to the 27th in the city of Friedrichshafen. They are the largest on the European continent.

Mitch Wolfson DJ0QN is a member of the DARC Executive Board. He tells us that Ham Radio 2010 is different than conventions and hamfests in the United States:

--

DJ0QN: "We have a section where clubs from all over the world -- mainly from Europe but also from other parts of the world like the U.S. have booths to basically meet other people from those clubs and countries and perhaps (get them to) join a club. So there's a lot of international good will with a whole lot of people getting together and meeting.

"Its basically a very easygoing show and does not have a high stress level. You can sit between the halls in this beer garden area and talk to people all day if you choose to do that. Or you can hang around the flea market or go to the main booths or go to talks most of which are in German but there are some in the English language as well."

--

More about this exciting European ham radio gathering in English is on line at http://www.hamradio-friedrichshafen.de/ham-en/index.php (Ham Radio 2010)

**

NEW GEAR: FRENCH COMPANY TO MARKET NEW SDR TRANSCEIVER

France is the latest nation to enter the ham radio marketplace. This with the announcement of the new TransFox is Software Definable Radio transceiver designed and built in that nation.

According to a press release from the manufacturer RFPA-RFham, the new radio is available in receiver only or receiver/transmitter configuration. Its stock coverage is 1 MHz to 1100 MHz. but it can be extended beyond existing frequency range upon request. Because of this the TransFox brings what RFPA calls unique Software Definable Radio to the VHF, UHF and SHF bands.

Other features include Software Definable Radio demodulation and modulation over a 50, 100 or 200 KHz baseband, compatiblity with existing Windows or Linux software in addition to specific SigFox software, spectrum analysis and 1 Hz tuning resolution.

First delivery of this new radio is slated for mid July. More information on the TransFox transceiver in the French language is on line at www.rfham.com. (Southgate)

**

HAM CELEBRATIONS: THE WIA AT 100 - THE CELEBRATION

As reported last week, the Wireless Institute of Australia has been celebrating its 100 years of existance since the beginning of the year. With a review of what's taken place so far, here WIA News anchor Graham Kemp, VK4BB:

--

The first activity this year was the VK9NA 2010 - VHF/UHF/Microwave DXpedition to Norfolk Island in January. A team of experienced VK amateurs operated bands from 6 meters to 10GHz. This was the first time such an expedition has been mounted on these bands from VK9 Norfolk Island.

Valentines Day saw the Center Victoria RadioFest at Kyneton VK3.

A Radio, Astronomy and Electronics Expo was held in April organized by the Midland Amateur Radio Club and held in the Old Bendigo Fire Station. This drew lots of non amateurs and showed of our hobby as well as that of astronomy.

A Re-enactment of the first wireless press message received from Britain in Australia is set to occur June 16-18. The Gippsland Gate Radio and Electronics Club will re-enact this historical wireless milestone that occurred in 1921 at Koo-wee-rup south-east of Melbourne.

More information about activities to be held by WIA affiliated clubs will appear as they are announced again when you visit wia.org.au.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Brisbane, Australia..

--

This 100th anniversary of the WIA continues through years end. (WIA News)

**

WORLDBEAT: VIDEO CELEBRATES 60 YEARS OF HAM RADIO IN ISRAEL

A video celebrating 60 years of Amateur Radio in Israel is now available on YouTube. Posted by 4Z1PF, the show combines historic still photos with music as a way of tracing the history of the hobby and those Israeli hams integral to it success over the past six decades. You can watch it on-line at tinyurl.com/2675nkp (IARC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: INVENTOR AND CHAMPION CAT BREEDER LARRY LEVY, WA2INM - S.K.

The ham who invented automated sound to light synchronization at the start of the 1960's Disco era and who was in part responsible for the creation of the IBM PC computer has died. Larry Levy, WA2INM, passed away late on Sunday night, May 30th after suffering what was believed to have been a massive heart attack.

From the time he was an early teen, Levy had developed a fascination in radio and electronics. He received his Technician class license at age 15 and like many kid hams of the day he proceeded to built most of his own station. He loved DX'ing on 6 meters an soon became known as the ham to go to if assistance was needed in modifying a piece of ham radio gear.

It was while attending Marlborough College in Vermont that he became fascinated with sound controlled lighting. Using his skill developed from ham radio, WA2INM invented the first control circuitry that converted sound to pulses of electricity that could control lights to the beat of music. He then refined his circuits so that different frequencies could trigger various light colors and patterns. It was not long before he was building and selling these control units under the name of "The Mind Garden."

After graduation from college, Levy went into business with our producer Bill Pasternak, then WA2HVK. The pair formed MG Electronics. Headquartered in the Sheepshead Bay area of Brooklyn, New York, MG Electronics provided full service audio synchronized lighting and high power sound reinforcement services to the burgeoning disco entertainment industry. They also built and installed the first ever 15 kHz split-split two meter repeater in the United States. It was located in Brooklyn's Williamsburg Bank Building and operated under the call WA2ZWP.

When Disco began to die in the early 1970's, WA2INM and WA2HVK closed MG Electronics and went their separate ways. Larry Levy found new interest in early microcomputers and was eventually a contributor to the development of the I-B-M personal computer. Along the way he obtained his Advanced Class license and eventually moved to the New York suburb of Yorktown heights.

Always a lover of show cats, Levy eventually dropped away from electronics to a begin a new career as a show cat breeder. In addition to his home and office in New York, he also maintained a flat in Paris and supplied many award winning cats at European shows.

According to his friend Victor Miller, Levy took ill at his home and was taken to Westchester Hospital in Mt. Kisco. From there he was transferred to the Westchester Medical center where doctors planned to do either an angioplasty or a coronary bypass surgery. However, it appears that Larry passed away before either could be done.

Larry Levy, WA2INM, is survived by his wife Nicole. As we go to air, memorial services for WA2INM have not yet been announced. (ARNresline(tm))

HAM RADIO IN SPACE: UNITEC-1 STILL NOT HEARD

Turning to ham radio space related news, the magazine New Scientist reports the latest on the interplanetary amateur radio probe UNITEC-1 which fell silent soon after launch. New Scientist quotes member Naomi Kurahara who says that the growing length of the silence has the mission team worried that the spacecraft has broken down. But says Kurahara they are still working to receive the signal from UNITEC-1. (New Scientist, Southgate)

ON THE NET: VHF+ CONTESTING WEBINAR AUDIO NOW ON LINE

For those who missed the recent on line webinar titled "VHF Contesting" the audio is now available on the Potomac Valley Radio Club Website. Writing on the VHF Reflector, Les Rayburn, N1LF, says that the session was lead by QST VHF columnist Gene Zimmerman, W3ZZ, lasted over an hour, and was a great introduction to the VHF+ contesting. It also included some great dialogue regarding station design that would be of interest to even the most serious operators.

Rayburn says that there were some on-line 60 attendees, including a couple of VHF operators from Europe who got up early for the webcast. You can hear it yourself at http://www.pvrc.org/webinar/webinars.htm) (N1LF via the VHF Reflector)

HAM HAPPENINGS: ITS ALL IN THE BATHTUB

Canada's Nanaimo Amateur Radio Association will host a 24 hour special events station VE7TUB beginning on July 24th. This to commemorate the annual running of the World Championship Bathtub Race slated for July 25th in Nanaimo, British Columbia, Canada.

Nanaimo harbor was the scene of the first bathtub race in 1967 and has been its home ever since as a part of the Nanaimo Marine Festival. This years festival theme will salute is to the "CANADIAN NAVAL CENTENNIAL 1910 - 2010".

The website for the World Championship Bathtub Race is www dot bathtubbing dot com. More information on special event station VE7TUB is on line at www dot ve7tub dot ca. (VA7CIP)

**

DX

In DX, W6NWS will be in Vietnam until the 9th of June. He expects to be active as XV2W when time permits. QSL via home call, direct, via the bureau, or Logbook of The World.

IZ4JMA will be QRV portable SV5 from Dodecanese operating holiday style from June 6th to the 20th. He will use all modes on 80 through 10 including some digital. Olease QSL as directed on the air.

W6ZL, arrived on Tonga last week. He reportedly skippered the "SV Summer Sky" from New Zealand and brought his K3 and a Buddipole antenna. He has also renewed his A35KL license. No QSN's have been reported yet.

Lastly, JE1WVQ, will be active as ZD8J from Ascension Island working on 80 through 10 meters including the digital modes therough June 8th. QSL via his home callsign.

Above from various DX sources.

**

THAT FINAL ITEM: DAYTON - QRP - FOUR DAYS IN MAY

And finally this week, we take a look a a gathering held in conjunction with the annual Dayton Hamvention. Its called Four Days In May and it's a gathering of hams who find operating with low power and simple antennas as being the most fun one can have in amateur radio. Amateur Radio's Mark Abramovich, N-T-3-V, spent some time with one of the events organizers:

--

Ken Evans, WD4U, president of the QRP Amateur Radio Club International, says more than 250 gathered for Thursday's day-long seminar on the state of QRP and the future. Why such a surge in interest?

"Its not about turning down your power, it's about having fun," says Evans.

Evans says the event drew people from around the world.

"We have a contingent from the United Kingdom right now or about 10 amateurs, says Evans. "We have a guy from Barbados. We have two or three people from Australia. We have Bruno Begali who makes keys him and daughter and son-in-law from Italy. Last year there was a guy who came over from the JAL, the Japan Amateur League."

Evans says the growing number of people doing QRP comes from the challenge of building your own radio and using it.

"I think what people are finding is it's a lot of fun to take a $200 or $300 part for a kit radio or a home brew radio that you build yourself and play with it as opposed to just going out and laying down your charge card and picking up an $1,800 commercial set," Evans says.

George Dobbs G0RJV, founder of the G QRP Club in 1972, was among the attendees at this year's "Four Days in May." His philosophy on being a

part of QRP is, well, elementary.

"One of the gifts that a hobby can do is ensure you at least do one pointless thing each day,s" Dobbs says. "And, QRP there's no point to it whatsoever except to have a good time. Thats all it's about."

Ron Doyle, N8VAR, is a QRPer and a Scout leader here in Ohio. He says he frequently combines the two for some fun experiences like a DX contact on just a few watts.

"It has to be Scotland, on five watts on a campout with battery power," Doyle recalls. And, that was single-sideband. So, that was the best. And, some of my Boy Scouts could talk to him with the dipole up about 20 feet. That was a lot of fun."

Yes, that fun word keeps cropping up among the many who like QRP. It's just one part of Amateur Radio that makes this a community of unique and diverse interests.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the "Four Days in May" gathering in Fairborn, just outside Dayton.

--

The annual Four Days in May gathering is conducted by the QRP Amateur Radio Club International. It was held this year at the Holiday Inn in the Dayton suburb of Fairborn, Ohio. With interest growing in QRP operations, it's no surprise this years Four Days in May event drew a record crowd. (ARNewsline(tm))

Ham installations have federal pre - emption over any regulations that hoa's, town or city governments, states, or anyone else can pass. the simple solution for these people is to get a ham license, even a technician license, which any 10 year old kid could get if he studied for a week, and join the ARRL. Put up your ham antenna, or scanner antenna, whatever you want to, and when they start giving you crap about it, call the arrl, and tell them all about it.
then, sit back and see how they like getting fined 500 dollars a day for interfering with a government emergency installation ! the FCC will come down on them like a ton of bricks.... It really doesnt matter what the antenna you put up is FOR, since if you SAY it's a ham antenna, it falls under these protections. Endlessly bitching about it on these news groups is not going to solve your problems. Remember this: ANY effort on their part to prevent you from operating, putting up an antenna, ect, is going to be a regrettable experience for them... One they will remember for the rest of their miserable, controlling lives...

> Ham installations have federal pre - emption over any regulations that
> hoa's, town or city governments, states, or anyone else can pass.
...

I believe that the amateur radio antenna preemption applies to regulations by government entities only (zoning laws, etc.) and not to regulations by private entities (HOAs). This is in contrast to the television antenna preemption which applies to both of the above categories.

"Yes, I'm Gay"
(sung to the tune of "Yesterday")
(Rusty Volvo / Paul McCartney / John Lennon)
****

Yes I'm Gay, my toobe with handles will soon broadcast away,
And tell the world my discovery for today,
Oh, I decree that Yes I'm Gay.

Homosexuality, now I know it's just the thing for me,
A weathered fencepost taught me who I need to be,
Oh, homosexuality came painfully.

Why I didn't know,
I don't know, I couldn't say.
Why it took so long,
To find out that Yes I'm Gay.

Yes I'm Gay, no more Sophie for me to lay,
Tell your big tit daughters to go away,
Oh, I decree that Yes I'm Gay.

How many men I'll blow,
I don't know, I couldn't say.
There's a database on QRZ,
I dooo believe I'll start today.

Yes I'm Gay, from a hamfest booth I will earn my pay,
In my hovel, I won't need to hide away,
Oh, I decree that Yes I'm Gay.

Mm-mm-mm-mm-mm-mm-mm.

Imagine
(UF / R. Xemblinosky / J. Lennon)

****

Imagine Marky Morgoon
It's not so hard to do

Kneeling in the boys' room
Slurping down some spoo
Imagine all the Cub Scouts
He has done this to!

Imagine Houghton County
A breeding ground for hicks
When they hear how Marky
Gets his seedy kicks
Imagining Marky Morgoon
Gumming winos' dicks!

Imagine Copper Country
Contagious miner's lung
No more ore to shovel
So Marky gets by with his tongue
Imagine him paying rent
With free shots at his bung!

We all know Morgoon is a reamer
But he's useful just the same
Where else would Brian find a patsy
Half as sad or half as lame?

this is true. kuhbuhninerkz hace no picture at all. sorta embarrassing,
really.

All the cool posters hace pictures, and I see you have another new one as well.
I like it better than the others.
Oh yeah, guess what? It turns out that kuhbuhninerkz is leaving those empty
seaweed posts on purpose! He says he's doing it to get rid of trolls, but I
haven't seen any trolls, so maybe it's working.

I'm sorry... is it the trolls that your cat plays with, or the troll droppings?

1641. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2010-06-07 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1275890700@panix.com>
Source record: 241760
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

1644. I use Lloyd's call

Newsgroup: rec.radio.amateur.policy
Date: 2010-06-07 09:20:30 UTC
From: AB8MQ <dummy@anon>
Message-ID: <3qevnj.u5v.19.1@news.alt.net>
Source record: 241763

But nobody knows who I am....

1645. I hid behind my curtains once...and only once.

Newsgroup: rec.radio.amateur.policy
Date: 2010-06-07 09:37:59 UTC
From: AB8MQ <dummy@anon>
Message-ID: <3qf0of.90b.17.1@news.alt.net>
Source record: 241764

Leila Heil came to my house last year, yes.
She knocked on my door, yes.
Dave Heil took photos of my house. Yes.
Did I answer the door? No.

Why?

1. Because I was not home.
2. Because my girlfriend was there when I was at the store and she was afraid to go to the door. (rubber dolls can't walk)
3. I was there and looked out the peephole and saw Mrs. Heil and hid behind my curtains.

One visit, two lies and a possible truthful answer.

Who do you believe?
Me or Dave Heil?

Mark can't thread jack in the roger-wiseman newsgroups, because Google
won't allow its users to post there! Maybe we should make those
groups or alt.news.admin.net-abuse.checkmate our new Mark free home!

Imagine that! Mark has made RRAP a worse newsgroup than
alt.cocksucker.roger-wiseman. It boggles the mind.

Sorry, if Mark is a troll, he's not welcome in alt.news.admin.net-
abuse.checkmate. I'm trying to clean up Usenet, and that means NO trolls.

Hi! I didn t seem to find the humor in this, but Coco says it s probably
because I m closeted.

Closeted? As in, something that s been put away? I don t get this. What s he talking about? He s laughing at me right now.

Sometimes it isn t easy being a non Native English speaker in an English speaking forum!

Peaches!

You're REQUIRED to report spam in the fat acceptance group? Is it a violation of some government mandated dietary thing? I was going to bring some Twinkies for myself, but I don't want to get in any trouble. If I share them with you, do you think we could keep it on the DL?

Google has blocked Mark from posting there, partly because he is an
egregious troll, but mostly because he's such an insipid writer. Thanks
to Google, Mark will never post or crosspost to ANANA.checkmate.

> actions-to-silence-all-ham-activity/#more-88
>

The article you referenced was an April Fools joke posted over one year ago... a non-existent "event" which was debunked within hours of its original appearance. No such ordinance was ever passed by San Luis Obispo (or any other) county in California. In fact many of the individuals quoted in the fake story don't even exist.

California hams have known this supposed "news story" was nothing more than a prank for over a year.

Here is a quote regarding this "news" item from the ARRL newsletter of April 2009:

"The California county of San Luis Obispo was notified by the Federal Communications Commission Wednesday, April 8 of a rumor on an Internet group site stating that the San Luis Obispo County Board of Supervisors passed an ordinance on March 31 which would ban Amateur Radio operators -- commonly known as ham radio operators -- from operating their transmitting stations. The rumor is posted as an alleged news story from a non-existent Los Angeles news publisher. The story alleges that the purpose of this false action by the Board was due to supposed interference caused by ham radio transmitters, among other reasons. The article has an online posting date of April 1, 2009."

Again, "Radioguy" you have shown yourself to be a gullible fool, with no critical thinking skills. Your continued diatribes on these newsgroups are pointless, as your credibility is zero. Nobody believes a single thing you post - why do you bother?

1681. Flustered Mark?

Well come on down!!!! A new player on the block. Glad to see you, pal. We have plenty of swinging dicks for you. All you have to do is ask. Are you goind to become a member of the DTS? We could sure use some new blood. All you need to do is make 100 troll posts to these groups. Or are you too much of a lightweight to make the grade? :o)

They can't grow up, Michael, because then they'd have to face their
own
sexuality, which is very gay. You can tell they're gay, because
they're so
fixated on gay fantasies. Never heard of any straight guys who
thought
about licking balls or giving head.

However, what you can do is enjoy the insanity of their k00ky
childishness and increasingly frantic attempts to get Mark off ham
radio
once and for all by slagging him off on usenet, because it's so foamy
and
sad. It's a tad mean, perhaps, to derive schadenfreude out of them,
that
way, but they do their part by being so pathetic.

not likely we belive in gavi being well hung

1734. Kelp and AZT work together.

Newsgroup: rec.radio.amateur.policy
Date: 2010-06-10 09:48:43 UTC
From: Cook <Anon@anon>
Message-ID: <3qmugc.7us.19.1@news.alt.net>
Source record: 241853

Mark has read that Kelp, a product of the oceans, works hand-in-hand with
AZT to stall the onset of full-blown AIDS.
It has not dawned on Mark that the greatest deterrence would be to simply
stop having anal sex with men.

Indeed it are Woger's photo for real sure. Too bad Woger is
so ashamed of his looks that he denies it.

In message <1139069215.383868.208680@g43g2000cwa.googlegroups.com>,
Secwet Woger incorrectly corrected someone else with "Too bad you
can't even spell non sequitor correctly, though."

==> + PUBLIC SERVICE: AMATEUR RADIO OPERATORS ACTIVE DURING SEVERE
TORNADO BREAKOUT IN NORTHWESTERN OHIO

During the early overnight hours of Saturday, June 5 through Sunday,
June 6, severe weather and tornadoes ripped across an area of
Northwestern Ohio, laying a large path of destruction. ARES and SKYWARN
groups in Erie, Huron, Sandusky and Wood Counties activated nets as
early as 10:30 PM Saturday, with many not standing down until 4:30 AM
the next day. According to ARRL Ohio Section Manager Frank Piper,
KI8GW, traffic on the nets was filled with reports of severe weather
damage, flooding and downed power lines. Read more here
<http://www.arrl.org/news/amateur-radio-operators-active-during-severe-tornad
o-breakout-in-northwestern-ohio>.

==> + FCC NEWS: IN FCC RULE MAKING PROCEEDING, ARRL SUPPORTS EMPLOYEE
PARTICIPATION IN DRILLS

In March 2010, the FCC released a Notice of Proposed Rule Making
(NPRM) (WT Docket No 10-72) that proposed to amend the Part 97 rules --

specifically 97.113(a)(3) -- governing the Amateur Radio Service. The new rules would provide that, under certain limited conditions, Amateur Radio operators may transmit communications on behalf of their employers during government-sponsored emergency and disaster preparedness drills. While current rules provide for Amateur Radio use during emergencies, the rules prohibit communications where the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer, except for government-sponsored drills for which a waiver has been granted. The NPRM asked for comments from interested parties. As such, on May 24, the ARRL filed its initial comments and on June 7, filed its reply comments. The ARRL's filings reflect the position adopted by the Board of Directors at its January 2010 meeting. Read more here <http://www.arrl.org/news/in-fcc-rule-making-proceeding-arrl-supports-employe e-participation-in-drills>.

==> + FCC NEWS: FCC DISMISSES CALIFORNIA HAM'S PETITION TO AMEND SECTION 97.1

In September 2009, Gordon Schlesinger, W6LBV, of San Diego, California, filed a Petition for Rule Making with the FCC, seeking to amend Section 97.1 of the Commission's rules to account for changes in technology and amateur practice since the rule was adopted. On June 8, 2010, the FCC dismissed Schlesinger's Petition. Schlesinger proposed new text in his Petition that he claimed "is equivalent to a total restatement of the Basis and Purpose for the Amateur Radio Service, to account for the numerous and significant changes both in wireless technology and in the practice of the Amateur Radio art over the intervening decades since the present Basis and Purpose was adopted. The current Basis and Purpose, which consists of five goals for the Amateur Radio Service, appears to have been adopted more than 50 years ago. The dramatic change in both telecommunications technology and the practice of Amateur Radio over the past five decades strongly suggests that a review and reconstitution of the Basis and Purpose is in order." Read more here <http://www.arrl.org/news/fcc-dismisses-california-ham-s-petition-to-amend-se ction-97-1>.

==> + ARRL FIELD DAY: FIELD DAY STATION LOCATOR SERVICE RETURNS FOR 2010

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station

Locator Web site <http://www.arrl.org/field-day-locator> and follow the instructions (this is a different link than was printed in the Field Day packets). ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 26-27, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Service.

==> + BOY SCOUTS REVIVE FOUR MERIT BADGES FOR 100TH ANNIVERSARY

In keeping with Boy Scouts of America's centennial theme -- Celebrating the Adventure, Continuing the Journey -- four retired badges have been brought back for the group's 100th anniversary. The effective date for earning these new merit badges -- Carpentry (1911-1952), Tracking (formerly Stalking, 1911-1952), Pathfinding (1911-1952) and Signaling (formerly Signaler, 1910-1992) -- is April 1, 2010; requirements must be completed no later than December 31, 2010. The contemporary merit badges closely resemble the original designs of their counterparts, but with a gold border, immediately identifying it as a 2010 historic merit badge. These four historical merit badges may be used toward a Scout's rank advancement.

"The Signaling merit badge is a great way to encourage hams who are already involved in Scouting to mentor this limited-time badge in their Troop and perhaps in other ways, such as camps," said ARRL Rocky Mountain Division Director Brian Mileshosky, N5ZGT; Mileshosky is the chairman of the ARRL's ad hoc Committee on Scouting. "Hams -- and especially clubs, that have more resources and volunteers -- who are not involved in Scouting at the present time but want to assist a Troop with earning the Signaling merit badge -- should contact their local BSA Council to inquire about Scoutmasters in their area to contact and offer their assistance." The requirements for the Signaling merit badge are the original requirements as written in 1911. Read more here <http://www.arrl.org/news/boy-scouts-of-america-revive-four-merit-badges-for-100th-anniversary-including-signaling>.

==> + ON THE AIR: ARRL USING TWITTER TO PROMOTE FIELD DAY

This year, the ARRL will be using Twitter <http://twitter.com/ARRL_FD> to promote Field Day events. According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP, more and more people, both young and old, are using social networking sites -- such as Twitter and Facebook <http://www.facebook.com/story.php?id=1126126806&share_id=133156716701040&rc1a73746&r24746a04#%21/pages/ARRL-the-National-Association-for-Amateur-Radio/20069212407> -- to keep their friends up-to-date with their latest activities. The account for ARRL's Field Day actions with Twitter is ARRL_FD <http://twitter.com/ARRL_FD>. Sign up to create your own Twitter account -- it's free -- and follow ARRL_FD. If you already have a Twitter account, just follow us.

Twitter is a social networking and microblogging service that
enables its users to send and read messages known as tweets
<http://support.twitter.com/articles/15367-how-to-post-a-twitter-update-or-tw
eet>,
text-based posts of up to 140 characters displayed on the author's
profile page and delivered to the author's subscribers (who are known
as followers). You can send these short messages by computer or even
via text with your cell phone. When you receive a tweet, you can also
relay it on to your own followers (called a retweet
<http://support.twitter.com/articles/77606-what-is-retweet-rt>). Your
followers can in turn relay it even further, getting your message
spread around, growing and going.

Pitts explained that posts with #FIELDDAY (the # sign must be included)
in with the message, Twitter will keep track of it: "If there is enough
traffic with #FIELDDAY in the text, then major blogs and news outlets
take note of it. So by taking part in this experiment, tweeting and
using the #FIELDDAY insert in with your message -- called a hashtag
<http://support.twitter.com/articles/49309-what-are-hashtags-symbols>
-- will help bring all of Field Day to the media's attention. Social
networking is new to a lot of us, but I found it is really not hard at
all to learn and do. The more people we get on, the more tweeting we
do, we have the wonderful opportunity to expose Amateur Radio to a new
audience."

==> PROPAGATION: SPACE WEATHER AND SOLAR STORMS TOPICS AT FORUM IN
NATION'S CAPITAL

The National Space Weather Program Council held a forum in Washington,
DC earlier this week. On Tuesday, June 8 at the National Press Club,
the Space Weather Enterprise Forum discussed how solar storms affect
today's technological society. This is the fourth year in a row that
policymakers, researchers, legislators and reporters have gathered in
Washington to share ideas about space weather. This year, forum
organizers sharpened the focus on critical infrastructure protection,
with the ultimate goal to improve the nation's ability to prepare,
mitigate and respond to potentially devastating space weather events in
order to serve a broad and growing user community.

According to Richard Fisher, the Sun is "waking up from a deep slumber,
and in the next few years we expect to see much higher levels of solar
activity. At the same time, our technological society has developed an
unprecedented sensitivity to solar storms. The intersection of these
two issues is what we're getting together to discuss. I believe we're
on the threshold of a new era in which space weather can be as
influential in our daily lives as ordinary terrestrial weather. We take
this very seriously indeed." Fisher is the head of NASA's Heliophysics
Division. Read more here
<http://www.arrl.org/news/space-weather-and-solar-storms-to-be-topics-at-upco
ming-forum-in-nation-s-capital>.

==> + COMING UP IN QST: TAKE A LOOK AT WHAT'S IN STORE FOR JULY

The July issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at how Amateur Radio fits into the Boy Scouts of America's 2010 National Scout Jamboree -- the upcoming issue of QST has something for just about everyone.

If you've ever had a hankering to try your hand at making some digital QSOs but you weren't sure if you had the right equipment, look no further. After reading an article in the January 2010 issue of QST about how to get on the air with PSK31 in one weekend, Howard "Skip" Teller, KH6TY, decided that he needed a low cost sound interface card that could be built in a single evening. Read all about it in his article "The Classic Universal Sound Interface Card." Hams know that just one lightning strike can take out their whole shack. Jim Talens, N3JT, learned that lesson the hard way -- even after he disconnected all cables and lines that led into his shack from the outside. Read about what he learned and how he recovered in "A Simple and Effective Approach to Station Grounding."

Was it just a few weeks ago that close to 20,000 hams trekked to Ohio for the 2010 Dayton Hamvention&#65533;? If you were there -- or even if you weren't -- relive the experience with "The 2010 ARRL EXPO at the Dayton Hamvention -- Everything Under the Sun (or Rain, or Snow, or...)" by ARRL News Editor S. Khrystyne Keane, K1SFA. With everything from soup (tasty clam chowder) to (hot roasted cinnamon) nuts, you can find just about anything at the Dayton Hamvention. ARRL Technical Editor Joel Hallas, W1ZR, takes a look at some of the new products that were introduced at this year's Hamvention.

<http://www.arrl.org/multimedia> ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, takes a look at the Yaesu FTdx9000MP HF and 6 meter transceiver in this month's Product Review. "The full size FTdx9000MP is Yaesu's flagship transceiver, offering a 400 W transmitter and a full suite of features and functions," he reports. "Hardware and Firmware upgrades under the PEP9000 program have made the radio even better." ARRL Senior Assistant Technical Editor and QEX Editor Larry Wolfgang, WR1B, checks out the Elecraft W2 HF/VHF/UHF wattmeter. "Elecraft's easy-to-build W2 wattmeter kit results in an accurate instrument that can be used over a wide range of frequencies and power levels," recounts Wolfgang.

Of course, there are the usual columns you know and expect in the July QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your July issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ON THE AIR: WX4NHC REPORTS 2010 ON-THE-AIR STATION TEST RESULTS

On Saturday, May 29, WX4NHC -- the Amateur Radio station at the National Hurricane Center (NHC) In Miami, Florida -- conducted its

annual on-the-air station test to promote awareness of the 2010 hurricane season, as well as to verify station equipment performance on the many frequencies and modes that are used to communicate with stations in the affected area during hurricanes. The station was on the air for 8 hours and made 142 contacts with stations in the US, as well as the Caribbean, Central and South America.

As volunteers at the WX4NHC prepare for one of the most active hurricane seasons predicted since 2005, WX4NHC Assistant Coordinator Julio Ripoll, WD4R, said he is counting on help from amateurs to relay hurricane advisories and weather data to those affected by the storms. "The surface reports that we receive from the affected areas help the NHC Hurricane Specialists fill in gaps in their meteorological data and help with their forecasts," he said. "Relaying the hurricane advisories to those who have lost the conventional means of getting information can help save lives." Read more here <http://www.arrl.org/news/wx4nhc-reports-2010-on-the-air-station-test-results>.

==> + SOLAR UPDATE

Tad "We had the sky up there, all speckled with stars, and we used to lay on our backs and look up at them <http://www.americanliterature.com/Twain/TheAdventuresofHuckleberryFinn/19.html>"
Cook, K7RA, reports: This week, the geomagnetic conditions quieted down, due to calmer solar activity. The average daily sunspot numbers were down 7.6 points to 17.7, and the average daily solar flux dropped two points to 71. The average planetary A index declined 6.4 points to 7.9, and the mid-latitude A index dropped 2.7 points to 6.4. Three new sunspot groups emerged this week. Group 1077 made a brief appearance on June 5, with group 1078 appearing on June 8-9. The area of 1078 grew rapidly, from 80 millionths of a solar hemisphere to 180. On June 9, sunspot group 1079 appeared, at 10 millionths of a solar hemisphere. Both sunspot groups are in the far southwest of the solar disc and should disappear soon. We are only 10 days away from the summer solstice, after which the days will shorten as we progress toward more favorable HF conditions in the fall. ARRL Field Day <http://www.arrl.org/field-day> is on the sixth and seventh days of summer. Look for more information on the ARRL Web site on Friday, June 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Mark Twain's The Adventures of Huckleberry Finn <http://www.americanliterature.com/Twain/TheAdventuresofHuckleberryFinn/TheAdventuresofHuckleberryFinn.html> (Chapter 19).

==> THIS WEEK ON THE RADIO

This week, the ARRL June VHF QSO Party
<http://www.arrl.org/news/join-the-fun-on-vhf-in-the-arrl-vhf-qso-party>
is June 12-14. A running of the NCCC Sprint Ladder takes place June 11.
On June 12, look for the BARTG Sprint, the Portugal Day Contest and the
Bill Windle QSO Party. The DRCG Long Distance Contest (RTTY) is June
12-13 and the SKCC Weekend Sprint is June 13. Next week, look for yet
another running of the NCCC Sprint Ladder on June 18. The Kids Day
Contest and the Feld Hell Sprint are both June 19. The All Asian DX
Contest (CW) and the West Virginia QSO Party are June 19-20. The Run
for the Bacon QRP Contest is June 21 and the SKCC Sprint is June 23.
All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Station Web page
<http://www.arrl.org/special-events>.

==> + ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL
Letter <http://www.arrl.org/arrlletter>? One of the many ARRL
membership benefits includes other newsletters, such as the ARRL
Contest Update <http://www.arrl.org/contest-update-issues> (a bi-weekly
contest newsletter), the ARES E-Letter <http://www.arrl.org/ares-el>
(sent monthly, containing public service and emergency communications
news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the
VE Newsletter, just to name a few. You can also elect to receive news
and information from your Division Director and Section Manager (keep
in mind that not all Divisions/Sections send notices), as well as W1AW
bulletins that relate to DX, propagation, satellites and Keplerian
reports. The ARRL also offers a free notification service to members,
letting them know when their membership and license are due to expire.
ARRL members can sign up for these newsletters, bulletins and
notifications on their profile page on the ARRL Web site
<http://www.arrl.org/myarrl-account-management#%21/edit-info-email_subscripti
ons>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these
online course sessions <http://www.arrl.org/online-course-registration>
beginning on Friday, July 2, 2010: Amateur Radio Emergency
Communications Level 1; Antenna Design and Construction; Propagation;
Analog Electronics, and Digital Electronics. To learn more, visit the
CEP Course Listing page <http://www.arrl.org/online-courses> or contact
the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL
members may subscribe at no cost or unsubscribe by editing their Member
Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1713 - June 11 2010

Amateur Radio Newsline report number 1713 with a release date of
Friday, June 11, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International Telecommunications Union
will investigate interference from BPL when it meets in Geneva, the FCC
denies a petition to change the basis and purpose of amateur radio, a
massive rewrite of the Part 95 rules governing GMRS and CB radio is
proposed and a New York State ham gets ready to fight a citation he
received for operating mobile with an HT. Find out the details on
Amateur Radio Newsline(tm) report number 1713 coming your way right
now.

(Billboard Cart Here)

**

THE BPL WAR: ITU TO STUDY BPL INTERFERENCE

The International Telecommunications Union's Working Parties 1A and 1B
will meet in Geneva, Switzerland. between June 21 and 28. A major item
of discussion will be protection of radio services from interference
caused by Broadband over Powerline or BPL. Amateur Radio Newsline's
Bruce Tennant, K6PZW, has a preview of what to expect:
--
The International Amateur Radio Union or IARU has already contributed to a
report titled "The Impact of Powerline Telecommunication Systems on
Radiocommunication Systems Operating in the Low Frequency, Medium
Frequency, High Frequency and VHF Bands Below 80 MHz." In it, the
acceptable criteria for degradation of the High Frequency radio noise floor
caused by BPL is defined as being one half of one db. Now, this group will
concentrate on the protection of radio services from the effects of BPL in
range from 80 to 200MHz.
The IARU delegate to the SG1 and its working parties is Peter Chadwick
G3RZP. He says that three input contributions have been prepared for this
meeting. The first of these is a report on the effects of intermodulation
in power supplies causing the amateur band frequency notches in the BPL
spectrum to be degraded. This report has been prepared from the work by
Richard Marshall, G3SBA. It go so far as to point out the difficulty such
effects could have on the BPL system itself.
A further input establishes the protection criteria for amateur stations
operating in the 2 meter band. Ian White, GM3SEK contributed to it. It
finds that the amateur and amateur satellite services require protection
such that BPL interference does not exceed the level of 4 point 5dB per

volt per meter in the main lobe of the antenna. This, with a separation between antenna and the PLT installation being at least 10 meters.
The third input is of a more general nature. It shows that there are a number of non-amateur services that could suffer interference from BPL or its harmonics. These include alarms for the elderly, pagers, medical implant telemetry, as well as broadcasting. And when accumulation of radiation from BPL and other sources is added together, aircraft navigation and communications could be negatively impacted as well.
For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--
Summing it all up, the reports conclude that when the differences in range between BPL devices versus the other spectrum users are taken into account, the acceptable levels of radiation to protect the amateur service users are of the same order as those needed to protect these other services. (RSGB, Southgate, others)

**

THE BPL WAR: ACCESS BPL APPEARS DEAD DOWN UNDER

Meantime, wide area Access-BPL will soon likely be extinct in Australia. The latest appraisal of Broadband over Powerlines that has been cautiously described as appearing to have all but vanished from the Australian telecommunications landscape.

That's the view of Wireless Institute of Australia BPL Working Group Chairman, Phil Wait VK2DKN, who also observes that the use of Access-BPL in the United States is diminishing rapidly, with the latest BPL shut-down occurring in the City of Manassas, Virginia. And while there have been eight Access BPL trials in Australia since 2004 the last of these appears to have terminated back in 2007. (WIA)

**

THE BPL WAR: IN-HOME BPL THE EMERGING MARKET

While BPL using power lines as an internet enabling technology has apparently failed, In-House BPL using the internal wiring or a home or building is now the major market for BPL equipment manufacturers.

In the United Kingdom more than 800,000 pairs of in-home BPL modems have been installed by British Telecom. This has brought continuing interference complaints to the UK regulator Ofcom which according to VK2DKN appears to be unable, or at least very reluctant to act.

To make matters worse for U-K radio amateurs, it appears that one type of In-house BPL adaptor can emit a radio frequency signal up to 370 MHz. (VK3PC)

**
THE BPL WAR: EGYPT TO EMBRACE BPL

While BPL may be on the decline in Western nations, it seems to be gaining a new foothold in the middle East. This with news that Egypt-based SABA

Electric is getting into the Broadband over Powerline act.

Jim Linton, VK3PC, reports that SABA has formed a partnership with ISP LINKdotNET and has plans for easy access to the Internet through BPL.

In a media statement SABA Electric said BPL is the technology it will use to provide to provide broadband data speed up to 8 Mbps that include a number of Voice over Internet Protocol and video options. The completed system reach over 300,000 residents. (VK3PC)

**

RADIO LAW: FCC DENIES PETITION TO CHANGE BASIS AND PURPOSE OF AMATEUR RADIO

The FCC has turned away a rules change request from Gordon Schlesinger, W6LBV, of San Diego, California. One that sought to partially rewrite Section 97.1 of the Amateur Service Rules.

Section 97.1 deals with the very basis and purpose of ham radio. In his September 2008 filing, Schlesinger claimed that Section 97.1 is outmoded due to changes in technology and practices, and that it diverges from the practical realities of the amateur service today.

In denying Schlesinger's request the FCC stated that that the basis and purpose of the Amateur Service was not intended to reflect any particular technology or the practices of a particular time. Rather, Section 97.1 is intended to provide guidance as to the accomplishments the Commission expects of the service and to assist in international negotiations affecting the service.

In closing the FCC notes that nothing in Schlesinger's petition demonstrates that the Commission's expectations for the Amateur Service have changed or are not being met, or that the rule is in some way hampering international negotiations that affect the Amateur Service. Nor does his petition identify any reason to revisit the Commission's decision on the matter made back in 1989. At that time the FCC decided that it was in the best interest of the hobby not to change the basis and purpose of the Part 97 Amateur Service. (FCC)

**

RADIO LAW: FCC ISSUES DOCKET ON REWRITE OF PART 95 RULES

The FCC is proposing a massive rewrite of its Part 95 rules. These are the regulations that govern such public available two way radio as the General Mobile Radio Service, the Family Radio Service, and 11 meter C-B to mention only a few.

WT Docket No. 10-119 was released on June 7th and is a catch all of proposed rules changes that would affect the General Mobile Radio Service the most. This, by ending its current licensing requirements and replacing these with what the FCC calls License by Rule. That's an FCC term that kind of means doing to GMRS what it essentially did on 11 meter CB a few decades ago. It would additionally mean relaxing GMRS eligibility

requirements and at the same time implementing mandatory 12 point 5kilohertz channel spacing to the service. It also would also allow the transmission of Global Positioning System location information and user-generated text messages on certain GMRS channels.

As to the Family Radio Service, the FCC proposes to prohibit the authorization of radios that combine FRS with other safety-related services. In other words, an FRS radio would have to be a Family Radio Service only transceiver and it would become illegal to manufacture an FRS radio that could work with or in any service other than channels where FRS is allocated to operate. This would mean an end to a whole slew of transceivers that have multiple service capability especially those that cover both FRS and GMRS or some with FRS, GMRS and Marine channel capability.

Regarding 11 Meter CB, the FCC says it plans to evaluate various requirements regarding the Citizens Band Radio Service in order to determine whether they all are still needed. Of significance the FCC will be looking into CB'ers who work skip during band openings. It notes that amplifiers for CB stations are already illegal, but WT Docket No. 10-119 asks if the regulatory agency should consider prohibiting directional antennas for C-B operations in order to promote the services intended use for short range only communications. It also wants to know if it should consider power reductions for the CB Service and whether or not to permit the use of "hands-free" microphones.
.
FCC WT Docket No. 10-119 is 96 pages long including various appendices. It also carries a rather short commentary cutoff date of 30 days after publication in the Federal Register. Reply Comments will be due 45 days after publication in the Federal Register. You can download and read it yourself at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-106A1.doc (FCC)

RADIO LAW: NY HAM HANDED CELLPHONE VIOLATION FOR USING MOBILE GEAR

Amateur radio operators in upstate New York are up in arms over a traffic ticket handed to Steve Bozak, WB2IQU, while he was operating mobile in the city of Troy. And Bozak is ready to force the issue in court. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

A 34 year veteran of the hobby, Steve Bozak, WB2IQU owns an antenna company and is well known in the upstate New York areas. But recently he was pulled over at an intersection while on his way to breakfast with fellow ham radio enthusiasts. He was then issued a ticket for talking on a cell phone while driving after Officer Mark Millington dismissed Bozak's claims that the radio was not in fact a telephone.

The section of New York's vehicle and traffic law Bozak was cited for violating is designated as 1225-c. It requires a phone to be in the immediate proximity of the driver's ear. It also defines the types of communication devices it applies to as ones interconnected to a public switched telephone network provided by a commercial mobile radio service.

But Bozak was not using a cellphone. He was using a small Kenwood H-T that is in no way even remotely similar to a cellphone. And on its face value, the statute does not refer to devices like a ham radio transceivers that independently transmits a signal with no telephone interconnect.

Sgt. Terry Buchanan is the Police Department's spokesman who worked traffic
patrols for years. He says that he doesn't recall this issue coming up in the past. He said the department would have no comment on the matter because it is still pending in court.

Bozak is scheduled to appear on June 23rd but that date could be pushed back because Bozak has decided to force the issue. As a start, he has requested a supporting deposition from Officer Millington, who is typically assigned to Troy's public schools and rarely works traffic patrol. Bozak wants Millington to specifically detail what happened and explain how he was breaking the law.

And when the case does come to a hearing more than a dozen local Troy area hams plan on being there with him.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

If he looses in court, Bozak faces a $100 fine. A loss might also cause other hams in New York State to face similar citations simply for operating mobile as they have since ham radio first began. (troyrecord.com and various other published reports)

**

ENFORCEMENT: HAM CHARGED IN FALSE THREAT REPORT

A Connecticut ham has been arrested in connection with incident that occurred at Walmart in Norwich this past January. The May 28th issue of the Norwich Bulletin reports that Keith J. Mutch, of Norwich has been charged with second-degree Breach of Peace, first-degree reckless endangerment and falsely reporting an incident in the first degree. According to the FCC database, Mutch holds the call KB1RBI.

By way of background, back on January 26th Norwich police responded to a report of a man in front of the local Walmart who was armed with a shotgun and was threatening to shoot people. On their arrival it was determined the report was false and no one was injured.

Initial investigation by police revealed that store security personnel had heard the report of the man with the shotgun over their two way radio system, however none of the personnel had made the transmission. A police investigation concluded that Mutch had used a portable ham radio set to make the transmission. (Norwich Bulletin)

**

ENFORCEMENT: AUSTRALIA REGULATOR REVOKES HAM LICENSE

The Australian Communications and Media Authority better known as the ACMA has canceled the amateur radio station license of an unnamed ham following an investigation that uncovered continuing breaches of that nations Amateur service by the licensee. In this case, the violations included causing interference to other stations, failing to use a call sign and transmitting an un-modulated carrier.

The ACMA made the decision to cancel the amateur license when other compliance and enforcement measures had failed. The regulatory agency says in its reporting on the matter that every effort had been made to assist, encourage and educate the licensee to understand the importance of compliance with license conditions. Despite repeated warnings to the licensee, the ACMA found that non-compliance continued over an extended period of time.

Under the Australian Radiocommunications Act of 1992, the ACMA can suspend or cancel an amateur license if the holder contravenes a condition of the license. In the case of the recent cancellation, crucial information was provided by other radio amateurs that alerted the ACMA to the ongoing non-compliance and assisted the investigation. Under Australian privacy laws the name of the ham who had his license revoked was not revealed. (WIA)

**

HAM RADIO SAFETY: DX OPERATION CANCELLED AFTER BURGLARY

W6ZL, has cancelled his current A35KL operation from Tonga. David has decided to leave Tonga on June 2nd and return to California after his guesthouse room was burglarized last weekend. He says that he may be back in Tonga for the CQWW contest, later this year. (OPDX)

**

D-STAR NEWS: VK HAM DEVELOPING ALTRETNATIVE TO AMBE ENCODER

While the D-Star protocol developed by the Japanese Amateur Radio League is open and freely available for use by anyone. However, the AMBEvoice encoding scheme currently used by the D-Star protocol is not. Rather it is patented by DVSI, Inc. and its licensing fee is one of the factors in the

higher cost of a D-Star radio over a similar analog FM unit. But that could change if one Australian ham has his way.

Development on an open source, freely available alternative to AMBE is being spearheaded by David Rowe, VK5DGR. This open voice protocol is called Codec 2. Right now, it is in a highly experimental stage but has several advocates in open source software circles.

Rowe says that a D-Star protocol implementing Codec 2 Digital Voice would significantly drop the entrance level cost to the mode and appeal to a much wider audience. He says that once Codec2 is stable and competitive, it would offer a real, developed-by-a-ham alternative to the patented AMBE voice encoder.

You can find out more about Codec 2 at David Rowe's development site. Its in cyberspace at tinyurl.com/2362n3t (KE7HQY)

**

HAMVENTION 2010: ATTENDENCE CONTINUES AN UPWARD GROWTH TREND

According to its Public Relations Director Henry Ruminski, W8HJR, the official attendance for Hamvention 2010 was 19,750. This continues the upward tend begun last year when 18,877 were counted going through the gate at the Hara Arena following the 2008 record ten year low figure of 17,253.

While this is a good positive direction it's also still a long ways from the 10 year record headcount of 28,804 set back in 2000. The all time record Hamvention attendance was in set in 1993 when 33,669 radio amateurs from around the world made their way to Dayton, Ohio for this annual ham radio right of Spring. (Hamvention Remailer, W8HJR)

**

THE SOCIAL SCENE: AMSAT SPACE SYMPOSIUM IN CHICAGO IN OCTOBER

AMSAT has announced that its 2010 Space Symposium and Annual Meeting will be held on Friday, October 8 through Sunday, October 10. This years venue is the Chicago area Elk Grove Holiday Inn which is near O'Hare Airport for the event. This is the same hotel that recently has hosted the Central States VHF Conference and W9DXCC events.

AMSAT has also put out a call for papers to be presented at the Symposium. These can be on any topic of interest to the amateur satellite community. A final copy must be submitted by September 1st for inclusion in the printed proceedings. Abstracts and papers should be sent via e-mail to k9jkm (at) amsat (dot) org. (ANS)

**

THE SOCIAL SCENE: INTERNATIONAL EME CONFERENCE IN DALLAS IN AUGUST

The North Texas Microwave Society will host the 14th International EME Conference in Dallas, Texas, on August 12th to the 14th. Gerald Youngblood, K5SDR, President and Chief Executive Officer of FlexRadio, will

be the lunchtime speaker on Friday, August, 13 and Nobel laureate Joe Taylor, K1JT, will speak about the 432 MHz EME event at Arecibo on Saturday, August 14th. Presentations will also include a noise figure workshop hosted by Al Ward, W5LUA, Tommy Henderson, WD5AGO, and Tony Emmanuel, WA8RJF. This is the first time the conference is to be held in the US since 2004. (SARL)

**

FOLLOW-UP: WA2INM - SK -- FAMILY REQUEST

Nicole Ledoux Levy, the widow of the late Larry Levy, WA2INM, has asked that we pass along the following information. In lieu of flowers, that donations in Larry Levy's name can be made to the Cornell Feline Health Center, for the William Ledoux Fund, College of Veterinary Medicine, Hungerford Hill Road, Ithica, New York, 14863.

As we reported last week, WA2INM died of a massive heart attack on Sunday night, May 30th. In the world of electronics he was best known as the developer of sound controlled entertainment lighting and as a contributor to the design of the original I-B-M personal computer. He went on to become a world champion cat breeder with offices in New York and Paris. (ARNewsline(tm))

EMERGING TECHNOLOGY: NEW SMAT CELLPHONE ANTENNA FOER RUGGED TERRAIN S&R

Emergency search and rescue workers in rugged, rural areas may never lose a cell phone call again. This, thanks to a new antenna developed by Montana State University researchers in collaboration with Advanced Acoustic Concepts, Inc.

The Montana State University antenna is considered a "smart" or "adaptive array" antenna because it uses computer technology to automatically aim the message transmission beam in the right direction, chooses the most appropriate signal strength, optimize the strength of transmitted beams and adapts to the environment. The automatic control allows users to communicate in rugged terrain while on the move.

Unlike normal omnidirectional antennas, smart antennas maintain a direct signal between individuals users and cell sites. This will likely mean fewer dropped calls and the ability to move more data, such as streaming video. You can read more about this antenna on-line at tinyurl.com/2cwad9m (Science Daily)

**

EDUCATION: NASA LAUNCHES INTERACTIVE SIMULATION OF SATELLITE COMMUNICATIONS

NASA has unveiled an interactive computer simulation that allows virtual explorers of all ages to dock the space shuttle at the International Space Station, experience a virtual trip to Mars or a lunar impact. It also allows users to explore images of star formations taken by the Hubble Space Telescope.

In an effort to excite young people about space and NASA's missions, the agency has launched its online Space Communication and Navigation or SCaN simulation. The interactive simulation offers a virtual 3-D experience to visualize how data travels along various space communications paths.

The interactive Space Communication and Navigation simulation allows visitors to select spacecraft and experience a "flythrough," or a tutorial with images and descriptions of NASA's three space communication networks. The Space Network flythrough also shows how data is relayed from NASA's White Sands Test Facility to the space station via the Tracking and Data Relay Satellite System. This is a network of communication satellites and ground stations NASA uses for space communications.

Finally, in the Deep Space Network demonstration, visitors learn how NASA communicates with the Mars Exploration Rovers, Sprit and Opportunity by using the Madrid Deep Space Network antenna. This to send data to the Mars Reconnaissance Orbiter, which then relays the data to the rover.

To explore the Space Communication and Navigation network simulation, please take your web browser to the www.nasa.gov/multimedia/3d_resources/spacecomm.html (NASA)

RADIO IN SPACE: SOLAR DYNAMICS LAB ACTIVATED

The images from cameras and sensors on recently launched Solar Dynamics Observatory satellite are a dramatic reminder of the power of the star that warms our planet.

Since the spacecraft and its instruments were officially commissioned on May 14, more than 5 million images have been transmitted back to Earth. Some show clouds of magnetized gas big enough to engulf the Earth breaking away from the outermost layer of the sun. These Coronal Mass Ejections which are usually accompanied by solar flares can last for several hours and travel through space at over 1 million kilometers per hour.

Coronal Mass Ejection's usually take about three days reach Earth, but very fast ones can arrive in under a day. And as they penetrate the Earth's ionosphere the charged particles and magnetic forces emit radiation across the electromagnetic spectrum, from low-energy radio waves through to high-energy gamma rays,

NASA launched the Solar Dynamics Observatory satellite in February to gain a better understanding of how the sun behaves and why and also to keep a closer watch on space weather. About 70,000 each day will be radioed back to Earth during the expected five year life of this on-orbit bird. (Adapted from the Japan Times)

**

WORLDBEAT - UK: WWII DOCUMENTS TO BE PUT ON LINE

Millions of documents stored at the United Kiingdom's World War II code-breaking center, Bletchley Park, will soon be made available online. This after Hewlett-Packard donates a number of scanners to the center in Milton Keynes so volunteers can begin the task which is expected to take over 3 years. The entire story is available on-line at tinyurl.com/3x2cfz6 (BBC)

**

WORLDBEAT - AUSTRALIA: ICOM DONATES D-STAR REPEATER TOP CELEBRATE WIA AT 100

Icom Australia has donated a new D-Star repeater to the Wireless Institute of Australia for installation in the Canberra area. The Canberra Region Amateur Radio Club will be the D-Star group responsible for the installation and operations of repeater on behalf of the WIA.

The repeater will be operational on 2 meters using Port C and have the callsign of VK1RWN. The timeframe for the installation and operations of the new D-Star system is yet to be determined.

The announcement of this donation was made by Takashi Aoki, Manager of Icom Australia at the official WIA Centenary dinner on Saturday night, June

5th. This donation from Icom was made to celebrate 100 Years of the WIA. (WIA News)

**

DX

In DX, word that a W0SD, W0OE, N0QJM, W7XU will be operating portable C5 Gambia from June 25th to July 6th. Their main focus will be 6 meters will focus on 6 meters with plans to remain on 50.103 Mhz. They will have an amplifier coupled to a large yagi from a seaside location and will have a breakable beacon. QSL as directed on the air.

G4AHK, is now active as 7Q7BJ from Malawi and will be on the air until June 22nd. Listen out for him on 160, 80 and 40 and meters. QSL via his home callsign.

DL1DA will be active stroke FJ from Saint Barthelemy Island between June 8th and the 20th . Activity will mostly be on 40 through 6 meters using CW and RTTY. QSL him also via his home callsign.

Lastly, N2NL, will be returning to Guam on June 17th, and will be there for three years. He will be active outside of contests as KH2 stroke N2NL and during contests as NH2T. QSL via Logbook of the World or via W2YC.

(Above from various DX news sources)

THAT FINAL ITEM: US CONGRESS CALLS SOUTH AFRICA HAM WHO SPOTTED SPY PLABNE A THREAT TO SECURITY

And finally this rather bizarre follow-up to our story two weeks ago concerning a South African ham who spotted a super secret United States military spy plane as it circles the globe. Now a local newspaper is deeming him to be a thereat to the security of the United States because of his accomplishment and those of his friends who helped him. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the rest of this rather unique tale:

--

South African retiree and amateur astronomer Greg Roberts, ZS1BI, says that he and his group have been labeled a threat to US national security. This after Roberts with the aiud of other amateur astronomers world-wide seem to have successfully located and recorded images of the US Air Force secret X-37B space craft on-orbit.

The South Africa Sunday Times reports that with the help of a group of amateur astronomers from around the world, including a gasoline station attendant in Canada, that Roberts calculated that the top-secret spacecraft took about 92 minutes to orbit earth. Also that it flies over hot spots such as Afghanistan, Pakistan, Iraq and Korea.

The discovery of the craft, which is 8.9m long and travels at 8km a second, earned Roberts a mention in the New York Times, on the BBC and in several

science publications. As a result, Roberts says that he and his group had been labeled a threat to national security by the U-S Congress. He and his wife now joke that that the Men in Black will walk up our driveway some day.

But not everyone looks at Roberts work in that way. Dr. Ed Elson, is a researcher at the University of Cape Town's department of astronomy. He lauded Roberts and the group of amateur astronomers. He says that the fact that they managed to find the X-37B and are now tracking the craft is certainly quite an admirable feat, especially from an observational astronomer's perspective.

Dr. Elson added that Roberts and his team certainly have a very respectable track record, claiming to be tracking almost every classified object that has been launched in the past five years. Because of this, he sees no real reason to refute their claim of having found the X37-B.

--

For his part ZS1IBI says that his group of amateur astronomers feel that they are doing a service to the public by providing to them what they really need to know. He added that they do not consider themselves a threat to security. He notes that anyone else can do exactly the same thing. You can read the entire South Africa Sunday Times story on line at tinyurl.com/2cwv7hv (SARL)

I found it in the FCC's Electronic Comment Filing System (ECFS):

http://fjallfoss.fcc.gov/ecfs/document/view?id=7020246777

A link to the full text of the FCC's reply was published in the FCC
Daily Digest for June 8th, 2010:

http://www.fcc.gov/Daily_Releases/Daily_Digest/2010/dd100608.html

Unfortunately, the mail filters for rec.radio.info didn't forward it on,
as they didn't find certain keywords in the text that indicated that
this was an amateur-radio-related (Part 97) action by the FCC.
Otherwise, it would have been automatically posted here.

Thank you Paul.

I'm kind of at a loss to see what his point was.

Part of it feels like this:
"Everything that can be invented has been invented."

Charles Duell, Commissioner of US Patent Office, 1899 ;-)

And part of this feels like a kind of end run to include
Morse code as part of the basis and purpose of the ARS.

Personally, I think it's the latter.

"through preservation of the history of the radio art"

I think the FCC did the right thing.

So, where is this "Very Hairy" ballad to be found?

1799. Ballad of the Hairy Tapiola Hillbilly

Newsgroup: rec.radio.amateur.policy

I can't find the Hairy Tapiola Hillbilly ballad! Can someone post a
link?

1800. Re: Ballad of the Tapiola Hillbilly

Well at last I found the thread for the original ballad! Now, all I have to do is to find the "Hairy Tapiola Hillbilly" and the "Very Hairy Tapiola Hillbilly" ballads. Then my collection will be complete.

Do you think he's related to Gregg? Or is he related to you? I think you might be related to Gregg. If so, are you applying for membership in the Distinguished Troll Society? We can always use a few good trolls, and there are none better than our little buddy Gregg. If you are related, come on out and play with us. Were tearing down Usenet and you can help.

I think he had the idea to update the Basis and Purpose section, which hasn't been changed much if at all since it was added to the regs in 1951.

Fun fact: Back in 1951, ARRL opposed the addition of the B&P to the regs. It was an FCC idea, and IIRC all radio services got such sections.

> Part of it feels like this:
> "Everything that can be invented has been invented."

I see it more as an acceptance of reality that many if not most hams today don't build their own rigs, even from kits. And that our other roles have changed over the years.
>
> And part of this feels like a kind of end run to include

> Personally, I think it's the latter.
>
> "through preservation of the history of the radio art"

I don't really see that, but if so, what's the harm? It's clear FCC won't even consider bringing back any form of Morse Code testing, except possibly to add some technical questions to the written tests. (Which would be a good thing, btw, if the questions are about things like necessary/occupied bandwidth of various modes).

"Preservation of the history" could also be interpreted to mean things like mode-specific subbands for AM and other modes, relaxation of some technical requirements for older gear (spurs, chirp, hum), reversion to the old 1 kW input rule at the option of the ham, etc.

> I think the FCC did the right thing.
>
I don't see that the proposal changed 97.1 all that much. Also, not being able to produce the exact dates of things such as when the B&P were added might not have impressed the Commission.

If I read the calendar correctly, it took FCC seven months to decide not to go anywhere with the proposal.

I was kind of disappointed that FCC didn't even put it up for comments. But I think FCC prefers that hams present fully-developed proposals with evidence of strong support in the amateur radio community.

If you are saying you did not see the point of the petittioner.. clearly the FCC fully agrees with you.

I would like to see the petittion once again. (I likely saw it long ago but not recently)

I do see folks saying things (IN OTHER AREAS) like "This law was written in 19xx and has not been modified since" (Fact is, the last time I read that it was a law where we got updates every month when I was working, no I won't say what law it was cause only a couple paragraphs apply to Amateur Radio, and, I might add, both got updated)

Sometimes a law does not get changed,,, Because the "original" version was very well written and there is no need to change it.

In the case of the purpose of Amateur radio.. I do not see as it has changed.. Refined a bit, Emphasis moved from one thing to another

(Within the original purpose statement) yes,,, but changed enough to need a re-wirte.. I doubt that will ever happen.

Jim,

The "advancement of the SoTA" clause MUST remain in our basis and purpose charter, else the next step would be to DENY us the privilege of putting our experiments on the air.

On that date, Amateur Radio would become a hulk adrift and heading for the rocks.

> RADIO LAW: NY HAM HANDED CELLPHONE VIOLATION FOR USING MOBILE GEAR
>
> Amateur radio operators in upstate New York are up in arms over a traffic
> ticket handed to Steve Bozak, WB2IQU, while he was operating mobile in the
> city of Troy. And Bozak is ready to force the issue in court. Amateur
> Radio Newsline's Norm Seeley, KI7UP, has more:
>
> --
>
> A 34 year veteran of the hobby, Steve Bozak, WB2IQU owns an antenna company
> and is well known in the upstate New York areas. But recently he was
> pulled over at an intersection while on his way to breakfast with fellow
> ham radio enthusiasts. He was then issued a ticket for talking on a cell
> phone while driving after Officer Mark Millington dismissed Bozak's claims
> that the radio was not in fact a telephone.
>
> The section of New York's vehicle and traffic law Bozak was cited for
> violating is designated as 1225-c. It requires a phone to be in the
> immediate proximity of the driver's ear. It also defines the types of
> communication devices it applies to as ones interconnected to a public
> switched telephone network provided by a commercial mobile radio service.
>
> But Bozak was not using a cellphone. He was using a small Kenwood H-T that
> is in no way even remotely similar to a cellphone. And on its face value,
> the statute does not refer to devices like a ham radio transceivers that
> independently transmits a signal with no telephone interconnect.
>
> Sgt. Terry Buchanan is the Police Department's spokesman who worked
> traffic
> patrols for years. He says that he doesn't recall this issue coming up in
> the past. He said the department would have no comment on the matter
> because it is still pending in court.
>
> Bozak is scheduled to appear on June 23rd but that date could be pushed
> back because Bozak has decided to force the issue. As a start, he has
> requested a supporting deposition from Officer Millington, who is typically
> assigned to Troy's public schools and rarely works traffic patrol. Bozak
> wants Millington to specifically detail what happened and explain how he

> was breaking the law.
>
> And when the case does come to a hearing more than a dozen local Troy area
> hams plan on being there with him.
>
> For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale,
> Arizona.
>
> --
>
> If he looses in court, Bozak faces a $100 fine. A loss might also cause
> other hams in New York State to face similar citations simply for operating
> mobile as they have since ham radio first began. (troyrecord.com and
> various other published reports)

> ENFORCEMENT: HAM CHARGED IN FALSE THREAT REPORT
>
> A Connecticut ham has been arrested in connection with incident that
> occurred at Walmart in Norwich this past January. The May 28th issue of
> the Norwich Bulletin reports that Keith J. Mutch, of Norwich has been
> charged with second-degree Breach of Peace, first-degree reckless
> endangerment and falsely reporting an incident in the first
> degree. According to the FCC database, Mutch holds the call KB1RBI.
>
> By way of background, back on January 26th Norwich police responded to a
> report of a man in front of the local Walmart who was armed with a shotgun
> and was threatening to shoot people. On their arrival it was determined
> the report was false and no one was injured.
>
> Initial investigation by police revealed that store security personnel had
> heard the report of the man with the shotgun over their two way radio
> system, however none of the personnel had made the transmission. A police
> investigation concluded that Mutch had used a portable ham radio set to
> make the transmission. (Norwich Bulletin)

Greg's never mentioned Mark, so I've never had any cause to
check. Since Greg's relatives are of no significant importance to me,
I doubt I'll make any effort to find out.

Always follow your dream!
Unless it's the one where you're at work in your underwear during a
fire drill.

1838. Ameritron AL-811 on 11 meters?

Newsgroup: rec.radio.amateur.policy

I think I'll go dumpster diving and run my Ameritron and HF rig on eleven meters just to piss off the local low-lifes.
Trouble is that I don't have an echo box or a roger beep and without either of both of those, you ain't s*it on 11 meters.

Maybe Mark has one that he would sell me.

And while I'm at it I think I'll use Roger Wiseman's call sign.
After all, if Roger can use Lloyd's call sign at will, turnabout is fair play.

Roger can rest in comfort that I will not use his call sign or address to "advertise" the alleged sale of kiddy porn as he did to Lloyd Davies.
Roger has me hands down there...I could never sink as low into the gutter as Roger.

1839. About those "man boobs, Roger?

Hi dumbass, apparently, you can't read headers, but then you got that phony Phd from a degree mill, like Pacific College of Graduate Studies/ Pacific International University!

Pacific International University was an unaccredited, conservative, Christian university and seminary located in Springfield, Missouri. 1989 alumnus of Pacific International University Carl Baugh was the university president.[1] The school has been referred to as a diploma mill.[2][3] Pacific International University is not accredited by any accreditation body recognized by its country. As such, its degrees and credits might not be acceptable to employers or other institutions, and use of degree titles may be restricted or illegal in some jurisdictions.
The school was founded in 1980 as Pacific College of Graduate Studies by Clifford Wilson, PhD, and incorporated in 1987 as Pacific International University. It is also sometimes known as Pacific College Incorporated.[3]

The school offers only correspondence education, so has no campus. It offers distance learning courses in biblical theology, ministry, cults, and many related subjects. It is unknown what credentials the professors have in these fields. The school offers B.D., B.Th., M.Div., M.Th., and doctoral degrees in Divinity and Theology; as an unaccredited school these have no official academic standing.

Poor Ace Ratshit, can't even claim to have a degree from a REAL college or University!!!!!!

http://en.wikipedia.org/wiki/Pacific_International_University

Nick-Names, Baby's Name
Children often have a way of coming up with a name for the baby. I
think it makes them feel a part of the whole scene. A niece begged me
to name my first daughter Big Bird. A friend's daughter choose
broccoli for the new baby. It's cute in utero, but allowing it to
continue will only result in your child being named Billy Boo boo
Belly - or Boo Boo for short!

Poor "Anon," he must've paid all his savings for his "diploma" from a
diploma mill on mail order, too bad he spent his secondary education
years in those SLD classes..... He seems to be like N0VFP, seeing
Roger everywhere and projecting his own activities like impersonation
upon others. of course, since he is N0VFP, his poor punctuation gives
him away. Like when N0VFP posted as "Christy Davies". BTW, How's
that Wonderbra you wear working for you?

==> + PUBLIC SERVICE: AMATEURS IN ARKANSAS PROVIDE SUPPORT TO LOCAL
AUTHORITIES AFTER FLOOD KILLS 20

In the early hours of Friday, June 11, as many as 300 campers were
taken unawares when 6-10 inches of rain fell in the rugged Ouachita
Mountains. The deluge caused the normally quiet Caddo and Little
Missouri rivers to overflow their banks during the night. Around dawn,
floodwaters barreled into the Albert Pike Recreation Area, a 54-unit
campground in the Ouachita National Forest, about 75 miles west of
Little Rock. Cars were wrapped around trees and children's clothing
could be seen scattered across several campsites. In all, authorities
said that 20 people lost their lives; 18 of the 20 victims have been
publicly identified, among them eight children age 7 or younger. Eight
of the 18 were from Louisiana, seven were from Texas and three were
from Arkansas. The Pike County Sherriff requested the assistance of
Amateur Radio operators to assist with search and rescue operations, as

well as communications support, at the site. Read more here
<http://www.arrl.org/news/amateurs-in-arkansas-provide-support-to-local-autho
rities-after-flood-kills-20>.

==> PUBLIC SERVICE: CALIFORNIA HAMS HELP COORDINATE OFF-ROAD RESCUE

On Saturday, June 12 around 1:30 PM local time, Jim Siemons, AF6PU,
of Walnut Creek, California, was checking his e-mail when he received a
message from a friend who was concerned that his brother -- who, along
with four friends had taken an off-road adventure along California's
famed Rubicon Trail -- had not come home when expected. Siemons' friend
told him that his brother's group had left on Wednesday with four
off-road vehicles in an attempt to cross the Trail. Since Siemons and
his friend's brother were members of the same off-roading club, his
friend thought Siemons might have some information. Siemons forwarded
the e-mail to several other club members; within five minutes, he
received a phone call from fellow club member Jenny Ward, KI6YBQ,
suggesting that he try Amateur Radio to attempt to locate the missing
group. There is no cell phone coverage on the Trail and very limited
official agency radio coverage, making Amateur Radio the only effective
means of communication in the area. Read more here
<http://www.arrl.org/news/california-hams-help-coordinate-off-road-rescue>.

==> + FCC NEWS: ARRL COMMENTS IN FCC SPREAD SPECTRUM PROCEEDING

In response to a 2006 ARRL Petition regarding spread spectrum issues,
the FCC released a Notice of Proposed Rule Making (NPRM) on March 16
(WT Docket No 10-62). The Commission is looking to amend Part 97 to
facilitate the use of spread spectrum communications technologies by
eliminating the requirement that amateur stations use automatic power
control (APC) to reduce transmitter power when the station transmits a
spread spectrum (SS) emission, as well as reducing the maximum
transmitter power output when transmitting a SS emission. The ARRL
filed comments on this matter on June 14, 2010. Read more here
<http://www.arrl.org/news/arrl-files-comments-with-fcc-regarding-spread-spect
rum-issues>.

==> ATTENTION WEATHER SATELLITE USERS: FCC SEEKS INFORMATION, COMMENTS
ON CURRENT USE OF 1675-1710 MHZ

The National Broadband Plan (NBP) recommends that the FCC should
make 500 MHz of spectrum available for broadband use within the next 10
years, including 300 MHz between 225 MHz-3.7 GHz for mobile use in the
next five years. The FCC's Office of Engineering and Technology (OET)
has engaged in discussions with the National Telecommunications and
Information Administration's (NTIA) Office of Spectrum Management to
begin examining various frequency bands that may be suitable for mobile
broadband use. NTIA has preliminarily identified the 1675-1710 MHz band
for such use and is examining the impact on its incumbent federal
users. As such, the FCC issued a Public Notice (ET Docket No 10-123) on
June 4, 2010, seeking information to help better comprehend the current
use of the 1675-1710 MHz band by non-federal entities and better

understand its potential utility for broadband. This portion of the spectrum is utilized by weather satellites. Read more here <http://www.arrl.org/news/fcc-issues-public-notice-to-seek-information-comments-on-current-use-of-1675-1710-mhz>.

==> + FCC NEWS: FCC SEEKS COMMENTS ON AMATEUR 5 MHZ (60 METERS) ALLOCATION

In May, the FCC released <http://www.arrl.org/news/fcc-proposes-additions-changes-to-amateur-5-mhz-allocation> a Notice of Proposed Rulemaking (NPRM) -- ET Docket No 10-98 <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-76A1.pdf> -- proposing to amend the Part 97 rules governing the Amateur Radio Service. Specifically, the Commission looks to modify the rules pertaining to the use of five channels in the 5330.6-5406.4 kHz band (60 meters) to replace one designated channel with one that is less encumbered, to authorize three additional emission designators and to increase the maximum authorized power in this band. On June 15, a summary of the NPRM was published in the Federal Register <http://edocket.access.gpo.gov/2010/pdf/2010-14384.pdf>, which started the clock on the deadline for comments. Comments must be filed on or before July 15, 2010 (30 days after publication in the Federal Register); reply comments must be filed on or before July 30, 2010 (45 days after publication in the Federal Register). Instructions on how to file comments are listed beginning on page 6 of the NPRM <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-76A1.pdf>.

==> + ARRL FIELD DAY: FIELD DAY STATION LOCATOR SERVICE RETURNS FOR 2010

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator Web site <http://www.arrl.org/field-day-locator> and follow the instructions (this is a different link than was printed in the Field Day packets). ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 26-27, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Service.

==> + ON THE AIR: A HAM RADIO HOMECOMING

Beginning with the 2010 ARRL November Sweepstakes <http://www.arrl.org/sweepstakes>, the prohibition against alumni

operating at a school club station has been repealed. According to Ward Silver, N0AX, the goal of the rule change is to get more school clubs active for Sweepstakes and on HF. Sweepstakes is just a little over four months away -- the first and third weekends of the month. What are your plans? Wouldn't it be nice to hear the call sign of your alma mater ringing out in the middle of the Sweepstakes exchange? Sure it would!

"Entering Sweepstakes in the Multioperator category was once a staple of the fall semester's competitive atmosphere, but many high school and collegiate clubs have fallen silent or nearly so over the past decades," Silver explained. "Your school club might be interested in hosting an alumnus or two -- why not contact them? If the club station has been inactive in recent years, this would be a good way to help get activity jump-started again. To get the juices flowing, challenge a nearby club or try to beat a score from days gone by." Read more here <http://www.arrl.org/news/a-ham-radio-homecoming>.

==> + INTERNATIONAL PERSPECTIVE: FORTHCOMING IARU ACTIVITIES AT THE ITU

Working Parties 1A and 1B of the International Telecommunication Union's (ITU) Study Group 1 will meet in Geneva from June 21-28. A major item of discussion will be protection of radio services from interference from Broadband over Powerline (BPL), called Power Line Communications (PLC or PLT) in Europe. The International Amateur Radio Union (IARU) has already contributed to the ITU-R report SM2158, Impact of Power Line Telecommunication Systems on Radiocommunication Systems Operating in the LF, MF, HF and VHF Bands Below 80 MHz. This report shows the acceptable criteria for degradation of the HF radio noise floor caused by BPL is defined as being 0.5 dB. Work in WP1A will concentrate on the protection of radio services from the effects of BPL in range from 80-200 MHz. Read more here <http://www.arrl.org/news/forthcoming-iaru-activities-at-the-itu>.

==> + LEGISLATIVE: HR 2160 NOW COUNTS 40 HOUSE SPONSORS

Last month, another Congressional Representatives -- Mike McIntyre (D-NC-7) -- pledged his support for HR 2160 <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>, The Amateur Radio Emergency Communications Enhancement Act of 2009, bringing the total number of cosponsors to 40, including original sponsor Sheila Jackson-Lee <http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bill-in-congress> (D-TX-18). HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), Jo Bonner, (R-AL-1), John Boozman (R-AR-3), Madeleine Bordallo (D-Guam), Andr&#65533; Carson (D-IN-7), Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Jeff Fortenberry, (R-NE-1), Scott Garrett (R-NJ-5), Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey (D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy

(D-OH-15), Ron Klein, (D-FL-22), Tom Latham (R-IA-4), Zoe Lofgren (D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Michael E. McMahon, (D-NY-13), Cathy McMorris Rodgers, (R-WA-5), Charlie Melancon (D-LA-3), Candice Miller (R-MI-10), Dennis Moore (D-KS-3), John Olver (D-MA-1), Bill Posey (R-FL-15), Denny Rehberg, (R-MT), Dana Rohrabacher (R-CA-46), Aaron Schock, (R-IL-18), Bennie Thompson (D-MS-2), Michael Turner (R-OH-3), Greg Walden, W7EQI (R-OR-2), Peter Welch (D-VT), David Wu (D-OR-1), C.W. Bill Young (R-FL-10) and Don Young (R-AK). On the Senate side of Capitol Hill, S 1755
<http://www.arrl.org/news/senate-introduces-companion-bill-to-hr-2160>
-- also called The Amateur Radio Emergency Communications Enhancement Act of 2009 -- cleared the Senate
<http://www.arrl.org/news/amateur-radio-bill-passes-senate-moves-to-the-house>
by unanimous consent in December 2009 and now sits in the House Committee on Energy and Commerce. Click here
<http://www.arrl.org/sample-letters> for information on how to encourage your Congressional representative to sponsor HR 2160.

==> + SOLAR UPDATE

Tad "The starred and stately nights seemed haughty dames in jeweled velvets, nursing at home in lonely pride, the memory of their absent conquering Earls, the golden helmeted Suns <http://www.classicreader.com/book/309/29/>!" Cook, K7RA, reports: Sunspots disappeared for the past two days, June 15-16, which is a bit scary considering the weak solar cycle we've seen recently. In the northern hemisphere, we are just a few days from the summer solstice. Despite the lack of sunspots for the last two days of the June 10-16 week, the average daily sunspot numbers rose 2.5 points from the previous week. Geomagnetic activity peaked on June 16, with the planetary A index at 19 and high latitude College A index at 42. This should decline over the next couple of days. Look for more information, including a look at some reported 10 meter propagation from Arizona to Rarotonga, on the ARRL Web site on Friday, June 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Herman Melville's Moby Dick <http://www.classicreader.com/book/309/29/> (Chapter 29, "Enter Ahab; to Him, Stubb").

==> THIS WEEK ON THE RADIO

This week, a running of the NCCC Sprint Ladder takes place June 18. The Kids Day Contest and the Feld Hell Sprint are both June 19. The All Asian DX Contest (CW) and the West Virginia QSO Party are June 19-20. The Run for the Bacon QRP Contest is June 21 and the SKCC Sprint is June 23. Next week, everyone is on the air for ARRL Field Day on June 26-27. Look for the His Majesty King of Spain Contest (SSB) and the

Marconi Memorial HF Contest, also on June 26-27. The SARL Digital Contest is June 27 and the RAC Canada Day Contest is July 1. There is another running of the NCCC Sprint Ladder on July 2. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1714 - June 18 2010

Amateur Radio Newsline report number 1714 with a release date of
Friday, June 18, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur radio gets ready for the 2010
Scouting Jamboreee, hams assist as floods hit Arkansas and tornadoes
hit Ohio, a dispute over first place in the International Amateur
Radio Headquarters Station category and a balloon ride across the
English Channel gets tracked using A-P-R-S. Find out the details on
Amateur Radio Newsline(tm) report number 1714 coming your way right
now.

RADIO CELEBRATIONS: HAM RADIO AT THE 2010 BOY SCOUT JAMBOREE

The 2010 National Scout Jamboree is a little more than a month away.
This years theme is the celebration of 100 years of scouting in the
United States and ham radio will be an important part of the
festivities. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at our
East Coast bureau with more:

--

For anyone who's ever been or still is a Boy Scout - youth or leader -
celebrating an anniversary of this significance is truly a
once-in-a-lifetime happening.

And, why not do it with a huge campout or jamboree at a military base
called Fort AP Hill, Virginia, just outside of Woodbridge?

Of course, to make it really a special event you set up an amateur radio
station!

The staff of K2BSA - the call sign of the Boy Scouts of America - is making
final preparations for the event - which runs from July 26 through Aug. 4.

Ed Dudley, WA4ISI, is the volunteer coordinator for the K2BSA staff. He
says the staff of nearly 50 volunteers is made up of folks from a variety
of fields who will be coming from all around the country.

"We have doctors and lawyers," Dudley says. "We have scientists, engineers
and we have youth that are Scouts that will be part of the staff."

Among the youth, Andrew Koenig, KE5GDB, Amateur Radio Newsline's 2009 Young Ham of the Year.

Dudley says the centerpiece of the K2BSA operation is a large demonstration station located inside a large circus-style tent with HF and VHF stations set up, a temporary antenna farm that might rival some of the smaller DX operations, and plans in the works for a contact with one of the astronauts aboard the International Space Station.

But Dudley says that's not all.

"We'll also be doing the Radio merit badge at the merit badge midway and we have a third group that will be doing licensing and testing," Dudley says. "We'll have classes and give the test every evening that there's not an arena show.

"When they have the arena shows, everything shuts down. But every other night we'll have testing for the amateur radio licenses, all levels."

Dudley says the mission of the K2BSA staff is clear - showing off the best of amateur radio.

"Well, we have an opportunity here to show ham radio to lots of Scouts, and when I say lots, I mean lots," Dudley says. "There are approximately 40,000 Scouts and adults that are actually participants in the jamboree, plus there's six or seven-thousand staff members.

"All of these people can come in and see what's going on. But, beyond that there may be several hundred thousands of visitors."

At the K2BSA demonstration, Dudley says the idea is to get Scouts and visitors talking on the air with other Scouts around the country and around the world.

"I'd like to see Scouts from all over the world that can come into a local ham station and make a contact and talk to some of these guys at the jamboree," Dudley says. "That's what the demonstration is

"It's sort of like Jamboree on the Air in that we're trying to do contacts with other Scouts. Of course we'll talk to everyone else, too."

The bottom line: Dudley would love to see the ham community get active during the jamboree. And, of course, if you contact K2BSA, there is a nice little bonus.

"Get on your radio and give us a call," Dudley says. "If you'd like a QSL card, we'll have a unique QSL card for the jamboree.

"We do ask that you send an SASE along with that because we may make thousands of contacts and we'd love to send you a card but we can't afford to pay for the mailing for all of them."

Check out the July QST cover story by Bill Morine, N2COP, to learn more about K2BSA's operations at the National Boy Scout Jamboree and listen for the web address at the end of this story, too.

Your humble correspondent will be part of the K2BSA staff for the third time in my Scouting career. And, I hope to be able to file a story or two for the Amateur Radio Newsline while there.

For now, for the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More information on this years Scout Jamboree is on line at www.nsj2010ham.com (NT3V, ARNewsline(tm))

RESCUE RADIO: HAM RADIO CALLED OUT IN ARKANSAS CAMPSITE FLOOD

Ham radio was called out on June 6th to assist in the search for missing people following flooding in the Albert Pike campground, about 75 miles west of Little Rock, Arkansas. Despite temporary cell phone towers being installed, emergency personnel still need help communicating in the remote Arkansas wilderness. Because of this local law enforcement has requested the help of ham radio operators across the state.

The Central Arkansas Ultra-High Frequency Amateur Radio Club was quick to respond. Its spokesman is Josh Carroll, N5JLC. He says cell phones can only cover so much of an area. According to Carroll the cellular towers and services that have been put in place are functioning properly. The problem is they're working for a certain portion of the affected area, and the area we're currently concerned with is still very spotty as far as cellular service and communications. So that's why they requested the assistance of the ham radio community.

The flash flood swept through a popular Arkansas campground on Friday, June 4th. At least 19 people have been confirmed killed, and one person is still missing after sudden severe floods rampaged through the area. (NPR, N5LJC)

RESCUE RADIO: OHIO HAMS READY AS TORNADOES STRIKE

The ARRL reports that during the early overnight hours of Saturday, June 5 through Sunday, June 6, severe weather and tornadoes ripped across an area of Northwestern Ohio, laying a large path of destruction. ARES and SKYWARN groups in Erie, Huron, Sandusky and Wood Counties activated nets as early as 10:30 p.m. Eastern Daylight Time on the 5th, with many not standing down until 4:30 a.m. the next day. According to ARRL Ohio Section Manager Frank Piper, KI8GW, traffic on the nets was filled with reports of severe weather damage, flooding and downed power lines. (ARRL)

ENFORCEMENT: CONNECTICUT HAM ARRESTED ON SUSPICION OF ARSON

A Norwich, Connecticut ham arrested last month on charges he called in a fake report of a gunman at Wal-Mart is in custody again. This time on charge of suspicion of arson linked to a 2007 fire.

According to the Norwich Bulletin on-line newspaper, Keith Mutch, KB1RBI, was arrested Wednesday, June 16th on a warrant on charging him with second degree arson and first degree criminal mischief in connection with a June 7, 2007 fire at a vacant home in Norwich. No injuries were reported at the blaze.

Mutch was also charged with tampering with a witness for actions connected to his May 28 arrest on charges he used a two way radio on January 26th to call in reports of an armed man threatening to shoot people outside Wal-Mart in Norwich. Police said they developed information that Mutch had contacted one of the witnesses in the Wal-Mart incident and tried to convince her to change her story.

Mutch was arriagned on Thursday, June 17th in Norwich Superior Court. He is being held on a total of $325,000 in bonds.

Norwich Police Lt. Stephany Bakoulis said that an investigation continues into suspicious fires and more arrests are expected. More is on-line at tinyurl.com/2ffee7h

ENFORCEMENT: CALIFORNIA SOS HOAXSTER SENTENCED TO 30 MONTHS IN FEDERAL PRISON

A federal judge sentenced Kurtis Thorsted of Salinas, California to 30 months in federal prison. This, after the 53 year old pleaded guilty in July in U.S. District Court in San Jose to broadcasting a fake distress signal in October 2008.

At that time he made the transmissions Thorsted told would-be rescuers in that he was in a kayak off the coast of Santa Cruz and having difficulty getting to shore. However it was found that he was actually at his home in the city of Salinas.

Thorsted also pleaded guilty in October to making two other fake mayday calls to the Coast Guard. In all, the court found that Thorsted has made 51 false distress messages over six months and costing the Coast Guard $102,000 in search and related costs.

This is not the first time that Thorsted has been convicted of transmitting a false distress message. In April 2004 he was sentenced to two years in federal prison and ordered to pay more than $29,000 in restitution to the Coast Guard for a similar series of hoax calls. And in one of the earlier incidents, Thorsted's phony call interrupted a real distress call from a 33-foot boat 4 miles off the coast of Santa Cruz island. More on this story is on-line at tinyurl.com/2f63oq8. (VHF Reflector, SF Chronicle)

WORLDBEAT: NO FIRST PLACE AWARD IN DISPUTED IARU HQ CONTEST

The 2009 IARU contest between the world's national amateur radio society headquarters stations has produced a bitter dispute over the scores. This as an argument rages between the Spanish and German national societies over who actually finished in first place as the ARRL says that nobody will be declared to have taken first place. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

Dave Patton, NN1N, is the Manager, ARRL Membership and Volunteer Programs. In a June 7th statement for the ARRL Awards Committee Regarding headquarters station entries in the 2009 IARU HF World Championship he writes that a most unfortunate dispute has arisen in connection with the outcome of the 2009 IARU HF World Championship. This, between AO8HQ on behalf of Spain's Union de Radioaficionados Espanoles or URE and DA0HQ on behalf of the Deutscher Amateur Radio Club or DARC.

Pattons says that as the administrator of the contest on behalf of the IARU, the ARRL regrets that it has contributed to this development in two ways. He says that far to much emphasis has been allowed to develop on competition between headquarters station entries. He explains that the special category of headquarters stations was intended to raise the visibility of the IARU member-societies among active radio amateurs, and to make the contest more interesting to participants by providing additional multipliers. But says Patton, it was never intended to be a competition for the highest world score. Clearly there can never be a "level playing field" for such competition, nor does it further the objectives of the IARU.

Second, in adjudicating the 2009 contest results a serious error was made in the initial computation of scores. He explains that many contacts were incorrectly identified as "busted calls" that were not. As a result of this error, when the results were first published AO8HQ was shown as having the highest score when in fact the DA0HQ score, after correction of the computation, is slightly higher. Therefore, the ARRL Awards Committee has decided that no certificate will be awarded for the high scoring IARU member society HQ station in 2009. Instead, a certificate will be awarded to each continental leader, and certificates of appreciation for their participation will be awarded to all headquarters stations.

And there are major changes coming to get this event back on track. Effective with the 2010 IARU HF World Championship, no adjudication of HQ station logs will be conducted by the ARRL. A certificate of participation will be awarded to each IARU member society headquarters

station and that will be it. Also effective with the 2010 event, by submitting a log the submitter agrees that the log may be made public, at the discretion of the contest sponsor.

For the Amateur Radio Newsline, I'm Brice Tennant, K6PZW, in Los Angeles.

--

In the committee statement Patton says that the ARRL will not engage in any further correspondence with regard to the 2009 IARU HF World Championship but it does welcomes suggestions for improvements for future events. He also says that it is extremely regrettable that the matter has escalated into a distraction from the other issues facing the words amateur radio organizations today. The ARRL Awards Committee Statement can be seen on line at tinyurl.com/3xfo54h (radio-sport.net, DARC, URE)

**

ENFORCEMENT: FCC SHUTS DOWN UNLICENSED BROADCASTER IN BROOKLYN NY

The FCC has issued a Forfeiture Order in the amount of $4,500 to Mark Nierman and Kakadu Productions, Inc.. This for willfully and repeatedly violating Section 301 of the Communications Act of 1934 by operating an unlicensed radio station on the frequency 99.9 MHz in Brooklyn, New York.

The investigation revolving this matter goes back almost 9 months. In response to several complaints from licensed area broadcasters, on October 12th and 13th of 2009, an agent from the Enforcement Bureau's New York Office used a mobile direction-finding vehicle and determined that the source of broadcast transmissions on 99.9 MHz was a radio station operating from an apartment building located in Brooklyn's Coney Island area. The agent also observed an FM broadcast antenna on top of a water tank on the roof of the apartment building. The agent subsequently took field strength measurements and determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's Rules and therefore required a license.

After taking the measurements the agent went to the office of the building management company. The office's director stated that he was aware of the antenna and that a five-year lease had been executed between Luna Park and Mark Nierman of Kakadu Productions allowing a radio station to operate in the bulkhead room of the structure beginning on May 30, 2009. The lease price was $6,000 a year.

Accompanied by the building superintendent, the agent then returned and conducted an inspection of the FM broadcast antenna on top of the water tank. The agent observed coaxial cable connecting the antenna to radio station equipment located inside the bulkhead room. The agent also observed that the radio station equipment was active and recorded information about the apparatus. The building superintendent then shut down all the equipment at the agent's request.

On October 16th the New York Office issued a Notice of Unlicensed Operation to Kakadu Productions. The notice warned Kakadu that operation of the unlicensed radio station on 99.9 MHz violated Section 301 of the Act and outlined the potential penalties for such a violation, including seizure of the equipment, fines and imprisonment. The notice also directed Kakadu to terminate operation of the unlicensed station immediately and provided Kakadu ten days to reply.

On October 26th Kakadu submitted a reply to the FCC stating that it had ceased operating the unlicensed radio station. Also, that it would comply with FCC directives in any future radio operations.

On January 8th, 2010, the New York Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Nierman and Kakadu for apparently willfully and repeatedly operating an unlicensed radio station. Nierman and Kakadu jointly submitted a response on February 9th. In it Nierman and Kakadu did not dispute the violations identified in the NAL but request cancellation of the proposed forfeiture based on their inability to pay. In support of their claim of financial hardship, Nierman and Kakadu submitted three years of individual and corporate tax returns.

After reviewing the documentation the FCC concluded that a reduction of the forfeiture to $4,500 is warranted. Nierman and Kakadu were given the customary 30 days to pay the fine or to file a further appeal. (FCC)

MOBILE OPS: DISTRACTED DRIVING SHOULD BE TREATED BY PHYSICIANS

Distracted driving should be treated as a medical condition. So says Dr. Amy Ship, a primary care physician at Beth Israel Deaconess Medical Center who suggests it's time for physicians to talk to patients about driving while distracted.

Dr. Ship says that distracted driving is a problem that has risen to the rough equivalence of drunken driving thanks to the proliferation of phones that allow drivers to talk and text. Writing in the June 10 issue of the New England Journal of Medicine, Ship notes physicians routinely ask patients about habits associated with potential harm like the use of helmets, seatbelts, cigarettes, drugs and alcohol. And with data showing 28 percent of all accidents in the United States are caused by drivers talking on cell phones or texting, it's time to step into this issue too.

While the absolute increase in the risk of collision attributable to distracted drivers is hard to assess, Ship says one study showed talking and driving posed a four time greater risk than undistracted driving. A second study suggested texting raised the risk of collision by a factor of 23. You can read the entire article on Dr. Ship's work at tinyurl.com/25bbt55. (Science Daily)

THE SOCIAL SCENE: AMSAT SPACE SYMPOSIUM IN CHICAGO IN OCTOBER

AMSAT has announced that its 2010 Space Symposium and Annual Meeting will be held on Friday, October 8 through Sunday, October 10. This years venue is the Chicago area Elk Grove Holiday Inn which is near O'Hare Airport for the event. This is the same hotel that recently has hosted the Central States VHF Conference and W9DXCC events.

AMSAT has also put out a call for papers to be presented at the Symposium. These can be on any topic of interest to the amateur satellite community. A final copy must be submitted by September 1st for inclusion in the printed proceedings. Abstracts and papers should be sent via e-mail to k9jkm (at) amsat (dot) org. (ANS)

**
THE SOCIAL SCENE: N6R FROM THE REAGAN LIBRARY FOR FIELD DAY 2010
And a reminder that for the tenth consecutive year, the callsign N6R will operate as a Field Day station from the grounds of the Ronald Reagan Presidential Library and Museum in Simi Valley, California. This, to commemorate the lives of President Ronald and Mrs. Nancy Reagan.
Joining the Ventura County Amateur Radio Society which is the primary organizer will be a number of other local groups. These include the Amgen Amateur Radio Club. The Conejo Valley Amateur Radio Club the Simi Settlers Amateur Radio Club, the Ventura County Amateur Radio Club and the Hollywood Hills QRP Contest Club.
N6R will operate from 1800 UTC on June 25th to 1800 UTC on June 27th with up to 16 stations on all of the High Frequency bands. Also listen out for the N6R call on the VHF and UHF bands from 6 meters on-up using many modes including fast-scan ATV and satellite operations.
If you are lucky enough to make contact with N6R this year, please QSL with an Self Addressed Stamped Envelope to Ventura County Amateur Radio Society in care of Peter Heins, N6ZE, 1559 Norwich Ave., Thousand Oaks, CA, 91360 (N6ZE, W6AQ)

NAMES IN THE NEWS: KJ4GQV BALLOONS ACROSS ENGLISH CHANNEL TRACKED BY APRS

A ham has successfully crossed the English Channel using helium filled party balloons. Jonathan Trappe, KJ4GQV, recently strapped himself to 54 balloons and floated across the English Channel.

Tied to an assortment of red, green, yellow, blue and white balloons the thirty-six year old Trappe is from of Raleigh, North Carolina made his trip across the Channel on May 28th. KJ4GQV took off from a field at the Kent Gliding Club, near Ashford in the UK. He landed , and landed at 7:42 UTC in a farmer's vegetable patch a few miles from Dunkirk., France.

To make his flight KJ4GQV was strapped in a specially equipped chair below a bright cluster of balloons. About five hours later, he lowered himself into a French field by cutting some of the balloons away. His equipment list didn't stop at balloons and a chair. It also included an aircraft transponder, aircraft radios, emergency locator beacon, in-flight satellite tracking, and am oxygen system. He also carried APRS gear that provided real time tracking of his KJ4GQV callsign via his website.

Trappe says crossing wasn't a matter of just grabbing a few balloons. Rather KJ4GQV says on his website that he made a trip in March to gain clearance from French and British aviation authorities. He also to gain permits for the trip from customs and immigration offices on both sides.

Jonathan Trappe, KJ4GQV, is no stranger to balloon flights. Two months ago he claimed the record for the longest free-floating balloon flight. This, after spending 14 hours cruising over North Carolina and traveling 109 miles. On another flight, his website says he ascended to 17,930 feet, just below controlled airspace. You can read more on-line at www.clusterballoon.com/ (Various published reports)

RADIO RECORDS: FIRST TWO WAY CONTACT MADE ON 8.97 KHZ

What is believed to be the first Amateur Radio two-way contact on 8.97 kHz using truly radiated fields took place on Friday, June 4, 2010 between DJ2LF and DF6NM. The distance was over a is 20.2 km path.

Both DJ2LF and DF6NM were using small backyard Marconi antennas for transmit and receive. DJ2LF antenna had an estimated effective height of about 5 meters while DF6NM was at about 7 meters. Both had an effective radiated power of about five microwatts using a 100 watt car radio amplifier as a transmitter. A computer and sound car with no preamplifier served each station as a receiver.

Both stations employed a special "micro-QSO" format,. This system is designed to exchange the minimum single-bit report and confirmation in only three turnovers, each containing a single dash. Station identification was by frequency alone. (DF6NM)

**

HAM RADIO IN SPACE: THREE HAMS IN NEXT ISS CREW

A new crew with two licensed U-S hams will soon be on board the International Space Station. Set to go on-orbit are U.S. astronauts Douglas Wheelock, KF5BOC and Shannon Walker, KD5DXB, They will be joined by Russia's Fyodor Yurchikhin, RN3FI, on for a mission lasting about six months.

Wheelock, Walker and Yurchikhin will arrive on Russian Soyuz booster launched on June 15th. They will be onboard the orbiting space station when the final shuttle flight of a United States Space Shuttle departs from its last planned mission to the lab in November before the fleet is finally retired. That flight will use the shuttle Endeavour.

The new three-person crew will join Russian commander Alexander Skvortskov, NASA flight engineer Tracy Caldwell Dyson and Russia's Mikhail Kornienko, who have been on the orbiting laboratory since April and are set to return to Earth shortly. A Russian Progress cargo carrier is also due to arrive at the orbiting lab later this month. (NASA, AMSAT, others)

DX

In DX, the long anticipated Spratley Island DXpedition slated for January of 2011. This according to VK3FY has just returned from The Philippines where he held high level discussions related to the upcoming DX0DX operation. The series of meetings included one with the current Municipal Mayor of Thitu Island where the DXpedition will be mounted. Another was held with the Mayor-Designate who will take office in September. Other discussions were held with military authorities plus officials of the Philippines Amateur Radio Association which is strongly in support of the DXpedition. VK3FY says that those face-to-face discussions enabled the amateur radio and humanitarian aims of the DXpedition to be fully explained and agreed. It also clarified the requirements of both local and federal authorities. The operation will last three weeks and require upward of 30 operators.

Bill Moore, NC1L, ARRL Awards Branch Manager, reports that 2010, E4X operation from Palestine operation will now be accepted for DXCC credit. If you worked this operation, the QSL route is via EA5RM.

JA6CNL, will be active as KH0N from Saipan between June 18th through the 22nd. His operation
will include the All-Asian DX CW Contest on June 19th and 20th. Outside the contest, he will spend some time on the 80, 30, 17 and 12m bands operating only Morse. QSL via his home callsign.

VE3ZIK will be active from Bilice on the Croatian coast between July 1st and September 27th as 9A stroke VE3ZIK. He will try to activate several I-O-T-A Islands in the EU-170 group as well as take part in the RSGB Islands on the Air or I-O-TA Contest. QSL via DO7ZZ.

Lastly, VE3EY will be active as portable FJ from St. Barthelemy Island from November 22nd to the 30th. Operation will be on 160 through 10 meters using CW, SSB and RTTY. QSL via his home callsign.

Four members of Yamakto Amateur Radio Club will be active from Yap Island in Micronesia between June 22nd and the 29th. The team will brings five transmitters and one 500 watt amplifier with plans to operate 160 through 6 meters using CW, SSB and RTTY. They will be on the air 24 hours, operating at least two bands and a 6 meter beacon, but with a maximum five bands

operating as time permits. This is their 19th DXpedition since 1993. Please QSL as directed on the air.

(Above from various DX news sources)

**

RADIO SCIENCE: THE WORLDS BIGGEST RADIO TELESCOPE

And finally this week, word that the world's biggest radio telescope has been established in The Netherlands. Amateur Radio Newslines Bill Pasternak, WA6ITF, takes a look at its very unusual design:

--

Scientists in the Netherlands revealed the largest radio telescope in the world while claiming that it is capable of detecting faint signals from almost as far back as the Big Bang that many believe created the universe.

Called the LOFAR the acronym stands for LOw Frequency Array, its owner is the Netherlands Radioastronomy Institute which says that its construction is unique. Iinstead of a traditional large dish the new radio telescope is made up of 25,000 small antennas measuring between 50 centimeters and two meters across.

The main unit is based near the northeastern Dutch town of Assen, but the antennas are spread out across the rest of the Netherlands and also in Germany, Sweden, France and Britain. When you combine all the antennas you get a giant telescope with a diameter of about 1,000 kilometres or about 600 miles.

A unique design for the modern times we live in.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The data gathered by the telescope will be processed by a supercomputer at the University of Groningen and then transmitted to the Netherlands Radio Astronomy Institute. (W0WOI via VHF Reflector)

And if you do a Google search for Roger Wiseman, the returns are just as
numerous....if not more.
It is quite obvious that Roger is not well liked, even reviled.

I can see it now. Roger is looking over the "buffet" and deciding which one
to eat first and in walks Mark.
Mark sees the "buffet", dons a bib, and shoves Roger aside as he sniffs each
tube steak like the Connoisseur of fine "meats" that Mark is.
Roger tells Mark to, "Move over, I was here first."

And the cat fight is on.......or would that be a "cock fight"?

1953. Roger likes his grilled, Mark likes his raw.

Last we heard, Woger is busy hiding from the Heils.
Seems that they paid Woger a visit...a rather unwelcome visit at that.
They knocked at Woger's door but of course Woger didn't answer.

What irked Woger is that the Heil's documented their visit with photos.

Woger talks tough, but was too cowardly to go out on his front porch to talk
to Mrs. Heil.

What a short-lived Presidency that was...
It took the CCRAA what? A few months to figure out what a goon Mark is?
Then they booted him AND Gav from their club.

Jesus funk!!!

I've been looking for the microscope for so long
cause I need to find that slackster Ivan Stang.
But no one offered it as a donation.
And, all of a sudden, come you!

Can you donate a microscope to the poor guy like me?

Jeez, if no one less than Fred Hall says it,
get yerr arse greasy. It is coming.
He is not like that pentyhose Ivan Stang!
```

Funken insult!
Well, what do you expect from these kinds of animals
but total disrespect?

I know, I know.
That is why I said it.

Willya teach these slucker sucksters zome family values
fer a moderate fee?

Which sex offences are registered, then?

Is it still an offense to commit an unregistered one?

Perspiring minds want to know!

Hey, Ray, the "Honeywell engineer", why is it all you have is a
training wheel tech license?
KB3HWB
Ray L Chason, Jr, 5472 Cedar Ln Apt B4, Columbia, MD, 21044

2000. Where's N0VFP?????

> Last we heard, <PKB>

Last we heard, Lloyd Austin Davies, N0VFP was too busy hiding from Oris!

I happened to be traveling through Huntsville, Alabama early this morning, I deceided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim
